Wheat has been more excited, more active, and the fluctuations in prices have been wider in the past week than in any previous week for six months. The net result, however, of all the fluctuations was an average decline of only from 1½c. to 2c. per bushel in the week up to Thursday. A variety of causes were in operation during the early part of the past week and the latter part of the previous one to cause an advance in prices, viz.: First, the reports which had prevailed for ten days in regard to the damage to the winter wheat by violent changes of the weather; this was more forcibly impressed by a drop of from 40 to 45 degrees in the temperature in Illinois, Iowa and Wisconsin on the 16th and 17th. The floods in the Ohio valley and elsewhere, it was also assumed, would do some damage to winter wheat on lowlands. The change to severe cold weather at the west and northwest was also unfavorable to the receipts of grain at western points. These were the prevailing influences up to Saturday, the 17th, wheat having advanced an average of 1½c. per bushel from the previous day, and making the highest prices both in Chicago and New York on that day. But on Monday there was an improvement in the weather throughout the west and advices of a similar favorable change in Europe. At the west also, and especially at Chicago, the effects of the important iron failures and one of an old established grocery house of that city, together with apprehensions of losses that might be caused to the banks by the failures, began to have a depressing effect on all speculation. The result of these influences was that the closing prices of wheat in Chicago on Wednesday, 21st, showed an average decline of over 3c. per bushel from those of Saturday, the 17th. The arrivals of wheat, also, at the principal western points have increased again, the total at St. Louis, Peoria, Chicago, Milwaukee, Detroit, Toledo and Indianapolis for the week to February 20, being 907,998 bushels, against 375,541 bushels in the week to February 9, and 921,272 in the week to February 2. The decline in prices at the west, resulting from those recently developed aspects of the situation, has undoubtedly been increased by the fact that a great deal of wheat was held by speculators in the country tributary to Chicago on small margins, and that these were easily frightened out by rumors of bank troubles in Chicago. The banks themselves, also, may have obliged a good many speculators to sell out. It is therefore presumable that the causes of the decline at the west are, to a great extent, only temporary. The general situation as between this country as a source of supply and Europe as a consumer has not materially changed. It seems quite certain that Europe will still require all the surplus wheat we shall have to spare.

The following were the closing prices of March wheat in Chicago on the dates named, viz: February 15, 109¾; 16, 110¼; 17, 111⅜; 19, 109⅞; 20, 110¼; 21, 108⅛.

In New York. February 15, 125⅝; 16, 124¾; 17, 126¼; 19, 124¾; 20, 124¾; 21, 123¼.

On Friday the markets for wheat were a fraction lower in both New York and Chicago.

The weekly statement of the visible supply of wheat in the United States on the 17th, showed a decrease of 213,986 bushels, as compared with February 10.

CORN.

The general course of the corn market for the past week has been governed largely by the same causes that have influenced the wheat market, except that there has been no effect from the weather on the prospects of another crop, and that there has been more influence on prices from speculation in corn than on the prices of wheat. Last week the foreign markets were firm, and showed an advancing tendency for corn. The demand at the west also for low grades of corn for actual consumption in the eastern and seaboard markets was large, and this, together with the small amount of No. 2 corn at Chicago, induced a speculative advance, sympathizing also with the advance in wheat. May corn advanced 5c. per bushel in Chicago from Monday the 11th to Saturday the 17th, then from the same causes that affected the wheat market, it declined on Monday, and on Thursday closed 3c. lower than on the previous Saturday. The movement of corn at the west has been less disturbed by the heavy snows and cold weather than the movement of wheat, mainly because it comes from a territory further south than the wheat. The total arrivals at St. Louis, Peoria, Chicago, Milwaukee, Detroit, Toledo and Indianapolis, in the week to February 20, were 2,000,684 bushels, against 1,258,421 bushels in the week to February 9, and 3,045,314 bushels in the week to February 2.

It was mentioned some weeks ago that there was a growing belief that the corn crop of 1882 had been overestimated. This belief continues, both as regards the yield and the quality of the crop. The corn that comes into the western markets now grades very low. The belief in a diminishing supply is also reflected in the fact that at Chicago May corn is 5c. per bushel higher than March.

Oats have been advancing in sympathy with corn. The advance last week up to Saturday the 17th, was 2c. per bushel, which has been nearly maintained this week.

On Friday the markets for both corn and oats were a fraction higher both in New York and Chicago.

The statement of the visible supply in the United States on the 17th as compared with the 10th, showed an increase of 563,437 bushels of corn and 59,328 of oats.

PROVISIONS.

The provision market, while it has not fluctuated so widely as the grain market, has shown a firmer undertone and more strength in the last few days. Prices of pork, lard and meats all advanced last week, and, like grain, attained their prices on Saturday. On Monday they were, to some extent, also affected by the semi-panicky feeling that pervaded all the speculative markets on that day. But in the next three days to Thursday the decline was nearly all recovered. The receipts of hogs at the principal western points last week were larger than was generally expected; but, as an offset to this, there has been for the last two weeks an increasing demand from the south and southwest for meats and pork for immediate consumption. The packing season began with a much lighter stock of all varieties of hog product on hand everywhere than at the corresponding time last year, and this has not been allowed to increase much. There is reason for believing that the receipts of hogs will be large during the remainder of the packing season, but with the present active consumptive demand there is also reason to believe that the stock of hog products at the end of this packing season will be less than at the corresponding time last year.

On Friday the provision market was stronger, both in New York and Chicago, with a slight advance in prices all around.

The receipts of hogs at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee, in the week to February 22, were 136,187, against 211,421 in the preceding week and 111,390 in the same week last year.

THE PROVISION MARKETS BY TELEGRAPH.

From Cincinnati, Ohio: Provisions are maintaining a healthy tone.

From Chicago, Ill.: Hogs receipts for the week estimated at 105,000; same time last year, 70,000. Packing for season estimated at 105,000 over last year; weights about same. Estimated stock of pork, 280,000; of lard, 85,000. Tierces active; speculative demand higher. Meats wanted for the south and for Europe, making the market active and higher.

From St. Louis, Mo.: Provisions active, strong and advancing. Cattle have been advancing all week, but are turning downward now. Hog values also high, but irregular. Both markets active and feverish on moderate receipts.

From New Orleans, La.: The stock of provisions is limited, and held ⅛ to ¼ point higher.

From Nashville, Tenn.: Provisions in good demand with an upward tendency. Cattle receipts very light; demand very good; prices higher.

From Memphis, Tenn.: Meat receipts have been heavy, yet prices are ¼c. to ½c. higher than two weeks ago.

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	Feb. 23.		*Feb. 16*

THE NEW YORK DRY GOODS MARKET.

The New York dry goods market during the past week had a firmer tone, and a more confident feeling prevailed. Trade, however, is still dull, and in quantity of sales there is no marked improvement over the previous week. The weather has been good, and if it continues so it is expected that buyers will purchase more freely. Next week is looked forward to with some hopes of improving business, though it is generally thought that it will be the 1st of March before business is as it really ought to be.

The amount of imported dry goods marketed during the past week is less by $1,200,000 than the week previous. Following is a summary of the importations and marketings:

	No. of packages.	*Value.*
Total amount of dry goods imported during past week	13,364	$2,149,123
Total amount of dry goods, duty paid, for past week	21,653	2,311,083

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, February 23.—The Manchester market is depressed. Home yarns are lower; small lots are sold for the East. Prices are unaltered.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The dry goods trade is slow.

From Boston, Mass.: The feeling in the dry goods market is very satisfactory. Trade has been good during the week; the outlook for the future is favorable; prices are firm, with every indication that they will continue so. Although January was considered a quiet month, yet the trade with many was larger than in January, 1882, and thus far in February the increase over the same period a year ago is decided.

From Providence, R. I.: The print cloth market remains the same as last week, without much life, and held nominally at $3^{13}/_{16}$c. for 64x64, and at 3¼c. for 56x60. The cotton market is firm at 10¾@11c., but not active.

From Philadelphia, Pa.: There has been a fair movement in staple cotton goods and an improved demand for men's woolenwear, but no general activity in the market. The week closes with a better feeling apparent in all branches of the trade. Values are very steady, except on a few low grades of colored cotton goods, which favor buyers. Woolens are hardening in exceptional cases in sympathy with wool.

From Pittsburgh, Pa.: Dry goods continue to move slowly and there are but few buyers in the market. Collections fairly satisfactory.

From Cleveland, Ohio: The dry goods trade is fairly active without special changes to note, the season in this line here comparing favorably with former ones.

From Columbus, Ohio: Trade in dry goods slow during the past week.

From Indianapolis, Ind.: The dry goods trade is fair, and in volume, it is thought, will equal same month last year notwithstanding the bad weather, but collections are somewhat slow.

From Chicago, Ill.: Dry goods more active; mainly in small orders.

From Peoria, Ill.: The floods of the past few days have greatly retarded trade in dry goods.

From St. Louis, Mo.: Dry goods are in better demand, but actual sales are little heavier than last week. Values are steady and fairly firm.

From Detroit, Mich.: In dry goods the volume of business has remained fair, there being some little improvement over last week. Spring trade is not fairly opened here yet.

From Burlington, Iowa: The dry goods trade is quiet, but looking up favorably. Collections are fair.

From St. Paul, Minn.: Dry goods slightly improved. Sales mostly on orders. Some personal buyers in, taking spring goods and patching old assortment. Prices steady.

From San Francisco, Cal.: The season for dry goods will not open for a week, when Oregon merchants are expected.

From Baltimore, Md.: The dry goods trade the past week was fairly active, and jobbers think that a good spring business will be done, but the impression is that the sales will be less than last year. Orders from the south are not arriving as fast as they might, and comparatively few buyers are in the city, yet no complaints are heard. Retail dealers are not doing much, and now await a favorable change in the weather before business becomes brisk with them.

From Richmond, Va.: There has been a very decided improvement in the dry goods trade, but prices remain low.

From Norfolk, Va.: Dry goods dealers are being actively employed with orders from traveling men and personal buyers.

From Savannah, Ga.: Dry goods are receiving more demands, and the market is steady and firm for sheetings and shirtings.

From Waco, Tex.: Owing to the continuous heavy rains for the past month trade in wholesale dry goods is quoted slack.

From Memphis, Tenn.: The dry goods business during the past week has increased somewhat and collections continue satisfactory.

From Nashville, Tenn.: Trade in dry goods is fair and shows signs of improvement.

COTTON.

The New York cotton market has been lower for spot middling uplands, the price having declined to 10 3-16c. The sales for the week have been for consumption 340 bales, and for speculation 100 bales, making a total of 440. Included in the above are 100 bales to arrive.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7½c.	7 9-16c.	8 15-16c.
Strict ordinary	7 15-16	8	9½
Good ordinary	8¾	8 13-16	10 5-16
Low middling	9 11-16	9¾	11 3-16
Middling	10 3 16	10¼	11⅝
Good middling	10½	10 9-16	12
Middling fair	11¼	11 5-16	12⅜
Fair	12	12 1-16	13½

The market for spot cotton closed dull.

The future market at New York has been lower, the price having declined an average of 7 points for near months, and 8 points for later months. The sales for the week foot up 376,000 bales, against 729,800 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
February	10.19c.	10.22c.	11.53c.
March	10.21	10.31	11.55
April	10.34	10.41	11.74
May	10.48	10.58	11.90
June	10.63	10.73	12.10
July	10.77	10.86	12.26
August	10.88	10.96	12.49
September	10.60	10.07	11.96

The future market at New York closed steady.

The total receipts of cotton at the ports since September 1, are 4,764,204 bales, which is an increase of 703,387 bales over the receipts of last year for the same time. The total at each port since September 1, is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	653,541	366,386
New Orleans	1,300,584	1,048,865
Mobile	284,446	228,319
Savannah	699,517	653,313
Charleston	495,656	489,351
Wilmington	114,222	122,741
Norfolk	939,248	812,892
Baltimore	44,200	23,638
New York	125,459	139,045
Boston	126,499	160,641
Philadelphia	50,187	39,536
Other ports	223,469	218,841

The receipts at the ports for the week were 129,509 bales, against 146,145 last week and 59,415 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 44,742 bales, against 43,253 bales last week and 17,495 bales for the corresponding week last year. The shipments for the week were 45,145 bales, against 58,522 bales last week and 27,592 bales for the corresponding week last year. The stocks for the week were 291,286 bales, against 299,328 last week and 332,503 for the same week last year.

The Liverpool spot market closed easier, with prices unchanged for middling uplands and a decline to 5¾d. for middling Orleans.

The sales for the week at Liverpool were 44,500 bales (of which 29,500 were American), against 56,000 bales (of which 42,000 were American) last year. The stock in port is 960,000 bales (of which 696,000 are American), against 742,000 bales (of which 526,000 were American) last year. The total imports for the week were 143,000 bales (of which 112,000 were American), against 102,000 bales (of which 76,000 were American) last year, and the amount afloat 286,000 bales (of which 208,000 are American), against 381,000 bales (of which 209,000 were American) last year.

The Liverpool future market has been dull and easier. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery:

	To-day.	*Last week.*	*Last year.*
March—April	5 32-64d.	5 44-64d.	6 28-64d.
April—May	5 43-64	5 47-64	6 32-64
May—June	5 45-64	5 52-64	6 38-64
June—July	5 48-64	5 53-64	6 42-64
July—August	5 53-64	5 57-64	6 44-64
August—September	5 57-64	5 61-64	....

The Manchester market closed dull and lower.

COTTON REPORTS BY TELEGRAPH.

From Columbus, Miss.: Since last report the weather has been cold, with one day's rain. Work on plantations now making some progress. Cotton receipts good for the season.

From New Orleans, La.: The week's cotton movement has been fair at a decline of ¼c. on Low Ordinary and Ordinary, ⅛c. on Good Ordinary and Low Middling, $1/_{16}$c. on Middling, and four to ten points on futures.

WOOL.

There has been a good demand for wool in all markets during the past week, and the volume of business has been large, although hardly equal to that of the two preceding weeks. Some abatement of activity was natural and expected in view of the reduced stocks and advancing tendency of values. The improvement in prices has been well sustained, but there has been no further change of importance within the week. The feature of interest at the moment is the course of the market for colonial wools now on sale at the London auctions. The sale opened on Tuesday with a large attendance of buyers and spirited bidding on the basis of quotations established in December. At these rates good average Port Philip wools could be laid down in New York at a price equal to 92@95c. to the scoured pound, and could be sold readily in competition with Ohio, West Virginia and similar fine fleeces, now quoted at 45@46c. in washed condition in the eastern markets. American buyers are now represented in person and by agents at London, and if prices are not materially advanced it is probable that a good many purchases will be made both by manufacturers and dealers. It is expected, however, that the competition from this side and the increased consumption in England, where the products of these wools are growing in favor and rapidly displacing the cheviots and worsted fabrics heretofore more saleable in the goods market, will combine to advance values and check importations unless there should be a further improvement in prices in domestic markets. Additional orders have gone abroad within the week for English combing wools, as home supplies of these are now almost exhausted. Interior stocks of all kinds are small and sellers very indifferent. Indications point to a firm and fairly active market for some time to come.

IRON.

The iron market presents much the same features this week that it did last. Business generally is slack. The market is dull and quiet, and the situation is best explained by reference to the fact that Congress is soon to adjourn. Consumers and manufacturers of iron are waiting until the members shall get away from Washington, in the hope that a certainty respecting the tariff, whether it means higher, lower, or the same rates as now exist, will infuse animation into would-be buyers. American pig iron is quiet. Sales have been for immediate necessities only. Known brands have brought full prices, and qualities of lesser note have been disposed of at concessions. The aggregate sales have been small. Stocks at mills are small, and no attempt is made to increase them beyond present wants. Furnaces consequently keep close to orders. Scotch pig enjoys about the same degree of increased animation noticed last week, but there are no signs of an improvement beyond the existing advance. Holders are firmer in their views, owing to the higher freight rates from the other side to this port. The arrivals during the week will aggregate about 1,400 tons, some of which will be stored. Sales amount to between 600 and 800 tons, of various brands, at rates previously specified. American bar iron is quiet at 2.2@2.3c., with very little demand. Plate has sustained some better inquiry, and is quoted at 2.5@2.6c., with concessions for large orders. Structural shapes are dull. Steel rails are held at $39@$40. The Wall Street Iron & Metal Exchange bulletin reports that large buyers expect concessions on these figures, which points to lower rates than have been heretofore named. The present attitude of the iron market, as a whole, is one of waiting and expectancy. No gain is looked for until Congress acts on the tariff—or, failing to, adjourns.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, February 23.—Coal and iron are depressed. Amount of speculation is trifling. Cleveland pig iron is three-pence lower. Scotch iron, two-pence lower. Stocks have increased.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Business has been very dull during the past week and a number of sales have been made at further concessions. The general market is weak and buyers are cautious, but manufacturers, as a rule, are not pushing trade. Nearly all mills are running short of orders, except the Bessemer rail mills. Confidence is still expressed, however, in the prospect for a good trade as soon as the tariff question is definitely settled.

From Pittsburgh, Pa.: The depression in the iron trade continues without any marked change for better or worse since last week.

From Cincinnati, Ohio: Iron manufacturers and dealers have not yet sufficiently recovered from the effects of the flood to enable us to give any statement of the condition of their trade.

From Cleveland, Ohio: The announcement of the recent suspensions in the west created some uneasiness and temporary disturbances in iron circles of this vicinity, but the feeling has already been overcome, and the conditions governing the business are about as they have existed throughout the winter. The tariff question continues a source of hindrance and uncertainty. This once settled, it is believed a better demand would be felt at once, though conservative and well-informed trade authorities say the season will be only a moderate one now under any circumstances. Prices continue low yet firm, and purchasers are buying only from hand to mouth, with an increasing effort on the part of manufacturers to reduce the cost of production wherever possible.

From Chicago, Ill.: Hardware more active. Pig iron quiet; bar and plate slow; structural iron more active. Nails in fair demand and weaker.

From Detroit, Mich.: In iron the market is still unsettled; prices are unchanged, and it is claimed that bar iron cannot be manufactured for the price it is selling at now.

From St. Louis, Mo.: The iron trade is quiet; prices are a little weak, but no declines have been listed. The extensive Vulcan Works have started up again with new men, without employing strikers and without trouble.

From St. Paul, Minn.: Heavy iron slow, waiting developments in the east. Nails steady; supply light.

From Baltimore, Md.: In the iron market consumers are not buying very largely, but a better feeling appears to exist and more activity is now looked for.

COAL.

There appears to be an effort on the part of some operators and dealers to report that the coal market is "looking up," and that more business has been done during the past week. It will be useless, however, to expect any permanent revival in this line of business until the opening rates for the season have been reached and announced. While there is any opportunity open for a further reduction in rates or cuts on nominal prices retail dealers will not stock up, not to mention those who are waiting to make contracts for industrial uses. The decision on the disturbing element in prices is looked for about April 1st, when it is expected that the condition of the market will respond at once. Bituminous coal is not active, but is exciting some attention from the fact that contracts for the year's supply will be signed by most large consumers within the next thirty days. The question of tolls from the mines to tide-water having been decided, as announced last week, prices for season's deliveries are rendered possible. The production of Pennsylvania anthracite for the week ending February 10 was 666,348 tons, against 370,511 tons in the week ending February 3, and 469,773 tons in the second week of February, 1882. The total production to February 10 from January 1 was 2,827,298 tons, against 2,501,566 tons in the corresponding weeks in 1882, a gain during the present year of 357,732 tons.

PETROLEUM.

The speculative markets in certificates of crude petroleum have not exhibited any features of moment during the week. There have been the customary declines of a cent or two and of fractional amounts and the subsequent reactions to higher ranges of value have been equally insignificant. The week will also show lighter aggregate transactions owing to the cessation of business on Thursday, a legal holiday. The extreme variation in prices from last week Friday evening to Thursday evening's figures was 1¼c., the quotations on those days, at the close, being respectively $1.01⅝ and $1.00⅜ bid. The general tone of the market up to the 21st inclusive was quiet, with mild spurts in either direction, up and down the financial gamut. The opening price on Saturday was $1.01⅝ bid, the highest for the day; the lowest was $1.00¾ and the closing $1.01½ bid. Sales were made on Monday at the opening at 99⅞c., a loss of 1⅛c. since the close on Saturday. The highest price paid during the day was $1.00⅞ and the lowest was 99¾c. At the close $1.00¾ was bid. Tuesday's transactions started off with $1.00½ offered. During the day $1.00⅝ was touched, and the other extreme was reached in $1.00⅜. Wednesday witnessed more dullness and relaxation in speculative petroleum circles. The opening sales were made at $1.00¾, the highest price paid was $1.01, and the lowest $1.00¼. At the close $1.00⅜ was bid and $1.00½ asked.

The closing hours of Wednesday's session were enlivened by the statement that a new Grandin well, about 500 feet from the old well by that name, would be brought in on Friday.

The market on Friday opened dull and uninteresting at $1.00½. The morning session revealed no gain, and the closing quotation at noon was at the same figure. No news had been received as to the predicted opening of the new Grandin well No. 5. At the close for the day the price was 98⅞c. bid, against $1.01⅝@$1.01¾ on Friday morning of last week, a decrease of 2¾c. in the week.

The market for refined oil continued quiet and even dull on Saturday, Monday, and a greater part of Tuesday. Late in the last-named day quotations for refined oil were advanced ⅛c. all around. The market was firm at the advance. Crude in barrels was weak during the earlier part of the week, but stiffened up considerably in sympathy with the advance in refined. Crude oil is quiet, and naphtha has been dull most of the week.

The closing prices of certificates of crude petroleum and of petroleum products last evening, as compared with those of Friday, February 16, were as follows:

	February 16.	*February 23.*
Certificates of crude	$1.01⅝@101¾	98⅞c. bid
Refined petroleum, 110°	7¾	7⅞
Refined petroleum, 70°	7⅞	8
Crude, in barrels	7@ 7½	6¾@ 7¾
Case oil, plain brands	10¼	10¼
Naphtha	6¾	6¾

The total quantity of petroleum (crude equiv-

alent) exported from the United States from January 1 to February 7 was 62,565,808 gallons, against 57,613,364 gallons in a like period of 1882, an increased exportation in favor of 1883 of 4,982,444 gallons, against an increase of 5,697,415 gallons reported up to February 9. For the week ending February 17 the shipments were 8,917,620 gallons, against 5,762,617 gallons in the preceding week. New York city's exports of petroleum from January 1 to February 17 amounted to 54,191,334 gallons (leaving but 8,404,474 gallons for all other ports), against 44,668,524 gallons in a like period in 1882.

OCEAN FREIGHTS.

The past week has continued the market which was announced last week to be in shippers' favor. Tonnage for chartering is in fair supply, and rates for petroleum and grain vessels 5@9d. lower for cargoes for the continent than have ruled previously for some months. It appears, in fact, as if the long squeeze in foreign ocean freights had collapsed. The market has been quite dull in consequence of light offerings. The same is true at the out ports. Berth freights have likewise been quiet, though latterly inclined to show some activity.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Quotations remain the same. General trade dull. Groceries somewhat improved. Spring business backward. Collections hard. Manufacturers cautious.

From Boston, Mass.: Though the furniture trade is not heavy as yet, prices are firm, and in a fortnight a good business is expected. As it is, the volume of trade since January 1 is larger than during the corresponding time last year. There is no material change in boots and shoes; shipments for the week to places outside of New England 58,453 cases, against 59,740 cases the eighth week of 1882. Total shipments since January 1, 395,254 cases, against 355,703 cases same time last year.

MIDDLE STATES.

From Philadelphia, Pa.: Trade has been only moderately active, a legal holiday and the city elections having occurred within the week. The general feeling in trade circles is better at the close, owing to the prospect of a settlement of the tariff question and an early resumption of business with the flooded districts along the Ohio valley. Concerning the tariff matter merchants express a feeling of relief rather than of satisfaction. The discussion has been so long a stumbling-block in the way of trade that the passage of even an imperfect measure is regarded as preferable to continued uncertainty and suspense. The industrial situation is quiet. There is a good deal of idle machinery among the the textile mills, and the iron works are not rushed with orders. The general outlook, however, is improving. Manufacturers are buying wool freely, but handle cotton only for imperative requirements. Wool is buoyant. Cotton barely steady. Breadstuffs have been less active, and wheat, corn and oats have declined, but flour has held firm. The break in grain prices has caused shippers to reduce bids and move more cautiously, but prospects are still favorable for a good export trade. Petroleum is quiet, but shippers are making more inquiry at the close. There is a fair trade in fruits and vegetables, and supplies are well in hand. Provisions are active and firm in jobbing lines. Sugars are strong and active.

WESTERN STATES.

From Cincinnati, Ohio: Accumulated orders have, as the river recedes and transportation facilities improve, made a stir in general business; however no effort has yet been made to sell goods by merchants. Reports of failures in outside cities east and west have had a slightly depressing effect. Flour has declined, and weakness is manifest in all cereals. Whisky maintains a healthy tone. The same may be said of groceries, cotton and tobacco. Money a little firmer, with more stringent feeling prevailing; borrowing demand, however, readily met at slight increase of rates, and maturing paper, as a rule, paid promptly. Collections are fair, and there is evidence that in sixty days the effects of the flood will be over.

From Cleveland, Ohio: The weather throughout the week has been favorable, yet the jobbing trade in general has not been brisk. Groceries, boots and shoes, and light hardware continue fairly active, but for seasonable goods the demand is comparatively light and the season late. There is a very fair demand for lumber, and, as noted in previous dispatches, the season for building operations promises to be a fair one. As yet but little has been done in way of season contracts for lake freights, and it is thought that the lake navigation season will be comparatively short, in view of anticipated low rates to rule.

From Columbus, Ohio: Business generally is sluggish, owing somewhat to bad roads. Collections still remain poor.

From Evansville, Ind.: The flood reached its highest on the 19th, exceeding all former rises known. Is receding very slowly. Over 100,000 bushels of corn have been destroyed in this vicinity with great loss of stock and farming implements. Wheat is firm at $1.10. The fall sowing is looking well considering the weather, which is now very propitious. Trade is rallying somewhat, though slowly, as the towns along the river are yet doing no business.

From Indianapolis, Ind.: There is some improvement to note in general trade, but it still lacks activity, and the volume of collections are not as good as might be, country merchants availing themselves of the excuse afforded by floods and bad roads.

From Chicago, Ill.: Collections improving. Shipments of money to country are liberal. Groceries active. Sugars scarce and firm. Drugs and chemicals better demand. Wool firm; medium and fine all sold; other stock scarce. Fair orders have been received for boots and shoes. Leather, more demand by manufacturers. Wheat lower; influenced by better crop reports the eastern and European markets are lower; less demand to fill orders. Corn unsettled and lower; receipts largely exceed same week last year; there is very little speculative demand; shipments confined to low grades. Oats steady; stocks larger.

From Peoria, Ill.: The floods of the past few days have greatly retarded trade, and made collections unusually slow.

From Detroit, Mich.: General lines of business are only fairly active. Collections slow, particularly from northern part of the state, where roads are still almost impassable.

From St. Louis, Mo.: Freezing and thawing for several days has injured wheat considerably in this region. The jobbing trade has been rather slack, although the inquiries show that the spring trade will open here earlier than usual. Cotton exceedingly dull and weak; receipts continue heavy. Mules in quite moderate offering and very urgent request. Supply of horses large and increasing, but not equal to demand; values of both high and upward. Grain lower all around than earlier in the week, and market about demoralized.

From Burlington, Iowa: Business is very fair for the season. Jobbers report a fair demand, though orders run small as yet. A general break-up of the roads has curtailed traffic somewhat during the week.

From St. Paul, Minn.: There has been a little better demand for boots and shoes and hats. Clothing quiet. Groceries and hardware moderately active; sales increasing. Milder weather stimulating trade. Country customers disposed to purchase ahead of actual wants, anticipating muddy roads from melting snows. Considerable currency within the week forwarded to wheat regions.

CALIFORNIA.

From San Francisco, Cal.: Thursday's holiday interfered with business; trade confined to immediate necessities. Australian and China advices favorable. Wheat strong and higher. Freight rates weaker.

SOUTHERN STATES.

From Baltimore, Md.: General trade has improved a little the past week, and in some branches, particularly hats and caps, boots and shoes and millinery, the volume of business is said to have been very fair. There has been a better feeling among jobbers of coffee and no disposition is now shown to push business; the market is quoted firm on the basis of 8⅝@8¾c. for fair. The flour market is quiet, but holders remain firm in their views and there is no indication of any yielding in prices. Transactions in grain were only moderate. The cotton market is quiet and the inquiry very limited. Orders for provisions are mostly for home wants with some export trade in lard, and the market is quoted firm. The receipts and stock offerings of wool are light and prices hold firm. Groceries are fairly active and a moderately good demand prevails for fruits. Lemons are reported 25c. lower. The salt market is liberally stocked, but the late weather has been unfavorable for deliveries. Business in tobacco is inactive, and receipts continue small and confined to Maryland grades.

From Norfolk, Va.: Since last report trade has generally improved. Grocery, boots and shoes, fancy goods, hardware and notion dealers are being actively employed with orders from travelers and personal buyers. As the spring advances trade will continue to improve. Prospects for a fair business are good. Cotton continues to come in freely for this season. Collections fairly good. Health of city excellent.

From Richmond, Va.: General business much improved.

From Savannah, Ga.: Business continues encouraging, and trade in naval stores has been more brisk, particularly in rosins. There has been a steady demand for grain. Hides are stiffening in prices, in consequence of the light receipts.

From Columbus, Miss.: General trade very fair, with a promise of a good trade for the future.

From New Orleans, La.: Sugar dropped ⅛c. to ¼c. Molasses was dull and little changed, with sound qualities very scarce. Rice quiet and unchanged. Flour scarce, firm and higher. In sympathy with New York, coffee declined ½c. Stock of corn and oats light and 2c. higher. Cottonseed oil up 1c. for crude and 2c. for refined. Notwithstanding press comments to the contrary great apprehension prevails here with regard to the Mississippi river, and checks expected to the movement in groceries, hardware, etc.

From Galveston, Tex.: Weather continues wet and disagreeable. General jobbing trade only fair.

From Waco, Tex.: Owing to the continuous heavy rains for the past month trade in all lines is quoted slack. Wagon roads are said to be very muddy, and in a great many cases impassable, in consequence of which unmarketed cotton moves slowly. Collections are generally reported tardy, but merchants are, as a rule, in good spirits and very active in preparing for the spring and summer trade, which they anticipate will be large.

From Nashville, Tenn.: Flour steady; demand good. Wheat quiet and firm. Country products steady and in good demand. Banks report but little demand for money.

From Memphis, Tenn.: Trade during the past week has been pretty fair, although the bad weather continued. The stock of corn is small, and the demand is good, with prices strengthening. Meal is unsteady, with receipts small. Flour is firm in prices, with supply ample. Stock of potatoes moderate.

LATE MAILS.

Chicago, February 21—Chicago has had its usual weekly sensation in the way of failures, and this time it occurred in a quarter where they were least expected—this was especially the case with Ayer's Sons. Of course the failure of an ordinary firm in the iron trade would not have caused surprise, for it is well known that the business during the past nine months has been the reverse of prosperous. But it was not supposed that it had been sufficiently bad to swamp the house that went down on the 17th, as it has heretofore stood at the top in point of credit; and if the heads of leading iron firms are to be credited, the failure was as much or more of a surprise to makers and dealers in iron than any other class. It is now stated that, in addition to the losses by depression in trade, the personal expenses of the head of the house were very heavy, being estimated by some at $50,000 per annum, while none place them below $25,000. As the standing of the house was high and its liabilities large, the collapse has seriously affected the iron trade. Manufacturers of iron goods and those who require it for structural purposes buy in small lots as their pressing wants demand, and distrust exists everywhere among the trade. A week since mine owners in the "Menominee Range" reported free buyers of 65 to 67 per Bessemer iron ores at $4 per ton. Since the Ayer failure there is no demand, and the leading mines are reducing their mining forces. Railroad officials say they will not require many rails, and the outlook for the rail mills is by no means flattering, and not likely to change for the better until there is an assurance of good crops. The dry goods trade has materially improved during the week, orders from nearly all sections being more numerous, and a better feeling is observed among the jobbing trade; yet the sales as a rule are in small lots, very few full stocks being called for, and it will require at least two weeks of good weather to bring an active spring trade. The boot, shoe, hardware, and grocery houses report a slight increase in the demand for goods, but purchases are made on a basis of current wants, and there is an uneasy feeling observable in about all branches of business. Money meets a good demand from operators in grain and provisions, who find stocks of such articles steadily accumulating, while merchants, who a week since were free borrowers, are being better supplied by remittances from country customers; hence they are asking less assistance from their bankers. The flow of money to the country during the last few days has been heavy, and Chicago bankers have drawn largely on their eastern reserves to replace funds sent to the interior. The receipts of grain are liberal, considering that there is scarcely a railroad leading out of Chicago that is not suffering from the effects of high water and adverse weather of some kind. Wheat is scarcely called for by shippers, but the volume of speculative trading is large, and prices exceedingly unsettled. The market to-day being weak and feverish all articles suffered a severe decline, but closed rather firmer. The feeling, however, is feverish, and it is thought by close observers that a few days of fine weather would greatly depress prices, as wheat is mainly held up by fears regarding the condition of the fall-sown, and corn and oats show that they have little strength of their own.

GRAIN IN CHICAGO ON DATES NAMED.

Articles.	*Feb.* 17, '83.	*Feb.* 18, '82.	*Feb.* 19, '81.
Wheat, bushels	5,602,000	3,756,000	7,855,000
Corn "	4,075,000	5,787,000	4,576,000
Oats "	1,577,000	834,000	1,542,000
Rye "	554,000	456,000	204,000
Barley "	191,000	319,000	369,000

There is also afloat in vessels in Chicago harbor, 313,000 bushels wheat, and 173,000 bushels corn, making a total of 5,915,000 bushels wheat, and 4,248,000 bushels corn here, afloat and in store.

The provision market is materially strengthened by the small receipts of hogs, and there is an active speculative call for pork, lard and meats; the latter are also in large demand for shipment south and southeast, the sales for that purpose to-day being over 700,000 pounds. There is also an increased export demand, but orders are mainly below the figures of sellers.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.	*Exchange selling on New York.*

PROGRESS IN MEXICO.

The following is from the last number of the *Mexican Financier:* "The year which has just closed was noteworthy in many respects in Mexico. Peace, whose gentle influence in the land has been so warmly recognized and welcomed by all, has developed the fuller growth of industry and energy, and hence the republic has made advances at which even the active world of our day has stood astonished. The liberal policy of the government has continued to foster and encourage every enterprise promising improvement and advance, and while all great movements, such as the rejuvenescence of this ancient land, are necessarily slow, enough has been done to prove that, under proper conditions of the future, the brightest anticipations will be realized. The past leaves with us a sense of merited congratulation. What shall the future be?

"In certain journalistic circles a pessimist theory seems to prevail, and the government is said to have contracted, and to continue to contract, obligations beyond its power to fulfill, and which will involve serious and early complications. We share in no such views. The resources at the command of the government are more than sufficient to meet all obligations, and these, moreover, have the power of multiplying themselves under proper conditions. But it is certainly true that a careful and wise management of national resources is essential for the continuance of that prosperity which has lately characterized this favored land. The financial transactions of the government have been noted freely, and in general the country has been congratulated on its increased revenues. But there is a point here which should not be disregarded.

"The imports have been enormous, and under a tariff system which is a dread to merchants and to consumers, the revenues have been large, it is true. But to the careful observer there is no pleasure in these facts. While we do not believe the assertions sometimes made that this enlarged income has led to official extravagance, we do recognize the unwelcome fact that these large imports have been exchanged for exports only in an infinitesimal degree, and that for their payment there has been an enormous drain on the specie of the country. Instead of importing so much, the country should have produced more. A lighter revenue, accompanied by diminished importation, and especially by increased exportation, would be a greater source of satisfaction than the present condition. Indeed, such a change is essential, for the existing conditions, if long unchanged, must lead to evil results. The exchanges between nations must be somewhat equalized, or there can be no real prosperity for the weaker. She must either remain isolated from the rest of the world, or suffer from intercourse based on conditions so unequal.

"This is undoubtedly the secret of the energy with which the government has sought to develop production in the country. The condition thus aimed at is so new for Mexico that it will be a gigantic work to effect it. Yet the liberal inducements offered by the government cannot fail to produce good results, both in awakening native industry and energy, and in alluring these from abroad. Such results are already manifesting themselves, and industries are springing up around us everywhere backed by ample capital from other lands. The various unequaled and special opportunities of Mexico are attracting daily increased attention. One of the special signs of the future is in the gradual development of agriculture on a large scale, in the special interest taken in the many precious woods of the Mexican coast lands, and in the industry of cattle-raising so profitable in the experience of the neighboring republic.

"Several vast tracts of land have already been purchased and will be opened up at once for cultivation under the direction of capitalists associated for the purpose; and it requires no prophetic vision to foresee the day when the golden grainfields, the rich vineyards and the luscious groves of California will be reproduced in most of our states under even greater advantages. Then will come the increased production and consequent export upon which the future of Mexico so largely depends, and therefore the efforts of the government to develop this happier condition are deserving of warmest approval and coöperation. The enactment of a treaty with the adjoining country, whose ample markets form the natural outlet for Mexican produce, will, we earnestly believe, stimulate this productive energy here, and it is another happy indication that, except in such foreign circles as feel their special interests threatened by such a treaty, the press of Mexico has largely recognized the fact that such a treaty will open opportunities for Mexico favorable in the extreme. If she fail to utilize them it will be her own fault, but it is not to be supposed that, with the new energy everywhere manifesting itself, she will be content to remain in the unproductive lethargy that has been her bane in the past."

SILK AND OPIUM PRODUCTION IN PERSIA.

The *Pall Mall Gazette* extracts from a recent Legation report on trade the following information in regard to the production of silk and opium in Persia: "A certain revolution appears to have been going on in the agriculture of Persia, which has resulted in a great reduction in the production of silk and an increase in that of rice and opium. Silk was once the staple produce of Persia, and in its flourishing days as much as 20,000 bales, of a weight of 1,400,000 pounds, worth £700,000, would have been exported, but not more than a fourth of that quantity is produced now. The silkworm disease played such havoc year by year that the peasants abandoned the cultivation. The place of silk in the export trade is, therefore, being rapidly assumed by opium, the cultivation of which has made enormous strides within the past ten years. Ispahan is the province where this drug is chiefly made, but Shiraz and Kermanshah also grow the poppy. Within the past ten years the cultivation of the poppy has also increased tenfold in the prairies of Khorassan. Prices have in consequence fallen, and it is possible that losses reported to have been sustained by the exporters may check the trade. The entire crop of last year was estimated at 6,500 chests, of which 3,000 came from Ispahan. The local consumption is very small, so that, deducting 400 chests sent to London, the bulk of the crop goes to the China market."

The *Gazette* adds that Persian trade might be much increased were the country opened up even by good roads, but says that in this respect it is in a very backward state. One party in Persia, jealous of the independence of the country, is opposed to progress in the direction of opening up the country to foreign trade. The influence of this party appears to have been sufficiently powerful to prevent the success of schemes for the construction of railways. It is mentioned that a single line of eight hundred miles in length between Teheran and Bagdad would do a great deal of good, since the produce of the country could be shipped from Bagdad direct to Europe. As the case stands at present, the delays in obtaining goods imported via Bagdad are intolerable, and the cost is still more so. As an illustration of this, an instance is given of a few cases of goods which were sent from London to Bagdad in six weeks at a cost of less than £20. These lay at Bagdad for five months because the roads were so bad that no muleteer could, during that time, be persuaded to take them on to Teheran. They were ultimately carried there at a cost of £90. There appears to be an opening for European enterprise in Persia, but there seems also to be some difficulty in persuading western capitalists that a line established there would be safe.

SILK PRODUCTION IN HUNGARY.

Nature prints the following summary of an official report upon silk cultivation in Hungary: "A recent report by M. de Bezerédy, government commissioner for cultivation of silk in Hungary, shows that the industry is making considerable progress in that country. In 1881 there were 2,976 producers, who obtained 41,537 kilogrammes of cocoons in 426 communes, and the produce was sold for 41,816 florins. The corresponding figures for 1830 are: 1,059 producers, 10,132 kilogrammes, 109 communes and 11,062 florins. The commissioner sold in Italy the produce of 1881 for 63,000 florins, and the profit so realized allowed of the institution of a model school for silk cultivation without exceeding the credit voted by the Chamber. This school has received three primary teachers sent by the Minister of Public Education and three from the Minister of Commerce; three more are maintained at private expense. These nine will acquire knowledge to be afterwards utilized in their place of residence. Further, a professor in the model school of Graz has given public lectures, on the rearing of silkworms, in several villages, and more than 80 kilogrammes of cocoons have been distributed continuously to cultivators. Lastly, 28,956 mulberry trees have been planted at government expense. The report recommends the establishment of spinning mills in the country and the planting of mulberry trees on land belonging to the communes and on the government roads. The climate of certain regions of Hungary is highly favorable to the production of silk."

TRADE EMBARRASSMENTS.

There were 204 failures in the United States reported to BRADSTREET'S during the past week, 17 less than the preceding week, 69 more than the corresponding week of 1882, and 64 more than the same week of 1881. The middle states had 46, a decrease of 11; New England states 23, a decrease of 11; southern states 36, a decrease of 16; western states 74, an increase of 18; Pacific states and territories 25, an increase of 3; Canada and the provinces 29, a decrease of 6. Although there has been a gradual reduction in the number of failures during the past few weeks, yet those of the past week have been much more important. They include John V. Ayer's Sons, iron manufacturers, and William T. Allen & Co., wholesale grocers, Chicago; Brown, Bonnell & Co., iron manufacturers, Youngstown, Ohio; The Fox River Iron Company, De Pere, Wis., and Hatch & Peters, bankers and brokers, New York city. In the principal trades they were as follows: General traders 35; grocers 26; shoes 14; liquors 12; manufacturers 11; dry goods 10; hardware 10; flour, feed and grain 8; drugs 7; clothing 6; iron 6; jewelry 5; butchers 5; hotels and restaurants 4; furniture 4; millinery 3; produce and provisions 3; coal 3; commission 3; hats 2; tobacco and cigars 2; fancy goods 2.

ALABAMA.

GOODWATER.—B. F. Ashley, confectioner, has failed.

ARIZONA.

PRESCOTT.—D. C. Thorn, saloon, has assigned.

ARKANSAS.

CLINTON.—W. T. Poe & Co., general store, recently sold out their entire stock, and are reported to have failed.

CALIFORNIA.

LAKEPORT.—M. Wilson, general store, has given a bill of sale for the benefit of creditors. Liabilities about $5,200.

LOS ANGELES.—George A. Vignold, grocer, has been attached.

MADISON.—F. W. Henrich, saloon, has been attached.

OAKLAND.—H. W. Haight, butcher, has been attached.

OAKLAND.—F. Ohezra, saloon, has been attached.

SAN FRANCISCO.—J. Bartholome, saloon, has been attached.

SAN FRANCISCO.—R. Bosq, restaurant, has been attached.

SAN FRANCISCO.—M. Bradwohl, butcher, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—McHugh & Perrie, warehouse, have been attached.

SAN FRANCISCO.—Mrs. H. Karewski, millinery, has failed.

SAN FRANCISCO.—Koehler & Ritter, jewelers, have been attached.

SAN FRANCISCO.—P. J. McVeigh, saloon, has been attached.

SAN FRANCISCO.—B. Vannucchi & Co., fruit, are advertised to be sold out by the sheriff.

SAN FRANCISCO.—P. Wren, junk, has been attached.

SAN JOSE.—Louis Krumb, brewer, has been attached.

VALLEJO.—Getchell & Thompson, grocers, are reported to have failed.

COLORADO.

DENVER.—William Douglass, trading as Douglass & Co., crockery, has assigned. He sold out about a year ago to Parkinson & Franklin, paid off his liabilities in full, and in November last he took back the business, assuming the liabilities of the firm. He then claimed assets $50,700; liabilities $30,000.

DUMONT.—L. J. Barnes, general store, has assigned.

DURANGO.—R. F. Blackmore, shoes, has assigned.

DAKOTA.

FARGO.—Dickinson & Steele, general store, have been closed by the sheriff.

GRAND FORKS.—W. H. Brown & Son, hardware, have obtained an extension.

PEMBINA.—McLellan & Marshall, agricultural implements, have been attached for $2,200, and assigned.

DISTRICT OF COLUMBIA.

WASHINGTON.—Mrs. Nannie Gutman, dry goods, has assigned, giving preferences for $3,500, mostly to relatives. She was recently sued by several New York creditors. She offers 25 cents.

GEORGIA.

ATLANTA.—Crawford & Perkins, saloon, have suspended.

FLOWERY BRANCH.—McAfee Brothers, general store, have had a mortgage foreclosed.

LUMPKIN.—John Daniel, grocer, has failed.

THOMASTON.—S. C. Pritchard, general store, has been closed by the sheriff.

ILLINOIS.

CHICAGO.—W. T. Allen & Co., wholesale grocers, have assigned without preference to Bradford Hancock. The liabilities are placed at about $400,000; nominal assets about $300,000. They attribute the failure to difficulty in making collections and the close margin on which business has been done. The firm had a working capital of about $100,000, but the principal partners were regarded as men of wealth, and three months ago thought $500,000 a safe estimate of the total responsibility of the firm. General E. N. Bates, one of the partners, was formerly State Treasurer, and C. H. Curtis, another partner, was interested in several extensive enterprises. The firm, in May, 1877, succeeded Allen, Keith & Co., who had failed and compromised at 75 cents.

CHICAGO.—Herbert C. Ayer, trading as John V. Ayer's Sons, iron, has become financially embarrassed, and his paper has gone to protest. The paper was indorsed by Brown, Bonnell & Co., of Youngstown, of which business Mr. Ayer owns three-fifths. The amount of paper falling due is placed at $100,000. Mr. Ayer recently sold his residence for $50,000 in an unsuccessful attempt, it is now thought, to obtain money to tide over the winter. Mr. Ayer's embarrassment is variously attributed to tariff agitation, labor troubles, the heavy expenditure of Brown, Bonnell & Co. in improving and enlarging the latter's plant, overproduction and the general feeling of insecurity created in financial circles by the recent heavy failures in the same line of trade. The liabilities are currently reported at $2,000,000, but no definite statement has yet been issued. The business was established in 1859 by John V. Ayer, who died in April, 1877, and his son Herbert C. Ayer became the owner of his father's interest, and on June 1, 1882, became the sole owner.

CHICAGO.—Hart, Barlow & Co., printers, have assigned to F. F. Cole, who holds a chattel mortgage on plant for $3,500.

CHICAGO.—S. S. Koons, furniture, has been closed by the sheriff.

CHICAGO.—O. Olson, furniture, has been closed by the sheriff.

CHICAGO.—Rudolph Sylvan, wholesale liquors, has assigned to W. F. Golsen.

CHICAGO.—The Chicago Jewelry Manufacturing Company has been closed by the sheriff on a confessed judgment for about $4,000 to Caleb Clapp & Co.

LA SALLE.—J. G. Feldes, grocer, was not attached, as previously reported.

MOLINE.—A. P. Fisk, dry goods, has assigned.

VIRGINIA.—George Plahn, dry goods, has failed and sold out.

INDIANA.

BEDFORD.—H. P. Thornton, saloon, has been attached for $500.

INDIANAPOLIS.—The liabilities of H. N. Goe, grocer, who recently became embarrassed, are about $18,500, of which $6,500 is secured; nominal assets $14,500.

IOWA.

BLOOMFIELD.—T. B. Myers, general store, has been closed by the sheriff.

CLEARFIELD.—J. M. Smith, general store, has failed.

DEDHAM.—Hood & Collett, grocers, have failed.

GRINNELL.—H. G. Wire, general store, has been closed on a chattel mortgage for $1,205.

JAMAICA.—William Moore & Co., general store, have been closed on attachments.

MANCHESTER.—Charles B. Eaton, harness, owes about $4,900; assets about $1,500. The chattel mortgages aggregate $3,624.

MINTURN.—Brown & Crawford, general store, are reported to have failed, with liabilities of $8,000.

OTTUMWA.—C. A. Manassa, meats, has assigned.

OTTUMWA.—L. H. Wilson, shoes, has assigned.

WHEATLAND.—J. M. Funk, shoes and clothing, has failed and sold out to his daughter.

KANSAS.

EMPORIA.—Loomis & Loomis, hardware, have failed.

JUNCTION CITY.—Mrs. C. M. Hookey, millinery, has assigned. Liabilities $700.

McPHERSON.—R. M. Clark & Co., hardware, have been closed by the sheriff.

OAK VALLEY.—Davis & McHenry, general store, are reported to have failed.

OLATHE.—Brown & Hodges, hardware, have failed.

OTTAWA.—Carroll Nolan, merchant tailor, has assigned. Liabilities $1,500; assets $1,128.

WELLINGTON.—C. E. Hand has been attached.

KENTUCKY.

ADAIRVILLE.—Mary M. Turpin, general store, has assigned to R. J. Townsend.

SHELBYVILLE.—C. L. Liddell, shoes, is reported financially embarrassed.

LOUISIANA.

LAKE PROVIDENCE.—Jennie G. O'Sullivan, grocer, is reported to have failed and gone out of business.

NEW ORLEANS.—G. D. Laneri, grocer, has assigned. Liabilities $2,118; assets $1,159.

MAINE.

BIDDEFORD.—Francis Meede, grocer, is reported to have failed.

BRIDGETON.—George E. Murphy, doors, is in insolvency.

CANTON.—Edwin Thompson, stoves, has failed.

EAST BOOTHBAY.—James McDougall, general store, has been attached for $2,000.

HARTLAND.—M. W. Jenkins & Co., provisions, have suspended.

MECHANICS' FALLS.—John C. Walker, drugs, has been attached.

STANDISH.—Erwin Libby, hotel, has been attached.

MARYLAND.

BALTIMORE.—J. W. Burnham, millinery, has assigned.

BALTIMORE.—Edward Melchoir, gunsmith and importer of guns, has assigned to Henry Lingenfelder.

BALTIMORE.—A. G. Myers & Co., manufacturers of boots and shoes, have assigned to M. S. Weil. It is said they have been forced to sell on very small margins to compete with eastern goods. They recently claimed assets of $23,100. The firm was formed in January, 1873.

BALTIMORE.—Herman Rose, butcher, was advertised to be sold out by trustee.

BALTIMORE.—Simon Wiel, hats, has assigned.

MOUNT VERNON.—Stephen Holland, general store, has failed. Liabilities $1,500; assets $1,000.

YATESVILLE.—White & Co., general store, have been closed by the sheriff.

MASSACHUSETTS.

BOSTON.—The liabilities of Ames & Makechnie, gents' furnishing goods, are $6,000; nominal assets $5,200. A committee has been appointed.

BOSTON.—Joseph H. Bridges, hats and caps, has failed and is in insolvency. Liabilities $1,325; no assets.

BOSTON.—John Goodwin, grocer, has failed and gone out of business.

BOSTON.—Hall & Edwards, tailors, have suspended, and ask an extension with notes signed by their special partner, Charles E. Gibson. Liabilities about $6,000; assets, stock about $1,500, and book accounts, the value of which has not been given.

BOSTON.—F. A. Tarbox, baker, has failed and gone out of business.

BOSTON.—The New England Press Brick Company has had a mortgage of $30,000 on their real estate foreclosed, and the sale is advertised for March 5. The total liabilities are placed at $60,000. The assets consist of the real estate, which it is thought will not bring much more than the mortgage. The company, it is said, lost about $1.50 per thousand on all the bricks they have made.

BROCKTON.—George E. Harrington, tobacco, has failed.

CHICOPEE.—John Brothers, grocer, has failed.

CHICOPEE.—O. J. Vincent, fish, has filed a petition in insolvency. Liabilities $1,700; assets small.

EAST BRIDGEWATER.—Caleb E. Hicks, grocer, has arranged a compromise and will go out of business.

LEE.—The schedules of W. H. May, paper manufacturer, show liabilities $18,000. The mill is mortgaged for $7,000; the stock and accounts are valued at $2,000.

LOWELL.—T. F. Carey, grain, is reported to have failed.

LYNN.—Frank A. Ashcroft, manufacturer of steam gauge glasses, has gone into insolvency.

LYNN.—Ezra T. Bates, grocer, has failed. Liabilities $6,444; nominal assets $4,126.

LYNN.—P. E. Cotton, grocer, who recently failed, owes about $1,300; nominal assets $900.

MARLBORO.—McCarthy Brothers, clothing, offer 25 cents, which the creditors refuse.

NEW MARLBORO.—Creditors of The Berkshire Paper Company have filed a petition in insolvency against it. It is said that one of the principal creditors was offered 50 cents.

TURNER'S FALLS.—Edward Dahill, shoes, offers to compromise at 60 cents.

WEST NEWTON.—F. S. Crockett, grocer, has increased his offer to 50 cents, which will probably be accepted.

MICHIGAN.

CALEDONIA.—Konkle & Peck, saw mill and handle manufacturers, have been attached. Chattel mortgages aggregating $2,000 have been recorded. Liabilities estimated at $8,000; nominal assets $5,000.

DETROIT.—E. W. Bissell & Co., forwarding and commission, have suspended.

DETROIT.—H. E. Champion & Co., grain commission, have suspended.

FERRYSBURGH.—The Ottawa Iron Works Company has been closed under a chattel mortgage for $50,000, on account of the failure of Ferry & Brother, the principal owners of the company.

KALAMAZOO.—Dudgeon & Cobb, produce commission, have assigned to S. S. Cobb and David Fisher. They had a working capital of about $5,000, and owned real estate which they valued at $37,500.

MARLETTE.—Warner & Hoag, general store and millers, have been sold out by the mortgagees. In January they gave mortgages for $10,523, claiming nominal assets $30,000 and liabilities $16,000.

OXFORD.—Henry Perkins, grocer, has been closed by creditors.

MINNESOTA.

ALBERT LEA.—The liabilities of W. P. Sargent, lumber, who recently assigned, are about $45,000; nominal assets $65,000. He is a state senator, and has been in the lumber business about nine years.

HUTCHINSON.—E. H. Alcott & Co., dry goods and grocers, have assigned.

ROCHESTER.—F. S. Barnes, jeweler, has assigned. Liabilities $3,000; assets $2,000.

SLEEPY EYE.—Majewski & Wagner, furniture, have been attached, and assigned.

MISSISSIPPI.

MACON.—E. N. Hameter, general store, has assigned.

MACON.—J. W. Holt, general store, has assigned.

MISSOURI.

KANSAS CITY.—Schroeder, Danforth & Co., commission grain, who recently suspended, claim to have settled with all their creditors fully. The nominal liabilities were about $30,000.

KANSAS CITY.—S. W. Scott, saloon, has assigned.

KANSAS CITY.—J. W. Underwood, brick manufacturer, has been attached for $1,097.

ST. LOUIS.—Conner Brothers, grain commission, suspended on the 17th inst. on account of the advance in corn, of which they were reported to be largely short.

ST. LOUIS.—E. M. Johnston, sales stables, is in the hands of the sheriff.

ST. LOUIS.—Joseph McKnight, grocer, has assigned to F. W. Brockman.

ST. LOUIS.—The Union Steam Mills Company has been sold out under a trust deed.

NEBRASKA.

BELLWOOD.—Henry Curtis, meat market, has failed.

FULLERTON.—W. C Phillips, general store, has failed.

NEVADA.

VIRGINIA CITY.—Kirschbraun & Son, grocers, have been attached.

NEW HAMPSHIRE.

GREAT FALLS.—James H. Blake & Son, shoes, have been sold out by the sheriff.

LANCASTER.—Frank A. Colby, drugs, has compromised at 50 cents.

NORTH CONWAY.—The liabilities of the Glen Ellis Lumber Company are about $6,000.

NORTH HAVERHILL.—George H. St. Clair, furniture, has failed.

NEW JERSEY.

HOBOKEN.—J. King & Co., manufacturing jewelers, have been attached for $1,077, and judgment for $14,050 has been entered in favor of Herman Winter.

NEWARK.—A. G. Randolph, flour and feed, has called a meeting of creditors. Liabilities $3,000; assets $1,500.

NEWARK.—Christopher Sippel, turner, was advertised to be sold out by the sheriff.

PATERSON.—Nightingale Brothers, silk manufacturers, ask an extension of six months. The liabilities are about $142,000, and assets $196,000, consisting of real estate, machinery and merchandise. They have received heavy advances from their commission merchants, and recently notified them that they would take away the account, and in order to do so would require extra time from creditors. Notes which fell due this week were not paid. The creditors favor an extension.

NEW YORK.

ALBION.—The schedules of Stilson & Son, grocers, show liabilities $9,107; actual assets $7,071.

BROCKPORT.—Mrs. M. W. Reed, dry goods, has assigned, giving preferences for $5,300.

BROOKLYN.—Anna Morris, fancy dry goods, has assigned

BROOKLYN.—Cyrus Pyle, drugs, assigned on the 19th inst. to Devine Burtis, Jr., giving preferences for over $15,000. In January he endeavored to obtain an extension of about two years on his merchandise debts, which were placed at about $8,000.

LYONS.—P. Knobloch, hotel, has assigned.

NEWBURGH.—John H. Walsh, paper manufacturer, has assigned to Henry A. Harrison. The deficiency is reported at about $18,000.

NEW OREGON.—Charles Thill, blacksmith, is reported to have failed.

NEW YORK CITY.—The schedules of W. S. Blunt, pumps, show liabilities $16,523; nominal assets $4,557; actual assets $3,847.

NEW YORK CITY.—Hatch & Peters, bankers and brokers, suspended on the 23d inst., the result of complications and embarrassments growing out of the embezzlement about eighteen months ago by their late cashier, the losses from which have proved to be larger than at first supposed. Their late cashier lost, it was said, at that time $35,000 by gambling, and the firm brought suits against several well-known gamblers to recover the money.

NEW YORK CITY.—Brace Hopkins, iron, assigned on the 21st inst. to James Hopkins, giving preferences to James Hopkins $700; Martha M Hopkins $2,996; total $3,696.

NEW YORK CITY.—W. S. Bracken, grain broker, has suspended, having been caught short of the market and customers failed to respond with margins. Liabilities about $20,000.

NEW YORK CITY.—The schedules of Alonzo Follett show direct liabilities $3,252,593; nominal assets $2,126,793; actual assets $1,060,355. The contingent liabilities are placed at $9,469,847, about 90 per cent. of which, it is said, has been liquidated.

NEW YORK CITY.—The schedules of A. Lange & Son, ladies' underwear, show liabilities $12,742; assets $10,012.

NEW YORK CITY.—Margaret Langlotz, manufacturer of dress trimmings, assigned on the 21st inst., giving preferences for $200.

NEW YORK CITY.—Charles Laurenzi, saloon, assigned on the 19th inst. to Gerhard Voltfort, giving two preferences for $250.

NEW YORK CITY.—The schedules of David J. Naughtin, dry goods, show liabilities $1,170; nominal assets $1,150; actual assets $805.

NEW YORK CITY.—The schedules of Frederick Tomlinson jeweler, show liabilities $26,283; nominal assets $18,513; actual assets $11,499.

NEW YORK CITY.—The schedules of Louis M. Tucker, grocer, show liabilities $3,751; nominal assets $1,845; actual assets $1,248.

ROCHESTER.—Joseph H. Bradley, jeweler, has assigned to B. F. Mason, without preference.

ROCHESTER.—Fernando L. King, mantels, has assigned to A. E. Woolf, giving preferences for $1,246.

ROCHESTER.—James D. McNaught, cigars, has assigned.

VICTOR.—W. F. Brizee, shoes, has assigned.

YONKERS.—Calvin D. Brown, shoes, is reported to have assigned and been sold out.

NORTH CAROLINA.

AVOCA.—Nichols & Baker, general store, have assigned.

FAYETTEVILLE.—J. W. Welsh, wagon maker, is reported to have assigned.

HAMILTON.—Williams & Gilliken, general store, have assigned, without preference.

RALEIGH.—Yeargan, Petty & Co., dry goods, have assigned. Dull trade and poor collections are among the causes attributed for their failure. Liabilities reported at $16,000.

ROXOBEL.—Liverman & Tyler, general store, have assigned

WARREN PLAINS.—O. O. White, general store, has failed.

WARRENTON.—Robert E. King, drugs, has failed.

WARRENTON.—H. H. Taylor, bar, has failed.

OHIO.

CANTON. Mrs. L. K Nell, millinery, has assigned.

CINCINNATI.—J. F. Kelling, coal, has assigned.

CLEVELAND.—William Wangerine, shoes and groceries, was attached and released. Then two creditors took their goods and sold them to Mrs. Wangerine, who now owns both businesses. Mr. Wangerine owes about $2,000.

CLEVELAND.—Windecker & Hyman, fancy goods, offer 25 cents, which has been accepted by a majority of the creditors.

COLUMBUS.—A receiver has been appointed for The Vulcan Iron Works.

GREENFIELD.—Edgar & Fraker, drugs, have assigned to P. W. Price.

IRONTON.—A. G. Clark, grocer, has assigned.

LONDON.—Duddy & Duddy, dry goods, have failed.

LORAIN.—Schumacher, Carney & Co., shoes, are reported to have been closed by the sheriff.

MANSFIELD.—George M. Geddes, clothing, has been closed by the sheriff and assigned.

MIDDLETOWN.—Jacoby & Co., dry goods, offer to compromise at 50 cents.

MILAN.—R. Croft, stoves and tinware, has chattel mortgaged his stock for $1,800; it was invoiced for $1,500. Creditors pressed him.

NEWARK.—C. M. Dean, notions, is offering to compromise at 30 cents. He recently sold out, it is said, for about $8,000.

SANDUSKY.—Henry R. Harris, shoes, is reported to have been closed by attachment.

SHAWNEE.—W. Horner, grocer, has failed.

ST. CLAIR.—W. G. McKee, general store, has assigned.

VAN WERT.—A. W. Scott, grocer, has assigned.

WOOSTER.—A. Saybolt, Jr., stoves and tinware, has failed and sold out. Liabilities about $5,000; assets $3,600.

YOUNGSTOWN.—Fayette Brown has been appointed receiver of Brown, Bonnell & Co., iron manufacturers, on the application of The Jackson & Lake Superior Iron & Mining Company and The Negaunee Concentration Company, whose claims aggregate about $30,000. A realty mortgage for $500,000 was given on the 17th inst., and the United States marshal had also levied upon the stock. The embarrassment was the result of the failure of John V. Ayer's Sons, of Chicago. The latter firm became the principal owners of the business of Brown, Bonnell & Co. about three years ago, and turned it into a stock company, incorporated with a capital of $1,500,000, of which they owned about three-fifths, and they marketed the product. The real estate was valued at over $750,000, consisting of rolling mills, blast furnaces and coal mines. Extensive improvements were made in the past few years, and the business was very large, the number of men employed being placed at 3,000.

YOUNGSTOWN.—Morgan E. Lewis, gunsmith, has assigned to J. B Miller.

OREGON.

NORWAY.—Reed & Welson, general store, are reported to have failed.

PORTLAND.—H. Gallick, shoes, who was recently burnt out, has been attached.

PENNSYLVANIA.

ALLEGHENY CITY.—John Richards, carpenter and contractor, is advertised to be sold out by the sheriff.

BEAVER FALLS.—M. Bowman, general store, has assigned to L. B. Chidsey.

BEAVER FALLS.—L. C. Kirker, grocer, has assigned.

BRADDOCK.—Execution has been issued against Boggs & Winchell, grocers.

BRADDOCK.—Execution has been issued against Andrew Wassell, tailor.

BRADFORD.—Childs, Willis & Loomis, oil refiners, have had judgments for $5,515 entered against them, and have assigned to A. Short. They recently completed a refinery which cost about $15,000. Mechanics liens for $3,000 have been filed against them.

BRISTOL.—Henry S. McMullin, coal, flour and feed, has assigned.

CORRY.—Wyman & Parsons, manufacturers of shovel handles, have been closed by the sheriff.

CURWINSVILLE.—H. W. Spencer, general store, is reported to have failed.

LANCASTER.—Execution has been issued against Alexander McKillips, pianos and organs, for $300.

LEHIGH GAP.—John Hagenbuch, general store, has been sold out by the sheriff.

LEWISTON.—James Glenner & Son, shoes, have assigned to Joseph McCulloch.

NEW CASTLE.—Alex. Robertson, plumber, has been closed by the sheriff.

NEW CASTLE.—G. Vandegrift & Co., grocers, have been closed by the sheriff.

PHILADELPHIA.—Thomas Bunting, manufacturer of carpets, was advertised to be sold out by the sheriff.

PHILADELPHIA.—John Greenawalt, restaurant, and who was also until recently in the livery stable business, has been sold out by the sheriff. Addison Foster, who has been in his employ for some time past, now has the restaurant.

PHILADELPHIA.—John G. Hack, shoes, has failed, owing about $4,000.

PHILADELPHIA.—Joseph I. Long, coal, is offering to compromise at 60 cents, half cash and half on time.

PHILADELPHIA.—J. W. Scott & Co., gents' furnishing goods, have compromised at 50 per cent., payable in five, seven and nine months, giving firm's notes without security.

PITTSBURGH.—William O'Brien, plumber, was advertised to be sold out by the sheriff.

PITTSBURGH.—J. P. Schulz, Jr., flour and grain, has had execution for $2,197 entered against him.

POTTSVILLE.—Thomas I. Mitchell, shoes, has failed and confessed judgment for $1,875 for borrowed money. His merchandise debts are about $570; assets small.

QUAKERTOWN.—E. T. Ochs, general store, who recently sold out, has compromised at about 50 cents. Liabilities $12,500; actual assets about $6,000.

READING.—A. J. Hain, flour, feed and coal, is reported to have failed.

SHUNK.—H. K. & E. Williams, general store, have failed.

SOUTH BETHLEHEM.—John N. Schoffner, drugs, is reported to have failed.

WAMPUM.—The Wampum Iron Company (Limited) has been closed by the sheriff on confessed judgments for $25,000. The liabilities are reported at about $45,000. Operations were commenced in January, 1881.

RHODE ISLAND.

CENTRAL FALLS.—S. Paquette, baker, has been attached.

SOUTH CAROLINA.

CHARLESTON.—George Little, clothing, has failed.

WALHALLA.—J. C. Mickler, general store, has assigned.

TENNESSEE.

CHATTANOOGA.—T. W. Cratchfield, dry goods, has compromised at 50 cents with some creditors, and obtained an extension with the balance.

LAFAYETTE.—Mrs. Sallie Funk, general store, has been sued and closed up.

SAULSBURY.—J. R. Stroup, grocer, has sold out, and offers to compromise at 50 cents.

TEXAS.

ATHENS.—J. M. Coffee, general store, has been attached.

HALLETTSVILLE.—George Yeager, stoves, has been attached by his brother-in-law.

TERRELL.—R. C. Dansby, drugs, has assigned.

VIRGINIA.

GAINESVILLE.—W. F. Hite, general store, has failed and been sold out by the sheriff.

WASHINGTON TERRITORY.

CHENEY.—Hendricks & Varker, drugs, have been attached. They were recently burnt out.

WALLA WALLA.—Marlin & Pieper, grocers, are reported to have failed.

WISCONSIN.

DE PERE.—The Fox River Iron Company has assigned to H. Booth. The company was organized in February, 1872, with a paid in capital of $200,000. The real estate, which cost over $150,000, was valued at $100,000; incumbered for about $20,000.

KILBOURNE CITY.—Peterson & Larson, general store, are reported to have failed.

WYOMING.

CHEYENNE.—J. H. Magoon, grocer, has been closed on attachment. He succeeded Magoon & Powelson a few days previous.

MANITOBA.

MILFORD.—Thomas & Somersall, general store, are reported to have assigned.

NELSONVILLE.—Jackson & McFarlane, hardware, offer to compromise at 55 cents.

ST. BONIFACE.—N. D. Gagnier, groceries and liquors, has assigned.

ST. BONIFACE.—Gaspard Longpree, hardware, has obtained an extension.

WEST LYNNE.—H. F. Despars, general store, who was recently burnt out, has assigned.

WINNIPEG.—Conley & Cormican, shoes, are reported embarrassed.

WINNIPEG.—B. C. Kenway, planing mill, is reported to have assigned.

NEW BRUNSWICK.

ST. JOHN.—Vincent & McFale, shoe manufacturers, offered 33 1-3 cents in ninety days, which has been accepted. Liabilities $40,000; assets $24,000.

NOVA SCOTIA.

HALIFAX.—Francis Carvill & Son, lumber and produce, have assigned.

HALIFAX.—Joseph R. Saunders, tobacco, has assigned.

PROVINCE OF ONTARIO.

BARRIE.—John Sweeney, shoes, is in the hands of the sheriff.

FOREST.—Alvin Palley, dry goods, is reported in the hands of the sheriff.

LONDON.—The Mahon Banking Company has suspended.

MERRICKVILLE.—W. H. McCrea, grocer, has assigned and offers 50 cents.

OTTAWA.—Moreland & Co., glassware, have assigned.

PARKDALE.—William Gooeman, baker, is reported to have failed.

RICHMOND.—W. H. Butler, general store, has assigned

STRATFORD.—H. B. Coates & Co., jewelers, are unable to meet liabilities and are being sued.

TORONTO.—H. B. Butterfield & Co., counter check books, are reported to have left town, and the sheriff is in possession.

TORONTO.—W. H. Essery, planing mill, is in the hands of the sheriff.

PROVINCE OF QUEBEC.

MASKINONGE.—Edmund Marchand, general store, has assigned.

MONTREAL.—The stock of M. D. Beck, china and glass, has been seized for rent.

MONTREAL.—Senecal Cadieux & Co., wholesale grocers, offer to compromise at 50 cents.

MONTREAL.—John Connelly, wood, is reported preparing to call a meeting of creditors.

MONTREAL.—The stock of R. Deloraine, cigars, is under seizure for overdue account.

MONTREAL.—Lee & Newport, coal and wood, have assigned.

MONTREAL.—L. Lewis & Brother, cigars, have assigned.

Selling Agents in U. S. A. for FINLAYSON, BOUSFIELD & CO., Johnstone, Scotland; and THE FLAX MILLS, Grafton, Mass.

208 DEVONSHIRE STREET, - - BOSTON.

The only Prize Medal of the London Exhibition, 1851; at Northampton Exhibition of Leather Work, 1873; at Cincinnati Exposition, 1879-'80; The Gold Medal Leather Exhibition at Frankfort-on-Main, Germany, 1881, etc., etc. Adopted by every machine on exhibition at New England Manufacturers' and Mechanics' Institute Fair, 1881 (Boston), to show the quality of work the machines would do. Did not exhibit at Paris, Philadelphia, or Charitable Mechanics' Fair, Boston, 1881.

JOHN P. SQUIRE & CO.
Packers of
PORK, LARD, HAMS,
AND MANUFACTURERS OF EXTRA LARD OIL,
21, 23 & 25 FANEUIL HALL MARKET, AND 30 NORTH MARKET STREET, } BOSTON.

JOHN P. SQUIRE. *[Established in 1842.]* FRANK O. SQUIRE

Slaughtering and Curing Establishment, Gore Street, East Cambridge.

WORSTED YARNS.

NONANTUM WORSTED CO.
Office, 5 Chauncy St., Boston.

Worsted Yarns for Cassimeres, Coatings, Dress Goods; also Knitting Yarns for hand and machine work; also Tops for Worsted Spinners.

HALL & CO.,
COMMISSION MERCHANTS,
No. 5 Chauncy Street, Boston.

WORSTED YARNS.

THE TRACY WORSTED MILLS CO. (Limited.)
OFFICE AND MILLS,
2500 SPRUCE ST., PHILADELPHIA.

Fine Worsted Yarns, suitable for Cassimeres, Coatings, Dress Goods, etc.; also Knitting and fine Zephyr Yarns, for hand and machine work.

Established A. D. 1842.

SAMUEL LORING,
PLYMOUTH TACK AND RIVET WORKS,
Manufacturer of Tacks, Brads and Nails,
Norway Iron, Copper and Brass Rivets and Burrs,
PLYMOUTH, MASS.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

MASTERS & CO.,
Pig Iron and Iron Ore,
13 Atwater Bld'g, Cleveland, O.

BRADSTREET'S

A Journal of Trade, Finance, and Public Economy.

VOL. VII—No. 244.] NEW YORK, SATURDAY, MARCH 3, 1883. [PRICE, 10 CENTS.

Entered according to Act of Congress, in the year 1883, by THE BRADSTREET COMPANY, in the Office of the Librarian of Congress, at Washington, D. C.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MARCH 3, 1883.

NOTES OF THE WEEK.

An improvement of prices in the stock market has been observable this week as compared with last; but the more notable fact is that this improvement has been accompanied by a growing feeling of public confidence. Last week it seemed that Wall street was in its lowest depths of gloom—nothing, but misfortune was to be seen to whatever quarter of the country the observer turned his eyes. Since then the weather has grown a little milder, Congress has come so much nearer to its unlamented end, and each day brings us closer to spring and the usual revival of trade. These things have had their effects, and unless a bank smashes there may be a good upward movement of the market in the next two weeks. It is still, however, in the hands of the professionals, and they may smash it down again at any moment.

A meeting was held in New York Thursday between a number of prominent dry goods merchants and representatives of the freight departments of the four trunk lines leading west. The trade presented a formal protest to the railway companies against the existing classification of sheetings, plain domestics and other classes of goods as first-class freight, arguing that the high rates of transportation are detrimental to the eastern shippers, and practically discriminate in favor of southern and western mills. The protest was signed by a great many firms in New York and other cities. The railway representatives listened and talked a little, but did not commit themselves to much. The meeting adjourned without definite results.

The New York *Evening Post* does well to advise men of business everywhere to insure a good basis for their transactions, as far as possible, by stipulating that future contracts shall be payable in gold. In the light of the present disposition of Congress in relation to the silver question, to specify that contracts are to be paid in gold is no more than ordinary business prudence. Business organizations everywhere should use their influence in furtherance of the movement for gold contracts.

The governor of the state of New York has vetoed the five-cent fare bill, concerning which there has been so much discussion recently. This result has not been unexpected, and was probably aided in the bringing about by the expressions of opinion contained in the protest of certain prominent business men in the city of New York, which was handed to the governor on Thursday. Governor Cleveland in his veto message notices the various acts passed in relation to the elevated railroads in New York, and refers to the proceedings under those acts and in furtherance of them. He arrives at the conclusion that in the legislation and the subsequent proceedings, and in the fact that pursuant thereto the road of the company was constructed and finished, a contract exists in favor of the company, which is protected by the clause in the Constitution of the United States prohibiting the passage by any state of a law impairing the obligation of contracts.

Governor Cleveland further takes the view that even on the supposition that such a contract does not exist, and that neither of the lesser companies are in any way protected from interference with their rates of fare, the general railroad act under which both companies are organized contains a promise that the fares shall not be reduced without the consent of the company so as to produce with the profits less than 10 per cent. per annum upon the capital actually expended, nor unless it shall be ascertained on examination that the income derived by the company from all sources for the year then last past shall have exceeded an annual income of 10 per cent. upon the capital of the corporation actually expended. The Governor says that he is not satisfied that the circumstances referred to exist, and that it is conceded that the examination required has not been made.

He does not, however, confine himself to the constitutional or legal aspects of the controversy, but finds in general considerations of policy cogent reasons for refusing his approval to the bill. He says that an arbitrary reduction of these fares at this time and under existing circumstances would involve a breach of faith on the part of the state and a betrayal of confidence which the state has invited. Capital hesitated to enter a new field full of risks and dangers until encouraged by the promise of liberal fares. The people of the city of New York are receiving the full benefit of the construction of these roads, and a great enhancement of the value of the taxable property has resulted. The governor lays stress upon the importance of protecting invested capital and of recognizing its necessity and usefulness in the development of enterprises valuable to the people by conservative conduct on the part of the state government. Under all the circumstances he is of opinion that should the act become a law the reputation of the state for honor and good faith would be seriously affected.

The public debt was reduced during the month of February by $7,630,678.54, a sum amounting to somewhat more than half the monthly average for the first seven months of the current fiscal year. The total decrease of the debt for the past eight months of the fiscal year was $102,638,346.29. It is probable that the large averages of the first seven months will not be reached again before the close of the current year. A comparison of the receipts and expenses for the first eight months of the current year with the corresponding period of the last year indicates a slight increase in the receipts and a decrease of about the same amount in the expenditures. The expenditures for February were nearly 50 per cent. greater than in January, owing to the heavy payments on account of pensions. The amount of outstanding 5 per cents, continued at 3½ per cent., has decreased from $81,328,750 to $54,339,850. The total cash in the Treasury has fallen during the month from $318,785,631.84 to $306,266,748.78. The available cash balance has sunk during the same time from $143,258,218.51 to $131,093,986.10.

The February accounts show that the payments made by the Commissioner of Pensions during the month greatly exceeded those for the previous month, and were indeed in excess of those for any single month since the beginning of the fiscal year. A comparison of the payments made on this account in January and February bears out what we have already said concerning the extreme difficulty, if not the impossibility, of calculating what the expenses for a month will be, much less of forecasting what effect the pension payments would have upon the estimates for the year. The payments during the month of January were $1,315,563; those for February were $9,781,419.

The amount of gold coin and bullion in the Treasury has been increased by about $4,000,000 during the month, and the excess of coin and bullion beyond the demands of outstanding gold certificates has grown during the same time by about $10,000,000. The steady piling up of the cart-wheel silver dollars goes merrily on, the store held by the government being nearly $2,750,000 greater than it was a month ago. As far as can be seen at present, the main point of interest in regard to the silver question is how the government will find a place for the tons of this unwelcome coin which are sure to accumulate on its hands or to be returned to it before Congress meets again. It is now too late to hope that anything will be done in the hurry of the closing session looking to the suspension or repeal of the compulsory coinage law. The sentiments of all classes of the business community in regard to the subject have been practically unanimous, and it is discouraging to be obliged to recognize that their representatives have failed to influence the action of Congress.

A man of business writes us as follows from Havre, under date of February 15:

"Business has been disturbed in consequence of the changing views of large numbers of the conservative people regarding the future form of government. These parties say that the Republic promised everything, and has given nothing to the country; that taxes are higher, and business not so good as under Napoleon; and that legislation promised which was to effect for good the entire country has been continuously neglected. Be this as it may, there is certainly much uneasiness among business people of all classes. Many who a short time ago were ardent republicans now advocate a monarchy solely, they say, on business grounds. Some expect a movement in the army at any time to quietly dissolve the Republic. The capitalist classes aver that, although things may quiet down to their normal condition, it can only be for a short time under the present form of government."

The above represents the extreme views of those who, in such a crisis as France now has in hand, are first to cry out for something stable to-day, with little or no regard as to what would be best to-morrow. The leading facts of the situation, however, go to show that the state of gloom reflected by our correspondent is unwarranted. The French people, so far as can now be seen, will find a way out of the existing difficulty. In truth, there is nothing else to do under the circumstances, for there is no likelihood of any prince in sight being able to both make a throne and seat himself upon it at the same time. The business situation in France is of course injuriously affected by the doubts as to the political future, but it is a very superficial view indeed to suppose for a moment that there is in sight any "man on horseback" of sufficient strength to dispel this state of doubt.

BUSINESS MEN AND LEGISLATION.

The adjournment of Congress without action on the silver question brings more closely into view the necessity of creating more certain means whereby the judgment of the business classes of the country can be conveyed to the mind of Congress. We cannot bring ourselves to think that, were the members of the House of Representatives, or a majority thereof, aware of the aversion with which further coining of the silver dollar is regarded by the business men of the United States, they would refuse to stop the coinage. But they do not know the real views of those who have most to do with the industry and commerce of the country. Far too many congressmen, whose constituents are not directly concerned in the wider movements of trade, imagine that in some way their people would be benefited by making the circulating medium of trade "cheaper," *i. e.*, by debasing it. Yet it may fairly be presumed that if those same congressmen could be brought to understand that the men who direct the commerce of the country do not want anything of the sort they would speedily stop it. The day of petitions based on a count of noses has gone by. This method of influencing legislation obtained in relation to questions affecting the liberty of the individual. Resolutions of boards of trade are well enough, but these are too often the acts of a few members, without evidence of general agreement in the particular business community. The thing needed, as it appears to us, is such a method of petitioning as will demonstrate a practical unanimity of the business community. This in relation to questions on which general agreement is possible, as is the case with the Silver bill at this juncture. Such a plan would of course necessitate the giving up of more time to public affairs on the part of business men. There is little reason to doubt that the conditions indicated will in time be forced upon the business communities of the United States. In other words, men of business will find more thorough organization necessary to a better protection from crude legislation. While the man of business may not be a specialist in finance, he is quick to understand such a point as is presented in the present phase of the silver question. He can readily see that the coining of the silver dollar of 412½ grains, if persisted in, will ultimately reduce the standard measure of values in the United States by 15 per cent. or more. Such a change in relation to the present stage of the world's progress would be a national calamity. Yet the coinage goes on, with Representative Belford, of Colorado, deliberately proposing to check what he regards as the aggressions of Wall street by storing 85-cent silver dollars in warehouses to be erected in the Mississippi valley. Means should be found for teaching such men that the men of business throughout the country do not wish such a change. The road to the desired end, as stated, is through more thorough organization of the business communities. Petitions are needed, and will be needed, in disposing of future questions, which will, in a measure, reveal the position and importance of the signers in their respective business communities. The questions of to-day and to-morrow that are to be dealt with by the state legislatures or Congress turn upon the soundness of this or that system of currency or taxation, or upon the expediency of this or that mode of administration. The world (at least the English-speaking world) is no longer quarreling over forms of government, save incidentally. The representative system is acknowledged. The questions to come up will in the main require for their right solution business calculation and judgment. Accurate means will then be necessary for determining the judgment and desire of the business community. To perfecting such machinery men of business have need to address themselves.

PRISON DISCIPLINE AND THE CONVICT LABOR SYSTEM.

The question of prison discipline has been brought into prominence by certain events of recent occurrence. The public had already manifested some interest in the subject upon the publication of charges of cruelty against the prison authorities in New York. The appointment of a committee to investigate the management of the penal institutions of the state was a result of the awakened popular feeling upon this matter. But the revolt in the Sing Sing prison and the mutiny in the Missouri penitentiary have drawn attention to the question more sharply than could have been done in any other way. It is well that the community has been forced, as it were, to concern itself with an important matter which has been too long neglected. It is to be hoped that, now public interest has been aroused, the entire subject of prison discipline will be thoroughly ventilated, so that the community may learn what the exact condition of the prisons and the methods of management there employed are at present, and to the end also that the public judgment may be informed as to the principles upon which a proper system of crime punishment should be conducted.

The reports of the Assembly committee's investigation lets in much needed light upon some of the abuses which have hitherto rendered prison discipline so ineffective for good, and point to some of the changes which a proper consideration for the best interests of society imperatively demand. The sanitary conditions which obtain in the prisons appear to be very imperfect indeed. The physician of Sing Sing prison testified that the air of the prison was very unwholesome, the cells being barely sufficient to accommodate one person properly. The ordinary sanitary requirements of the prison are apparently much neglected; the ventilation and cleaning of cells being frequently left undone. The details of the investigation are rather unsavory, and may be omitted. It is sufficient to say that a condition of extreme filthiness has been permitted in the prisons, and that the authorities in the jails from which convicted persons are transferred exercise no care whatever with regard to the cleanliness of those confined there. The arrangements of the prisons are so imperfect, and there is so little effort made to separate convicts of totally different antecedents, and whose association can only result in evil, that youths who have gone but a slight distance upon the path of crime, and who are yet susceptible to good impressions, are constantly thrown into the companionship of criminals of the most hardened and desperate character, and the moral ruin already begun is soon completed. The improper system of association permitted has resulted, according to the testimony of the physician himself, in the foulest practices.

The view of prison life disclosed by these investigations is indeed repulsive. It is a disgrace to the state in which it is permitted. It is plain that the prison discipline of the past, of which the system employed in Sing Sing is an example, has had in view only one of the important ends which a true penal system should pursue, namely, the punitive end. This has been varied somewhat in later times by the application of what many regard as a mistaken and pernicious economy—in the adoption of the convict labor system, so called. There is no longer any excuse for this. In the rudimentary stages of penal science it was perhaps not unnatural that the simple end of punishing the violator of the law should have been alone regarded. A deeper and wiser policy, however, suggests that the enemies of society may perhaps be reclaimed and made its friends and supporters. All penologists worthy of the name now concern themselves more with the preventive and reformatory aspects of prison discipline than with its merely punitive end. Society at large can derive very little satisfaction from the simple fact that an individual is subjected to pain or loss of liberty because of crime, beyond the sense of security from the commission of other criminal acts by that individual, which results from his incarceration. But, beyond this, society is concerned that the incarceration shall, wherever possible, accomplish more than the mere restraint of the criminal, and that the system of punishment applied shall be effective toward his reformation by discovering and removing or overcoming his tendencies to crime. From the point of view indicated, any system of punishment which classes such a motley collection of criminals as makes up the population of one of our prisons as an aggregation, to be dealt with by a uniform and unyielding rule, cannot but be regarded as injudicious. The requisites of a proper system of prison discipline were well and tersely set forth by Mr. Vaux, of Philadelphia, in his pamphlet on "Crime—Cause and Punishment." "A system of punishment, to be what it purports," says the writer, "must separate from association, remove from temptation, prevent combination, isolate for reflection, segregate for instruction, set apart for the ascertainment of individual characteristics, crime cause, motives, inducements and allurements that were precedents to crime." It need hardly be said that the system of prison discipline employed in Sing Sing neglected or violated most, if not all, of these requirements.

The system of hiring out the labor of the convicts to contractors has been violently condemned, but mainly upon selfish or interested grounds, and generally without reference to the relations of such an arrangement to a true method of prison discipline. Laborers and capitalists whose interests are bound up with a certain branch of industry in which the labor of the convicts is employed have demanded protection against the system. Many earnest and thoughtful penologists are of the opinion that the system should be abandoned, but their opposition to it is based upon scientific grounds mainly. Among those holding this opinion is Mr. Vaux, who opposes the system on the ground that it affords no scope for a true prison discipline; the requirements laid down by him being impossible under a system whose only agency is force. If the system should be abandoned it should be for some reason cognate to the main inquiry, such as that suggested by Mr. Vaux, and not upon the interested representations of persons unconcerned about the good or evil effects of a continuance of the system upon a proper method of prison discipline.

SUCCESS OF SORGHUM IN 1882.

Since the publication of our former article on amber-cane sugar, a number of journals in different parts of the country have commented upon the importance of this new industry. Their remarks have generally been based upon the convention of the New York State Sugar Association, which occurred at Geneva on February 7. That was a notable gathering, as intimating the evident interest felt even in New York, which is as yet not so largely engaged in the culture of amber-cane as Kansas, or Minnesota, or Illinois, or two or three other states. It was found, however, that upward of fifty mills are in operation in the state, and this number will be materially increased during the present year. The methods of manufacture were intelligently discussed, and the members, of whom over one hundred were present, were all eager to gather information from each other or from Prof. Collier, who came on from Washington to attend the convention. A more wide-awake or energetic body of farmers is seldom gathered together. The same remarks are true of two other amber-cane conventions held the present season. The Mississippi Valley cane growers, who met at St. Louis the middle of December, and the Minnesota growers, who convened at Minneapolis the middle of January, were equally enthusiastic and sanguine as to the success of their new business. It may be set down as a rule that it is a difficult thing to get farmers to raise a new crop whose market value has not yet been established. They are naturally conservative, and prefer to follow in beaten tracks. But the few early experiments with amber-cane seemed to convince them that there was money in growing it, and the ready sale found right at home for the sirup, at a price that gave them a handsome return from their land, encouraged them to continue the growth, and increase the acreage.

An account of some of the most successful establishments of the past year will furnish the best basis for judging of what may be accomplished in the future. The largest company in the northern states is the Rio Grande, of Cape May county, New Jersey. In order to encourage the industry within its borders that state offered a bounty of one dollar per ton for cane, and one cent a pound for all sugar made from it. A company which was formed in Philadelphia to enter upon the business took advantage of this law, and, instead of purchasing land and erecting works in Pennsylvania, crossed over into New Jersey, bought 2,400 acres of cheap land for an insignificant sum, and there set up their establishment. One of the advantages of this crop is that it derives its food mainly from the atmosphere, and soil which would be good for very little else will grow a large crop of sorghum. The Rio Grande planted last year 964 acres which came to maturity, and from this they obtained about 6,200 tons of "topped" cane—that is, with the head of seed taken off. The average yield was by no means as good as it has been in New York state, but there was a wide difference in different plots. One field of eight acres gave 136 tons, an average of 17 tons per acre, while small plots of one or two acres yielded as high as 21 and 22 tons per acre. These facts show that there is a great deal yet to

be learned in regard to the cultivation of sorghum; and the company is this winter having its soils analyzed in order to learn what made some fields so fertile, and what constituents in the shape of fertilizers should be given to other fields to increase their productiveness. The total result of the season's labor was 319,944 pounds of "manufactured sugar," and 40,000 gallons of dense sirup. Their state bounties amounted to $8,837.44, and the proceeds of their sales must have been something like $45,000.

Another large establishment is that of the Champaign Sugar Company, Illinois. The plant of this company was new last year, and cost in all, including crop, about $30,000. They manufactured the sorghum from 244½ acres, the yield of which was 2,282¾ tons of cane, topped and stripped, or with the seed and leaves taken off to prepare it for the mill. The amount of sugar made was 86,603 pounds, and of molasses 25,137 gallons. The receipts, therefore, must have been about $17,400, which is larger proportionately than those of the Rio Grande company. Their average yield of cane to the acre was 9⅓ tons, and of sugar to the acre 465½ pounds. The sugar was graded as extra yellow C, and sold at the mill for 8½c. Last season was particularly unfavorable for growing sorghum, on account of the lack of hot weather. But the results attained by the Champaign company were so prosperous that they have decided to plant a thousand acres this year.

The two establishments which have been mentioned are the largest in the northern states. But there are numbers of men all through the country who own mills and raise many acres of cane. At the St. Louis meeting, a Mr. Powell, of Wisconsin, who had sixty acres under cane cultivation last year, made a condensed statement of the season's work, in which he presented his estimate, based on actual results, of the cost per acre and the yield per acre. According to this estimate the total cost of planting, cultivating and manufacturing an acre of cane was $20.75, while the value of sirup, vinegar and seed obtained from it was $95.08, leaving a net profit of $74.93 per acre. It is not likely that many growers could make as good a showing as this for last year, but one-half that amount of profit would be more than most farmers could show for their best cultivated land in general crops, and few cane-growers would fall below $37 an acre for the average profits of their cane crop.

Taking last year's successful results as a basis, therefore, it is safe to infer that a much larger area of land will be put into sorghum this year than ever before. It is seldom that we have throughout the north such a cold, moist summer as was experienced last season. With the usual amount of hot weather in July and August, there will not only be a heavier growth of cane, but it will mature earlier and contain a greater quantity of saccharine material. One point seems to be fully settled by experience, viz., that, in order to get the largest yield of sugar, the cane must stand until it is fully ripe, and must be worked up on the same day it is cut. It may stand after maturity until frost comes without being injured. The earlier it ripens, the more time it gives for manufacturing. For these reasons a warm summer makes cane-growing a more successful business. That it is to be, at no distant day, one of the leading branches of agriculture among our northern farmers is the firm belief of those best qualified to form a judgment. Already the amount of sirup produced has considerably lessened the consumption of glucose. Manufacturers of glucose are complaining of dull markets. Country people are finding out that sorghum sirup is as cheap and far sweeter and more palatable than the lighter colored product made from cornstalks. In a short time city people will discover the same fact, and when they do, the reign of glucose will be over.

THE SILK TRADE OF JAPAN.

The correspondent of BRADSTREET'S at Yokohama writes as follows under date of February 5:

The United States are becoming customers on an increasing scale for the raw silk and cocoons of Japan, and hence the condition of our markets here should not be uninteresting on your side of the Pacific. Both in Europe and America the course of the demand for silk has been adverse during the last semester of 1882, and it is feared that there is no prospect of improvement within any reasonable time. Japanese producers have sustained unparalleled losses, and foreign shippers have found the season eminently unsatisfactory. The subjoined table will show the course of prices of filatures and kakedas, and the gradual decline in their value:

	Filatures.				
	1st class, 10-13 denrs.	*1st class, 14-16 denrs.*	*2d class, 12-16 denrs.*	*2d class, 14-18-20 denrs.*	*Kakeda, No. 1.*
July	.....	$660-670	$640-650	$620-630	.....
August	.....	670-680	640-650	620-630	$600-620
September	$635-645	640-650	620-630	590-610	605-615
October	650-660	650-670	630-640	600-620	620-630
November	630-640	630-640	630-640	580-600	590-610
December	625-635	610-620	580-590	560-570	590-610

Shipments for the half year 1882, as against same period previous year, were:

	1882, *bales.*	1881, *bales.*
France	9,998	4,318
America	5,927	2,673
England	2,369	1,458
Totals	18,294	8,449

It will be seen that there were no remarkable fluctuations in quotations. Largely increased exports, the almost continual decline in prices, and the unusual freedom of the Japanese in getting rid of their staple, are the most noteworthy features of the season, which to native dealers and sellers has been the most disastrous on record. But fall in price is not the main cause of the trouble—that must be found in the great appreciation in the exchange value of the national currency.

At the opening of the season dealers based their campaign upon a presumed exchange of yen 1.70 for the Mexican dollar, with hope and prospect of a further fall of the rate. By the end of December, however, currency stood at 1.40, and has since been quoted at 1.28. It will be easily seen that a loss of 20 per cent. and more on exchange alone in transactions about an article so costly as silk means ruin to many dealers; and we may well wonder that Japanese continue to embark in so hazardous a venture. In the words of a local writer, "It is a moot point whether the small producer, being unable to raise advances or find a market in the interior, will not be compelled to proceed" (to the treaty-ports) "with his pack on his back, and deal direct with the European trader."

In June last, before the opening of the season, it was recognized that the crop must be a very abundant one. The lowest Japanese estimate placed it at 10 per cent. above that of the previous year; but no one probably expected the very large export figures that have been already reached, as shown in the table above given, considerably more than twice as large as those recorded for the corresponding period in 1881. That the pecuniary condition of the country at large is not an enviable one is partly indicated by the fact that the natives have reserved very little, if any, silk for home consumption. In fact, the whole production is available for export. Altogether 18,294 bales have been shipped, and there are stocks to the tune of 7,000 bales to be disposed of; so that, with ulterior arrivals, we may safely predict that the whole season's (1882–83) export will exceed 25,000 bales. I regret to say that the increased production has not been equaled by improvement in quality and progress in reeling; the contrary has been the case, to the great disappointment of expectation. The best cocoons go to the filatures, the number of which has considerably increased, a fact which will partly account for the noticeable falling off in the quality of hanks; but there are other causes. It is said that the local magnates among silk-reeling communities have relaxed the reins of the wholesome supervision and admonition which once proved so useful to themselves and their dependents. Again, the fall in prices seems to have rendered producers indifferent or careless in reeling. Nor is even this the worst. Silk inspectors have found the necessity of keeping their "eyes skinned" this season, which has witnessed a deplorable, if not so far very extensive, reversion toward the malpractices of former years. Ostensibly good hanks are "cased" with inferior or altogether unsalable silk, cut skeins are concealed in filatures, and stones and other matter—always weighty, of course—out of place, are not infrequently discovered in bales from the interior. Then there is a growing disposition on the part of the guileless indigen to increase the standard of tare on hanks above the 2½ per cent. which has been hitherto tacitly accepted by the trade. Lastly, experts proclaim the bulk of this season's Japan silk of all classes to be utterly unsatisfactory in regard to size, which is much too coarse, and the reeler to be unwilling or unable to meet the requirements of his best customers, the French and American buyer. The former asks for a fine thread of denrs., the latter demands one of $\frac{1}{16}$ denrs. The finer thread is now hardly ever to be had, and our Japanese reeler, apparently believing that anything not of fine size will suit his American friend, has succeeded in producing an article not unlike whipcord, and totally unsuitable to anyone's requirements.

IRON AND STEEL IMPORTS IN JANUARY.

It has been a matter of common repute that the iron and steel trade of the United States during the past three months has been exceedingly dull. While the contracts for steel rails of domestic manufacture made since January 1 last will aggregate between 700,000 and 800,000 tons, or over one-half the domestic production of 1882, the prices at which the same were taken have been very much lower than at the corresponding time in 1882. Steel rails were quoted at about $60 per ton on January 1, 1882. Since the like date in the current year quotations for steel rails have been oscillating about $40. They have been as low as $38.90, and as high, for small lots, as $41. At present there are few orders being taken. As pointed out in our commercial reports from week to week, the season delivery contracts for domestic pig iron have also been very slack. Transactions of importance in American pig have been few and far between. Orders have been and are for hand-to-mouth lots. Mills are running on yard-scrapings, and a new order is followed by a call for but enough pig to fill it. Furnaces are running very close to orders, and the contracts thus far made will not aggregate much if any over 40,000 tons. Prices of No. 1 pig are stubbornly held up, but inferior grades of iron are slaughtered whenever an opportunity offers. The output of the domestic pig iron furnaces in 1882 was 4,623,323 gross tons, against 4,144,254 tons in 1881. The imports of British pig iron in the same years amounted to 487,000 and 394,000 tons respectively, or 9 per cent. as much as was made at home in 1881, and 11 per cent. in 1882. The depression which has been felt in the domestic iron trade in the concluding month of 1882 and the opening month of the new year are naturally reflected in the imports of foreign iron and steel, inasmuch as the stagnation is largely caused by the disinclination of consumers to buy while there is any likelihood of a disturbance of the tariff by Congress. The January imports of British iron and steel, as compared with like months in preceding years, will go far toward measuring the depth of the depression which has fallen over the industries under discussion. Late reports from Great Britain show that the exports of iron and steel from that country to the United States during January, in the years named, were as follows:

IMPORTS OF BRITISH IRON AND STEEL IN JANUARY.

	Tons.		
	1881.	1882.	1883.
Pig iron	16,054	31,360	21,226
Bar, angle, bolt and rod	1,085	2,039	1,316
Railroad, all sorts	7,921	27,423	6,666
Hoops, sheets and plates	220	3,733	1,315
Tin plates	12,177	19,959	16,371
Cast or wrought	725	598	772
Old iron	5,654	9,215	5,345
Steel, unwrought	3,775	15,430	2,357
Totals	47,581	110,557	55,308

From this it will be seen that while the January imports of British iron and steel in 1883 exceeded those of the like month in 1881 by about 7,700 tons, they were but one-half as large as the aggregate receipts of British iron and steel in January, 1882. There is little reason to believe there has been any improvement in receipts of foreign iron and steel during the month of February, and, judging by the ratio of imports of iron and steel in January, 1883, to those in that month last year, as an indication of the buying temper in this country, the existing business in the leading metals trades may fairly be rated at but one-half what it was one year ago. It is notorious that the falling off in business is more than that in some departments.

The importations indicate a falling away of 10,236 tons of pig iron in January, 1883, as against January, 1882, or about one-third; 1,323 tons of bars, angles, bolts and rods, or about one-half; nearly 21,000 tons of railroad iron of all sorts, or about three-fourths; 2,418 tons of hoops, sheets and plates, or less than two-thirds; 3,588 tons of tin plates, or between one-fifth and one-sixth; 3,870 tons of old iron, or less than one-half, and 13,075 tons unwrought steel, or about five-sixths of January's imports in 1882. The item of cast or wrought alone increased last January, the gain being 174 tons, or more than one-third on the January receipts in 1882. Supplementary to this list is given the following special exhibit of last January's imports of iron and steel rails, with comparisons:

	1881.	1882.	1883.
Iron rails	5,663	8,763	131
Steel rails	1,705	18,504	5,962
Total tons	7,368	27,267	6,093

The decline here is 16 per cent. under the figures for January, 1881, and 75 per cent. off from those of that month in 1882. The American demand for British steel blooms has died rapidly away of late, as our domestic works are more than equal to the demands made for that product.

Surely the malcontent American iron and steel makers who so seriously object to imports of those products should gather courage and confidence from the report for January. But it will be hard for others to do so, inasmuch as the loss of the importer is due to reduced demands, and not in all cases to a home supply of an equally good article at a cheaper or as cheap a rate.

AMERICAN MANUFACTURES.

In the March number of the *Princeton Review* Mr. Francis A. Walker contributes an article entitled "American Manufactures." The views expressed are lent additional interest by the author's wide acquaintance with his subject through his connection with the tenth census. In the article under discussion the writer's opportunities to collate and arrange data have been improved in every instance, while the economic bearings of the same are skillfully handled. This was to be expected from one who has gained recognition as an economist, although we confess to some disappointment at the unfinished shape in which the literary artist leaves the picture he has drawn. Just at the present time there are but few topics which command a wider interest than that of "American manufactures." Here, within the closing hours of the Forty-seventh Congress—one which has spent by far the greater part of its breath in torturing this very subject—there is abundant need of a calm and careful presentation of the general aspects of industrial

America, the comparative progress thereof, the causes of the growth shown and the drawbacks to its perfect and free development. It was in the expectation of such a review that we read Mr. Walker's article. And, as previously hinted, while it deals generously and fairly satisfactorily with the origin, causes and growth of American manufactures, it is disappointing in its final passages. The point made, if we apprehend the spirit of the article rightly, is that the "United States has failed to reach the position of a manufacturing nation assigned by the patriotic anticipations of our forefathers." Mr. Walker arrives at this conclusion after a course of narration of fact and of reasoning which we may summarize as follows:

American manufactures, in one sense, began with our national independence, inasmuch as prior to that time all forms of manufacturing industries were not only discouraged by the mother country, but in many instances positively prohibited by acts of Parliament. At the present time it is conceded the United States ranks second as a manufacturing nation. This prominence is claimed to be due primarily to the striking fact that in this nation, differing from all others, mechanical genius can be attributed to the mass of population. In other countries it is pointed out that the picked few only possess the attribute. General Walker feels this so deeply that he quotes the following twice to illustrate his meaning: "The American invents as the Greek chiseled, as the Venetian painted, as the modern Italian sings." The main reason attributed is that the inhabitants of the American colonies, particularly those of the north, were a picked people, "more truly selected in the respects of mental vigor, intellectual inquisitiveness, freedom of conception and self-reliance than any other which history has known. Another highly important characteristic of the fathers of the country was that they possessed and transmitted to their descendants all the desires, tastes and ambitions proper to a highly advanced society, with but small means for their gratification. In short, "necessity" was largely "the mother of invention." Another and not less important element of our industrial growth is given in the abundance of raw materials with which the soil is endowed.

With all these natural advantages, with a picked ancestry, early necessities and abundance of materials with which to work, Mr. Walker inquires: "Why did not the United States at once take the foremost rank?" "Why, * * * after nearly a century of effort, * * * are we still not the first, but only the second manufacturing nation of the world?"

In brief the answer made is as follows: It is replied that, among other reasons, the American people are not organizers in an industrial sense. In other words, that, advanced as we are in individual instances, notably railway and mill management, that Englishmen—proprietors or directors of industrial establishments—excel us in this particular. "The ingrained wastefulness" of the native American is, doubtless, in some degree an element of weakness in our manufacturing industry. The analysis of this American trait is sharp, and one which is quite admissible. It is added that if we make "utilization of waste a problem," American genius will grapple it; but "make it a matter of daily care and pains, and he will sovereignly despise and neglect it." The genius for petty economies is not his. This drawback, it is remarked, is met, however, by a high degree of commercial honesty by our manufacturers, and whatever the "sneers and flings" typified by the currency of the words "wooden nutmegs," Mr. Walker is still firm in the belief that "neither in France, England and Germany is it equally safe to buy goods upon representations made, or on the strength of trade-marks, or ordinary commercial brands, as here."

The answer made to the inquiry quoted at the outset of the above summary is that the reason why we have not met the patriotic anticipations of our forefathers is owing to the "extraordinary success of our agriculture;" the drains it has made on surplus capital which would otherwise have been invested in industrial enterprises. It is pointed out that from 1790 to 1820 there was in this country a vast accumulation of earned and saved wealth. From 1800 to 1820 we populated 10,000 square miles a year, bridged, trenched and built upon it. The rate of extension over our public lands from 1830 to 1850 was at the rate of 17,500 square miles, and from 1860 to 1880 20,000 square miles annually. This era of agricultural advancement unquestionably absorbed so much capital that it is largely responsible for our industrial position being short of first place at the present moment. It has been, therefore, the competition of the farm with the shop which has hindered the growth of our manufactures. Here Mr. Walker virtually stops, so far as the main point of his argument is concerned. So far as he has gone it is not difficult to agree with him. It is not easy, however, to understand why he presumes that the "patriotic anticipations of our forefathers" had defined the present time as one when we should rank first as an industrial nation. And it is not fully apparent why any fault is to be found because the United States is not to-day the foremost manufacturing nation, or because her agricultural development has prevented the more rapid advancement of the manufacturing industries. There is at present a sharp demand for all the agricultural produce we can raise. Our industrial capacity to-day is quite in some lines in excess of our home demand. It would appear that the course that has been taken in the development of the country could hardly have been better (so far as agricultural growth is concerned) if specially devised in view of future requirements. At the present time we are not able, except in a limited degree, to compete abroad with our industrial products. The causes of this it is not now necessary to discuss. Congress has been trying to deal with them during this session, but appears to have failed to agree on the subject. In short, our tariff system off and on since 1816 has had a very vital bearing on the question which Mr. Walker discusses, but which he appears to have ignored entirely.

THE FRENCH IN NORTHWEST AFRICA.

The current number of the London *Chamber of Commerce Journal* contains an interesting supplementary chapter concerning the progress of the "French on the Niger." We have heretofore printed in BRADSTREET'S some account of the advance of the French in their endeavors to construct a railway from Daker, at Cape St. Verde, on the west coast of Africa, northeast along the shore to Fort St. Louis, about 150 miles, and thence about 700 miles south of west to Bambaku, the nearest point on the river Niger. The original plan of the French engineers was not only to connect the west coast of Africa with the Niger by rail, thus opening up the valuable commerce of the Soudan country to the world, but to extend a line of railway from Algiers south across the all but inaccessible desert of Sahara to Soudan, thus placing a cordon about north-northwest and north central Africa and some of its richest commercial regions. The Saharan railway project, fortunately for the proposed investors, has been abandoned as impracticable. The Senegal railway from Daker and Fort St. Louis to the Niger is under construction, and, according to latest advices, promises to prove a success. This route into Soudan is said to be the only practicable one. The gold coast region (Guinea) prohibits the continued residence there of Caucasians, owing to fevers prevalent. The desert cuts off entry by other routes, and the rail connection described is thus left the only apparent outlet for the stuffs, carpets, ostrich feathers, gold and gums exported from Timbuctoo, the capital of Soudan. These products of native industry are now shipped east to the French post named by caravans, and consume about four months on the journey. When the railway is completed the trip from the coast to the river Niger will consume but forty-eight hours. From that point to Timbuctoo, by steam launch, eight days will be required, or ten days from the coast to the Soudan capital. Forts have been constructed along the line of the railway and at the termini. Thus far the garrisons have held peaceable possession. The gold, mentioned as a product of the region to be opened, is gathered by the women of the country, and the supplies of ivory to be gained by this projected tap upon Central African products are reported to be very large. The African territory south and southwest of the French coast have been explored by the French travelers, M. Olivier, Vicomte de Sanderval, M. Gaboriand, Dr. Bayol and others. Treaties have been concluded with the rulers of Senegambia and other adjoining countries permitting the construction of railways and opening of commercial relations with the natives by the French. These treaties have been renewed from time to time by succeeding rulers, the French advance agents succeeding in holding the ears of the African potentates despite attempts made by heads of neighboring English settlements to secure the same or like advantages. The privileges mentioned have thus been obtained by the French to the exclusion of the English and Portuguese. According to the latest newspaper intelligence Dr. Bayol and M. Olivier are preparing a new expedition to western Africa. The former has undertaken the task of facilitating, by negotiations with the warlike races of the Toucouleurs and Bambaras, the march of a French military column, which expects to occupy Bambaku, the terminus of the projected railway from the Senegal to the Niger, and there erect a fort. M. Coquereau, of Bordeaux, has also originated a scheme for the establishment of a French colony in the kingdom of Futa-Djallon. The *Chamber of Commerce Journal* adds that it will watch with interest the course of events which follow upon the entry of the expeditionary force of 1,200 men into regions in which the natives have previously held their own. Their mission is considered very important, as it is recognized that its failure will seriously affect the carrying out of the whole scheme for the railway. This becomes apparent when it is known that the provisions, etc., not only for the expedition, but for the French operating on the upper Senegal, will have to be obtained from the country whose people are to witness the invasion of 1,200 armed Frenchmen. The English writer concludes with this: "The chiefs in question are brothers of the king of Ségou, who is a powerful sovereign, and naturally suspicious of all foreigners."

OCCASIONAL NOTES.

The Philadelphia *Record* has a paragraph announcing that the reading-room in the Merchants' Exchange Building, on Third and Walnut streets, in Philadelphia, will be closed on April 1, after an existence of fifty years. At one time over thirteen hundred members contributed to its maintenance. The *Record* recalls the fact that the exchange was, in its heyday, one of the most important and interesting institutions of Philadelphia. In the days antedating the steamship, when foreign news, and much domestic news even, was brought in packets, merchants and privileged citizens gathered at the exchange to hear the latest marine and commercial news, and upon information there received the trading of the city was carried on. All the business interests of the city were represented in the exchange, the news of the day was discussed, and transactions involving very large amounts were carried on. But the old institution has outlived its usefulness, and is about to become only a memorial. The busy stream of activity has passed on in the path of progress, and the living interest that once attached to the place has departed. The story of the decline of the exchange is not an uncommon one. Since the introduction of electricity as a medium for the transmission of information the reading-room has declined in membership and interest. From time to time particular branches of trade, feeling the need of more speedy and more detailed information, left the old exchange and established places of their own. The patronage of the reading-room had been gradually distributed, and it had been a source of considerable loss for years. The unresting activity of the time will not even permit the institution to become merely a source of reminiscence. The reading-room is to be fitted forth in new bravery as an auction-room, so that its identity will gradually be lost; and thus the old commercial men, who might at least have been allowed the sad pleasure of greeting a staid contemporary in the midst of so much modern hurry and bustle, are to be denied that melancholy luxury.

Industrial exhibitions—exhibitions devoted to the display of materials and agents of production—have not been uncommon of late years, and they have been useful in stimulating the industrial progress which has been such a marked feature in the last thirty years. Such exhibitions have come to lose the charm of novelty of late. This feature cannot be said to be lacking from the exposition recently opened in England for the benefit of invalided soldiers and the families of those who were killed during the war in Egypt, or who have died from wounds or diseases consequent upon the campaign. The exhibition referred to is devoted to the display of trophies and instruments of war; of destructive agents, or, at any rate, agents whose productive properties lie hidden as yet awaiting the discriminating eye of some paradoxical economist. The trophies won and the weapons used in the Egyptian war have prominent place, but memorials of other wars are included. The most destructive engines of modern warfare are to be seen there, among them shells, handsomely mounted, Gatling guns, Nordenfeldt machine guns, etc. Exhibitions of this character would subserve a very useful end indeed (beyond the immediate purpose of their institution) if they would but suggest to the minds of those who view them a proper sense of the wastefulness and misery which every use of these terrible implements of man's contrivance entail, not only in their immediate but in their remote consequences, and thus do their share toward bringing about that era of universal peace which the philanthropic and the wise have labored to bring about—apparently in vain.

We are promised, from the famous London press of Messrs. Chapman & Hall, a notable work of considerable interest to America, namely, a history of "Newfoundland, the Oldest British Colony," by Joseph Hatton and the Rev. M. Harvey, the last-mentioned gentleman being an old resident of St. John's. The work will come very opportunely before the public at this time, seeing that it will contain an exhaustive account of the fishing industries, just as the exhibits are beginning to arrive at South Kensington for the International Fisheries Exhibition. The complete story, historical, geological and industrial, has yet to be told, and Messrs. Hatton and Harvey will supply a real want in a work that covers, for the first time, this important and interesting ground.

In addition to the article on "American Manufactures," which we notice more fully elsewhere, the *Princeton Review* for March contains other articles of general interest. One of these, on "The Utah Problem," by Henry Randall Waite, takes the view that the responsibility for the present condition of affairs in that much-discussed territory does not wholly lie at the door of the Mormon church, and much less at the doors of those who constitute the mass of the Mormon people. Justice demands, says the writer, that the responsibility be laid at the door of the government and people of the United States. There was an absence of wise legislation in the beginning, and then laws were passed calculated to suit the use of those whom they should have controlled. The means necessary for the cure of the existing evils he declares to be congressional legislation, offering special inducements to an agricultural and mining population opposed to the law-defying features of Mormonism, and providing restrictions preventing further sales of land to a population not of the character indicated; the abrogation of such features in the present constitution as are designed for the benefit of Mormons, including female suffrage; the making of the superintendent of schools a federal officer, and the investment of the executive officers of federal appointment with the widest authority for the correction of abuses consistent with the spirit of our institutions. Professor Felix Adler treats of "A New Experiment in Education." The system is termed by the author "the creative method," and is an advance on the system of object-lessons in that it gives lessons in the production of objects. It should be a valuable introduction and aid to industrial education. Mr. A. S. Meyrick deals with "Convict Labor and the Labor Reformers." His study of the subject leads him to the conclusion that other parts of our prison system should be thoroughly and radically recast before attempting the abolition of contracts for labor. Among the reforms which he suggests are the separation of our penal system from politics, the appointment as prison officials of persons prepared for their work by special training and recommended by fitness only, and the classification of convicts according to age, sex, and degree of criminality. The first of these measures he says has not been begun; the other two are still in their infancy. Most of the evils experienced under the contract system are not inseparable from it, and disappear entirely under conscientious and capable prison officers.

The *Pall Mall Gazette* has something to say about the disposition that has been manifested of late by certain classes in France and out of it "to despair of the republic," and it shows very conclusively the utter baselessness of the main ground upon which these men of little faith rest their misgivings. It has been said by some that the evil of abstention from the polling-booth has formidably extended of late years, and M. Jules Simon, in a speech more antithetic than sensible, predicted that "there will soon be but two parties in France, the dynamite party and the folded-arms party." This evil of abstention is a phantom. At the last general election out of 10,179,345 electors on the register 7,181,443 voted. The largest poll cast for the republic since the fall of the empire was at this election, when 5,128,442 electors voted for republican candidates. The anti-republican vote was much less than that cast at either of the general elections of 1876 or 1877. The general result would not have been changed even if all the absentees were added to the anti-republican column. A great part of these abstentions, the *Gazette* adds, may be accounted for by the fact that in many constituencies there was no contest, and the electors in consequence did not go to the poll, the whole of the electorate in uncontested constituencies being returned as absent. The percentage of abstention in both the United States and Great Britain, too, is

quite as high as in France, and it would be regarded as rather premature to despair of either of those countries as yet. From a comparison of the percentages of abstention at each of the general elections and plebiscites since the establishment of universal suffrage in France, it would seem that, as the *Gazette* concludes, Frenchmen have voted since the republic very much in the same proportions as they have always done, and that the number of abstentions corresponds with tolerable accuracy to the abstentions in other democratic countries.

Recently published French criminal statistics present some features of interest. There seems to have been a remarkable decrease in the number of crimes against public order during the last forty or fifty years, for while between 1836 and 1840 crimes of this class numbered 161 annually, between 1876 and 1880 they only averaged 9. Crimes against property, as a rule, have also decreased, there having been only 1,785 in 1876–80, as against 4,135 in 1836–40. A noticeable exception to this rule, however, exists in the case of incendiarisms, which have increased during the period mentioned from 87 per annum to 180, while those for 1881–82 numbered 244. In the majority of cases, it is said, these crimes are committed with the hope of obtaining the insurance. Crimes against morality seem to have more than tripled since 1826. The figures regarding murders and assassinations show no improvement, though it seems that much the larger number of these are confined to localities where the vendetta prevails. In those districts, it seems, the crime is regarded with extreme clemency, it being stated that in Corsica, for instance, indictments are found on the average in only 26 cases out of 100. A very grave feature of French crime statistics is the increasing number of juvenile offenders, 16 out of every 100 being under age, while 31 are from 20 to 30 years old.

The report of the public analyst of the city of London for last year has been published. From a view of the results arrived at by this official, it would seem that the milkman is perhaps the most constantly tempted among retail dealers. Of ninety-five samples of milk examined, Dr. Saunders found that fifty-four were adulterated, the average amount of water added being 8.7 per cent. Notwithstanding the large opportunities opened to the enterprising butter dealer by the discovery of the oleomargarine process, the samples of butter examined were found to be genuine. The tea samples were microscopically pure, but chemically of inferior quality. The sugars were free from mineral adulteration, but all contained filaments of fungi, and in some animal parasites were discovered. Of the samples of disinfecting powders examined, the active principle in all was from 25 to 50 per cent. less than represented by the seller. The samples of pepper examined were dirty and sandy from careless packing and grinding. The water supply of the city had in the main sustained an excellent character except in the autumn quarter, when the organic matter increased to an appreciable though not dangerous extent. This generally satisfactory condition of the water supply in so large a place as London speaks well for the sanitary arrangements of the city. The analyst reports that it has not been deemed expedient to institute any prosecutions during the year, partly on account of the practical difficulty experienced by all public analysts in obtaining convictions, and also on account of the great leniency shown by the magistrates in awarding punishment to proved offenders. He expresses regret that the officially appointed referees and censors in the government department of chemistry have not seen fit to publish standards of purity to enable the magistrates to arrive at just conclusions as to the extent to which any admixture of foreign substances with either food or drugs should be attributed to accidental and unavoidable circumstances, rather than to fraudulent intention.

The Manchester *Guardian* says that two questions are just now occupying the attention of those engaged in the production and distribution of manufactures in the English home trade, namely, "What is the present economical condition of the agricultural population, and how far has it been improved by the fairly good harvest of last autumn?" A recent parliamentary return throws some light on these questions, showing that in December, 1882, there was a slight increase over the pauperism recorded in December, 1881. The further fact is revealed, however, that the increase occurred almost entirely in the large centers of population, and that the purely agricultural districts exhibit decidedly less pauperism than they did at the close of 1881. The entire increase is more than sufficiently accounted for by the enlargement in the number of persons relieved in the metropolis and two other counties. In those parts of the country in which the industry is mainly agricultural, a steady, moderate increase is noted. The *Guardian*, in discussing the return, concludes that the facts presented in the return, in so far as they bear upon the questions referred to above, go to show that the agricultural portions of England are decidedly better off than they were a year ago, and that their condition was improved by the last harvest. They also afford ground for believing that if the home trade is not as good as it should be, the cause must be looked for rather among the laboring poor of London and the manufacturing towns of Lancashire and Cheshire than among the agricultural laborers. On the other hand, the *Guardian* says that in so far as the deficient power to buy manufactures, which is mainly implied in the term "bad home trade," is to be ascribed to classes above the pauperable level, there can be little doubt that it exists far more extensively among farmers and rural trades-people than among the middle and lower-middle classes in the towns and cities.

The same journal calls attention to the movement which has been set on foot for the abolition of tribunals of commerce in Paris. The proposal does not come from the mercantile community, but from the barristers practicing in the ordinary civil courts of Paris. The petition for the suppression of these tribunals is not, it appears, founded upon any serious charge of incapacity or maladministration, but it is represented that the jurisdiction of these courts is being extended more and more to non-traders, who may be brought within their range by the performance of a single act which the law regards as commercial, as, for instance, a transaction on the stock exchange. The petitioners contend that the judges in the tribunals of commerce are only in rare cases better qualified to try the cases brought before them than those in the civil courts, because they are for the most part not in the same branch of business as that in which the parties before them are engaged, and when they are not it is said they are even less competent to decide questions of commercial usage than the judges in the ordinary tribunals. It is asserted in addition that the divided jurisdiction leads to loss of time and to needless expense, owing to the uncertainty which often exists upon the question to which of the two classes of courts certain cases should be taken. The journal quoted states that it is informed that the tribunals of commerce absorb the majority of litigated cases, the one commercial court in Paris trying in the course of the year two or three times as many cases as the seven courts of the civil tribunal.

At the recent annual meeting of the Manchester Chamber of Commerce, the president, Mr. Lord, said that the course of trade between Great Britain and France, since the lapsing of the treaty between the two countries in May last, left little room for doubt that the action of the Chamber in advising the government not to conclude a treaty which should not be an improvement on the existing one, was very sound. He found that during the time since England had traded with France without a treaty, but with the advantage of the most-favored-nation treatment, only one important branch of the English textile trade had suffered. This exception was in woolen and worsted goods, on which there had been a decrease for the last six months of the year of 53 per cent. and for the twelve months of 26 per cent. He understood, however, from those most conversant with that branch of trade, that this was in some measure owing to the fact that previous to last year many English woolen and worsted goods were sent to France simply to be passed on to Spain. On the other hand, England had sent to France during the whole of last year 79 per cent. more cotton goods than in 1881. As far as could be seen, he added, the English were no worse off without the treaty than they were previously under it. In France, too, he said a free trade spirit was growing which, if left to itself, would lead in the course of a very short time to a reduction of the duties on many articles.

The Australians also have a railway problem. It appears that heretofore the ministry in Victoria have had the management of the railways, and that much dissatisfaction has resulted. Mr. John Wisker, a writer in the *Victorian Review*, says that the demand that the railways should be removed from political control is universal. He discusses the plan of leasing the railways to the highest bidder, but says that this method, although it might have been worthy of attention some years ago, does not now come within the range of practical expedients. The people, he says, constructed the railways there, after railway construction by means of private companies had been tried and proved to be a failure. If the experiments had proven a success the people, he says, might have grown up accustomed to seeing the lines in private hands, but after sustaining the labor and expense of constructing these works, they are not going to allow themselves to be deprived of the control of them, not to speak of the profits to be derived from them. The terror of Mr. Jay Gould's name seems to have spread to the South Pacific, for Mr. Wisker finds the principal objection to leasing the lines in the danger of establishing an enormous semi-independent power within the state. The railways of the colony form, he says, one of the most important departments of state, the greatest trading organization in the colony, and the most powerful industrial instrument possessed by the people. Whether the lines were leased to one or more individuals or companies, the results would be the same; the lessees might dispute among themselves, but would present a united front to the people, and there would arise a power within the state very little under the control of the state. This danger, the writer suggests, may not readily be appreciated by Australians, who have been accustomed to seeing their railways in the hands of ministers, but the danger is a very real one, and he adds that the most powerful man in the United States is Mr. Jay Gould, whose power rests chiefly on the control of railways. The writer advocates the establishment of an independent non-political board, which should have the fullest powers in all matters of management, and should be responsible only to the legislature. This does not seem like emancipating the railway management from political control, unless the board is to be non-removable by the legislature, and, in the latter case, there is the possibility of a practically irresponsible railroad oligarchy.

SPECIAL CORRESPONDENCE.

THE GROWTH OF LOCAL DEBTS IN GREAT BRITAIN.

London, February 14.—When writing to you recently upon the finances of London the accounts of the Metropolitan Board of Works and the Corporation of London were passed in review; but it may be observed that, as far as the first of those important bodies was concerned, the expenditure account was silent upon some very important points, police protection being the principal. Within the corporation bounds the police administration is intrusted, as it is in all provincial boroughs, to the civic authorities; but the Metropolitan Board has no hold upon the police organization of the large area they control in other ways, the metropolitan police being under the administration of the Home Office, and hence it is that the accounts say nothing upon that important head. There is reason in thus withholding the control of the police in those districts where the government and Parliament are carried on, and thus it is that so large a proportion of the protection of the metropolis is under the direct control of the state. Toward the maintenance of that control the government contributed in the year ended March, 1881, £451,705, and the balance was raised by a police rate collected through the medium of the local vestries, the sum required recently averaging nearly £550,000. These vestries, however, have no controlling voice in the matter. The administration of justice is also a matter with which the Metropolitan Board of Works does not deal, and under this head the government expenditure in London amounts to a very large sum. The establishments connected with the administration of justice, however, are to a large extent national; nevertheless, the county courts and prisons, as well as the higher courts of justice, are all in government hands, the total expenditure upon law and justice in the year named being £6,072,295. The largest item on the entire list was £1,163,361 for the Irish constabulary, which was in addition to a considerable appropriation for the Dublin metropolitan police, which are likewise under state control. Neither does the Metropolitan Board of Works finances deal with the cost of poor relief, which is intrusted to the management of the vestries already referred to, and these have almost all of them contracted debts.

The indebtedness, however, of the local authorities is by no means confined to the metropolis. On the contrary, almost every town and county has its separate indebtedness, which has grown very considerably in recent years. But the statements which have recently appeared and attracted a good deal of public attention as to the enormous growth of these local bodies are to some extent exaggerated. To say that the local debts of England and Wales rose in the nine years, 1871 to 1880, from £63,457,791 up to £137,096,607 (that is an increase of £73,638,816, or nearly £8,200,000 per annum, is to some extent overstating the case. A local debt which is not a local burden and for which the rates are in no wise liable should, I think, be removed from the category of local indebtedness. For instance, in this sum of £137,000,000 is included about £24,000,000 entirely secured upon harbor dues, the Mersey dock and harbor representing no less than £15,800,000 of that total. This is no burden upon Liverpool, however much as Lancashire manufacturers or Anglo-American merchants may find the payment of dock dues burdensome. In London there is quite as considerable an expenditure upon dock accommodation, yet the local indebtedness of the river Thames is set down at only $103,000, although the dock companies are authorized to levy tolls upon shipping just in the same way that the Mersey Dock and Harbor Board are authorized, and that board can no more raise money without parliamentary sanction than can the East and West India Dock Company. In reality, therefore, the Mersey Dock and Harbor Board, or the Tyne River Conservancy, are practically private companies, and their borrowings are no more local burdens than are the capitals of the London, Hull, or Southampton companies. I therefore purpose to exclude all local indebtedness which is not secured upon local taxation. In 1880, such local debts were in Great Britain as follows:

England	£107,003,378
Scotland	9,147,000
Total	£116,150,378

Thus it is shown that the local borrowings of England and Wales and Scotland together represent, upon a population of 29,700,000, rather less than £4 per head, which cannot be regarded as a very grievous burden. The great increase in the nine years was due to two items: 1, town improvements, and 2, the School Board. The latter was an entirely new creation within that period, and their borrowing reached £10,000,000 in England and Wales up to the end of that year. But the addition made to the loans for town improvements were no less than £51,000,000, or at the rate of nearly £5,700,000 per annum. This money has in the main gone for drainage, street improvements, and the purchase of gas and water works, which have in the interval been transferred largely from companies into the hands of borough corporations. Here again such acquisitions, which are in reality self-supporting, can hardly be classified as local debt, for if the entire seventy or eighty millions of gas and water companies capital still outstanding were transferred to-morrow to the district authorities they would not add anything to the rates, such works in this country being almost without exception more than self-supporting. Indeed the parliamentary restriction as to dividends above 10 per cent. and for further issues of capital above 7 per cent. are found to be very beneficial to consumers, and many corporations which have purchased from the companies find the business profitable and an actual relief to the rates.

Nor must it be forgotten, in summing up the total of this local indebtedness, that it has been borrowed in no inconsiderable amounts from the state. The Public Works Loan Commissioners were, at the date of March 31, 1881, owed nearly £27,000,000 by these local bodies, upon which the interest charged was 3½ per cent., and as the bulk of the remainder has been borrowed at 4 per cent., we shall be overstating the interest charge if we reckon it at 4 per cent. upon £116,000,000. Indeed, there must be a very material deduction to be made from that amount, so large a proportion of borrowings upon town improvement rates being for works directly reproductive. We shall be within the mark in thus writing off a third from the total, and in stating that the ratepayers are not burdened with interest upon more than £75,000,000, which at 4 per cent. would represent £3,000,000 a year, or about two shillings per head. The burden of British local indebtedness must, therefore, be regarded as a very trifling matter, and the outcry with regard to the increase in the rates is due largely to the extent which improvements are effected out of current revenue instead of out of borrowed money.

It will be seen that no mention of Ireland has been made in all this, and it must be admitted that Irish credit would stand upon a very different basis to that of English or Scotch boroughs were it not that the state had come so largely to the relief of borrowers across the Irish channel. Out of £18,000,000 borrowed for public works in Ireland, some millions have actually been remitted, and interest is in arrear to a further extent. There is at

the present time outstanding due by Irish local authorities something over £7,000,000, including advances to railway companies and for water works. But Ireland is always dealt with leniently in this country.

THE PROSPECTS OF NEW ORLEANS.

New Orleans, February 22.—The feeling of confidence in the future of New Orleans, which has recently sprung up among all classes of the mercantile community here, is based on the real or imaginary traffic which the various newly-completed or projected railway lines is to pour into the lap of the Crescent City. It would hardly, however, be safe for the people of New Orleans to persist in the folly of relying exclusively on the natural advantages of the geographical position of their port. In fact, it would be well for them to be doing something else, and quickly too. The writer takes the liberty of suggesting to her thoughtful business men, capitalists and property holders, that unless New Orleans takes prompt and effective steps to retain her commerce, she may, by the very railroads upon which she founds such great hopes, be turned into a mere way station. To be sure she has assured deep water at the jetties, a grand harbor, and a magnificent river front, giving facilities to an almost limitless trade, but what of all this when her antediluvian method of handling goods is considered. Besides, the tendency of the cotton crop to move by interior lines of transportation is becoming more marked every day. Competition has reduced railway rates to the Atlantic seaboard to a point which permits Baltimore, Norfolk and other cities to make favorable through rates on cotton destined to Europe. Indeed, it cannot be doubted that, in the present condition of business, with margins for commissions or profits cut down to a minimum, many shipments of cotton have, in consequence of the heavy terminal charges at New Orleans, been diverted to Atlantic ports.

The following figures are pertinent to the subject with regard to cotton. Percentage of the cotton crop received at New Orleans during twenty-seven years, exclusive of the period of the war, when no correct record was kept:

	Crop.	*N. O.*	*Per ct.*
1850-51	2,355,257	933,369	39.63
1851-52	3,015,029	1,373,464	45.55
1852-53	3,262,882	1,580,875	48.74
1853-54	2,930,027	1,346,925	45.97
1854-55	2,847,339	1,232,614	43.27
1855-56	3,527,845	1,661,433	47.09
1856-57	2,930,510	1,435,000	48.81
1857-58	3,113,092	1,576,409	50.62
1858-59	3,851,181	1,669,274	43.34
1859-60	4,075,770	2,130,125	45.77
1865-66	2,154,476	711,629	33.08
1866-67	1,951,988	702,131	35.96
1867-68	2,430,893	579,231	23.84
1868-69	2,200,557	794,205	35.12
1869-70	3,113,502	1,142,097	36 66
1870-71	4,347,066	1,446,490	32 28
1871-72	2,974,351	957,538	32.19
1872-73	3,930,508	1,240,384	31.56
1873-74	4,185,534	1,221,608	29.18
1874-75	3,832,991	993,775	25.91
1875-76	4,699,288	1,415,959	30.36
1876-77	4,485,485	1,195,035	26.64
1877-78	4,773,805	1,391,519	29.15
1878-79	5,074,155	1,187,365	23 44
1879-80	5,701,252	1,504,054	26.12
1880-81	6,605,750	1,606,184	24.31
1881-82	5,456,048	1,190,711	21.82

It seems quite evident from these figures that New Orleans must place herself in a position to compete with formidable rivals, and this can only be done by departing from her antiquated methods of handling cotton and adopting some system in harmony with the progressive spirit of the day.

In connection with this subject the writer learns that a new enterprise has been organized in New Orleans for the purpose of erecting cotton sheds and compresses, in view, particularly, of providing storage and shipping facilities for the cotton to be brought to New Orleans by railroads on the west side of the river and avoiding the etxra expense of ferriage across, drayage, presses, etc., inasmuch as the cost of handling will be reduced to a minimum in the projected establishment. A tract of land covering 400 acres, with a river front of 1,700 feet on the Mississippi river, situated opposite the business portion of the city, has been purchased at a cost of $100,000. The cotton sheds which it is proposed to build represent a storage capacity of 170,000 bales, equal to a handling capacity of 1,000,000 bales during the season. The present charges on cotton received at New Orleans are said to be $1.60@$1.70 per bale. Those interested in the new enterprise assert that the expense of handling cotton can easily be reduced to $1 per bale by their method, and leave a clear profit of 25c. per bale to the company. Subscriptions to the capital stock now amount to $250,000, and it is reported that the directors will make no contracts for building or machinery until $500,000 is subscribed. The total cost of the land, houses, presses, warehouses, etc., is roughly estimated at about $1,000,000. The cotton sheds will occupy only a small portion of the company's land. Ample space will remain for the erection of warehouses for the storage and handling of western produce, sugar, grain, coffee, etc.

LETTERS TO THE EDITOR.

BULLION CERTIFICATES AS CURRENCY.

To the Editor of BRADSTREET'S.

SIR—I inclose a pamphlet entitled "Bullion Certificates," in which I have considered the desirability of issuing fractional currency against deposits of bullion in bulk, thereby saving much actual coinage and making a national paper currency, each dollar of which is secured by its equivalent in metal. As to gold certificates, no really debatable question can possibly arise, because all are agreed in preserving the use of gold, and these certificates will facilitate its employment. As to silver certificates, there are two classes of persons to please. Those who simply desire that silver pass for money at its market value, whatever that value may be—this is the sincere and by far the most numerous class—and those who believe in a ratio of value established by law, and desire to maintain the legal advantage which the law relating to the coinage of the present silver dollar gives to the silver interest. To this latter class the following propositions may appropriately be made: If the demand for silver is equivalent to the price indicated in our silver dollar, that price will be speedily attained under this fractional certificate system, and, if the demand prove greater, the excess of value will be attained also. If, however, the price indicated by the present silver dollar is not attained, then it is unjust that they ask for silver bullion a legal tender quality above its actual price. To the whole silver interest it may be said that under this system, more than under any other, will a steady and reliable market be afforded. The use of silver certificates is entirely practical. They would soon come to be understood, and readily used; they would meet with no organized hostility from the gold interest, and thus a healthful, permanent demand would be created for this industrial product. By virtue of their superior safety and convenience, bullion certificates cannot fail of pleasing the masses, and in time they will come to be considered, in a peculiarly appropriate sense, "the people's money."

Professor W. G. Sumner, of Yale College, writes me, and says: "I believe that bullion notes are the only legitimate form of paper currency. I heartily approve of all that part of your scheme which relates to gold." Mr. E. L. Godkin, of the *Nation*, says: "Its effect in clearing the public mind of the prevailing fallacies about the nature of paper money, and about the power of the government over the currency, would, I think, be very valuable." Charles F. Adams, Jr., of Boston, says: "Could you induce Congress to pass such a measure as you suggest, I would look upon you as a public benefactor. You would remove what I regard as the most dangerous rock in the way of our industrial prosperity."

I am anxious to obtain the written opinion of all those who may favor a "bullion certificate system," either as applied to gold alone, or as applied to both silver and gold, with the view of concentrating the influence of good thinkers, and thus securing favorable action by Congress. I would draw your attention to the fact that the proposed measure is merely permissive. It does not propose to change a single law upon the statute book. It simply adds the quality of legal tender to bullion, and permits the issuing of certificates. It does not in any way interfere with the coinage of gold or silver as at present, nor with the issuing of paper money by the banks. It simply provides increased facilities for the employment of both metals. If the system does not meet with public approval, people will not avail themselves of its privileges; if, on the contrary, it does supply a want, its existence will be abundantly justified.

Respectfully yours, I. W. SYLVESTER.

U. S. Assay Office, New York, February 27.

SCIENCE AND LEGISLATION.

To the Editor of BRADSTREET'S.

SIR—My attention has been called to a letter in your issue of the 15th, in which Professor Sumner has been so kind as to handle me with severity. The real point in controversy is the nature of an economic law, though the question in hand has to do with laws of money. My position on monetary laws is that habit, character, prejudice, degree of education, state of social development, and the like (these may or may not be expressed in legislative enactments) are essential for determining the monetary conduct of people; or to make my statement general, every law in political economy is a law of human conduct, and as such human sentiment is the character-giving element in it.

But, replies Professor Sumner, "This has nothing to do with the laws of money as deduced by science. Nature's forces get their full effect." The manifest answer to this is, there are no "nature's forces" in monetary science; the forces out of which this science is built pertain to human character. There is an essential difference between the inclination of a potato to sprout, the inclination of men to believe that two and two make four, and the inclination which impels men to conduct their business according to certain rules. A science may be based upon any of these sets of facts, but these sciences will be different in character and ought to be regarded differently by scientific men. Not to recognize any difference, and in consequence to follow the study of political economy according to methods learned in mathematics or physics, is to proceed irrespective of facts.

And now, with regard to monetary laws, Professor Sumner believes that Gresham's law is a law of scientific pretensions. Is it a "nature's force" or a human sentiment that lies back of it? When analyzed it is found to be simply a convenient way of stating that there is in men an inclination to keep the good money and give their neighbors the bad when either serves equally well for a single exchange. Or, again, respecting the scientific character of the law, that current prices fluctuate with the amount of circulation there will be no question, but there is no more "nature's force" in this than in the other. This, too, is only an easy way of saying that every man insists that his money shall get into circulation because, as we now use money, he can thereby get a profit. Abstract the human sentiments from economic laws and there are no laws left. One, therefore, is obliged either to say that these sentiments are "nature's forces" or to deny the instruction of Professor Sumner as a teacher of scientific method. That these sentiments are not "nature's forces" is proven by the fact that they are not universal in application. They are restricted by territory and by grade of development. A Boston man does not follow the same business rules as does a Patagonian, nor is that which is now true of our civilization necessarily true of a past civilization. For example, consider the law that current prices depend upon the money amount pertains especially to modern times and to peoples of our own habits and sentiments. Try it in China. Test it by the industrial transactions of the fourteenth century. Call up Abraham and see if the price of his flocks and slaves varied with "the amount of circulation." The fact is, this law depends for its validity and importance upon the previous development in society of a certain conception respecting the use of money; and to say that the business tendency which it discloses—a tendency that is true only of people with a certain history at their back—is a "nature's force" is evidence of mental provincialism.

This question is, of course, at bottom a question of method in the study of political economy, and it would be inappropriate to speak further of the matter. Permit me, however, to call attention to the fact that since the time of Mr. Mill there has not been a single economic problem solved, or a single step taken toward a better understanding of the economic questions of the present by any member of the school of writers to which Professor Sumner has allied himself. But, they ask, is not our method logical? Yes, the method is logical. What, then, do you complain of? I complain that it is totally inadequate to the demands now made upon the student of industrial science.

Very respectfully, HENRY C. ADAMS.

Ann Arbor, February 26.

LEGAL NOTES.

The Supreme Court of Wisconsin, in the case of Karow et al. vs. The Continental Insurance Company of New York, decided on February 20th, held among other things that where there was nothing in the policy to the contrary, a fire insurance company was not relieved from liability because property covered by the policy was burned by the assured while in a state of insanity, nor unless the burning was caused by the voluntary act, assent, procurement or design of the assured.

In a recent case, London & Lancaster Fire Insurance Company vs. Graves, where two buggies which were insured as "contained in the frame building occupied by the assured as a livery stable," were burned while in a manufacturing establishment where they had been placed to undergo necessary repairs, the Superior Court of Kentucky held that the assured was entitled to recover the value of the vehicles from the insurance company. The court, in its decision rendered on the 21st ult., took the ground that whether or not words in a fire-insurance policy describing the situation of personal property insured are to be regarded as a warranty, depends upon the nature of the property. If the property is such as is generally kept in one place, and the use of which does not require it to be moved, the location is an essential element of the risk, and is generally a continuing warranty; but where the ordinary use of the property requires it to be moved from place to place the presumption is that it is in use, and that the policy is issued with reference to such use.

According to a decision of the same court, also rendered on the 21st ult., Eastern Kentucky Railway Company vs. Holbrook, a common carrier of freight has a lien upon each shipment so long as it remains in its possession for the charges thereon, but it cannot refuse to receive freight because back charges for other shipments have not been paid, nor can it, by mere notice to the shipper, acquire a lien on a shipment about to be made for such back charges.

The Supreme Court of Indiana, on February 20, decided some cases sustaining the general principle that the negligent signer of a promissory note cannot defend against it in the hands of a bona fide holder. In one these, Baldwin et al. vs. Burrows, the court said that, ordinarily, one who signs a note without reading it is guilty of negligence, and held that, where one was able to read, and signed a note in the presence of his wife, who could read, and neither read the note himself nor asked his wife to read it, but signed it, relying on the representations of the persons with whom he was contracting, he was guilty of negligence in the signing, and could not defend against a bona fide holder of the note.

Another case bearing upon the same doctrine was that of Yeagley vs. Webb, which was an action by the indorsee of a note payable in a bank against the defendant and appellee as maker. The answer of the defendant averred in substance that two men agreed with her to put a lightning rod on her dwelling house for a certain sum; that after the rod had been put up, one of the men drew a note for her to sign, representing that it was for the amount agreed upon; that he read a note for the sum then mentioned, which she signed. The answer further alleged that the defendant was unable to read writing; that she relied wholly upon the representations of the person who drew the note; that there was no one at her house who could read writing except the men who tendered her the note; that her nearest neighbors were at a considerable distance from her; that she did not have time to go and get them to read the note to her; that she believed the note in suit was the one she signed, believing it to be for the sum agreed upon, and that she never intended to execute such a note as the one in suit appeared to be, it being for a sum many times the amount for which (as she understood) she had given her note. The court held that the answer was insufficient; and that the facts set out therein brought the case within the rule that the maker of a promissory note, payable to order in a bank and negotiable as an inland bill of exchange, is liable to an indorsee for value before maturity, if such maker was guilty of negligence in failing to use reasonable care to inform himself of the contents of such note.

The last number of the *Reporter* has a note of the case of Greve vs. Dunham, decided by the Supreme Court of Iowa in December last, and which is of interest as illustrating the extent of the vendor's right of stoppage *in transitu*. It appears that the plaintiff sold to a firm at Pattersonville, Iowa, and shipped to them by rail from Minneapolis a certain lot of lumber. The sale was on credit, the freight was not paid, and the lumber remained in the possession of the railroad company. The firm to which the lumber was sold became insolvent, and certain of their creditors issued writs of attachment against the firm. An agent of one of the attaching creditors paid the freight. Another person who had been acting as the agent for the insolvent firm at Pattersonville receipted to the railroad company on the same day for the lumber, and the sheriff thereupon levied upon the same and removed it to a warehouse owned by the insolvent firm. The plaintiff afterward tendered to the sheriff the amount of the freight paid, and claimed possession of the property, which was refused. Judgment was had for the plaintiff below, and the defendant appealed. Judge Day, in delivering the opinion of the Supreme Court, said that the court below decided correctly in declaring the plaintiff entitled to the possession of the property and in requiring him to pay the amount of freight advanced by the attaching creditors mentioned. The court considered the doctrine settled that the vendor's right of stoppage in transitu

was not defeated by the arrival of the goods at the place of destination, and that it would only be terminated by the passage of the goods into the actual or constructive possession of the vendee. The insolvent firm had refused to take the lumber, and there was nothing to show that they had receded from that refusal. The lumber was held by the railroad company at the time of the levy of the attachment, but it did not appear that it was held by them as agents of the consignees. It did not therefore appear that the lumber had come into the actual or constructive possession of the insolvent firm. It could not be claimed that a creditor of that firm could pay the freight and bind them to an acceptance of the lumber. The judgment below was affirmed.

A recent action in the Queen's Bench Division of the Supreme Court of Judicature gave occasion for a clear summing up of one branch of the law of libel, by Mr. Justice Stephen. The case was that of Watt vs. Emmott and Amall, tried on the 14th ult. The plaintiff was a consulting chemist, and had written a book on mechanical industries, which was reviewed and somewhat severely criticised in an article which the defendants were respectively the publisher and the writer. The writer of the article described the book as being of such a character as a schoolboy might write after perusing an old volume of the Penny Cyclopædia, and said that while the kind of writing indulged in by the author of the book might injure nobody, yet that it became "a gross nuisance to publish such stuff, and only one remove from a fraud on the public to sell it." The defendants pleaded that the review in question was a bona fide comment upon a matter of public interest, and also that the statements contained in the alleged libel were true in substance and in fact. It was proven on the trial that the plaintiff had very slight knowledge of many of the subjects discussed. Mr. Justice Stephen, in summing up the case, said that there was a wide latitude given for the discussion of matters of literature, art and science. When a man published a book he invited criticism, and he could not complain of any criticism of the book unless it went beyond all fair and proper limits. It was more or less a question of degree. One was not to be accused personally of fraud because he happened to write a book, but another was at liberty to express his opinion of it quite freely, and it might be rather rudely, in order that the public at large might have the advantage of a perfectly free and unfettered expression of opinion about it. The publication of a malicious attack, capable of serving no other purpose than that of holding a man up to shame and contempt apart from his book, was another matter. A man was not to be held liable for libel and to be visited with damages even if a jury should think that some of the expressions complained of went too far, and were mistaken as to matters of fact, if they were the real expression of the opinion of the writer. Concerning the material part of the alleged libel, that it was "a gross nuisance to publish such stuff, and only one remove from a fraud to sell it," the learned judge said that was strong language. It was a coarse way of saying over again what the writer had said before; but it was not a legal wrong to use hard words about a book if they did not contain some serious imputation upon the person who wrote it. The defendants recovered a verdict. Mr. Justice Stephen's acknowledged abilities naturally give great weight to the statements of the law made by him, and the case itself and the disposition made of it cannot fail to be of interest to those who wield the dangerous power of the press.

BUSINESS NOTES.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* for the week ended February 10 was 238, against 242 and 265 respectively in the corresponding weeks in 1882 and 1881. England and Wales together had 217, against 218 and 249 in the weeks indicated in the preceding years; Scotland 17, against 16 and 11, and Ireland 4, against 8 and 5.

Canada is exercised concerning the extension of its foreign trade. To this end a reciprocity treaty is proposed with Brazil. The latter country has been buying fish from the dominion maritime provinces, and would take more but for her own heavy duty on fish. Canada also wants to buy Brazilian surplus products. A movement is on foot at Montreal to establish a line of steamers between that city and a Brazilian port.

A German paper, *Naturen*, warns its readers concerning the alleged rich silver mines in Saxony. It is added that there are over one hundred companies claiming valuable silver lands in that region. They are busily engaged at present in endeavoring to sell shares at home and abroad. The paper named adds that it is well known that traces of silver ore are constantly found in the galena and cadmium yielded by these mines. This fact hardly warrants the investment of the most daring speculators in Germany.

Berly's (English) "Electrical Directory," recently issued, gives an inspiring idea of the magnitude and importance of the numerous industries connected with this illuminating and motive force. A comparison of this volume with that issued the year before conveys a good conception of the rapid strides made in the utilization of electricity during the year. The directory gives a well-arranged record of the industries connected with electricity and magnetism, together with names and addresses of manufacturers throughout England.

Statistics concerning the Peruvian guano deposits, recently prepared and made public by the Chilian Minister of Finance, represent that there are but 650,000 tons of this variety of fertilizer remaining in that country—that is, in the known and worked deposits. This information is peculiar, coming as it does close on the heels of a request by Chili for bids for 1,000,000 tons of Peruvian guano. Up to the present time Chili has sold 179,900 tons of guano, for £592,000. One-half of this sum went to the bondholders, and the remaining half, about $1,480,000, into the Chilian treasury.

The English labor market, according to the London *Labour News*, continues brisk, although the agitation in reference to wages and hours of work interferes with it to a certain extent. Building and railway contracts continue to be actively progressed. The Australian and New Zealand demands are fair, and industrial products intended for those markets are in improved request. At Sheffield the cutlery and hardware trade is increasing, but Bessemer and crucible steel is falling away. In the textile trades there are some wages disputes, but work is fairly abundant. The Huddersfield cloth trade is quiet, although Canadian and other American orders are improving.

"A new substance," consisting of a mixture of gelatine, glycerine and tannin, has been prepared by M. Potel and submitted to the "French Society of Encouragement," which, as alleged, is absolutely impermeable to the air. The inventor has named it after himself, "Potcline." When warmed the mixture becomes nearly liquid, and takes the form of the object to which it is applied. It has been used as a coating to preserve meat. The claim made for it is, that at the temperature of 112° it envelopes the meat, kills the germs of putrefaction, and prevents any new germs passing in. According to M. Potel, meat thus treated will retain all its freshness for two months. If this proves true on practical experiment the compound cannot fail to prove to be of lasting value.

The custom foreign societies have of offering prizes to stimulate literary or scientific effort is far more prevalent than any like incentive to special effort in the United States. The desirability of the method has frequently been called in question, but it may well be doubted if the results attained do not fully encourage its continuance. The latest announcement in this direction is from the Industrial Society of Berlin, which offers a number of prizes. Among them are the following:

For a method of precipitating zinc, by galvanism, from its dilute sulphate solution	£50
For the examination of German crude petroleum with directions for preparing a good commercial product	75
For a criticism of the usual indications of the value of iron and a proposal of more useful indications	15
For a plan of the technical arrangements of a public institution for the examination of tissues in order to oppose the frequent adulterations met with in textile industries	15
For ameliorations in salt mines and salt works	75
Total prizes offered	£230

The following national banks have been organized: The Citizens' National Bank, Lancaster, Ky.; capital $75,000; John M. Higginbotham president, J. P. Sandifer cashier. The City National Bank of Lawrenceburgh, Ind.; capital $100,000; De Witt Clinton Fitch president, Walter Fitch cashier. The Old National Bank of Grand Rapids, Mich.; capital $400,000; Solomon L. Withey president, Harvey J. Hollister cashier. The First National Bank of West Point, Miss.; capital $52,500; P. B. Dugan president, T. M. Moseley cashier. The First National Bank of Springville, N. Y.; capital $50,000; William O. Leland president, Elmer O. Leland cashier. The First National Bank of Colorado, Tex.; capital $100,000; W. Scott president, F. W. James cashier. The Continental National Bank of Chicago, Ill.; capital $2,000,000; Calvin T. Wheeler president, John C. Black cashier. The Bank of Hamburg, N. Y.; capital $25,000; George M. Pierce president, H. S. Spencer cashier. The State Bank of Tonawanda, Pa., has been organized; capital stock $100,000; J. A. De Graff president, B. L. Rand cashier.

The following changes in national banks are announced: National State Bank of Troy, Charles Warner president in place of H. Ingram. Metropolitan National Bank of Cincinnati, William Means president in place of J. F. Larkin. First National Bank of Mattoon, Ill., W. R. Dunlap president in place of W. R. Warren. First National Bank of Mason City, Ill., John Van Horn president in place of A. A. Blont. German National Bank of Millerstown, Pa., G. F. Fetzer president in place of H. L. Westerman. First National Bank of Bennington, Vt., J. G. McCullough president in place of Trenor W. Park. National Bank of Owenton, Ky., J. W. Johnson president in place of H. P. Montgomery. Second National Bank of Springfield, Ohio, Amos Whitley president in place of S. A. Bowman. Trumbull National Bank of Warren, Ohio, Harmon Austin president in place of C. Smith. United States National Bank of New York, L. C. Murray vice-president, E. G. Sherman cashier.

A compilation of the statistics of the Scotch pig iron trade for thirty years has been prepared by Mr. Edward W. Crawley, of Leeds. It is of especial value to speculators in Scotch "warrants" of pig iron, and is of use to dealers in Scotch pig iron everywhere. The reduction of stocks of Scotch pig during 1882 is commented on as indicating an unusually healthful condition of the trade. The Scotch consumption of pig iron alone has increased, the total—930,000 tons—being unprecedented. This total includes 585,000 tons of Scotch pig and 345,000 tons English iron, the Scotch consumption of the former showing an increase of 188,000 tons against 1881, while the figures representing the consumption of English iron in Scotland show a decrease of 75,000 tons against 1881. Mr. Crawley's statistics include the shipments to the various foreign markets and the consumption in Great Britain, a comparative table showing the total annual productions, shipments, stocks, consumption in Scotland, average number of furnaces in blast, number in blast on December 31, and the prices of warrants in each year of the thirty from 1853 to 1882.

Another plastic composition has been designed especially as a substitute for ivory, which is fast growing scarce and expensive. Celluloid has attained a wide use as a substitute for making various articles formerly constructed of ivory. Common among these are piano keys, knife and fork handles and certain kinds of personal ornaments, umbrella and cane handles, and the like. It has proved quite acceptable as a substitute, although in no sense competing with the genuine goods. The new candidate for favor in this direction is mentioned by the London *Furniture Gazette*. It is composed of a solution of 200 parts of casein in 50 parts of ammonia and 400 parts of water, or 150 parts of albumen in 400 of water. To the solution the following are added: Quicklime, 240 parts; acetate of alumina, 150 parts; alum, 50 parts; sulphate of lime, 1,200 parts; oil, 100 parts—the oil is to be mixed in last of all. When dark objects are to be made, from 75 to 100 parts of tannin are substituted for the acetate of alumina. When the mixture has been well kneaded together and made into a smooth paste it is passed through rollers to form plates of the desired shape. These are dried and pressed into metallic moulds, previously heated, or they may be reduced to a very fine powder, which is introduced into the heated moulds and united to a homogeneous mass by strong pressure. The objects are afterward dipped into the following bath: water, 100 parts; white glue, 6 parts; phosphoric acid, 10 parts. Finally, they are dried, polished and varnished with shellac.

The St. Paul *Pioneer Press* of recent date printed a long editorial concerning "Minnesota as an iron producer." A brilliant future in this direction is predicted, owing to the discovery of "practically inexhaustible" deposits of a superior quality of high-grade iron ore in the Vermillion Lake region, about one hundred miles north of Duluth, in St. Louis county. The *Pioneer Press* is evidently so impressed by the nature of the discovery, as well as the efforts making to untilize the same, that it feels justified in claiming that Minnesota "is destined to take a leading place in the national production of iron, if it is not finally able to dictate terms to the industry of the world." The final clause of this claim may be pardoned as the outgrowth of an excusable pride in state industrial development. It will hardly stand the test of all the facts bearing on the situation. The alleged discovery—and we know of no reason to doubt what is told concerning it—is to the effect that the Vermillion Lake ores analyze from over 65 to nearly 70 per cent. of metallic iron, while the proportion of sulphur and phosphorus is low, almost beyond precedent, from .053 to .078 per cent. The deposits lie from 75 to 100 feet "above the railroad track," thus facilitating mining the same. At one mine there is "an exposure of pure iron" 75 feet wide at the surface. The ore lies in a hard formation. Naturally, "the first step" must be to put the Vermillion region in communication with markets through the ordinary lines of transportation. It appears that "the Minnesota Iron Company" owns this enormous deposit of superior ore, and has sent a force of sixty men, with a portable saw-mill, to clear the land, prepare sites for operations, and make ready for a population of from 1,200 to 1,500 persons which it is said will be on hand for the opening of the first season's work. A bill is before the Minnesota Legislature to extend the time allowed the old Duluth & Iron Range Company to build a railroad to the seat of proposed operations. With or without this extension of time, we are informed that this railroad will be built. The *Pioneer Press* here remarks that it is important that this road should be so built as to arrange to ship said ore to manufacturing centers within the state, instead of by the lake route from Duluth to eastern iron centers.

It will be recalled that those who have goods to sell are seldom affected by motives of sentiment or local pride to the detriment of pocket. The owners of the ore, when mined, will want a market. If that market be not offering in Minnesota, the ores, if as desirable as alleged, will undoubtedly come east. It behooves Minnesotians, then, to have ready sufficient improved iron and steel works if they hope to retain the product of the Vermillion Lake ore regions. Otherwise they will lose some of it, and their state will then have to defer the time when it "is finally able to dictate terms to the industry of the world." But the *Pioneer Press* forgets one element in discussing the advantages which this bed of superior ores may give her in supplying high-grade iron and steel. Recent improved methods of manufacture of steel—and it is with steel that the supremacy in metal industries will rest—enable the manufacturer to produce the same from low-grade ores at competitive rates of outlay. When Minnesota considers her distance from the eastern portion of the country (omitting foreign countries), and the expense of transportation, she will recall that high-grade ores are not now so essential to the cheap production of steel. Furthermore, there is cheap coal to be looked after. Has Minnesota all of that which she will require at competitive rates, as has Colorado? Still the find in the Vermillion Lake region is valuable. The *Pioneer Press* is but too enthusiastic, perhaps, in characterizing a piece of good fortune.

The St. Petersburg correspondent of the London *Ironmonger* illuminates the pages of that journal with the statement that "the naphtha (petroleum) question in Russia has become a burning one." This is based on the fact that the celebrated Nobel Company (operating in the petroleum region on the western shores of the Caspian sea) have declared that they are prepared to reduce their prices. They are now selling in Izantzin "the best kerosene, equal to American," at 70 copecks per pood, or £4 5s. per ton, and residuum at 11 copecks, or 14s. per ton. It is confidently stated that "American oil, and its various products, are banished from the Russian markets." This appears to be a broadside to the allegations recently made by the American oil trade that the Russian product cannot hope to compete with them, owing to the inferiority of the Russian oil. It likewise tends to confirm the opinions of our Vienna correspondent, lately published, as to the low cost at which Russian oil can be laid down in European markets. The quantities of Baku oil in view for the season of 1883 are stated to be enormous—the best authorities estimate the amount at 25,000,000 poods. Referring to the Asiatic oil trade, it is remarked that the borings carried out on the other—the Asiatic—side of the Caspian, near the railway on the road to Merv, have proved a great success. One well, without any pumping, is said to give a regular flow of ten tons per day. The area of land found to be workable is over 1,500 acres, and it lies within thirty miles of the line of railway, to which it is now connected by "horse railway." It is supplying the fuel for all purposes on the railway. The engineers estimate the output of this new oil field at 800,000 tons per year.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS

The only feature the stock market presents this week as compared with last week, or, indeed, any since the opening of the year, is an improvement of prices accompanied by a distinctly perceptible feeling of growing public confidence. It cannot be said that the advance the market made in January through the efforts of the combination of "reformed bears" at any time inspired public confidence; which perhaps was mainly due to their wretched policy in selecting for the most conspicuous advance stocks notoriously in bad odor in the street, known to be worthless, or nearly so, and which every one was well aware were put forward only because the members of the combination had bought largely of them and were most anxious to get out from under what had proved an unexpectedly heavy burden. An advance of the market led in such a way impressed itself on everybody as being artificial and manipulated, liable at any moment to break down in ruin; and it did so break down, as people had expected. That brief upward movement of the market, then, may be said to have been one which the majority of the traders of the street looked upon with the hope that it might prove solid—that is, that the great outside public might be induced to come in and sustain by buying—but with faint expectation that it would be so. When the sudden tumble came, and the confused decline of prices after it, few were surprised, and the people most hurt were the half-dozen would-be leaders.

The market seems to have last week struck its lowest level from that fall. Prices did not go down from their highest height of January to where they were last week in one great crash, but they fell from one ledge, as it were, to another lower one, pausing a little at each and rebounding slightly, then starting down again. This week they have been growing better gradually, and with developing strength apparently, and there has been, in consequence, an improved state of public feeling in the street, and hope begins to be expressed that, despite the squally outlook in some quarters, the market will really receive some genuine public support. It is perfectly true, however, that it is yet entirely in the hands of the professionals, and a combination may be formed which would give it another crushing blow at any moment. It is tolerably sure that the men who went in to work up the "January boom" have dropped most of the stocks they had, have pocketed their losses as best they could, and that the combination has been entirely disintegrated. The bull combination now at work, if there be one, is practically a new machine. Such an one is said to have been formed at the close of last week, with Mr. D. O. Mills for its leader. The reliance of the new combination is virtually on the approach of spring. February, as was said before, is a bear month, for in that month the forces of nature in this climate are apt to work with destructive energy. This year it has been a specially bear month from these and other causes. With the coming of milder weather a better feeling is aroused in the public mind. Trade begins to revive, the sunshine itself exerts a cheering influence on men, and the rigors of winter are looked upon as happily passed. Then we have some distinctly favorable circumstances in the condition of commerce; for it is certain that there will be a good demand for our crops abroad this year, and the large increase of our exports over our imports is now showing itself so far that exchange has fallen to a point where the possibility of importing gold in the near future begins to be talked about. The decline here indicates that the movement of our securities from abroad has practically come to an end. We have heard that the foreign houses here estimate that there are now left in the hands of foreign investors only about ten per cent. of the amount of American railroad securities held abroad two years ago. The steady selling by the foreign holders has had the effect of keeping exchange at rates far higher than it should have been according to our exports and imports of merchandise. This selling has ceased, and some foreign buying is reported. It is certain that the trunk line roads are earning largely, and the southwestern systems report good earnings. The northwest roads, however, have been heavy sufferers by the winter; but they may make it all up as soon as the weather gets a little warmer. The experience of Wall street is that the break-up of winter generally brings with it a smart bull movement of the stock market, and the signs are that we may get one now.

But there are some ugly rocks ahead which may speedily wreck it. Congress adjourns, but the tariff is left to be a subject of further agitation, and we have already seen that tariff-reform agitation is worse in its effects on trade than tariff reduction. But protection men seem blind even to their own interests. They cry out against all change, when everybody but themselves is able to see that change is inevitable at some time. Had the tariff been reduced now, a stability would have been given which could not fail to have been of great benefit to business. Then the weeding-out operation in trade is proceeding with unusual severity. It creates depressing uncertainty, for if a bank were to smash the effect on the stock market would be crushing. To work up a bull movement while such a contingency as this is hanging over the street is like walking on thin ice. In the same category must now be placed a threatened stringency in the loan market, due to large shipments of money to the west. The bank statement of last week will be seen to be a bad one, showing that the banks were getting down near to the 25 per cent. line of their reserve against liabilities; and this week it is expected that the small surplus left above it will be found to have been swept away. The loan rates on call have been steadily rising this week, as the banks sent away more and more of their funds, and 7 per cent. was touched on Thursday. The average for the week may be placed at about 5½ per cent. Time loans have been 6 and 7 per cent. for a couple of weeks past. A sharp upward movement in stocks might give us a 10 per cent. rate on call in short order. In passing it may be noted that there were listed on the Stock Exchange this week $55,000,000 par value of new securities, stocks and bonds both; so that no one need fear any dearth of investments for all the surplus money he has.

The Bank of England reduced its discount rate on Thursday from 3½ to 3 per cent., so that the London market may now be considered to be in good shape. With loanable funds abundant there, some buying of our securities ought to result, and doubtless it is due to the easier state of things over there that some renewed foreign buying has already been reported. The reduction of the bank rate caused a corresponding reduction here in the rate or short date exchange, and the posted rates are now $4.82 and $4.85; the actual rates are $4.84 @ $4.84½.

In government bonds there has been a slightly heavier tone, in consequence of the failure of the tariff and revenue bill in Congress. The failure to reduce taxation means an accumulation of surplus in the Treasury, and a continuance, in consequence, of bond redemptions. The closing prices yesterday were:

	Feb 23, bid.	—March 2,— bid.	asked.
U. S. 4s extended (3½ p. c.)	103¾	103½	—
U. S. 6½s 1891, registered	112¾	112⅝	112⅞
U. S. coupon	113⅜	112⅝	112⅞
U. S. 4s 1907, registered	119½	118½	118⅝
U. S. 4s 1907, coupon	119½	119½	119⅝

Saturday's bank statement was, as above said, a bad one, and its publication had a visibly depressing effect on the stock market. It showed an increase in the loans of $2,038,900, so that they are now larger by nearly that amount than they were at the same time last year and a reduction in the surplus reserve of $2,465,825, leaving it only $1,209,000 above the 25 per cent. line. At the same date last year, however, the banks were below that line. The following are the comparative totals of the statements of February 17 and February 24:

	February 17.	February 24.	Differences
Loans	$323,352,100	$325,391,000	Inc. $2,038,900
Specie	59,999,300	58,504,300	Dec. 1,495,000
Legal-tenders	21,353,700	20,023,500	Dec. 1,330,200
Deposits	310,712,700	309,275,200	Dec. 1,437,500
Circulation	16,543,300	16,498,700	Dec. 44,300

The proportion of total reserve to liabilities is now 25.38 per cent., as against 24.52 per cent. in the corresponding week of 1882.

By cable from London: The Stock Exchange failures caused a fall in American railroad securities, but all are now higher except Atlantic mortgages. The proposed Erie lease is viewed adversely here.

By telegraph from New Orleans, La.: Sterling, 1¼ points lower. Consols, ⅝ higher.

President Dowd, of the Hannibal & St. Joseph Railroad, confirms the report that the company, failing to make any satisfactory arrangements with the Chicago, Burlington & Quincy, has positively decided to build the proposed extension to Chicago, and that work will begin at once. The route, already partly surveyed, will not connect with the Wabash, but will be an independent line north of the Illinois river, and running through the counties of Adams, Schuyler, Fulton, Peoria, Marshall, Lasalle, Grundy, and Kendall. All of these counties except the first and last named have larger deposits of bituminous coal than any other counties in the state. It is understood that at Auburn Station, nine miles out of Chicago, the new Hannibal & St. Joseph extension will connect with the Chicago & Western Indiana, and run into the city and into the depots of that company.

COMMERCIAL.

The dispatches to BRADSTREET'S this week from the trade centers of the United States again tell of improved feeling in general trade, and this in spite of a comparatively large increase in the number of failures reported for the week. The cotton situation is unchanged save as a somewhat greater faith in big crop figures gives a downward tendency to prices. Wheat showed a declining tendency up to last Thursday, in consequence of the improvement in the weather throughout the west and also of the increasing arrivals at western points. But the cable reports of the very unfavorable aspects of the crop prospects in the United Kingdom and in western Europe on that day caused an advance in the foreign prices of both wheat and corn, and this was reflected in an advance in American markets, which for the week was nearly 1c. per bushel on wheat and from 1½ to 2c. on corn. The exports of breadstuffs from the seven Atlantic ports for the week to February 24 were a little less than in the preceding week. The imports of dry goods at the port of New York for the week to Friday night, March 2, were $4,502,568, against $2,149,123 last week, showing an increase of over 100 per cent. The amount withdrawn from warehouse also showed a nearly equal increase, the total for the week being $4,157,947, against $2,311,083 in the preceding week. These are the largest figures of imports this year, and show a large increase in the volume of business. The iron market has recorded no improvement over last week, except as to the general feeling throughout the trade. That is better, and is due, as may be supposed, to the approach of the adjournment of Congress. Manufactured iron is quiet. Refined bar is dull at 2.2@2.3c., and common is held at 2c. only. Plate is more active at 2.4@2.5c. Steel rails are quiet, and there is little doing in that direction. Consumers and makers are apart about $1, the former offering $38 and the latter asking $39@$40. American pig is dull. A leading company have contracted with water-main makers and others to deliver between 30,000 and 40,000 tons of forge iron at $20.50, which is $2.50 below the nominal market. This indicates the quality of rebates in prices made in order to gain what business has already been transacted. The outlook now is for the making of season delivery contracts in about two weeks at figures under the existing nominal rates, say $23@$22 against the $25@$24 which are commonly quoted. Petroleum continues dull and depressed without prospects of an early recovery. This is due to the fact that a number of wells are being sunk at the north end of the Cooper tract, and that they are likely to be brought in within the next ten days. Should any of them prove to be gushers, it would open the subject of the extent of the pool of petroleum underlying that tract. The anthracite coal trade is about as last reported. Production is still restricted, stocks are low, and all hands are waiting for the issuance of the spring schedule of prices, which is likely to be announced in two or three weeks. Bituminous coal is quiet, and will probably remain so until the opening of navigation. The prospects are for higher prices for bituminous during the season, owing to the rail freight arrangement in shipments to the seaboard. Ocean freights are dull. The supply of tonnage is ample, and berths are not scarce. But there has been a dearth of inquiry, and rates under these circumstances have ruled low. There has been some little inquiry for charter for petroleum, but not enough to absorb the supply of vessels. Higher prices for wheat have restricted export. The customary spring movement of surplus product is looked to to correct this at an early date. Wool is steady, but quieter. Speculation has subsided, and demand is for legitimate requirements. There were 260 failures in the United States reported during the past week, 56 more than the preceding week, 108 more than the corresponding week of 1882, and 126 more than the same week of 1881.

BREADSTUFFS.

The general situation as regards breadstuffs has changed but little in the last week. More favorable weather in the United States has had some effect to prevent any advance in the American markets, and this has been reflected in the foreign markets. As remarked in last week's issue of BRADSTREET'S, the prospect for large exports of wheat from Russia during this spring are good. Mail advices from Nicolaieff, of February 9, also say that the weather has been favorable for the next crop of all kinds of grain. Since the first freezing of the ground in the early part of the winter, the ground has remained thickly covered with snow, so that the winter grain has not suffered at all, and though, of course, more depends on the character of the spring and summer weather, it is believed the crops will be good in all that part of Russia.

In western Europe, however, the general situation as regards the prospect for next year's crops has not improved much, while in the United Kingdom it has grown worse. The *Mark Lane Express*, of the 12th, says: "There has probably never been a worse prospect for the wheat crop than there is to-day." The *Express* estimates the acreage in the United Kingdom at two-thirds of last year, and says that of this area one-half was sown early and one-half late. The early sown looks well, but the late sown is very poor, and a great deal of it will be plowed up. The *North British Agriculturist*, of February 15, says the crop prospect in both Scotland and England is bad. The weather since the advent of February has been unusually stormy and unsettled. All the rivers of Scotland and many in England have been in a flooded condition, and thousands of acres of lands in both countries have again been under water.

The latest estimates are that if there is an average yield on the area planted in wheat in the United Kingdom the crop will be 26,000,000 bushels less than last year, but there is very little hope of an average yield per acre.

The Australian wheat crop just harvested in December and January is reported to be of good quality, and the yield is somewhat larger than that of last year.

The French wheat crop of 1882 was estimated at 318,000,000 bushels, but it is now estimated that in consequence of its poor quality and light weight it was not equal to more than 284,000,000 bushels. It is not known how much the area of land planted for the crop of 1883 will be diminished, but the difference will be large. The usual area averages 17,000,000 acres. Last year it was 17,877,206 acres. The average quantity required for seed is about 42,000,000 bushels, and for food is probably near 300,000,000 bushels.

AMERICAN WHEAT MARKETS.

The wheat market of Chicago has been depressed during the greater part of the week by bright, clear weather, which affords a better prospect for the autumn-sown wheat, and also has a tendency to increase the arrivals of wheat at western points, because it makes better country roads throughout the northwest. New York has to a large extent been governed by Chicago, but on the whole prices had not declined much in either market up to Wednesday, the 28th. On Thursday the firmer foreign markets caused an advance in New York, and large speculative buying orders were also sent from New York to Chicago, which caused an advance in that market. The bright, clear weather at the west, however, and the improved reports from the winter wheat region, together with the probability of increasing arrivals at western points, will have a tendency to prevent any very rapid advance. In fact if it had not been for the continued firmness of the foreign markets and the certainty of short crops in western Europe next summer the American markets would have declined. The total arrivals of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis in the week to February 28 show a large increase, as the result of better weather, being 1,361,794 bushels, against 819,454 bushels in the week to February 10, and only 375,541 bushels in the week to February 2. The total stock of wheat in Chicago on February 24 was 5,686,000 bushels (of which 5,200,000 bushels were of the grades deliverable on speculative contracts), against 3,774,000 bushels on the corresponding date of last year. It will therefore be seen that the strength of the market is entirely in the aspect of foreign situation.

The course of the wheat markets for the week may be seen by the following closing prices for April wheat in Chicago and New York on the dates mentioned, viz.: New York, February 24th, $1.25; 26th, $124⅝; 27th, $1-24⅞; 28th, $1.24¾; March 1st, $1.25⅜; 2d, $1.26. In Chicago, the prices were as follows, viz.: February 24th, $1.09¼; 26th, $1.08½; 27th, $1.09⅛; 28th, $1.08⅝; March 1st, $1.09½; 2d, $1.09¾.

The visible supply of wheat in the United States and Canada (exclusive of the Pacific coast) on February 24 showed an increase of 535,806 bushels, as compared with February 17.

CORN.

Corn has followed the same course as wheat during the week. The markets both in New York and Chicago drooped under the influence of fine weather at the west and large receipts at western points until Thursday, when the firmness and slight advance in foreign markets gave an impetus to speculation and caused an advance of 1c. per bushel. The total arrivals at the seven western points above named, in the week to February 28, were the large amount of 2,837,102 bushels, against 1,730,777 bushels in the week to February 10 and 1,258,421 bushels in the week to February 2. There is, however, the fact that the visible supply of corn is still small in the United States, and that there is still an active consumptive demand in all the eastern and seaboard markets. The speculative deals are largely in May contracts, and the advance in May corn from the 1st of February to the 1st of March has been nearly 5c. per bushel, while April has advanced only 1½c. Oats have advanced in sympathy with corn to some extent, and are also the subject of active speculation, a New York house being credited with holding the bulk of the February contracts in Chicago. The market for February oats was practically cornered, but the advance in prices as a result of the corner was comparatively small.

The course of the corn market will be seen by the following prices for May corn at noon in New York and Chicago, viz.: In Chicago, February 24th, 61c.; 26th, 60⅜c.; 27th, 61⅜c.; 28th, 61½c.; March 1st, 62⅛c.; 2d, 62⅝c. In New York, February 24th, 71½c.; 26th, 71⅛c.; 27th, 71⅝c.; 28th, 71⅞c.; March 1st, 72⅛c.; 2d, 73⅜c.

The visible supply of corn in the United States on February 24, as compared with February 17, showed an increase of 388,783 bushels, and of oats 66,797 bushels.

PROVISIONS.

The provision trade is rather quiet, though prices are firm and have advanced a little during the week. The stocks at the principal western packing points are comparatively small, and at Chicago are held by strong parties, who are expecting to advance prices. There is still an active consumptive demand from almost all points of the United States, but especially from the south and southwest. The aggregate receipts of hogs at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee, in the week to February 28, was 167,149, against 136,187 in the preceding week, and 156,222 in the corresponding week of last year. The season of winter packing ended on the 1st of March, and it is presumed that packing operations will soon be diminished. The foreign demand for American hog products of all kinds continues active, and prices have advanced some during the week.

THE PROVISION MARKETS BY TELEGRAPH.

From Chicago, Ill.: Pork dull, weaker; scarcely any speculative buying; stock 277,941 bbls. mess, 22,730 other classes. Lard dull, weaker; stock 93,963 tierces contract, 10,065 off-grades. Meats dull; stocks, all classes, 111,361,000 pounds; March 15, last year, 123,633,000.

From St. Louis, Mo.: Provisions higher and firmer than for months before, but not very active. Cattle and hog values well sustained on heavy demand, but packers buy lightly because of warm weather.

From Wilmington, N. C.: The provision market is steady, with a fair demand.

From Memphis, Tenn.: Live stock receipts during the past week have been moderate, and good prices have been obtained on all grades. The meat market is firm, with advancing prices.

From Nashville, Tenn.: Provisions firm and higher. Cattle receipts fair; prices high; demand good. Banks report money in moderate demand; rates unchanged.

From New Orleans, La.: Though liberal supplies of provisions are expected, the market is strong.

THE NEW YORK DRY GOODS MARKET.

The American dry goods market during the past week has shown a slight improvement over the previous. The demand is steady, but not of large proportion, buyers seemingly selecting only for actual requirement. Still trade is evidently on the increase, and the present month is expected to yield good results. The jobbing trade report very fair business for the week, mainly with buyers from the interior, the near-by trade not yet being in the market. The wholesale clothing trade is rather flat and their prospects of a good season are not encouraging. Collections in this line are quoted rather slow. Hosiery and mens' furnishing reported of fair proportions, though business not up to the usual standard in this branch.

The importations of dry goods for the week is as follows:

	No. of packages.	*Value.*
Total amount of dry goods imported during past week	15,669	$4,502,568
Total amount of dry goods, duty paid, for past week	14,560	4,157,947

This shows an increase of about $2,000,000 on previous week's marketings.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, March 2.—Manchester cottons are very weak, the price of yarns being an eighth of a penny down. The expediency of short time is being discussed. Stocks are increasing.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Boston, Mass.: Dry goods jobbers report that, notwithstanding the interrupted travel, floods, etc., in the west, their trade outside of New England is good. It is early as yet for the opening of eastern trade. There is a fair business doing in woolen goods and in hosiery, and underwear trade is excellent. Collections are not very good.

From Providence, R. I.: The print cloth market is quiet and steady, the amount of sales being light; 64s are quoted at 3¾c., less ½ of 1 per cent., and 56x60s at 3 3/16c. There are about 130,000 pieces on hand. The cotton market is steady, and sales are moderate; middling uplands are worth 10¾c., and middling gulfs 11c; there are about 8,000 bales on hand.

From Philadelphia, Pa.: Trade has been more active in most lines. Orders are coming in more freely from the south and southwest. The near trade demand is light. Prices are firmer on some makes of plain cottons, and there is an improving tendency on fancy cassimeres and worsteds. The general market is in good shape and the outlook fairly encouraging.

From Pittsburgh, Pa.: The dry goods trade shows a slight improvement over last week; still the movement is moderate. Collections improving.

From Cincinnati, Ohio: Dry goods have met with steady consumptive sale only. Collections fair.

From Cleveland, Ohio: Dry goods trade for the week presents no new features, and is in the main satisfactory for the season.

From Columbus, Ohio: Trade in dry goods has improved considerably over last week, and now appears fairly active.

From Toledo, Ohio: Trade in dry goods is unusually good for the season.

From Chicago, Ill.: Dry Goods more active on orders and personal selections. Many full stocks selling. Collections better.

From Peoria, Ill.: The dry goods trade is reported good, and among dealers a confident feeling for the future prevails.

From Detroit, Mich.: In dry goods the volume of business improved somewhat over last week, but the market is not very active yet.

From Louisville, Ky.: Dry Goods houses are having a brisk and liberal order trade, with indications of an early and healthful spring movement.

From St. Louis, Mo.: Dry goods are steady and firm, with a better trade than last week.

From Kansas City, Mo.: Dry goods sales have increased, and a good, steady, though not extra heavy, business is being done.

From San Francisco, Cal.: Oregon buyers are in town, and there is considerable movement in dry goods for shipment to Portland.

From Baltimore, Md.: The dry goods market the past week presented an active appearance and sales were larger than any one week since the beginning of the year, yet they did not exceed the average of the same period last year. Prices are firm.

From Richmond, Va.: The dry goods trade has been quite fair, and is improving.

From Norfolk, Va.: Dry goods jobbers are doing a fairly active trade.

From Wilmington, N. C.: The dry goods jobbing trade has been fairly active.

From Savannah, Ga.: The dry goods market has been more active, and sales for the week have been fair, with increasing demand.

From Nashville, Tenn.: Trade in dry goods has been fair and improving.

From Memphis, Tenn.: Dry goods sales have been very active, and prospects are favorable for a further increase.

COTTON.

The New York cotton market has remained unchanged at 10 3/16c. for spot middling uplands. The sales for the week have been for consumption 2,346 bales, and for speculation 214 bales. Included in the above are 100 bales to arrive. The deliveries on contract amount to 1,300 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7½c.	7½c.	9 1-16c.
Strict ordinary	7 15-16	7 15-16	9⅝
Good ordinary	8¾	8¾	10 7-16
Low middling	9 11-16	9 11-16	11 5-16
Middling	10 3 16	10 3-10	11¾
Good middling	10⅝	10½	12⅛
Middling fair	11 3/16	11¼	12⅞
Fair	12⅛	12	13⅝

The market for spot cotton closed quiet.

The future market at New York has been easier, the price having declined an average of 8 points for near months, and 10 points for later months. The sales for the week foot up 477,000 bales, against 729,800 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
March	10 18c.	10.21c.	11.82c.
April	10.27	10.34	11 94
May	10.30	10.48	12.11
June	10.52	10.63	12.28
July	10.65	10.77	12.44
August	10.77	10.88	12.58
September	10.50	10.60	12.21
October	10.18	10.26	. .

The future market at New York closed easy.

The total receipts of cotton at the ports since September 1, are 4,897,987 bales, an increase of 886,899 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	971,675	385,045
New Orleans	1,347,203	1,096,010
Mobile	286,710	236,374
Savannah	712,934	668,883
Charleston	507,541	500,431
Wilmington	116,332	125,539
Norfolk	661,359	832,036
Baltimore	45,003	24,777
New York	122,278	141,159
Boston	130,710	104,573
Philadelphia	51,081	44,787
Other ports	231,175	227,424

The receipts at the ports for the week were 133,783 bales, against 129,509 last week and 51,116 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 44,974 bales, against 44,742 bales last week and 16,537 bales for the corresponding week last year. The shipments for the week were 61,323 bales, against 56,145 bales last week and 35,612 bales for the corresponding week last year. The stocks for the week were 280,340 bales, against 291,286 last week and 313,544 for the same week last year.

The Liverpool market closed easy, prices having declined to 5 9/16d. for middling uplands and to 5 11/16d. for middling Orleans.

The sales for the week at Liverpool were 41,500 bales (of which 30,000 were American), against 61,000 bales (of which 44,000 were American) last year. The stock in port is 965,000 bales (of which 704,000 are American), against 731,000 bales (of which 527,000 were American) last year. The total imports for the week were 79,000 bales (of which 62,000 were American), against 63,000 bales (of which 52,000 were American) last year, and the amount afloat 292,000 bales (of which 204,000 are American), against 430,000 bales (of which 217,000 were American) last year.

The Liverpool future market has been dull and flat. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery:

	To-day.	*Last week.*	*Last year.*
March	5 35-64d.	....	6 36-64d.
March—April	5 35-64	5 32-64d.	6 36-64
April—May	5 39-64	5 43-64	6 40-64
May—June	5 42-64	5 45-64	6 45-64
June—July	5 46-64	5 48-64	6 49-64
July—August	5 50-64	5 53-64	6 51-64
August—September	5 54-64	5 57-64	6 54-64

The Manchester market closed dull and lower.

COTTON REPORTS BY TELEGRAPH.

From New Orleans, La.: Bears begin to estimate more than 7,000,000 bales for the cotton crop. Bulls maintain that present prices of silver and easy money in England improve the outlook abroad, and that manipulation will control stocks after March 15. Bears contend that the latter view is premature, as large stocks are appearing at home and abroad, which will prevent manipulation controlling until June.

From Columbus, Miss.: Good weather prevailed during the past week except very heavy rain on one day. Planters are availing themselves of the good weather and making good headway. Cotton receipts light; trade moderately good.

From Helena, Ark.: The weather is favorable, and the remnant of crop is being rapidly marketed.

WOOL.

Trade has been quieter at all the seaboard centers during the past week. The volume of business has been fair, however, and the market generally retains the firmness noted in last report. Speculation appears to have subsided, and sales have been mostly to manufacturers. Some of the latter bought very little during the recent excitement, and are still reluctant to do so, as their product has not correspondingly improved in price; but the rates for wool seem to have been firmly established, and the policy of delay is likely to afford no relief to buyers. Stocks of long staple wools are almost exhausted, and orders are still going abroad for English-grown fleeces to supply the deficiency in the domestic clip. Foreign markets have hardened since the opening of the London auctions last week, and prices on competing grades of clothing wools are now 1 @ 2c. per pound higher than in December. It is expected that this improvement will check importations. Domestic carpet wools are selling fairly, but prices do not respond to the improvement in clothing grades. Supplies of New Mexican and similar wools are ample. The outlook for this class of stock is less favorable than for other descriptions, as foreign carpet and blanket stock is competing at relatively low prices; but the demand is improving, and better prices are anticipated if foreign markets advance. The general outlook for the wool trade is encouraging, both as regards demand and prices.

IRON.

The iron market as yet has enjoyed no actual improvement, but, as may have been inferred from the discontent exhibited at the congressional debate over the tariff, "the feeling" in iron and steel circles is greatly improved. This, of course, is due entirely to the prospect of relief from congressional interference, owing to the near approach of the time for the adjournment of that body. The condition of the market for American pig is unchanged. It is extremely dull, and contracts, as a rule, have been few and far between. The current quotations for No. 1 and No. 2 are $25 and $24, but it is a matter of common notoriety, among members of the trade at least, that on such contracts as have already been made these figures have been subject to shading. One of the leading pig iron companies has already agreed to season deliveries aggregating between 30,000 and 40,000 tons of No. 2 at $20.50, or about $2.50 below current quotations of that grade of iron. Watermain companies have taken most of this. There is good reason to believe, after careful inquiry among leading manufacturers and representatives, that in about two weeks season contracts will be freely made at figures averaging about $23 and $22, respectively, for No. 1 and No. 2.

The Scotch pig iron market at New York continues unchanged as to prices and feeling. The sales during the week will foot up about 1,200 tons of various brands, and the arrivals about 1,500 tons, some of which will go into store. About 1,000 tons of Bessemer pig iron have also arrived, having been sold prior to its receipt at this port. Manufactured iron is dull. Refined bar continues to be quoted at 2.2@2.3c., and common at 2c. Plate iron has exhibited more activity, and is bulletined at 2.4@2.5c. Steel rails are dull, with but few orders. Consumers offer $38. Makers hold out for $39@$40.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, March 2.—There are no signs of a revival in the iron trade. The decline in Cleveland pig since January 1 has been 3s. 6d., and in Scotch 2s. 6d.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: The trade is still dull, and values are weak and unsettled, but more buyers are in the market, and a number of transactions are likely to be closed as soon as the tariff matter is determined. Stocks are low. Eastern furnaces are working as usual. Mills are running, but the output is restricted. A good business is in sight.

From Pittsburgh, Pa.: There is no change in the position of merchants' iron business. Orders are still scarce, and prices about same as during the past two months. Manufacturers feel confident that a much better condition of trade is near at hand, and while they do not anticipate any large appreciation in values, believe that better rates will prevail. With present light stocks a slight increase of orders would make the mills busy. The demand for nails has already set in, and the stoppage of the western factories for two weeks from March 5 insures the continuance of present card rates during the coming summer. Building this season promises to be brisker than ever before. Stock of nails on hand is very light, and some factories will not be able to fill orders until after the resumption.

From Cincinnati, Ohio: Iron slightly demoralized, but with increased volume of trade. Much in this line depends upon Congress.

From Cleveland, Ohio: There is nothing specially new in the iron trade. Demand and prices remain unchanged, and the feeling generally is one of watching and waiting, with a settled belief that any solution of the tariff question will, to some extent, effect an improvement in the business.

From St. Louis, Mo.: Iron rates are unchanged. A good demand from merchants and small consumers is developing for manufactured iron. Pig iron continues weak and dull.

From Detroit, Mich.: The iron market is very dull and unsettled.

From Chicago, Ill.: Bar iron dull and irregular. Pig in slightly more active demand, mainly for small lots. Nails unsettled, but jobbing slowly in small lots; prices favor buyers. Rather more active inquiry for small lots of steel rails, but prices irregular; mills are willing to take large contracts at low prices.

COAL.

There is no news of importance to report this week respecting either the anthracite or bituminous coal trades. The restricted output of the former, as stated previously, continues, and is likely to for several weeks. When the presidents or other officials of the companies who control this business decide that stocks have been sufficiently reduced, and have observed signs of a demand equal to their anticipations, then word will be passed round to mine on full time. It is possible that half time will be continued until April, but not certain. No change in prices are now believed to be probable during the month, and the low state of stocks at distributing points presents no features other than those commented on during the past fortnight. As is natural under the circumstances, the anthracite coal trade is fair; that is, the demand, which is restrained, and which is practically taking now for immediate wants only, is forced into this shape, owing to the proximity of the time for announcing the spring circular. Dealers and large consumers have then plenty of spare room in their yards. The bituminous trade expect to have some fault found with the new rates of toll by rail to New York. An arrangement having been made for the same, cutting of rates will hardly be practicable, and bituminous coal laid down here will therefore cost more money than in 1882. This branch of the industry is at present quiet, and little is doing. By the time navigation opens the revival in distribution of "soft coal" may be looked for. The increasing demand for anthracite in the west, the probability that this will prove the case throughout the year, and that the anthracite companies are preparing to meet this request, has suffered no modification by rumor or otherwise since first reported in these columns a month ago. The *Coal Trade Journal* has data showing that the net increase of anthracite production in 1883 over 1882, to February 17, is 324,000 tons.

PETROLEUM.

The speculative market has been dull and dragging, with a declining tendency during the past week. Several short spurts upwards have been made upon occasional reports that the Grandin Well No. 5 had struck sand but not oil; but a combined bull and bear monthly report of operations during February rather preponderated in favor of the constitutional shorts. A summary of the main points in the February report is as follows:

	At end Feb.	*At end Jan.*
Number wells completed	130	124
Total new production, barrels	2,079	2,789
Average new production per well, barrels	16	22½
Number wells drilling	152	126
Number rigs up and building	157	131

It will be noted that while the number of wells completed in February is in excess of that for the preceding month, the "new production" is considerably less. The latter fact is due to the absence of new flowing wells as compared with the exhibit made in Forest county exploitation in January.

The course of the market for certificates of crude during the past six days has been as follows: On Saturday business on 'change was slow and prices depressed. There was no news, and the possibility that the new Grandin well might come in with a heavy flow of oil at any moment served to deter investments. The opening sale was made at 99c. From this figure prices steadily receded, closing at the lowest point reached during the day, 98@98½c., a loss of ⅞c. from the closing price on Friday evening, February 23. Bull rumors touching the Grandin well prospects strengthened the market on Monday, and prices touched $1, closing for the day at 99¾c. bid. This strength was continued on Tuesday under the influence of a generally accepted belief that the new well is small. Sales opened at $1.00½, reached $1.02⅛, and closed for the day at $1.00½ and $1.00⅝. Transactions were heavier and the day's trading quite animated. The bear influences in the February report rather gained the ascendancy on Wednesday, with the natural effect on prices and trading. The opening figures were $1.01¼@$1.00⅝. The decline shown here was continued throughout the day. At the close the quotations were 98⅞@99c.—a loss of 1⅝c. on the day. On Thursday the transactions were not large; the feeling of dealers was unimproved, and prices received no support. The opening figures were 98½c. and the closing 98⅛c., the highest and lowest for the day respectively having been 99@98c.

The market on Friday opened at a fraction over 98½c. and closed at noon at the figure given. The tone was dull and weak. Buyers continue to hold aloof. The depression felt is primarily due to the fact that a number of wells are being sunk at the northern extremity of the fertile Cooper tract, with a view to defining the limit of that pool in the direction named. Any or all of them may be expected to come in within the next ten days. The possibility that one or more of them may turn out to be big producers, and thus open up the possibility of a larger field there than had been looked for, hangs heavily on prices. At the close yesterday certificates of crude were quoted at 97⅛c. bid, against 98⅞c. bid at the close on Friday of last week, a decrease of 1¾c.

The market for refined oil during the week has remained quiet. There was some little demand early in the week, but later this practically disappeared. Prices were held up for early and future delivery, as they were also in the case of crude, which has been in very slack demand. No new features respecting naphtha and the case oil market have presented themselves. Prices of petroleum and petroleum products at New York, at the close of business last evening, as compared with those on February 23, were as follows:

	February 23.	*March 2.*
Certificates of crude	98⅞c. bid	97⅛c. bid
Refined petroleum, 110°	7⅞	7⅞
Refined petroleum, 70°	8	8
Crude, in barrels	6⅞@ 7⅜	6⅞@ 7 ⅜
Case oil, plain brands	10¼	10¼
Naphtha	6¾	6¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to February 24 was 74,436,702 gallons, against 67,534,392 gallons in a like period of 1882, an increased exportation in favor of 1883 of 6,902,310 gallons, against an increase of 4,982,444 gallons reported up to February 17. For the week ending February 24 the foreign shipments were 11,840,894 gallons, against 8,917,620 gallons in the preceding week. New York city's exports of petroleum from January 1 to February 24 amounted to 64,246,336 gallons (leaving but 11,026,596 gallons for all other ports), against 53,219,740 gallons in a like period in 1882.

OCEAN FREIGHTS.

In the ocean freights market during the past week business has been very slack. There has been, practically, no demand worth specifying at New York, and Philadelphia and Baltimore report a state of affairs equally unsatisfactory to ship agents and brokers. The demand for charters for petroleum has continued but feebly. Rates in that line are therefore quite low, especially as the supply of tonnage of this variety is quite heavy. Grain charters have had no special call, and rates are consequently off. Grain shipments by steam have likewise declined, in part, doubtless, due to the advance in the price of that cereal. The entire foreign shipment movement is sluggish, the supply of tonnage and berth accommodations being ample, to the contrary notwithstanding. The general impression, however, is that with spring at hand and the natural outflow of surplus products at this period, a better demand and consequently improved rates for tonnage and berth may be looked for in the near future.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: There has been no change in quotations or condition of business.

From Boston, Mass.: The boot and shoe business is fair. There are forty or fifty buyers in town. There is really a little improvement in this trade, and the feeling regarding the future is decidedly more hopeful. Shipments to places outside of New England, 56,015 cases, against 58,543 cases the ninth week in 1882. Total shipments since January 1, 451,269 cases, against 406,732 cases same time last year.

MIDDLE STATES.

From Philadelphia, Pa.: The wholesale markets have ruled quiet during the past week, but an improvement is noticeable in some lines, and the general outlook is regarded as more favorable. The adjournment of Congress will relieve the strain of uncertainty concerning the revenue question, and is generally expected to be followed by reviving activity in many departments where operations have been so long retarded by its indeterminate course on the tariff bill. There is a fair trade in wool, but cotton moves slowly. A great deal of textile machinery is still idle in and about the city. Other industrial interests are fairly employed, and anticipate greater activity in the near future. The building trades' outlook is unusually promising. There is a good jobbing trade in provisions, and a steady, moderate movement in groceries, boots, shoes, hardware, etc., but no rush or excitement in any department. Farm products are selling well at firm prices. The flour trade is moderately active. Stocks are light and values firm. The grains have slightly advanced, and the general temper of speculation is bullish—particularly on wheat. Export business however has been slow, but is improving at the close. Petroleum shippers are not buying to any extent. The Maritime Exchange is again fighting the Delaware river pilots, who are working at Harrisburg to secure the passage of a bill advancing their rates about 40 per cent. The boot, shoe and leather trades have this week organized an association for the advancement of their business interests.

WESTERN STATES.

From Cincinnati, Ohio: The recuperation from the disorganized state of business in which the flood left the city has been slow, and additional time will be required before business will resume its former channel. General outlook is favorable. Flour steady under quiet demand. Provisions firmer; there is little packing and steady consumptive demand; stocks light and prices firm. Whiskies quiet and unchanged. Money higher.

From Cleveland, Ohio: The week has been a fair one for general business, though spring trade continues backward, and orders from the interior are in smaller qantities than in former years. The weather has been favorable for outside work, and the outlook for building operations is still regarded favorable.

From Toledo, Ohio: Trade in boots and shoes is unusually good for the season. In other lines it is fully up to the average of a year ago. Collections fair.

From Columbus, Ohio: Business generally shows more animation than last week, and collections have improved.

From Indianapolis, Ind.: Trade manifests some improvement. There has been a decided change in the weather for the better, and it is believed that the spring will be an early one and that business will be reasonable. Country roads are still in bad condition and collections here are slow.

From Evansville, Ind.: Business is fairly active, and the outlook for a spring trade is good. Weather bright and warm, being fine for wheat.

From Chicago, Ill.: Boots, shoes and leather improving. Hardware, metals and tinners' stock in better demand. Lumber in better demand. Groceries active. Sugars scarce. Tobacco in better request. There has been more doing in miscellaneous goods. Average increase on all trade 10 per cent. over last week. Advices from interior indicate an improved tone in business. Wheat firmer; advance mainly due to local manipulations; demand exclusively speculative. Corn firm, chiefly influenced by wheat; speculation small, with good shipments of low grades. Oats firmer and active; speculative demand for No. 2; off grades shipping freely; stocks 1,700,000 bushels, all contract.

From Peoria, Ill.: All railroads leading into the city are in good running order again, and trade is reported good with most all dealers, among whom a more confident feeling for the future prevails.

From Detroit, Mich.: Some improvement has been noted in collections during the week. There has also been a slight improvement in the retail trade, occasioned by a considerable movement in wheat, augmented by several days of pleasant weather. Jobbers in all lines claim that indications point to a good season's business. Considerable movement in wheat from interior.

From Grand Rapids, Mich.: General trade for past week has been a trifle more brisk than for several weeks past, although it is generally considered by merchants to be quiet. Collections reported only fair. Banks report a very active demand for money and are generally loaned up close. Furniture and lumber trade show signs of improvement.

From Louisville, Ky.: Shipping facilities being restored, business was resumed with a fair degree of activity. Jobbers report an encouraging trade in progress. Groceries, hardware, boots and shoes, and other leading staples report February sales quite satisfactory, and the present week shows liberal consumptive orders. Flour quiet and stationary. Grain trade dull, sales being principally on a retail basis. The recent advance in wheat brought out most of the remaining stock, and but little is now unsold. Drilled wheat on good soil appears to be in fair condition, while that sown broadcast looks frozen out. Leather steady, and in fair demand; manufactories are moderately active on spring orders. The leaf tobacco market is buoyant in point of sales, and firm and well supported in prices; the movement this year to date is the largest on record; the offerings are mostly white burleys of good average grades; dark and heavy tobaccos are active and firm. The whisky situation is unchanged; withdrawals of 1880 goods from bond continue large, and sales are being vigorously pressed; prices are easy and stationary. The money market has been close, but shows an easier tendency. Collections were hampered by the floods and are becoming satisfactory.

From St. Louis, Mo.: The general jobbing trade is quieter than was expected. The floods interrupted railway transportation and bad wagon roads are retarding business. Winter wheat is proving less injured than was feared. This has been the dullest week of the year in cotton, with no mill men buying and no export demand; receipts continue quite large. Oats are firm and active. Wheat and corn weak and irregular through the week and little done in futures, but there is an upward tendency and more strength now. Horses are firm and very active. Mules duller, because southern buyers fear flood influences.

From Kansas City, Mo.: The weather during the past week has been open and favorable for spring trade. General trade shows some improvement after several weeks comparative stagnation. Many buyers are in the market and mail orders are increasing. Collections still slow, but somewhat better.

From Milwaukee, Wis.: Business at the banks has been quite brisk the past week, there being a very marked increase in the demand for loans from wheat-producing and shipping sections. In the jobbing trades there is a general complaint of dullness both as to trade and collections. Still there seems to be no particular feeling of uneasiness, belief being that spring trade will be reasonably good. Outside of the iron interests, manufacturing industries are, as a rule, running quite full, and seem to have orders ahead. Business outlook generally seems favorable, notwithstanding forebodings heightened by the occasional failures.

CALIFORNIA.

From San Francisco, Cal.: Spring trade opening with good promise. Oregon buyers are in town, and there is considerable movement in boots and shoes for shipment to Portland. California country trade is also opening. Continued fine weather hardened the price of wheat, which is higher than last week. Crop reports from various parts of the state are favorable, but rain is needed during March. The severe winter destroyed seed wheat in greater part of Oregon and Washington Territory. Arrangements are being made to import seed from San Francisco. Steamboat and railroad companies are carrying freight at nominal rates. March-sown wheat will yield fair crops. Farmers are not discouraged with the outlook.

SOUTHERN STATES.

From Baltimore, Md.: The weather is now more favorable to the spring trade, and the volume of business the past week reached fair proportions. Transactions in grain were quite active, and in the southern wheat market good Fultz was wanted at $1.20@$1.23 and long berry at $1.20@$1.27. The inquiry for all good merchantable southern corn was at full prices. Jobbers in oats are doing a good business. The cotton market is fairly steady and holders show firmness; there is some demand for both export and spinning; late sales were 300 bales at 9¾@10c. Grain charters are dull and rates nominally lower, with no late engagements reported. The offering of tonnage is fair, but no urgency is shown on the part of owners. Cheap grades of light leather are now selling well. Wool continues firm and the small lots offering find ready sale.

From Richmond, Va.: The weather for the past week has been good and general business has gradually improved.

From Norfolk, Va.: Trade is generally improving. The weather is fine and all lines feel its influence. The trucking interest is now developing; large shipments of early vegetables are being made; the prospects for heavy business in this line are good. Cotton comes in freely; the receipts this season will far exceed any previous year. All other industries fairly active.

From Wilmington, N. C.: The weather has been pleasant. Cotton receipts good; market steady. Breadstuffs and grain firm, with a fair demand. Timber firm; lumber and shingles dull. Foreign freights steady; coastwise quiet. Spirits turpentine irregular, closing lower to sell. Rosin firm. Tar and crude turpentine steady.

From Savannah, Ga.: Trade is quiet and easy, without excitement. An easy money market has facilitated movements. Naval stores have ruled quiet, with no large transactions; stock on hand and on shipboard to-day is 2,400 barrels of spirits, and 62,679 of rosin. The demand for investments has been fair for first-class securities. Groceries quiet. Bacon and flour in fair demand. Cotton market unchanged; sales yesterday were 2,206 bales.

From New Orleans, La.: Sugar stronger at ⅛@¼c. advance; excepting a few fermenting lots of open kettle coming in, there is none to be had; centrifugals entirely in second hands, who hold at fancy prices; for fair goods there is a nominal range of market—25c. to 44c. The high price of rice checks demand; stocks are moderate and prices well maintained; fair to prime 5½@6⅛c. High grades of flour are scarce but weak; low qualities in moderate supply and dull; prices unchanged. White corn 1c. higher; stock moderate. The supply of oats is fair, and price is 5c. lower. Cottonseed cake is quoted at 23c.; crude oil, 45c.; refined, 50c. River news encouraging; apprehensions subsiding.

From Nashville, Tenn.: General trade for the week has been quiet and steady. The grocery market has been active, with a steady demand. Wheat steady and unchanged. Flour quiet. Country produce active. Corn steady and higher.

From Memphis, Tenn.: Business has been active in all lines during the past seven days. Cornmeal and flour are in active demand. Corn firm in price, with a fair stock on hand.

LATE MAILS.

Chicago, February 28.—This being the last day of the month there is more than the customary demand for bank favors, the chief calls being from operators in grain and provisions who are preparing to receive property bought for March delivery. There is also a fair average call from manufacturers and miscellaneous borrowers outside of jobbing circles, the improvement in collections in the interior rendering the latter class of customers less dependent on the banks than at any previous time since the first of the year, and many of the strong houses are reducing their discount lines at the banks, and unless some unlooked-for disaster occurs there is reason to predict an easier money market at an early day. The jobbing trade is slowly but steadily improving. The dry goods houses report a large gain in the number of their mail orders for goods from the west and southwest. There is also a noticeable increase in the size of some of the latter. The continued severe weather in the north and northwest still prevents any great increase in trade from that direction, and the few orders coming from there are mainly for staple lines that retailers are compelled to have to supply their pressing wants. Boots and shoes are selling a little more freely, but the bulk of the goods called for included heavy work. The clothing trade remains exceedingly quiet, but the leading houses express a large degree of confidence in a good trade when the weather becomes good and the season fully opens, and are preparing for it. The iron market has not shown much, if any, improvement on the general list; a little more call is reported for structural grades from builders of railroad bridges, but ordinary bar moves slow, country dealers confining their purchases to such small lots as their absolute necessities compel them to have for immediate sale. Manufacturers also show an equal hesitancy in their purchases. Pig of nearly every description is equally slow, foundries and mill-men only buying as their wants demand, but stocks are moderate, and jobbers show scarcely so much desire to press sales, as they seem to think that the decreased production during the next few months, if not throughout the year, will have a beneficial effect on the market. The uncertainty regarding the financial condition of a large class of workers also causes dealers in pig to hesitate about pressing sales unless they feel perfectly assured as to the financial condition of buyers. There are no new features to report in the market for steel rails, the demand, if any exists, is so small that manufacturers decline to report it. Nails are in good supply, sales slow and prices unsettled. Advices from the northern iron mines report that a further reduction will soon be reported in the working forces of the leading mines. There is an improved demand for lumber from the south and west, and an active market is looked for at an early day.

The receipts of wheat are slowly increasing, there is scarcely any demand for shipment, stocks are large and the market in an unsettled condition, the present outlook being that prices during the incoming month will largely depend on the weather, which just now promises well. Corn is arriving freely, the receipts for the month just closing being larger than for any corresponding period on record and more than twice as large as for February, 1882. The market is destitute of strength, prices for No. 2 being mainly dependent on wheat. There is, however, a good shipping demand for the non-speculative grades, and the bulk of such arrivals are taken from track for the eastern markets. Oats are arriving freely and show more strength, but the stocks are large. The provision market is quiet and firm, but speculative movement in pork and lard only fair. Dry-salted meats have shown great activity since the date of my last letter, large purchases having been made for shipment east and south. The exports to Europe were also larger than at any previous time since the 1st of November, and stocks are concentrated in a few strong hands. The total packing in Chicago for the season commencing with November and ending to-day is estimated at 2,500,000 hogs, or 135,000 over the same time last year. The weights are thought to be about the same.

GRAIN IN CHICAGO ON DATES NAMED.

	Feb. 24, '83.	*Feb.* 25, '82.	*Feb.* 26, '81.
Wheat, bushels	5,686,000	3,774,000	7,871,000
Corn, bushels	4,232,000	5,654,000	4,575,000
Oats, bushels	1,597,000	813,000	1,547,000
Rye, bushels	590,000	452,000	203,000
Barley, bushels	195,000	302,000	283,000

In addition to the above there is also 313,000 bushels of wheat, 173,000 bushels of corn, and 47,400 bushels of oats on vessels in harbor, making total stocks 5,999,000 bushels of wheat, 4,405,000 bushels corn, and 1,644,400 bushels of oats here.

The following table exhibits the number of cars of wheat inspected into store for the month of February, as compared with the years named:

	1883.	1882.	1881.	1880.	1879.
No. 1	1	...	...	...	1
No. 2	547	151	615	690	1,467
No. 3	497	623	238	530	1,701
Rejected	254	359	187	169	705
No grade	19	40	21	49	48
Totals	1,318	1,183	1,561	1,438	3,922

The following table exhibits the number of cars of grain inspected here during the months of January and February in the years named:

	Wheat.	*Corn.*	*Oats.*	*Rye.*	*Barley*
February, 1883	1,318	8,788	1,915	345	1,033
February, 1882	1,183	3,687	1,012	103	605
February, 1881	1,561	2,015	1,123	56	317
January, 1883	2,137	9,123	1,531	348	928
January, 1882	1,024	9,370	3,074	194	876
January, 1881	2,307	4,294	1,575	120	745

TRADE EMBARRASSMENTS.

There were 260 failures in the United States reported to BRADSTREET'S during the past week, 56 more than the preceding week, 108 more than the corresponding week of 1882, and 126 more than the same week of 1881. Compared with the previous week, the middle states had 65, an increase of 19; New England states 37, an increase of 14; southern states 55, an increase of 19; western states 79, an increase of 5; Pacific states and territories 24, a decrease of 1; Canada and the provinces 39, an increase of 10. The important failures included Humphrey & Co., leather, and Wiley, Wickes & Wing, importers of fruit, New York city; Fox & Co., glass manufacturers, Durhamville, N. Y.; The First National Bank of Union Mills, Pa.; The First National Bank of Peru, Ill.; Lucius Clark & Co., paper manufacturers, South Bend, Ind.; George H. Taylor & Co., wholesale paper, and Paul D. Hayward, wholesale paper, Chicago; William Zeckendorf, general trader, Tucson, Ariz. In the principal trades they were as follows: General traders 52; grocers 37; dry goods 15; shoes 13; jewelry 11; manufacturers 10; liquors 9; hardware 8; tobacco and cigars 8; commission 8; clothing 7; paper 6; furniture 5; produce and provisions 4; drugs 4; books and stationery 4; bakers and confectioners 4; iron 3; millinery 3; banks 2; grain and flour 2.

ALABAMA.

FORT PAYNE.—A. F. Payne, general store, has failed.

ARIZONA.

TUCSON.—William Zeckendorf, general store, has assigned to Lionel M. Jacobs, giving preferences to the First National and Importers' & Traders' National Banks, of New York, for about $15,000. The liabilities are estimated from $150,000 to $200,000, and nominal assets about the same. He owes in New York city over $100,000, of which $85,000 is on notes and bank accounts, all confidential, and $15,000 on open accounts for merchandise. He has resided in New York for two years past, and on the 15th ult. went on to Tucson and found the business in such a shape that an assignment was unavoidable. He telegraphed to New York that goods purchased in February were still in transit and subject to owners' orders.

ARKANSAS.

ARKANSAS CITY.—B. T. Dishough, general store, has failed and sold out.

BEEBE STATION.—Dux & Bolder, grocers, have been closed by the sheriff.

OZARK.—J. A. Lane, general store, has assigned.

CALIFORNIA.

ALAMEDA.—C. Kohlmoos, grocer, has been attached.

EUREKA.—S. W. Scotton, printer, has been attached.

JACKSON.—H. C. Hill, general store, has been attached.

JAMESTOWN.—John Whitney, general store, who was recently burnt out, has called a meeting of creditors.

MARYSVILLE.—S. Gorezynski, pawnbroker, has been attached.

NEVADA CITY.—W. R. Coe, shoes, has filed a petition in insolvency.

RIVERSIDE.—R. Hornbeck, printer, has been attached. He was recently burnt out.

SACRAMENTO.—S. J. & J. M. Jackson, stoves, are reported to have compromised at 25 cents.

SAN FRANCISCO.—M. Ainsa, commission, has filed a petition in insolvency.

SAN FRANCISCO.—A. Cohen, agent, has filed a petition in insolvency.

SAN FRANCISCO.—P. J. Kalb, broker, has filed a petition in insolvency.

SAN FRANCISCO.—The liabilities of Koehler & Ritter, jewelers, are $27,470; nominal assets $9,000.

SAN FRANCISCO.—J. Schreiber & Co., brokers, have filed a petition in insolvency.

SAN JOSE.—Coyne & Duggan, liquors, have been attached.

WOODLAND.—Jesse Walters, saloon, has been declared insolvent.

COLORADO.

DENVER.—Richard Brittain, jeweler, has been sold out under a chattel mortgage.

DENVER.—Henry Lloyd, shoes, has given a chattel mortgage and been attached.

DENVER.—Anndres Rasmussen, shoes, has assigned. Liabilities $12,000; assets $14,000.

LEADVILLE.—John C. Ritchie, saloon, is reported to have left town.

CONNECTICUT.

DANIELSONVILLE.—Ely & Co., dry goods, clothing, etc., have failed. Liabilities about $62,000.

NEW BRITAIN.—William W. Jackson, has assigned.

DAKOTA.

KIMBALL.—George Wynn, hotel, has failed, and the sheriff is in possession.

PLANKINTON.—Cramer & Co., grocers, have failed.

DISTRICT OF COLUMBIA.

WASHINGTON.—Mrs. J. C. Cross, shoes, has assigned, giving preferences for $1,200. She was recently sued, and transferred real estate to secure her children for $4,343.

WASHINGTON.—O. Dammann, dry goods, has assigned to Abram Fisher, giving preferences for $1,057. The liabilities are about $13,000, and it is thought that there will be no actual assets above exemptions, preferences and expenses.

GEORGIA.

ATLANTA.—E. Brewer, grocer, has assigned

AUGUSTA.—John J. Gallagher, shoes, has assigned. Liabilities $7,500; assets, stock $6,000; accounts $3,000; preferences $4,500.

GAINESVILLE.—T. C. Gower, carriage maker, has compromised at 50 cents.

THOMSON.—Paschal & O'Neal, general store, have assigned. Liabilities $9,000; nominal assets $18,000; preferences $1,000.

ILLINOIS.

CENTRALIA.—Burton & Stevenson, grocers, offer to compromise at about 40 cents.

CHICAGO.—The schedules of W. T. Allen & Co., wholesale grocers, show liabilities $350,000; nominal assets, stock, $145,000; accounts $200,000, of which $150,000 is considered collectable.

CHICAGO.—Paul D. Hayward, wholesale paper, assigned on the 27th ult. to R. S. Jenkins. The failure, it is said, resulted from the troubles of Clark, Hayward & Co., whom he recently succeeded.

CHICAGO.—J. D. Stone, coal, has been closed by the sheriff on confessed judgments for $10,000. He organized the Wilmington Coal Company at Braidwood, Ill., where the recent mining disaster occurred.

CHICAGO.—George H. Taylor & Co., wholesale paper, were closed by the sheriff on the 28th ult. on confessed judgments aggregating $120,055, as follows: Jacob Newman $15,350; J. L. Beverage & Co. $8,400; Ellen M. Delano $1,650; Frances E. Carey $9,350; Mrs. E. O. Foote $1,575; First National Bank $40,400; Mary A. Masters $640; Bella G. Masters $540; Cleveland Paper Company $30,400; Rosa M. Knickerbocker $12,350. The Cleveland Paper Company also obtained a judgment for $71,000. The failure is attributed to the failure of Lucius Clark & Co., who recently bought out the South Bend (Ind.) mill from Taylor & Co., giving notes for the purchase. The liabilities are reported at about $400,000. The business was incorporated in February, 1881, with a capital of $50,000, and succeeded the Chicago branch of the Cleveland Paper Company.

FAIRMOUNT.—James Thomas, dry goods, has confessed judgment for $8,000.

JERSEYVILLE.—G. C. Carroll, jeweler, has assigned.

JERSEYVILLE.—Edgar & Co., drugs, have assigned.

MARSEILLES.—The Black & Clark Paper Company have closed their mills and their paper has gone to protest. Lucius Clark & Co., of South Bend, Ind., who have failed, were largely interested in the concern. Slow collections is ascribed as one of the causes of the embarrassment.

MILAN.—William Young, general store, has been closed on attachments. Liabilities about $22,000; assets $5,000. He has been in business over twenty-five years, and was involved with the Rock Island Paper Company.

MOLINE.—J. P. Newberg, grocer, has assigned to H. P. Oakley. Liabilities $12,034; assets $5,520.

PECATONICA.—Miss Adcie Hill, cigars, has failed. Assets about $400.

PEORIA.—C. O. Lehman, dry goods, has confessed judgment for $15,500.

PERU.—The First National Bank suspended on the 24th ult., its charter having expired on that day. Within the last week $60,000 had been withdrawn, but it is believed that $115,000 was in the vaults when the doors were closed. One of the heaviest blows the bank received was the suspension of a leading manufactory which owed the bank $63,900. The capital of the bank was $100,000.

ROCK ISLAND.—The Rock Island Paper Company has failed. Attachments have been issued on the property which was already incumbered with judgments and mortgages for its full value. The mill is located at Milan. The company was incorporated in December, 1876, with a paid in capital of $42,300.

SPRINGFIELD.—A. H. Fisher, jeweler, assigned on the 27th ult. Liabilities $70,000; assets $40,000. Previous to the assignment he confessed judgment for $20,000 and mortgaged realty for $10,000.

WARRENSBURG.—L. A. Drake, general store, offers to compromise at 35 cents. Liabilities about $3,000.

WENONA.—W. Lloyd & Co., grocers, have been closed, and turned over the stock to a creditor.

WENONA.—Peter Reilley, grocer, has been closed by the sheriff. Liabilities about $700; nominal assets $750.

INDIANA.

HARTFORD CITY.—J. P. Van Cleve & Son, general store, have assigned. Liabilities about $25,000; nominal assets $25,000 to $30,000.

NEW CASTLE.—Thomas L. Fowler, butter and eggs, has assigned. Creditors, it is thought, will probably not receive anything.

NEW CASTLE.—W. L. Nuzum, liquors, has failed.

NEW SALEM.—W. H. O. Goldsmith, blacksmith, has assigned.

PLYMOUTH.—The Adams Chilled Plow Company is reported to have assigned to J. F. Behrens, on account, it is said, of the failure to subscribe sufficient stock to carry on the business. Liabilities about $10,000, of which $6,000 is secured by mortgage; nominal assets $18,000, consisting of real estate machinery, etc. The works are advertised to be sold out on the 8th inst.

SOUTH BEND.—Lucius Clark & Co., paper manufacturers, have failed. Mr. Clark has been interested in several paper mills and had considerable to attend to. In November last a stock company was formed to take the business with a capital of $200,000, of which $150,000 was paid in, the balance to be paid in instalments in four months. The firm in January bought out the interest of George H. Taylor & Co. in the business. They have given mortgages to the bank and others for about $25,000.

WINSLOW.—Murphy & Whitman, general store, have suspended.

IOWA.

CLINTON.—R. E. Ragan, flour and feed, has assigned to A. P. Barker. Liabilities $1,730; assets $1,222. He offers 80 cents.

CRESTON.—C. F. Hannenning, tailor, has assigned.

DAVENPORT.—G. A. Stone, stoves and tinware, has assigned to A. F. Cutler. Liabilities $3,423; assets $3,527.

DES MOINES.—L. Conigsky, dry goods, has assigned to A. Lederer.

DUBUQUE.—R. Morrell, grocer, has failed.

SIOUX CITY.—James O'Hanlon & Son, shoes, have assigned.

WEBSTER CITY.—James Hoyt, grocer, is reported to have failed. Liabilities $3,000; nominal assets $2,620.

KANSAS.

BARCLAY.—L. H. Jones, grocer, has assigned. Liabilities $1,800.

EDNA.—Bloom & Co., general store, have failed and been attached.

JAMESTOWN.—M. M. Strain, general store, has assigned.

LEAVENWORTH.—Henry Wenz, baker, has failed.

OLATHE.—Jones & Myers, millers, have assigned.

PLEASANTON.—S. Armsby, hardware, has failed. Liabilities $5,000.

WELLINGTON.—C. E. Flandro, clothing, has been attached.

KENTUCKY.

CORYDON.—A. S. White, cigars, is reported to have failed.

DANVILLE.—W. P. Blake, jeweler, has assigned to D. S. Hinman. Liabilities $3,100; assets about $1,250.

FORD'S FERRY.—Glass & Co., mining and fluorspar, are reported to have failed.

HEDGES.—W. L. Combs, general store, has assigned to E. W. Combs.

HOPKINSVILLE.—H. B. Kilbren, groceries and saloon, has failed and been attached.

LOUISVILLE.—P. J. Morel (agent), dyer, has been attached for $1,200.

LOUISIANA.

SPEARSVILLE.—Goyne & Dixon, general store, have been attached for $5,713. They were burnt out January 11. The liabilities are about $10,000.

MAINE.

AUBURN.—The Auburn Medicine Spring Water Company has been attached.

BIDDEFORD.—L. J. Ayer, grocer, has failed.

BIDDEFORD.—C. A. Lufkin, provisions, has failed.

BIDDEFORD.—F. H. Spear, harness, has failed and settled at 38 cents. Liabilities $4,800; actual assets $2,500.

BRIDGETON.—The liabilities of George E. Murphy, builder, are $2,400; assets about $1,000.

CASCO.—John C. Bangs, general store, is in insolvency.

DEERING.—Frank Brothers, grocers, have been attached.

HARTLAND.—M. W. Jenkins & Co., provisions, offer 25 cents. Liabilities $1,800; assets about $900.

LINCOLN.—Charles F. Plumley, general store, has failed. Liabilities about $8,000; assets $4,000.

LISBON.—A. H. Macurdy, stoves, has failed. Liabilities about $2,400; assets $800.

PORTLAND.—Joseph Levy, tailor, has been attached.

PORTLAND.—Simpson & St. Cloud, fish, have been attached.

ROCKPORT (Camden).—G. H. M. Barrett, ice, has been attached.

SEBEC.—The creditors of the Sebec Woolen Company refuse to accept 25 cents.

SPRINGFIELD.—B. Burr, general store, has failed. Liabilities about $7,000; assets estimated at $3,000.

MARYLAND.

BALTIMORE.—James Crowley, stationer, has filed a petition in insolvency.

BALTIMORE.—E. W. Downs, dry goods, has assigned.

BALTIMORE.—Christian and Barbara Lohman, dairy, have assigned to L. H. Robinson, Jr.

BALTIMORE.—W. E. Patterson, baker, is advertised to be sold out by the landlord.

BALTIMORE.—H. C. Wright, flour and grain, has filed a petition in insolvency. Liabilities $12,000. He recently offered 10 cents.

MASSACHUSETTS.

AMESBURY.—R. L. Stevens, furniture, owes $6,165; nominal assets $2,900. Creditors refused 20 cents, and he will settle in insolvency.

BOSTON.—Simon Alexander, cigars, has failed and is in insolvency. Liabilities about $3,200; nominal assets $1,000.

BOSTON.—George W. Canterbury, produce, has failed and is in insolvency.

BOSTON.—E. A. Cowan & Co., watchmakers' materials, have failed and offered 35 cents—10 cents cash, 10 cents in sixty and ninety days, and 5 cents in four months. This was declined by some of the creditors and the firm filed a petition in insolvency.

BOSTON.—D. A. Goodrich & Co., fancy goods, have been petitioned into insolvency by a New York creditor.

BOSTON.—Hall & Edwards, tailors, have gone into insolvency. Liabilities $11,507.

BOSTON.—James Harkins, liquors, has failed and is in insolvency.

BOSTON.—Patrick F. Shevlin, bottles, has failed and is in insolvency. Liabilities $3,500; the assets are mortgaged for $4,500.

BOSTON.—Edwin L. Shute, machinist, has failed and is in insolvency.

BROCKTON.—Isaac S. Emerson, shoe manufacturer, has been attached for $20,000. Liabilities $50,803; assets $36,915.

CHICOPEE.—John Goodwin, contractor, who recently absconded, is said to have left a large number of creditors.

CHICOPEE FALLS.—Albert Guenthner, baker, owes $5,592, of which $2,630 is unsecured. Unencumbered assets small.

HAVERHILL.—G. W. Thomas, shoe rosette manufacturer, has failed and offers 40 cents.

LYNN.—The liabilities of Frank A. Ashcroft, steam gauge glasses, are $2,753.

LYNN.—Ezra T. Bates, grocer, offers 30 cents.

MARLBORO.—McCarthy Brothers, clothing, have raised their offer to 30 cents, which will probably be accepted.

NEWTON.—G. W. Rigby, builder, is in insolvency.

NEWTON HIGHLANDS.—T. B. Wiggin, livery, has settled at 25 cents.

NORTH ADAMS.—A. F. Davenport, dentist, has been attached.

PEABODY.—John O'Shea & Brother, tanners, have failed. Liabilities estimated at $12,000. The tannery is mortgaged for $19,000, which will probably fully cover it. The other assets are stated to be only $2,000, and the prospects for unsecured creditors are very poor.

SPRINGFIELD.—Creditors have filed a petition in insolvency against John H. Phillips, felting.

SPRINGFIELD.—The Chapin Paper & Pulp Company has suspended.

TISBURY.—William D. Harding, shoes, has failed and offers 35 cents. Liabilities $1,200; assets about $600.

TURNER'S FALLS.—Edward Dahill, shoes, has settled at 60 cents.

MICHIGAN.

BIG RAPIDS.—B. E. Hutchinson, furniture, assigned on the 26th ult. to William Van Loo. He was also in the grocery trade at Paris as B. E. Hutchinson & Co. Both firms have assigned. Liabilities estimated at $12,000; actual assets about $7,000.

BIG RAPIDS.—E. E. Smith & Co., grocers, are reported to have assigned.

HARBOR SPRINGS.—Albert R. Mattison, clothing, has been closed up on a chattel mortgage.

GALESBURG.—H. E. Turner & Co., general store, are reported to have assigned.

GRAND RAPIDS.—J. M. Tuttle, auction, has been closed up under chattel mortgage.

KALAMAZOO.—The liabilities of Dudgeon & Cobb, produce commission, are reported at $48,000; assets about $25,000. The business will be continued by John Dudgeon as agent.

LOWELL.—Stiff & Stiff, millers, have assigned.

LUDINGTON.—Mrs. S. A. Cushway, jeweler, has assigned. Liabilities about $5,000; assets $2,000.

MANCHESTER.—D. B. Silvers, clothing and hats, sold out to his brother, who indorsed for him, and, it is said, compromised with a pressing creditor at 50 cents. Liabilities about $10,000; assets estimated at about $5,000

MARLETTE.—F. W. Tallmadge & Co., general store, were attached and have assigned. They also gave a chattel mortgage.

STURGIS.—C. N. Fairbanks, jewelry, is reported to have been attached.

WHITE PIGEON.—David S. Weaver, agricultural implements, has failed.

MINNESOTA.

SABIN.—F. Meyer, grocer, has been closed on attachment.

MISSISSIPPI.

BOLTON'S DEPOT.—Pond, Haills & Co., general store, have assigned. They had been hard pressed for some time previous.

CANTON.—Calhoun & Stinson, general store, have failed. In July they were granted an extension until January last on liabilities of $12,000; nominal assets $20,000. Collections were very poor.

CARSON'S LANDING.—S. C. Blanchard & Co., general store, have been attached for $2,743.

GLENORA.—W. M. & S. Worthington, general store and planters, have transferred all their property, including two plantations and homestead, to Graham, Black & Co., their commission merchants, to cover the latter's claim of $75,000. Other creditors are unprovided for.

TIBBEE.—V. H. Ryland, general store, has assigned.

MISSOURI.

KANSAS CITY.—L. Benjamin, auction and commission, has been attached for $6,000, and gave mortgages for $2,300.

KANSAS CITY.—Butler, Neff & Co., grocers, have failed and sold out.

KANSAS CITY.—Sweet & Seifried, manufacturers' agents, have been closed by the sheriff.

SEDALIA.—W. J. Bagley, grocer, has assigned.

ST. LOUIS.—Conner Brothers, grain, have assigned to James Kinsella.

ST. LOUIS.—A. F. Stewart, restaurant, has been attached.

YATESVILLE.—White & Co., general store, have been closed by the sheriff.

NEBRASKA.

CLARK'S.—F. George, Sr., general store, has assigned. Liabilities about $6,000; assets about $2,500.

DORCHESTER.—Baker Brothers, general store, have assigned.

LINCOLN.—C. W. Chambers, millinery, mortgaged stock for $4,283 and assigned.

ORD.—Lewis A. Ellis, hardware, has given a bill of sale to two creditors. Liabilities about $4,000.

RED CLOUD.—A. A. Sawday, hotel, has been attached.

SOUTH AUBURN.—Mrs. A. H. Richards, millinery, has failed.

NEW HAMPSHIRE.

DOVER.—E. T. Trafitter, dry goods, has settled at 25 cents. Liabilities $1,500.

MANCHESTER.—J. Fenton, grocer, is reported to have failed.

OSSIPEE.—J. Q. Rolles, lumber, has failed. Liabilities about $50,000. He will probably settle in insolvency.

ROCHESTER.—M. L. Burr, dry goods, offers 25 cents.

SALEM.—N. G. Abbott, grocer, has failed. Liabilities $2,300; nominal assets $2,600 in stock, which he has sold to his brother.

TILTON.—G. W. Abbott & Son, shoes, are reported to have been attached.

NEW JERSEY.

JERSEY CITY.—O. T. W. McDonald, grocer, called a meeting of creditors for the 2d inst. He was attached for $2,285, and gave a chattel mortgage for $8,883.

PATERSON.—William Richardson, grocer, has been closed up on a chattel mortgage.

NEW MEXICO.

LAS VEGAS.—W. H. Keller, hotel, has assigned to G. P. Conklin.

NEW YORK.

ALBANY.—Philip Hertz, Jr., furniture, has assigned to Louis Dryer.

BINGHAMTON.—Ellen Bidwell, hotel, has assigned.

BROCKPORT.—M. A. Keller, manufacturer of binders, is reported in the hands of the sheriff. His machinery is chattel mortgaged for over $4,000, and his interest in his entire property is estimated at $2,500, which his unsecured claims, it is thought, will wipe out.

BROOKLYN.—H. E. Fickett & Co., builders and planing mill, assigned on the 26th ult. to W. A. Collingwood, giving preferences for $16,246.

BROOKLYN.—Henry J. Hume, furniture, assigned on the 26th ult. to Jackson Orr, giving preferences for $13,860, the largest being Ruth Hume $8,203; James Pearson $1,385; Rohmann & Hillman $1,500.

BUFFALO.—Henry Jacobs, shoes, has compromised at 40 cents. Liabilities $1,300; actual assets $850.

CUBA.—A. H. Bishop, grocer, is reported to have assigned to E. D. Loveridge.

DURHAMVILLE.—Fox & Co., glass manufacturers, assigned on the 28th ult. to Charles S. Symonds, giving preferences for about $65,000. The liabilities are reported at about $180,000, and nominal assets $200,000. They have been doing a large business, and have borrowed largely. The failure is attributed to extending the business and expenses in erecting a new factory. The business was established in 1818 by Isaac B. Fox, the father of the present senior partner. S. H. Fox was the Republican candidate for state senator two years ago and for Congress last fall.

EAST WILLISTON.—D. S. Skidmore, grocer, is reported to have assigned to William Post.

HERKIMER.—C. L. Avery, dry goods, has assigned to D. M. Deverdorf. Liabilities about $17,000. The assets are about covered by the preferences, $12,425.

HERKIMER.—Frank Hall, meat market, has assigned.

HERKIMER.—W. H. Patrick, shoes, has assigned.

HORNELLSVILLE.—George R. Kinne, grocer, has failed and sold out.

KANONA.—W. S. Goodnow, general store, has assigned.

LEEK.—H. Savage, general store, has assigned to Lanford White. It is thought the assets will realize about 50 cents.

NEWBURGH.—The schedules of J. H. Walsh, paper manufacturer, show liabilities $87,601; nominal assets $29,483.

NEW YORK CITY.—Jacob Block, jeweler, assigned on the 1st inst. to Levi Cohn, giving four preferences for $818.

NEW YORK CITY.—Anselon Bruck, shoe manufacturer, assigned on the 1st inst. to Nathan L. Hahn, giving four preferences for $496.

NEW YORK CITY.—Hatch & Peters, bankers and brokers, assigned on the 26th ult. to William A. Booth.

NEW YORK CITY.—Humphrey & Co., wholesale leather, assigned on the 2d inst. to Enos Wilder, without preference. The liabilities are reported at from $600,000 to $700,000. The assets are reported large, consisting of property, tanneries, stock and accounts. The failure was a great surprise to the trade, and is attributed to overtrading and the stringency of the money market, which affected the sale of their paper. The business was established many years at Albany, and they have been in business in New York city about twelve years. James B. Colgate was the special partner for $100,000 to February 28, 1885.

NEW YORK CITY.—George H. Kennedy, shoes, assigned on the 24th ult. to Thomas E. Greacen. Liabilities $1,921; actual assets $398.

NEW YORK CITY.—The schedules of Margaret Langlotz, dress trimmings, show liabilities $2,274; nominal assets $2,107; actual assets $1,457.

NEW YORK CITY.—J. Levy & Co., manufacturers of neckwear, assigned on the 2d inst. to Samuel Kramer, giving preferences for $10,937—to S. Kramer $9,703; Ninth National Bank $1,128; I. Tannenbaum & Co. $106.

NEW YORK CITY.—Kiva Radler, manufacturing jeweler, assigned on the 24th ult. to Hyman P. Binswanger. In November last he was granted an extension of six months, when he showed liabilities $4,000; nominal assets $9,000.

NEW YORK CITY.—Frank R. Van Nest, trading as Van Nest Brothers, wholesale saddlery hardware, assigned on the 28th ult. to George G. Van Nest, giving preferences to Elizabeth C. Van Nest $2,000; Market National Bank $1,351.

NEW YORK CITY.—Edward F. Wattson, bond broker, assigned on the 2d inst. to Harold Clemens, giving preferences to Royal C. Vilas $1,488; Harold Clemens $350; O. M. Farrond $675; Bruner & Moore $489; total $2,992.

NEW YORK CITY.—Wiley, Wickes & Wing, importers of fruits, assigned on the 2d inst. to John Galway, giving preferences to Brown Brothers & Co. $5,114; G. Amsinck & Co. $30,393; Irving National Bank $49,703; Fruit Merchants' Steamship Association $2,037; total $97,248. Liabilities $400,000; assets claimed to be about $500,000.

NEW YORK CITY.—The schedules of Henry Wilson, wholesale liquors, show liabilities $28,042; nominal assets $19,079; actual assets $14,294.

NEW YORK CITY.—Alfred J. Wolf, folding beds, assigned on the 1st inst. to Emanuel W. Bloomingdale, giving preferences for $12,847, the largest being as follows: Henrietta Wolf $7,002; Alex. Gunterman $3,574; Edward Manser $1,010. Dull trade, insufficient capital and expenses incident to removal are attributed as the causes.

OSWEGO.—Julia A. Pool, thermometers, is offering to compromise.

PIKE.—Brownson & Co., general store, have assigned.

POUGHKEEPSIE.—John G. Miller, cigars, has assigned.

POUGHKEEPSIE.—J. Propson, cigars, has assigned, giving preferences for $1,177.

PROSPECT.—W. J. Curtis has assigned.

ROCHESTER.—The receiver of the City Bank has issued a statement showing liabilities $635,127, of which $130,000 is preferred. It is thought the depositors may receive 20 cents.

NORTH CAROLINA.

HARRELL'S STORE.—Albert S. Colwell, general store, has assigned to his brother, without preference.

MACON.—J. W. Harrison, general store, has assigned. Liabilities $4,000; assets $1,000.

RIDGE SPRING.—C. K. Johnson, general store, is reported to have assigned to his father.

WILMINGTON.—R. W. Price has assigned. Liabilities $7,000; preferred claims $4,000; assets $5,500.

OHIO.

BLANCHESTER.—F. M. Baldwin, drugs, has assigned to C. W. Swaine.

CINCINNATI.—Fritz & Rogers, cigar manufacturers, have assigned to John F. Ricard.

DELAWARE.—J. N. Clingan, books, has been closed by the sheriff.

FINDLAY.—T. R. Wilson, books and stationery, has been closed by the sheriff on judgment for $1,200. The stock is valued at about $2,000.

GREENVILLE.—Dininger & Compton, stoves, offer to compromise at 20 cents.

IRONTON.—Joseph Lloyd, gents' furnishing goods, has assigned.

LONDON.—The liabilities of Gardner & Lohr, clothing, are $19,335; assets $13,186.

YOUNGSTOWN.—Hull & Eckert, grocers and butchers, have been closed on attachments.

YOUNGSTOWN.—Smith & Love, grocers, have been closed on attachments.

OREGON.

HUBBARD.—A. Gray, general store, has assigned.

PENDLETON.—C. B. Allison, grocer, has assigned.

PORTLAND.—R. H. Cardwell has assigned.

PORTLAND.—John Epperly & Co., commission and feed, have been attached.

PENNSYLVANIA.

ALLEGHENY CITY.—Judgment has been entered against Gettman & Brother, grocers, and execution issued.

ALLENTOWN.—A. A. Huber, dry goods, has been closed by the sheriff on confessed judgments for about $10,000.

ALLENTOWN.—Thomas Weaver, iron ore, is reported to have assigned.

CHESTER.—J. D. Howard, grocer, has had execution issued against him on a judgment for $203.

DANVILLE.—George W. Fisher, drugs, has been closed by the sheriff.

DANVILLE.—Execution has been issued against W. H. Hassenphy, dry goods, and judgments entered for $3,608.

DENT'S RUN.—Smith & Mirey, lumber, have had judgments for $2,181 entered against them.

DUFFRYN MANOR.—William Emme, tailor, is in the hands of the sheriff.

DUFFRYN MAWR.—I. D. Jones, general store, has sold out, and offers to compromise at 25 cents.

DUKE CENTRE.—George A. Hill, hotel and liquors, has sold out and left town. Some of stock not sold was attached.

FALLS CITY.—W. W. Hartzell, manufacturer of wood pulp, has failed.

FRANKLIN.—A. A. Alden, clothing, is in the hands of the sheriff on judgments amounting to $10,000.

FRANKLIN.—Bement & Elliott, shoes, who recently failed, offer 28 cents. Liabilities $5,994.

HANOVER.—John H. Walters, hotel, is reported to have left town, and the sheriff is in possession.

HARRISBURG.—William Strobel, publisher of *The Staats Zeitung*, is advertised to be sold out by the sheriff on the 6th inst.

HYNDMAN.—J. Morris, confectioner, has been sold out by the sheriff.

LEWISTON.—C. A. Blymer, general store, has had a judgment for $3,067 entered against him.

MARIETTA.—George S. Windolph, gents' furnishing goods, is reported to have been sold out by the sheriff.

MATTAWANA.—T. P. Orner, general store, has been closed by the sheriff on judgment for $2,953.

PHILADELPHIA.—Bell & Dunn, of *Bell's Daily Hotel Register*, are advertised to be sold out by the sheriff on the 6th inst. The paper was in existence but a short time.

PHILADELPHIA.—Charles Berry, cigars, has been sold out by the constable, realizing only $127.

PHILADELPHIA.—Joseph Boulter & Son, manufacturers of hosiery, are advertised to be sold out by the sheriff on the 13th inst. They failed nearly two years since, compromising at 60 cents. Recently two judgments for $22,563 were entered against them, and they are said to owe one creditor about $7,000, in addition to a judgment claim of $22,062, and are reported to have other merchandise liabilities of about $10,000.

PHILADELPHIA.—Frank P. Burke, storage, was advertised to be sold out by the sheriff.

PHILADELPHIA.—P. H. Fitzpatrick, china, glass, etc., has confessed judgment for $6,381, and the sheriff is reported in possession.

PHILADELPHIA.—Judgment has been entered against Ivan Fox, optical and mechanical instruments, for $3,700, and he was sold out by the sheriff.

PHILADELPHIA.—John G. Hack, shoes, offers to compromise at 15 cents. Assets about $1,600.

PHILADELPHIA.—Samuel Harrison, saloon, is advertised to be sold out by the sheriff on the 3d inst.

PHILADELPHIA.—Kelly & Ludwig, commission machinery, have assigned to The Guarantee Trust & Safe Deposit Company.

PHILADELPHIA.—D. W. R. Read, trading as D. W. Read & Co., iron ores, has suspended. The liabilities are reported at from $30,000 to $40,000, mainly abroad. It is said that if T. H. Brown, a former partner, relinquishes certain securities regarded by Mr. Read as a firm asset, there will be enough to pay in full, but with this unadjusted it is uncertain what can be done. He formerly had agencies in New York, Baltimore and London.

PHILADELPHIA.—John W. Worrall, undertaker, is advertised to be sold out by the sheriff on the 5th inst. Nearly two years ago he was of John W. Worrall & Co., same business, who were sold out by the sheriff, and since which time he has been financially weak.

PITTSBURGH.—Execution for $4,393 has been entered against Charles L. Scott, dentist.

PITTSBURGH.—Execution for $2,200 has been issued against N. M. Thomas, scrap iron, in favor of J. S. Graff.

SMETHPORT.—F. M. Ball, wagonmaker, has failed. Executions cover all his property.

SUMMIT HILL.—William Shea (agent), general store, is reported to have failed.

TERRYTOWN.—F. N. Diaments, general store, has been sold out by the sheriff. The deficiency will probably be about $1,000.

TREXLERTOWN.—Charles Hill, hotel, has had execution issued against him on a judgment for $360.

UNION CITY.—The First National Bank of Union Mills suspended on the 26th ult. The assets are stated to be $248,000, and there is due depositors $164,000. The bank had a paid in capital of $50,000. Among the causes ascribed are the great depreciation of real estate and the expiration of the charter. It is thought the depositors will be paid in full.

RHODE ISLAND.

PAWTUCKET.—G. C. Loker, grocer, has been attached for $800, and offers to compromise at 30 cents.

WESTERLY.—Alexander Jeffrey, shoes, has assigned.

SOUTH CAROLINA.

BRANCHVILLE.—L. Pearlstein, general store, has assigned.

CAMDEN.—W. F. Perkins, general store, has been closed by the sheriff on mortgages in favor of S. B. Latham.

NINETY-SIX.—T. T. Beacham (agent), grocer, etc., offers to compromise at 25 cents.

WILLIAMSTON.—Hart & Maher, general store, are reported to have assigned.

TENNESSEE.

BELL'S DEPOT.—W. R. Critchelow, dry goods, has assigned.

HUMBOLDT.—J. J. Hammon, dry goods, has assigned.

OAKDALE.—J. M. Carter & Co., general store, are reported to have failed and closed out. Liabilities $1,500; no assets.

WINFIELD.—F. C. Porch, general store, has assigned.

TEXAS.

CORPUS CHRISTI.—M. Lichtenstein, dry goods, has assigned. He has been in business about eight years, controlled a large trade, and has a branch at Laredo, which was opened a year ago.

GALVESTON.—W. C. Burch, dry goods, has been attached.

PILOT POINT.—M. A. Dale & Brother, tinware, have been attached.

RUSK.—J. G. Slover, general store, has failed.

SAN ANTONIO.—J. W. C. Love, jeweler, has assigned to M. H. Clayton. Liabilities $1,900; assets $800.

SHERMAN.—J. L. Kennedy, drugs, has been attached.

TEMPLE.—Wallace & Northrup, general store, have assigned.

WACO.—J. M. McDonald, dry goods and groceries, has assigned. Liabilities $5,000; nominal assets $8,000.

WAXAHACHIE.—T. Rollins, grocer, has failed and been attached.

VERMONT.

BURLINGTON.—S. B. Wager, grocer, offers to compromise at 40 cents.

SWANTON.—B. B. Blake, general store, has gone into insolvency.

SWANTON.—S. S. Morey, millinery, is reported to have failed.

VIRGINIA.

FRANKLIN.—J. M. Story, general store, has assigned.

LEESBURG.—Albert Shiner (agent), tobacco and cigars, has been sold out by the sheriff.

MANCHESTER.—C. F. Liscomb, general store, has been sold out by trustee.

NORFOLK.—A. A. Stewart, feed and liquors, has assigned.

RICHMOND.—Baughman Brothers, stationers, have assigned. Liabilities $90,000; preferred debts $42,000; nominal assets about $92,000, consisting of stock, fixtures, accounts and printing office fixtures. The business had been established about fifteen years, and they controlled a large trade. One of the causes of the failure, it is said, was losses sustained in trying to establish a branch in New York city, which was closed out about a month ago.

RICHMOND.—W. T. Holdsworth, grocer, has assigned.

RICHMOND.—J. W. Richmond, general store, has assigned. Liabilities $7,000; assets $2,000; preferences $2,000.

WASHINGTON TERRITORY.

NEW TACOMA.—R. D. Harrington, furniture, has assigned.

WEST VIRGINIA.

TALCOTT.—Boon & Meadows, general store, were advertised to be sold out by the sheriff.

WISCONSIN.

BERLIN.—James P. Bassett, grocer, has assigned. Liabilities $3,781; assets $2,000.

DE PERE.—At a meeting of the creditors of The Fox River Iron Company the statement showed direct liabilities $106,000, with a contingent liability of $30,000; assets $90,000.

FOND DU LAC.—J. C. Whittlesey, dry goods, has assigned. Liabilities $36,000; assets $48,000. He has been in business over twenty years.

NEILLSONVILLE.—Cannon Brothers, saw mill, have failed. Liabilities $30,000.

WAUSAU.—Charles Schwab, general store, has assigned. Liabilities $2,600; assets about $3,000.

MANITOBA.

EMERSON.—Joseph Fleury, harness, is reported to have assigned.

RAPID CITY.—C. C. Whellams, brick maker, has been sold out by the sheriff.

STONEWALL.—J. B. Rutherford, grocer, is reported in financial difficulties.

VIRDEN.—James Downs, general store, has obtained an extension.

WEST LYNNE.—W. B. Robertson, grocer, is reported financially embarrassed.

WINNIPEG.—Conley & Carmican, shoes, offer to compromise at 85 cents.

WINNIPEG.—Alexander Ross, merchant tailor, has assigned.

WINNIPEG.—Schole & Denison, contractors, have assigned.

WINNIPEG.—Thompson & Co., hats and furs, have assigned.

NEW BRUNSWICK.

MONCTON.—Miss Ellen Wright, millinery, has failed and offers 40 cents. Liabilities $3,800; actual assets $500.

ST. JOHNS.—Finlay & Doherty, grocers, have assigned.

NOVA SCOTIA.

AYLESFORD.—N. H. Davidson, general store, has assigned.

NEW GLASGOW.—Dodson & Waterman, victuallers, have assigned.

PORT HOOD.—John Twamsley, general store, has assigned.

PROVINCE OF ONTARIO.

ALLISTON.—J. Y. Merrick, auction, etc., is reported to have left town.

APPIN.—DeWitt & McRoberts, general store, are advertised to be sold out by trustee.

BARRIE.—L. LeClear, cigar manufacturer, is in the hands of the sheriff.

BELLEVILLE.—J. S. Crothers, confectioner, offers to compromise at 50 cents.

BRANTFORD.—Hugh J. Jones & Co., dry goods, who recently assigned, offer 65 cents.

BROCKVILLE.—R. A. Wilson, drugs, is advertised to be sold out by the sheriff.

CAMPBELLFORD.—D. D. McDonald & Co., grocers, are advertised to be sold out under a chattel mortgage.

COLLINGWOOD.—John H. Anderson, hardware, is financially embarrassed, and his store is closed.

CORNWALL.—C. L. Liddell, shoes, has assigned.

CORNWALL.—J. McAdam, baker, has failed.

DALHOUSIE.—E. R. Smith, general store, is reported to have left town, and his brother is taking stock.

HAMILTON.—Miss Emma Johnson, millinery, has assigned.

INGERSOLL.—A. G. Murray & Co., teas, are in possession of the sheriff. They recently gave a chattel mortgage to the Imperial Bank for $2,500.

INGERSOLL.—The Ingersoll Shirt Manufacturing Company is reported financially embarrassed.

KINGSTON.—Charles T. Gray, showcase manufacturer, is reported to have left town.

LONDON.—The liabilities of the Mahon Banking Company are reported to be about $200,000. Nearly all the assets were transferred to their bankers before the suspension. It is feared the estate will realize poorly.

OTTAWA.—John Cowan, grocer, has assigned.

OTTAWA.—Joseph Flanagan, dry goods, has assigned.

ST. MARY'S.—William McIntosh, dry goods, offers to compromise at 60 cents.

ST. THOMAS.—The estate of C. Mitchell, drugs, has assigned.

TORONTO.—John Kilwee, hotel, is unable to meet payments, and some creditors have removed chattels.

WATERFORD.—The stock of G. F. Sterling, photographer and grocer, is advertised to be sold out under mortgage.

PROVINCE OF QUEBEC.

ARTHABASKA.—P. H. Matte, tanner, has compromised at 20 cents.

EAST WATERLOO.—Charles Millotte, tailor, has assigned.

MONTREAL.—John Connolly, wood, has assigned.

MONTREAL.—The estate of J. H. Dorval, dry goods, is advertised for sale by the trustee.

MONTREAL.—William Elliott, grocer, offers 25 cents.

MONTREAL.—Hodgson & Co., manufacturers of boots and shoes, have assigned to J. M. M. Duff. Liabilities about $30,000.

MONTREAL.—William Hood & Co., gents' furnishing goods, etc., offer to compromise at 40 cents.

MONTREAL.—M. Riendeau, fish, has sold out, and creditors are unable to get a settlement.

MONTREAL.—Joseph Versailles, Jr., plumber and roofer, has called a meeting of creditors.

SOREL.—Louis Labelle, hardware, has assigned to Thomas Darling. Liabilities $17,500; nominal assets $15,000.

ST. HYACINTHE.—P. A. Blanchet, saddler, offers to compromise at 10 cents.

ST. JOHN'S.—Remi Breault, dry goods, has compromised at 75 cents.

ST. JOHN'S.—Dunn & McQuillan, confectioners, have assigned, and offer 40 cents.

VILLAGE RICHELIEU.—W. Loiselle, grocer, has compromised at 60 cents.

IS THE DIRECT LINE

To the famous Wheat Fields of Dakota.
To the beautiful Yellowstone Valley.
To the wonderful National Park.
To the great Montana Cattle Ranges.
To the new Gold and Silver Mines.
To the new Grain Belt of Washington.
To the Rich Valleys of Oregon.
To the magnificent Puget Sound Region.

It runs through the Growing Towns of the New Northwest.

IT PASSES THROUGH SCENERY OF UNSURPASSED BEAUTY.

IT IS THE BEST ROUTE

For Settlers, Travelers and Sportsmen.

Fast Trains and Pullman Cars.

Selling Agents in U. S. A. for FINLAYSON, BOUSFIELD & CO., Johnstone, Scotland; and THE FLAX MILLS, Grafton, Mass.
298 DEVONSHIRE STREET, - - BOSTON.

The only Prize Medal of the London Exhibition, 1851; at Northampton Exhibition of Leather Work, 1873; at Cincinnati Exposition, 1879-'80; The Gold Medal Leather Exhibition at Frankfort-on-Main, Germany, 1881, etc., etc. Adopted by every machine on exhibition at New England Manufacturers' and Mechanics' Institute Fair, 1881 (Boston), to show the quality of work the machines would do. Did not exhibit at Paris, Philadelphia, or Charitable Mechanics' Fair, Boston, 1881.

JOHN P. SQUIRE & CO.
Packers of
PORK, LARD, HAMS,
AND MANUFACTURERS OF EXTRA LARD OIL,
21, 23 & 25 FANEUIL HALL MARKET, AND 39 NORTH MARKET STREET, } BOSTON.

JOHN P. SQUIRE. [*Established in* 1842.] FRANK O. SQUIRE.

Slaughtering and Curing Establishment, Gore Street, East Cambridge.

WORSTED YARNS.

NONANTUM WORSTED CO.
Office, 5 Chauncy St., Boston.

Worsted Yarns for Cassimeres, Coatings, Dress Goods; also Knitting Yarns for hand and machine work; also Tops for Worsted Spinners.

HALL & CO.,
COMMISSION MERCHANTS,
No. 5 Chauncy Street, Boston.

WORSTED YARNS.

THE TRACY WORSTED MILLS CO. (Limited.)
OFFICE AND MILLS,
2500 SPRUCE ST., PHILADELPHIA.

Fine Worsted Yarns, suitable for Cassimeres, Coatings, Dress Goods, etc.; also Knitting and fine Zephyr Yarns, for hand and machine work.

Established A. D. 1842.

SAMUEL LORING,
PLYMOUTH TACK AND RIVET WORKS,
Manufacturer of Tacks, Brads and Nails,
Norway Iron, Copper and Brass Rivets and Burrs,
PLYMOUTH, MASS.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

MASTERS & CO.,
COMMISSION DEALERS IN
ORES, PIG IRON AND METALS,
18 ATWATER BUILDING,
CLEVELAND, OHIO.

BRADSTREET'S

A Journal of Trade, Finance, and Public Economy.

VOL. VII—No. 245.] NEW YORK, SATURDAY, MARCH 10, 1883. [PRICE, 10 CENTS.

Entered according to Act of Congress, in the year 1883, by THE BRADSTREET COMPANY, in the Office of the Librarian of Congress, at Washington, D. C.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MARCH 10, 1883.

NOTES OF THE WEEK.

The stock market this week has justified to some extent the promise of last that a rise of prices was coming. Congress having adjourned, the tariff bill having passed, and foreign exchange fallen to a point which showed a profit in importing gold, there was good material for working up a bullish feeling in the street. The advance of prices has been mainly in those stocks in which there was a large short interest, like Union Pacific. Their advance has stimulated the rest of the list. The most discouraging sign, however, is that the market gets dull when it advances, whereas it should get active then if public support were coming to it. This may come in at a later stage. A stringency in the loan market hampers the efforts of the bull operators at this time.

We have received the constitution and by-laws of a society contemplated in New York city, to be known as the City Reform Club. All organized efforts looking to a better conduct of city business in New York are, of course, to be commended, save that there is need of greater prudence in this direction to the end that organizations ineffective for good may not intervene to bring odium upon the very name of reform. It is to be hoped that such will not be the outcome of the present movement, but it must be admitted that the outline of the objects of the society is forbidding as regards the prospect for usefulness. The purpose is too general, being "to secure and maintain good municipal government," to be furthered by various means, mostly all of which are almost equally as general A reform movement to achieve anything should be concentrated upon a limited number of specific objects. Thus, if reform in the conduct of New York city's business is desired, the thing to do is to organize to bring about certain changes, organic or otherwise, calculated to further the general results in view.

On another page will be found abstracts of the decisions of the United States Supreme Court in the Louisiana bond cases. Those decisions have done a good deal towards settling the construction of the eleventh amendment to the Constitution. In the cases brought against the state officers of Louisiana, the endeavor was made to secure a mandamus compelling certain state officers to carry out the provisions of the law under which the consolidated bonds in controversy were issued, and which was abrogated by the Constitution of the state adopted several years later. The judgment of the Supreme Court is to the effect that the executive officers of the state are, as such officers, subject to the Constitution and laws of the state and have no power to act outside of them, and that the judiciary of the United States cannot step in between the state and its officers and take control of the action of the latter. In the cases brought by the states of New Hampshire and New York against Louisiana, where the attempt was made to collect the claims of individual citizens by means of suits instituted by states holding such claims by assignment, the Supreme Court took the view that the proceedings were intended to evade the restrictions of the eleventh amendment, and held that the states could not act as collecting agents for their citizens, and that the citizens could maintain no action in the name of the state which they could not maintain of their own right in their own names.

The decisions of the court will, without doubt, be accepted as laying down the correct constitutional doctrine in relation to the much discussed question of the enforcement of state debts under the Constitution. The view taken by the learned judges does not, it is true, offer much consolation to those who hold repudiated state bonds. There appears to be no way of enforcing claims against defaulting states through the machinery of the federal courts under the Constitution as it exists at present, and the prospects of the repeal of the eleventh amendment, which has been advocated by some, seems an improbable contingency in any but the most distant future. What loss is involved must fall upon those who have trusted to the legislative promises of necessitous and unprincipled states. The whole question of state debts, however, is one of the past rather than of the future. The time has gone by when the states were in urgent need of credit. The debts of the past were in great part contracted under the plea that state aid was needed for the construction of great works of public utility, such as railroads, canals, and other kindred enterprises. The decisions of the Supreme Court will serve a useful end in pointing to what we believe the proper policy of the future to be, namely, to refuse to lend money to states whose credit has been in the slightest degree tainted, and finally for the several states to go out of the debt business altogether.

The Civil Service Commissioners appointed by President Arthur are in Washington, and are about to enter upon their work. What the actual results of their activity will be it is, of course, premature to attempt to forecast. This would be so even if they were engaged upon a matter in which they had the hearty sympathy and coöperation of the President and other prominent politicians. That they have not that sympathy the leading civil-service reformers apparently believe, and in the recent action of the President there is to be found abundant reason for that opinion. The appointment of the Commissioners was followed by the removals in New York, which were evidently made on entirely other grounds than such as would recommend the President's action to zealous advocates of reform principles. The removal of Mr. Burt, an officer who had given constant evidence of his devotion to the reform cause, from an influential position in the custom house to the chief examinership under the commission, at a much smaller salary, was a somewhat pointed piece of satire, and one which indicated fairly well the President's real attitude toward the reform movement.

This action of President Arthur was recently made the subject of some resolutions by the executive committee of the National Civil Service Reform League, in which that body declared that the removal of Mr. Burt and his replacement by a gentleman without experience in the duties of the office, and unfriendly to reform, at a time when absolute fidelity to its principles in the office held by Mr. Burt was of the utmost importance to the success of the system, was a serious blow at reform in its strongest hold, a grave embarrassment of the work of the Civil Service Commission, and a violation of those sound principles of administration which the country had approved, which the President himself had commended in his messages, and which Congress had enacted into law. The committee very sensibly urges the repeal of the act of 1820, limiting the terms of important offices to four years, which by periodically vacating all such offices enables mere personal and partisan objects to be accomplished without the odium of arbitrary and causeless removal.

In its review of the financial history of 1882 the London *Economist* refers to the exceptional activity in floating new securities in England between July and January last, which was unparalleled in the history of Great Britain. The chief mania in that direction was for electric light and power company shares, most of which are already at a discount. Some are even in process of liquidation. These enterprises have contributed £7,000,000 to the year's totals. The foreign government loans in the London money market aggregate £30,400,000, of which sum Italy took £14,600,000, Russia £8,900,000 and Turkey £3,000,000. The foreign railway demands called for £23,500,000. This sum included loans floated for the United States, Mexico, Argentine Republic, while the British railways called for £11,000,000 and colonial lines for £12,000,000. The land and mortgage companies are said to have covered another £9,300,000, Canadian requirements being most important, but including also North Borneo requisitions, demands for United States cattle ranches, and the like. It is added that in the Canadian Northwest the land fever appears to have been a little overdone. In these and similar ways £115,000,000, out of a total of £148,000,000, are accounted for. The French financial journal, *Moniteur des Intérêts Matériels*, states that the "creation of capital" in the United States in 1882 amounted to £35,985,000, against £17,729,000 in 1881, £19,080,000 in 1880 and £160,000 in 1879. During the calendar year just concluded the above figures place America second in this respect to Great Britain, which floated shares of new companies to the amount of £58,969,000.

The French Premier is very sensibly endeavoring to allay the alarm which has been excited by the recent very inconsiderate action of the government. When the question of taking into consideration the proposals for a revision of the constitution came up in the Chamber of Deputies he declined to court a repulse by presenting any such proposal to the Senate. The government, he declared, would energetically bring the matter before the chambers when it believed that such a revision was possible, but for the present the measure was inopportune. He cautioned the advocates of revision that the people would withdraw their support from the republic if they saw that it meant instability and agitation. The question, he thought, was one for friendly compromise, and should not be raised as a means of revenge against the Senate. He suggested that an attempt might be made before the elections in 1885 to induce the Senate to accept a revision.

THE PRESENT AND FUTURE TARIFF LEGISLATION.

In another column the more important features of the Tax bill passed in the closing hours of the Forty-seventh Congress, and their probable effect, so far as a definite statement is possible, are set forth. The way in which the portions of the bill relating to the tariff were framed and passed is a striking proof of the inability of the House of Representatives to deal with the very complex tariff in a straightforward, business-like manner. After wrangling over the detail of a tariff bill of its own, the House, whose constitutional province it is to originate tax bills, is compelled either to accept the Senate tariff bill or fail to pass any at all. Tariff legislation at Washington has come to be a discreditable conflict of individual and corporate interests for special advantages. The present tariff bill is the unsatisfactory outcome of an attempt to reconcile the conflict of interests so far as to permit the passage of some sort of a bill to meet the public demand for a reduction of taxation. The amount of reduction effected remains to be seen. No two authorities are agreed upon this point. Some simplification of the tariff is believed to have been effected, and this is particularly welcome. While the present bill is welcomed for the minor benefits conferred, it is not to be thought that the adjustment will prove in any sense a permanent settlement of the vexed questions at issue. As the appropriations for the ensuing fiscal year have been reduced some $60,000,000, it is fairly certain that the necessity of a further reduction of taxation will be forced upon the Forty-eighth Congress at its first session. It is to be hoped that the policy advocated by BRADSTREET'S will find favor. This position is in brief as follows: The policy of protection was entered upon in the United States under the plea that its duration would be temporary. Sooner or later a distinct reckoning must be had before the people, unless the popular conflict is warded off by an avowed willingness on the part of the manufacturers to submit to a gradual reduction of protective taxes at intervals extending over a period of years. The carrying out of schemes in finance dependent upon future legislation is difficult, but it is believed that the tariff muddle is susceptible of such a solution. This done, the tariff question would be "taken out of politics." In no other way is its removal possible. At present it is the political question for contending parties to battle over. The depressing influence of a prolonged popular contest upon the business interests of the country would be very great. This outcome can, we believe, only be averted by an agreement of those who control the leading industries with the revenue reformers for a gradual reduction of the tariff. Such a policy was promised, in theory, by those who were mainly instrumental in securing the adoption of protection. An imperial government in dealing with protective taxes would at the proper interval frame and put in execution such a scheme of reduction. But with agents of the manufacturers practically in charge of legislation at Washington, the permanent solution indicated is out of the question unless the captains of industry will agree thereto. Failing in that, a popular contest will, perforce, be entered upon, and the danger is that the ultimate outcome will be a violent reduction of protective taxes. From every point of view it is desirable that such a contest be not invited.

BULLION CERTIFICATES AS CURRENCY.

These columns having been freely opened to a discussion of the speculative advantages which might be derived from authorizing the issue of legal tender bullion certificates, as advocated by Mr. I. W. Sylvester, of the United States Assay Office, our own views are submitted as follows:

A law providing for the issue of gold-bullion certificates would serve no purpose, worthy of consideration, which is not already accomplished by the present laws governing the free coinage of gold and the issue of gold-coin certificates, unless gold-bullion certificates should be issued in amounts less than twenty dollars, to the exclusion of small gold-coin certificates. There is no valid reason why the present law should not be amended so as to provide for issuing gold-coin certificates of the denominations of five and ten dollars. On the contrary, there is a perceptible want for these smaller gold-coin certificates, and, if provision were made for them, there would be left no argument in favor of gold-bullion certificates.

Persons unfamiliar with mint operations might suppose that the expedient of issuing bullion certificates would save owners of gold bullion valuable time in exchanging it for money; but it would not. After gold bullion has been assayed the owner is not obliged to wait for his coin. Although the government does not buy the assayed bullion (as M. de Laveleye and some other writers aver), there is a fund provided for the accommodation of gold-bullion depositors, from which coin is borrowed to exchange for the assayed bullion, and the bullion holder can obtain the coin as promptly as he could obtain a bullion certificate.

The proposition to issue silver-bullion certificates, and to make of them a legal-tender currency at gold value, is open to grave objections. Mr. Sylvester suggests that the Secretary of the Treasury might issue daily bulletins of the gold value of silver bullion, and that the quotation for one day should be the legal-tender rate for the next. It needs no gift of prophecy to foretell that these silver-bullion certificates would put the entire stock of silver bullion in the United States under the easy control of gambling syndicates to the extent of a gambling margin. That they would be a fluctuating measure of values admits of no question, and, as such, of what use would they be in legitimate business transactions? It is entirely fair to assume that the banks would not receive such certificates except on special deposit, and business men generally are disposed to receive nothing but bankable money or checks in payment of accounts. Their legal tender feature, instead of bettering the situation, would make it worse. Merchants would be driven to adopt the necessary expedient of printing on their bills, under the significant heading of "Terms," the words "payable in gold coin;" and the prejudice against the silver-bullion certificates would aggravate the existing prejudice against silver dollars. Independent of other considerations, the probability being that the Treasury's bullion quotation of yesterday and Wall street's quotation of to-day would frequently be at variance, it is unreasonable to expect that these legal-tender silver-bullion certificates would serve any business purpose except that of gambling.

EXPORTS AND IMPORTS IN 1882 AND 1881.

The statement of values of imports and exports of domestic and foreign merchandise, coin and bullion, during the calendar year 1882, as compared with 1881, just published by the National Bureau of Statistics, is condensed as follows:

VALUE OF IMPORTS.

	1882.	1881.
Free of duty	$214,036,390	$266,910,261
Dutiable	538,807,117	463,299,187
Total merchandise	$752,843,507	$670,209,448
Coin and bullion	22,500,913	68,994,265
Total imports	$775,344,420	$739,203,713

VALUE OF EXPORTS.

	1882.	1881.
Domestic merchandise	$749,911,309	$814,162,951
Foreign merchandise	18,070,637	19,386,176
Total merchandise	$767,981,946	$833,549,127
Coin and bullion	56,038,134	19,666,817
Total exports	$824,020,080	$853,215,944

The total value of imported merchandise remaining in warehouse December 31, 1882, was $31,260,307, against $24,135,324 on the like date 1881. The increased warehouse stocks were, therefore, valued at $7,124,983. The excess in value of exports of domestic merchandise in 1881 over the value of merchandise imported was $143,953,503, and the excess in value of exports of both domestic and foreign merchandise over that of the merchandise imported was $163,339,679. In 1882 the value of merchandise imported exceeded the value of domestic merchandise exported by $2,932,198, but the total value of exports of domestic and foreign merchandise exceeded that of the aggregate value of merchandise imports by $15,138,339. The excess value of coin and bullion imported in 1881 was $49,327,448, but in 1882 the movement has changed and the value of the excess exports of coin and bullion amounted to $33,537,221.

The detailed statement of imports and exports by quantities and values affords an opportunity to trace the ebb and flow of foreign commerce, and thus determine the special channels in which the various increases or decreases in receipts and shipments of merchandise have shown themselves. It will be noted in the statistical summary given above that in 1882 the United States received, duty free, merchandise to the value of $7,126,129 in excess of 1881. The gain in importations of india rubber and gutta percha in 1882 alone increased nearly $7,000,000. Foreign eggs were received valued at $1,200,000 in excess of those coming here in 1881, raw silk about $3,000,000 in excess, indigo about $1,400,000, and cotton and linen rags about $1,200,000. A portion of these increased importations were offset by lessened values of receipts of coffee about $5,000,000, tea about $4,000,000, and hides and skins, other than furs, about $2,000,000 less than in 1881. The gain in value of importations of dutiable products in 1882 was much more noticeable, amounting to $75,507,930. Four-fifths of this net increase may be accounted for in the conspicuous gains made in the following articles. The figures are given in round numbers only:

APPROXIMATE GAINS IN VALUE OF DUTIABLE IMPORTS IN 1882.

Sheep, goat and alpaca wool	$2,000,000
Cloths and cassimeres	3,000,000
Dress goods	4,000,000
Other manufactures of above	4,000,000
Total of this variety	$13,000,000
Refined sugar	$11,000,000
Other manufactures of silk	8,000,000
Fruits and nuts of all kinds	4,000,000
Tin plates	3,000,000
Steel ingots, bars, sheets and wires	3,000,000
Potatoes	2,000,000
Wood, and manufactures of	2,000,000
Peas, beans and other seeds	1,500,000
Flax, and manufactures of	1,750,000
Glass and glassware	1,600,000
Buttons and button materials	1,250,000
Leather of all kinds	1,250,000
Chemicals, drugs and dyes	1,000,000
Raw hemp	1,000,000
Pig iron	1,000,000
Total	$60,150,000

There were no importations in 1882 whose value was as much as $1,000,000 less than in 1881, with the following exceptions:

DECREASED VALUE IN IMPORTS IN 1882.

Railroad bars or rails of iron, about	$2,400,000
Railroad bars or rails of steel, about	2,300,000
Total	$4,700,000

Beyond these two the only noteworthy declines in values of imports were precious stones $600,000, opium and extract thereof $200,000, and salt $200,000. These three, with the total last above given, aggregate $5,700,000, and leave a net gain in value of imports of dutiable merchandise in 1882 of $54,450,000. The remaining $20,000,000 increased importations of duitable merchandise mentioned is made up in less conspicuous gains on a great variety of articles.

The value of exports of domestic merchandise in 1882 was $64,251,642 less than in the preceding year. Five-sixths of the net gains are accounted for in the following, which shows the approximate increased and decreased values of some of the exports in 1882, as compared with the preceding year:

DECREASED VALUE OF LEADING DOMESTIC EXPORTS IN 1882.

Indian corn	$23,500,000
Bacon	15,500,000
Wheat	15,000,000
Lard	6,500,000
Illuminating oils	4,500,000
Fresh beef	4,000,000
Cheese	4,000,000
Butter	2,500,000
Hams	2,000,000
Pork	2,000,000
Tallow	1,500,000
Fur and fur skins	1,000,000
Spirits distilled from grain	1,000,000
Naphtha, benzine, etc	600,000
Refined sugars	300,000
Total leading decreased values	$93,400,000

INCREASED VALUES OF LEADING DOMESTIC EXPORTS IN 1882.

Wheat flour	$6,000,000
Living animals	5,800,000
Hops	4,000,000
Unmanufactured cotton (not Sea Island)	3,300,000
Salt beef	3,000,000
Boards, joists, etc	2,000,000
Shooks, staves, etc	1,900,000
Uncolored cotton manufactures	1,300,000
Machinery (n. e. s.)	1,300,000
Cloverseed	1,500,000
Spirits of turpentine	1,200,000
Logs, masts, spars, etc	1,100,000
Agricultural implements	1,000,000
Lubricating oils	1,000,000
Steam engines, locomotives, etc	900,000
Sewing-machines and parts thereof	700,000
"Other manufactures of iron"	800,000
"Other manufactures of tobacco"	600,000
"Other lumber"	500,000
Household furniture	500,000
Rosin and turpentine	500,000
Leaf tobacco	400,000
Total of leading increases in value	$39,400,000
Total decreases, as above	93,400,000
Net decreased values in leading domestic exports	$54,000,000

The exports of foreign merchandise which arrived in this country free of duty were $1,899,742 less in 1882 than in 1881, and of that class which paid duty on coming here the shipments abroad were valued at $584,203 in excess of like exports in 1881. This shows a net decrease in total value of reshipments of foreign merchandise in 1882 of $1,315,539.

THE NEW TARIFF LAW.

The Tariff bill passed, after a narrow escape from defeat, six hours before Congress expired, and will be known as "The Tariff Act of March 3, 1883." It cannot be stated with certainty that anything more is known about it now. The only positive fact about the new law is that in some particulars it seems to simplify the tariff. It remains to be determined by experience whether this simplification is real or apparent. The law makes material reductions in internal revenue taxation. This feature of it can be better understood and more accurately estimated than the tariff portion. The internal revenue feature of the bill, especially that portion of it which repeals the tax on tobacco, cannot fail to meet the united condemnation of all sound economists. There was no occasion for a reduction of the tobacco tax. The manner in which parts of this tax has been repealed, by providing for a rebate, opens the door to very extensive frauds, which it will not be possible even for the "army of internal revenue officials" to prevent or punish. It is claimed that the bill will make reductions ranging from $60,000,000 to $75,000,000 in the national revenue. The law ought to make the cost of many articles cheaper to the consumer. That is all that can with confidence be said of it. It is by no means certain, however, that it will effect any considerable reductions in the revenues. It is very possible that the reduction in the rates may

lead to such increased importations that the aggregate revenue will not be reduced. In the sugar schedule, for instance, it has been claimed that the reductions might reach $13,000,000. Mr. Aldrich, the member of the Senate Finance Committee who was best informed upon that subject, is reported to have made a careful revision of the new schedule since the law passed, and to be of opinion that the maximum reductions will not exceed $4,000,000. The representatives of some of the sugar refineries are of opinion that the law will effect no reductions in the revenue; but it is claimed that it should reduce the cost of sugar to the consumer three-quarters of a cent per pound. Others maintain that the minimum reduction will be $9,000,000 on sugar.

The bill is much nearer to the bill of the Tariff Commission than had been expected. The new law has 631 distinct articles outside the free list. Of these 524 are taken from the Commission's bill.

The points gained by the tariff revision, as to which there can be no dispute, are these:

1. The Tariff law has been greatly simplified.

2. Compound duties have been abolished, except in the woolen schedule, and with the exception of cigars and lead-pencils.

3. The law has been much shortened and made more symmetrical, and is more like a general system than the incongruous mass of shreds and patches which constituted the law which preceded it.

4. The "basket clauses" have been very much reduced in number and extent, and articles hitherto "unenumerated" and "not otherwise provided for" have been assigned to new classifications, and have been defined with great precision. On account of this change we shall probably hear less of "Treasury-made law."

5. The law has been freed from a great many cumbersome details and ambiguities which have grown up since 1861.

6. There has unquestionably been a reduction of rates in most of the schedules. Whether that will result in a reduction of revenue is problematical.

7. The abolition of duties on incidental charges of importation, including transportation, "commissions," "boxing and handling," will be a very great convenience as well as an actual saving to the importer. This change will reduce the expenses of importation over those under existing law about 5 per cent.

8. The law is beyond question a gain for reform, and perhaps is more than could have been expected from a Congress organized so carefully in the interests of extreme protection.

9. The philosophy of the reductions generally has been that there have been reductions on raw materials and upon the more common and coarser articles of manufacture, while the increases have generally been on luxuries and upon the higher grades of manufactured articles.

The reductions in the internal revenue part of the bill may be estimated with greater accuracy than any other feature of it. They are estimated by the Commissioner of Internal Revenue, Controller of the Currency and the Secretary of the Treasury—an estimate which is concurred in by the committees of the two houses—to be as follows:

Friction matches	$3,272,258
Patent medicines, perfumery, etc.	1,978,395
Bank checks	2,318,455
Bank deposits	4,007,701
Savings bank deposits	88,400
Bank capital	1,138,340
Savings bank capital	14,729
	$12,818,281
Collected by Treasurer of United States from—	
National bank deposits	437,774
National bank capital	5,521,927
	$18,777,983
Special license taxes	900,000
Cigarettes	278,516
Cigars	9,122,926
Tobacco	12,516,870
Total internal revenue reduction	$41,596,295

The attempts made by the committees of the two houses to obtain accurate information as to the probable reductions in customs failed. A resolution of the House directing the Secretary of the Treasury to obtain the information was answered by the statement that the government was not in possession of the facilities which could give the necessary information, and that it probably could not be obtained. The Tariff Commission did not venture upon the arduous and impossible task. The customs appraisers of the great ports, to whom the subject was referred, reported their inability to make the computation. Even the estimates which have been made are stated by those who made them not to be accurate, and, of course, their reliability is at any moment subject to question. Even with these qualifications no statement of any sort except in the most vague and general way has been submitted. The Congress of the United States, and the Treasury of the United States, with all the means at their command, abandoned the task. Reliable estimates may be secured with respect to certain articles where the classification is not changed, but as to others, not even an approximately correct estimate can be made. The classifications are different, specific rates in many instances are substituted for ad valorem, and the charges for "packages," "inland freights," "port charges," "commissions," which were an important element in the old tariff, have no place in the new. Take as an illustration the duty on empty glass bottles and vials, on which, under the old law, there was an ad valorem duty of 35 per cent. In the new law it is changed to a specific rate per pound. The invoices of the last year on the articles imported under the ad valorem rates do not give the weight of the articles, so that there is no basis for comparison. The duty on sugar during the last year also was collected almost entirely upon the basis of color alone. In the new law the polariscope is to be the test of saccharine strength on all sugars above No. 13 Dutch standard. The duties collected on these sugars in the last fiscal year amounted to $46,644,097, or 21.63 per cent. of the total duties collected on imports into the United States. Yet, as to this large percentage of the imports, nearly one-quarter of the whole, it will be seen that there is absolutely no practicable basis of comparison. The change in the classification of the various branches of the metal schedule makes a comparison still more impossible. It is to be seen, therefore, that all statements as to reductions, if any, which will be effected by the new tariff, are entirely speculative. There is no means of proving whether the estimates or "guesses"—for that is what they are—are correct or not, and there will be no means of proving their correctness, or inaccuracy, until the law shall have been tested by its practical operation. There is no way, therefore, of making a comparison between the old tariff and "the tariff of March 3, 1883," except by a comparison of percentages, and that is only possible, with absolute accuracy, in the schedules the classification of which have not been so altered that really no basis of comparison remains.

The following statement is an attempt at an approximate estimate of such a comparison by percentage, so far as practicable, but it is subject to revision:

Schedule A. Chemicals. Generally speaking the reductions in the chemical schedule range from 25 to 30 per cent. on existing rates. There have been reductions upon most drugs and dyes, with the exception that sumac is retained at a high duty to protect the Virginia industry. The products of lead, zinc and spelter have been put in at a slight advance. The New England manufacturers were considered in the reductions on dyes, and the dye and cotton manufacturers will be benefited by this change. The chemical free list of the Tariff Commission was considerably increased by the compromise bill.

Schedule B. Earthenware and glassware. Common window-glass was reduced by the abolition of charges, etc., so that it is claimed that the rate of duty will be about 5 per cent. less than under existing law. It is not altogether clear that this will be the result. There is a reclassification in this schedule which will be greatly to the benefit of the earthen crockery manufacturers of New Jersey and Ohio.

Schedule C. Metals. There has been a very thorough reclassification of this schedule, as the result of which there has been a reduction in iron, tin plates, steel rails and a great many articles of hardware. The compound duty in this schedule is also abolished. Iron and steel are merged at many points where, under the old law, they were distinct. This is due mainly to the fact that with the progress of invention hearth steels are now used for many purposes for which cast and even wrought iron were employed when the old tariff was passed. An attempt of the crucible-steel makers to draw a distinct line between their high-priced steel and the cheaper Bessemer was not successful. This schedule is defined with much more precision than the old law, the effect of which will probably be that while on the surface the duties seem and are reduced the protection is actually increased. The duties on unspecified iron manufactures and steel are heavily increased in the "basket schedule." The present rates look lower, and at the present prices they will be lower, but the definitions are such as to scrap-iron, for instance, that crop-ends are excluded, which will result in a very considerable advance in this portion of the metal schedule. The claim is made that the changes in the metal schedule will be from 10 to 20 per cent. over existing rates, but the estimate is purely speculative.

Metals other than iron and steel. There has been a general reduction in many portions of this branch of the iron schedule, but a number of miscellaneous productions which have hitherto been classed at 30, 35 and 45 per cent. have been lumped in one class and the rate fixed at 45 per cent.; this, undoubtedly, will result in an increase.

Schedule D. Wood and Woodenware. There has been no special change in this schedule from the existing law, the attempt to place rough lumber on the free list having failed.

Schedule E. Sugar. There are three changes in this schedule: first, the rate is made specific; second, the polariscope is used; third, the classification is altered. The adoption of the specific rate omits one source of revenue. The adoption of the polariscope, it is expected, will encourage the introduction of sugars whose primary manufacture is skillfully conducted. The change of classification between 13 and 16 Dutch standard will be of benefit to the Louisiana planters. The alteration in the classification makes it very difficult to estimate the amount of the reductions. The estimates range from $4,000,000 to $13,000,000. One of the most competent experts fixes the reduction in the sugar schedule from $9,500,000 to $10,000,000. At all events the chief reduction in the tariff schedule is on sugar.

Schedule F. Tobacco. The most notable change in this schedule is the increase on Sumatra tobacco from 35c. per pound to 75c. and $1 per pound, according to quality. This was done to protect the producers of the Connecticut valley and of Pennsylvania from competition in the production of tobacco for wrapping purposes.

Schedule G. Provisions. There was no considerable change in this schedule. Barley and malt are slightly reduced, and there is a considerable reduction on dried fruits. Of articles in general consumption, oatmeal is reduced.

Schedule H. Liquors. There has been an important addition in this section to the duty on liquors by abolishing all allowance for breakage, leakage, or damage. This, at present, is estimated at about 5 per cent. on each invoice, which would admit one bottle in twenty free. This makes the weight of the new duty about $7.60 on champagne, in quarts, against $6, the old rate. The real increase of duty on champagne is $1 per dozen for quarts. There has also been an increase on still wines, in casks, of 10c. per gallon. The chief changes in the liquor schedule have been in the direction of an increase.

Schedule I. Cotton and Cotton Goods. It is claimed that there is a reduction in this schedule of about 35 per cent. on the present rates. There has been a general reduction in the list, excepting on fine hosiery, cotton laces, embroideries, insertings and lace window-curtains. Some articles are raised from 35 to 40 per cent. There has been, however, a very considerable reduction on thread, which will now be required to pay but 7c. a dozen instead of 6c. a dozen and 35 per cent. ad valorem. Yarns, too, will pay a single duty, the compound duties in this schedule being abolished.

There have been very important changes made in the cotton schedule. The classification has been simplified and rendered more symmetrical. The number of prices under which yarns are classed have been increased. The classification in the old law, which includes jeans, drilling, bed-tickings and the like, has been abandoned, and a uniform classification by the number of threads to the square inch—100, 200, etc.—adopted, each class being divided into three subdivisions of gray, bleached, and colored. Many of the articles which in the old tariff were classed under sundries have been taken out from that class and put under woven and ornamented goods, and two new classes are created under the head of knit goods, namely, cut and full knit goods. Even with these modifications and simplifications the cotton schedule is still quite intricate.

Schedule I. Hemp, Jute and Flax. Jute butts, which were on the free list, were fixed by the conference committee at $5 per ton.

Schedule K. Wool and Woolens. The difference in the new tariff in raw wools is one of rates and not of classification. On manufactured wools the chief changes, on the other hand, are of classification and not of rates. The highest priced raw wools lose the most duty; the highest priced woolen manufactures gain the most. Woolen yarns, to a great degree the raw material of the manufacturer, are reduced from 40c. to 24c. per pound in the grades which are most used. The object of this is to encourage the use of the lighter variety of wool goods, and to consequently stimulate the manufactures into which this class of wool enters. Two grades are made in ready-made clothing, viz., "mens' wear" and "women's cloaks and wraps." A new duty has been made upon these grades, which will bear with special severity on the cheaper and coarser kinds of ready made clothing, which constitute the chief portion of the imports. In flannels and blankets the duty is lightened both by reduction and by introducing a new division at 80c. a pound in value. Comparatively few of the goods which now come in are under 80c. a pound, and the reduction on these is heavy. Merino yarns in gray color are much lower than the Commission rates. In worsted stufis the classification and description, with regard to the thread used in the material, will be likely to result in litigation. There has been a sharper average reduction in carpets than in the other points in the schedule, some of the reductions being 20 per cent.

The following table shows the approximate percentage of reduction in duty on flannels, blankets, etc., woolen and worsted yarns, and all worsted manufactures of every description, valued as indicated per pound:

Values per lb.	*New rates. per ct.*	*Commission's rates. per ct.*
$0.45	21 85	26.22
.50	21.05	25.26
.55	20.30	24.36
.60	23.52	23.52
.65	25.49	25.49
.70	24.80	24.80
.75	24.15	24 15
.80	23.52	23.52
.85	7.21	25.07
.90	6.74	24.53
.95	6.30	24.02
1.00	5.88	23.52
1 10	5.04	10.70
1.20	4.35	9.18

The following table shows the approximate percentage of the reduction in duty on woolen cloths, woolen shawls, and on manufactures of wool, etc., valued, as stated, per pound:

Value per lb.	*New rate, per ct.*	*Commission's rate, per ct.*
$0.40	23 43	31.25
.45	22.81	30.41
.50	22.22	29.03
.55	21.66	28.86
.60	21.12	28.16
.65	20.61	27.49
.70	20.13	26 84
.75	19.67	26.22
.80	19.23	25.64
.85	7.21	25.07
.90	6.74	24.54
.95	6.30	24.02
1 00	5.88	23.53
1.10	5.08	10.73
1.20	4.35	9.78

Schedule L. Silks and Silk Goods. In this schedule the duties have been greatly simplified. Raw silk is still free. The rates at 30 and 35 per cent. ad valorem cover a great many articles which have hitherto been divided into several classes. Special pains have been taken to determine the point at which silks are required to pay a specific duty. All other rates, with the exception of one of 10 per cent. on button goods, are fixed at 30 and 50 per cent.

Schedule M. Books and Paper. There has been a slight reduction on paper and paper pulp; but the change is not of much importance, and not likely to materially affect the present duties. The rates on books are left the same as under existing law.

Schedule N. Sundries. The reductions in this schedule, so far as there are reductions, range from 5 to 25 per cent., the latter on statuary and ornaments. There have been many changes in this schedule from ad valorem to specific rates, and there are a great many articles in which there have been no change. There is an important commercial advantage in the provision that there shall be a remission of duties on salt used for packing and curing purposes.

The Free List. Considerable additions have been made to the free list.

GERMANY AND AMERICAN HOG PRODUCTS.

The increased shipments of pork, bacon and hams from New York to German ports last week were conspicuous, and were due to a desire on the part of exporters here to pile up as large a quantity of American hog products in German warehouses as possible before the prohibitory decree recently passed by the Bundesrath goes into effect. The exports referred to consisted of 6,768,509 pounds of bacon, 212,270 pounds of hams, and 3,176 barrels of pork. The German Bundesrath, on February 21, prohibited the importation of American hog products. Inasmuch as the measure was adopted "for sanitary reasons," owing to "the prevalence of hog cholera in America, and the presence of trichina in American pork," it was not necessary for the Reichsrath to act upon the question. The measure goes into effect next week.

There can be little doubt that the American exporters of hog products and the trade generally will suffer a loss of business. Just how much is not now easy to determine, for the reason that such methods have been known as exporting hams, bacon, etc., to England, and then re-marking and re-exporting the same to Germany as special brands of the remains of prime British porkers. A reporter in this city recently inquired of Mr. Armour, the well-known packer and exporter, if he could tell how extensively this custom prevails, and if in his (Mr. Armour's) opinion it will be still fur-

ther resorted to in case the (then) proposed prohibitory act was passed in Germany. Mr. Armour admitted that "such things" had been done. For a reason which may be inferred from the above it is a matter of doubt just how severely the prohibitive measure will cut into the hog products annually exported from the United States.

Popular feeling in Germany is and has been against the measure. This is conclusively shown by Mr. A. A. Sargent, of the United States Legation at Berlin, in a report to the State Department at Washington, made January 1 last. Strong protests against the exclusion of American hog products were sent by merchants at Berlin and other cities throughout the empire to the Bundesrath, and many went in person to express their objections. So widespread was this feeling, it is added, that under a popular form of government it would have been irresistible.

This suggests that some motive other than that alleged, viz., "for sanitary reasons," lies behind the action taken; and it now appears to be generally admitted that the alleged "sanitary reasons" are but a pretense, constituting, as Mr. Sargent says, "the thinnest veil, which has been torn into shreds and which is now apparently insisted on only as an excuse to the United States." So far as the evidence goes, the German official reports as to deaths from eating pork affected with trichinosis averaged but 33 annually throughout the empire from 1877 to 1879. The rate has increased since then, but in no instance, adds Mr. Sargent, has it been shown that a death resulted from eating American pork.

The real cause of the action taken appears to be the jealousy of dealers in German hog products. It will not be stretching definitions to go a step further and say it is due to the extreme and manifestly consistent protective policy of Germany. There can be no absolute protection without prohibition of foreign competition in home markets. The German dealers have been crowded to the wall—to the sty, as it were—by cheap American pork. Instead of admitting the fact and obtaining an excessive rate of duty on imported pork, etc., they prefer to allege "sanitary reasons" and prohibit its coming into the country on that ground. Reduced to a more tangible form, the trouble appears to be that a pound of American pork can be sold in Berlin for 10 pfennig less than the German product.

These facts have been presented to the German Federal Council, of course. A leading German newspaper, after commenting on the situation, says that a large quantity of railway supplies, formerly procured in Germany, have of late been purchased by the French in Austria, probably because they were cheaper. Already the German press, or a portion of it, are clamoring for reprisals by overtaxing champagnes, and the paper adds: "If the action of a few Frenchmen can raise such stormy calls for reprisals, what will the Americans think on seeing their pork prohibited while Russian pork is allowed to come in?" Mr. Sargent concludes that the movement to exclude American hog products "is only selfish." This goes without saying. Commerce generally is conducted on that basis. But there are different kinds of selfishness. That just exhibited by the German Bundesrath is of the short-sighted variety. The German people who need American pork, not being of the well-to-do class, require cheap food. If their legislators—we should say rulers—insist that "the people" shall buy dear food, and justify their action on the ground of selfishness, the greater loss falls on Germany and the Germans.

Meanwhile the American hog is in heavier demand at home, and such a proportion as accumulates in excess of the domestic demand will presently cast about for new markets to conquer.

THE INDIA-RUBBER TRADE.

The position of the india-rubber trade may be designated as one of extreme tension between the manufacturers in that line and the syndicate, composed of Americans and foreigners, which holds the bulk of the visible supply of fine Para, estimated at some 8,000,000 pounds, out of a total season's production of 14,000,000 pounds. Some of the best informed members of the trade hold that the price of india-rubber is in the main controlled by the laws of supply and demand. However this may be, there assuredly prevails among manufacturers themselves a feeling of uncertainty as to the effect on the market of their action in checking the production of india-rubber goods. The price of fine Para, which had been up as high as $1.20, has since January last declined to 95c.; but it is now at $1.05, and the market is strengthening. Fine Para is still higher in Europe, the last cable quotations being 4s. 6d.—$1.08. The position, plainly stated, stands thus: In the hope of getting prices reduced, our manufacturers will not take fine Para at current quotations, the aim being to bring such a pressure to bear on the chief holders as to compel them, in view of loss by shrinkage of stock and of interest on investment, to throw such stock on the market at what is claimed by many to be the normal value (66@70c.), and by thus breaking up the syndicate prevent the establishment of a precedent which would encourage other houses hereafter to adopt speculative tactics.

The market being well supplied with goods renders possible this waiting attitude. In former years, when there was a less demand, india-rubber manufacturers had to operate their mills full time the year through, and so were of necessity constant buyers. Consumption has doubled the last three years, but productive powers in the goods line are far from being taxed to their utmost. Were the annual value of consumption $60,000,000 instead of $38,000,000 we believe the plant of mills would be equal to it. The evidence is that a few months now suffice to meet the season's demand. The new crop, which begins to come into the market in July, assumes its largest proportions in September, October and November. Despite the decisive position taken by manufacturers a wide prevailing hesitancy among them as to the issue is observable, as the influence of the coming demand, always a potent element in estimating prospective prices, cannot be wholly gauged. The policy of running mills on half-time or stopping them altogether has in this case a certain novelty; other manufacturing combinations for the restriction of production having had for their object the preventing the undue depreciation or enhancing the value of goods. Our india-rubber manufacturers and dealers—and we here refer to well-managed houses—had never a more prosperous period than in the last year, when the syndicate is regarded as having been most potent in manipulating prices. The yield of fine Para is about 14,000,000 pounds per annum, of coarse Para one-third that amount, while the total of inferior grades supplied from Mexico, Central America and the East Indies about equals the total of the above of fine Para; we take two-thirds of the yield, and Europe one-third. The yield of all descriptions has increased in a series of years from 10 to 15 per cent., but it is to be noted that although Para rubber, which is gathered in the vicinity of the river Amazon and its tributaries, is not naturally limited to present supply, the tree abounding in vast regions of the country, no large addition can be looked for, as the native gatherers can alone live there, and when a native has gathered some 300 or 400 pounds, he is satisfied, and quits work altogether for the season. As a means of checking speculation in the article, the suggestion has been entertained that certain of our mercantile or manufacturing firms should take in some of the old Para exporting houses. All things are possible in the way of business alliances, but the question is an open one as to how far this course would contribute to stability of prices within what may be considered a normal range. Just now the Para shippers are disposed to regard the attitude of our manufacturers as directed against themselves, and although arrivals continue from Para, it is surmised, rightly or wrongly, that they are holding a considerable amount of stock over on their own account in order to resist reduction, and may possibly adopt a similarly conservative course with the new crop. It is most desirable that confidence in the india-rubber market should be restored, but this result can only be the work of time, dependent, as it is, on the concurrence of various favoring influences. The rapidly growing importance of india-rubber in the clothing, boot and shoe departments, in the insulation of wires for telegraphic and telephonic purposes, in sundries that include packing, belting, springs and hose, and generally its extensive use with the classes who make and use machinery, constituting for them a valuable auxiliary in a thousand different ways, would render any reduction in cost a most important boon.

OCCASIONAL NOTES.

A correspondent of the New York *Evening Post* gives an account of the origin and present aspects of the convict-labor system in Georgia, which is not without interest in other states. The system originated, he says, in impatience of taxation, and this, its source, is now its main support and strength. The fact is recounted that in 1831, under the old penitentiary régime, when the prison-roll contained only 200 names, the expense of maintaining the prisoners after the old fashion was considered by the taxpayers so heavy a burden that the penitentiary was actually abolished. The whipping-post was then introduced to serve as a terror to those who were prone to commit certain minor crimes. In 1832, however, the legislature was constrained to open the doors of the state prison again. After that, although the taxes for the support of the convicts were still paid very unwillingly, and notwithstanding that some serious attacks were made on the administration of the penitentiary, no further action in relation to it was taken by the legislature until 1866, in which year the Governor was authorized to farm out the convicts to private persons on the best terms possible. In 1868 the entire convict force of the state was leased on easy terms. After making trials of short leases for terms of one or two years, the law now provides for leases for at least twenty years in ordinary cases. There are now, it appears, about 1,200 convicts in the hands of the several lessees. These are scattered throughout the state, wherever they can best serve the purpose of the contractors. For each convict the regular lessees, it is said, pay only $20 per annum. For the lease of the whole force the state realizes yearly about $25,000. The lessees undertake to clothe and lodge the convicts comfortably and to punish them only when they shall think punishment necessary for the preservation of discipline. The convicts are not to be worked on Sunday, nor for more than ten hours on any other day. This policy of leasing is extended even to cases of misdemeanor. It is difficult to see how the system practiced in Georgia can be defended on any public grounds whatever. The revenue derived from it is ridiculously low, less than 7c. per day for each convict! Under the system outlined there can be no punishment inflicted upon the criminal in the proper sense, and it allows of no attempt whatever toward effecting his reformation. Everything is lost sight of except the private gain of a small number of contractors. Such a system cannot be justified. It should be abolished.

Recently compiled official statistics indicate that the net increase over last year in taxable values throughout the state of New Jersey is $8,016,654. An increase over the returns for last year is shown in every county in the state, with one exception. The aggregate taxable value for the state amounts to $535,467,836, an increase of $86,993,164 over 1866, the first year for which the state has a record of the taxable values. The taxable values reached their maximum in 1874, when they aggregated over $619,000,000. They began to decline in 1875, and so continued until 1878, when an appreciation again became apparent.

The question how telegraph wires shall be carried is attracting attention in England. *Truth*, of London, says that the telegraph wires which are carried over the tops of houses in London and other large towns have lately increased in number to such an extent that it seems highly desirable that some supervision should be exercised over the further development of this species of communication. *Truth* says that there are more than a thousand in one city street, and declares that on account of the likelihood of a number of these wires and the chimneys to which they are attached being brought down by a gale of wind or a heavy snowstorm, people walk about the streets in more imminent peril of their lives in wintry weather than if they were in the midst of the Atlantic. It is not unlikely that *Truth* states the case somewhat strongly, but its suggestion of a remedy is an excellent one. It directs attention to the system of subterranean telegraphy in Germany, and to the steps being taken toward completing a similar arrangement in Russia, and intimates that it might be well for the government to consider whether the time has not arrived for the adoption of similar measures at home. A large outlay would, it concedes, be necessary, but in the end it would be an economy. There can be no doubt as to the soundness of *Truth's* counsels in this matter. The wonder is that this plan of underground carriage of the wires has not been more extensively adopted than has been the case.

Mr. Abram S. Hewitt lately expressed the opinion that the new Tariff law would fail of its intended object for the reason that, in his opinion, the industries of the country are suffering not from foreign competition but from the domestic competition arising out of the protection the country has had for the last twenty years. The result of this long period of protection, he said, has been an excess of production at home for which no market can be found, because we have not the same access to foreign markets as other nations who have free raw materials. Among the consequences of this system, he says, are the failures which have begun to occur in various branches of business, and which, he thinks, will proceed with accelerated rapidity until the weaker concerns, which cannot compete with their stronger neighbors, will be driven to the wall. The only possible relief that could have been extended to the manufacturers, he thought, would have been to free raw materials from destructive duties, so that goods might be produced at a lower price, and thus find a wider market at home and abroad. He said that the passage of the bill made the fundamental issue between revenue reform and "unprotective protection" so clear that the organization of the next House would be determined by it alone. By revenue reform, he said, he wished it to be distinctly understood that he did not mean free trade, for which the country was not as yet prepared, but the freeing of raw materials from duty, which he declared could be done without injury to any existing interest, and "the reduction of all taxes which enable favored industries to prey on the rest of the community when the demand happens to exceed domestic supply." So far as he knew, he declared, the revenue reformers would be very conservative, and they would take care "that no existing interest that has a right to live in this country—that is to say, which can be carried on in this country with as little labor as in other countries—will be disturbed or impaired."

The Boston *Herald* has a sketch of the work of the Massachusetts Bureau of Labor Statistics during the time that it has been under the direction of its present efficient chief, Colonel Carroll D. Wright. The bureau, it may be said, was established in 1869, and was placed under the direction of General H. K. Oliver, who remained at its head until 1873, when Colonel Wright took charge. The legislative resolution creating the bureau declared that the duties of the bureau should be to collect and present, in annual reports to the legislature, statistical details relating to all departments of labor in the commonwealth, especially in its relations to the commercial, industrial, social, educational and sanitary condition of the laboring classes, and to the permanent prosperity of the productive industry of the commonwealth. The reports of the bureau have made known to those interested in statistical science the skill and care with which these duties have been discharged. It would require very much more space than is at our disposal to enumerate with any particularity the investigations conducted by the bureau while under the management of Colonel Wright. The reports on the condition of the mills of the state, on hours of labor, rates of wages and the purchasing power of money, will be remembered as among the earlier contributions of the bureau. The investigations into the comparative condition of manufactures and labor, and into the education and labor of the young, may be classed with the most useful and practical statistical work done of late years. A body of very interesting and valuable information in relation to industrial arbitration has also been given to the public through the efforts of the bureau. The Bureau of Statistics of Labor is by law the census bureau of the state, and it took the United States census of 1880 for the state of Massachusetts. The work of the bureau has usually been carried on by special agents, and the great amount of work done has been rendered possible only by a severe application of the civil-service rules. It is intimated that the forthcoming report for 1883 will be one of unusual interest. It is to contain the report on the liability of employers to employés for personal injuries, which has already been laid before the legislature, and also a scientific presentation of the relation of wages and profits to products in the various industries of the state. In this latter report the endeavor has been made to arrive at some scientific basis for determining the proportion of the joint results of labor and capital which accrues to each.

At the meeting of the Associated Chambers of Commerce recently held in London much discussion was had as usual upon parliamentary measures particularly affecting trade. After some debate a resolution was adopted urging that ante-nuptial and post-nuptial settlements be declared null and void in all cases where the settled property belongs to the husband, and where the latter at and after the date of the settlement is engaged in carrying on business either alone or in partnership, unless such settlements are registered as required in respect to bills of sale. A motion was also adopted favoring the extension of the amendments of the Bills of Sale act to Ireland. A resolution was passed declaring that in view of the probable great increase of traffic to and from India and the Australian colonies there was need of an additional canal to the Red sea. It was said that reports were constantly received of the grounding of vessels in the canal, and that the traffic was stopped or impeded. One member complained that British interests were not adequately represented, and remarked that out of thirty members comprising the board of

directors of the canal company there were only three representing the English government, and that among them there was not one English mercantile man. The tonnage charged there was, it was said, excessive. There was an attempt also to force pilots upon those using the canal, although pilotage was not required. The general opinion seemed to be that there should be an independent canal constructed. A motion was agreed to requesting the government to provide in the bill continuing and extending the powers of the railway commission an authority for chambers of commerce or any town to appear before the commissioners. Resolutions were also passed urging that dishonored bills of exchange be made instruments of summary judgment throughout the United Kingdom, and recommending that the more important courts be made courts of first instance. A motion calling the attention of the Foreign Office to the desirability of an early resumption of diplomatic relations with Mexico was discussed, but finally withdrawn.

SPECIAL CORRESPONDENCE.

WORK OF THE FORTY-SEVENTH CONGRESS.

Washington, March 7.—The Forty-seventh Congress enacted more useful legislation than it has received credit for. Its omissions are great, but the acts which it has placed upon the statute books will, many of them, be very beneficial to business interests, while some of them have undoubtedly done much to avert a serious business disaster. It is fair to say that this Congress has done more in the way of practical business legislation than any Congress since the one which passed the Resumption act.

The following are some of the more important measures affecting business interests which were enacted:

The act which provided for the extension of national bank charters undoubtedly prevented a serious contraction of the currency, while it has continued for twenty years the best banking system that has ever existed in the United States. The refunding of a large portion of the public debt into 3 per cent. bonds has reduced the interest rate and helped to establish lower commercial rates. The bill for distribution of the Geneva award has settled some important business questions. The provision in the Post Office bill which fixes the rate of letter postage at 2c. after October 1 next will be found to be not only a great convenience but a large economy to the commercial classes. The tax and tariff bill will be a benefit to business interests in a great many relations, in none more, possibly, than in the fact that it will remove one source of continuing uncertainty, and will enable importers, manufacturers, producers and consumers to make long-time contracts and other plans for the future, which would not have been possible had the bill failed to become a law. The bill to reform the civil service, while it is not to be expected that it will have any effect upon the business interests of the country, is, nevertheless, a recognition of the fact that the introduction of better business methods is essential to a wise administration of the government. The act in relation to the discriminating duties on goods produced east of the Cape of Good Hope will remove a petty annoyance to commerce. The bill relative to the exportation of tobacco, snuff and cigars in bond to adjacent territory will be an advantage which has long been sought by the trade. The bill which gives certain advantages to the Industrial and Cotton Centennial Exposition in 1884 is expected to be of great benefit to the cotton manufacturers. The act to prevent the importation of adulterated tea will be of advantage to legitimate trade, and will close up many tea concerns which swindle the public by inducing poor people to purchase vile teas with the inducement of cheap chromos. The bill to modify the postal system so as to permit the issue of postal notes in small denominations and fractions of a dollar will serve all the purposes of fractional currency while avoiding its dangers. The bill will be of especial advantage to small dealers, seedsmen, the notions trade, publishers, and to all classes who use the mails for the distribution of their wares.

Turning to the calendar of bills which failed it will be seen that the list of omissions is a long and important one. Among the measures which failed to pass are these:

The bankurptcy bill. The bill to suspend the coinage of the silver dollar and to prevent the issue of silver certificates. The shipping bill, which would relieve commerce of many minor burdens. All measures to encourage commerce by modified registration laws. All measures relating to inter-state commerce and the regulation of railway transportation. The bonded spirits extension bill, deemed by many very important to commercial men. Bill to establish a postal savings bank. To exchange the trade dollar. To prevent adulteration of food and drugs. To amend the copyright and trade-marks law. All the propositions looking to commercial treaties with different countries. Bills to regulate immigration. Postal telegraph bill.

MUNICIPAL AFFAIRS OF SAN FRANCISCO.

San Francisco, February 26.—The working of "local self-government" in municipal affairs having received special attention in BRADSTREET'S, a review of the muddle into which the official business of this city has fallen will not be out of place. It will at least point a moral.

San Francisco has been governed hitherto by the Consolidation act and its amendments, the elective principle prevailing. The mayor, perhaps, had less real power than any other civic functionary, but he was a member of various local government boards or commissions to which a great deal of purely administrative work was delegated by statute, and from these various sources he enjoyed a fair salary as well as considerable patronage and political influence. The city auditor, assessor, treasurer, surveyor-general, sheriff, superintendent of streets, clerk of the county court, together with the district and city attorneys, and several other functionaries, were elected by the people, thus making them entirely independent of the Board of Supervisors, of which the mayor was ex-officio chairman. The practice of the two last mayors was to absent themselves from the meetings of the board of supervisors and veto its legislation, the board invariably passing the order over the veto. The present mayor presides at the board meetings, and by so doing avoids the friction created by absence and misunderstanding.

This form of local government would have worked well enough had there been proper safeguards against jobbery and corrupt expenditures. But these were lacking, and in practice the government of San Francisco was in the hands of the state legislature. No session passed, prior to the adoption of the new Constitution, which did not enact some measure dealing with city affairs. Heads of departments went to Sacramento and lobbied in their own interest. The legislature fixed the salaries and the number of deputies and clerks for each department, and, not content with this wide range of patronage, the elected officials went to the supervisors with requests for extra clerks, which were usually complied with, thus providing places for ward politicians and "political strikers" at the taxpayers' expense. This became a gross and glaring abuse, and the people grew restive under it. Once elected, however, the interest of the people was seldom, if ever, thought of by officials, the only object kept in mind being to employ as many clerks and supernumeraries as possible to lower the general average of the regular monthly assessment collected for the head of the department, ostensibly for political purposes, or to recoup his outlay in securing his election. Many unsavory stories in this connection are told, but it is sufficient, in a general way, to state that the taxpayers ultimately repaid all the money expended in the election of successful aspirants to office, however unnecessary, extravagant, or corrupt it might have been. This would not have happened if the Board of Supervisors—the local legislative body—had been intrusted with the sole power of determining the number and pay of clerks and deputies. Being amenable to local opinion and subject to direct criticism, the Board of Supervisors would have been kept comparatively straight, but this power was exercised by the state legislature, over which the city had little or no influence. The consequence was that the supervisors and city officers "pooled their issues," and managed affairs very often in a reprehensible way. Contractors and others who had jobs to perpetrate or private interests to serve went to the legislature, and found little difficulty in persuading country members that their schemes were in the interest and for the good of the city.

Despite all this, San Francisco is practically out of debt, its real estate representing far more than its funded liabilities, and these will soon be wiped out. But in other directions we have not been so fortunate. The streets and sewers are in a most deplorable condition, with every prospect of becoming worse instead of better. Money appropriated for the streets, although expended, did not all find its way into lawful channels, and there has been peculation and stealing all around, although nothing very glaring has yet been made public. It is doubtful, however, if the exact truth in the premises will ever be made known.

For several years past an agitation has been kept up in favor of economy, which was embodied in the resolve to limit the tax levy to one per cent. So glaring had civic abuses become that the contending parties were compelled to exact a "one dollar tax limit" pledge from their nominees to appease popular discontent. After election, however, no attention was paid to the pledges; but the late supervisors, in their last year of office, maliciously redeemed their pledge and fixed the tax levy for the current fiscal year at $1 on every $100 of the valuation. Now, it so happens that this year's valuation is unique in its treatment of reputed millionaires, many of whom figure as very slim capitalists indeed. It amounts to $210,000,000, which gives $2,100,000 revenue if no delinquincies are reported, but there is always a long delinquent list which finds profitable employment for a special attorney to collect on commission, so that no such sum can be safely counted upon. The late Board of Supervisors, which has been stigmatized as the most corrupt body that ever mismanaged our civic affairs, and with some show of truth, did not consider itself bound by the 1 per cent. limit. It expended everything in sight, plus a special water rate which was absorbed in the general fund, and the new Board of Supervisors, on taking stock, found themselves $500,000 short of meeting current outlay for the last half of this fiscal year. To add to the board's perplexity, the Supreme Court—for the first time invoked by the outgoing auditor—decided that the "one-twelfth act" must be enforced. This act provides that only one-twelfth part of the money to the credit of any particular fund shall be expended in any one month; but as the money for the year was nearly all expended and heavy liabilities had been incurred, the only thing to do was to "down brakes" and stop the civic train. This was promptly done, and the mayor appointed a committee of prominent citizens to confer with the supervisors and consider ways and means to get out of the difficulty. It was a miserable makeshift, however, for a rich and populous city.

The joint committees met, investigated the state of the city finances, and reported, recommending among other things that the police force be reduced by one hundred men or that their pay be reduced. The city being unable to pay its gas bills, the gas company, by consent of the supervisors, had previously removed half of the gas lamps; and this reign of darkness was recognized by the committee as in the true interest of economy. The park fund was also to be absorbed. There is very little in it, however, and some time ago the men employed on Golden Gate Park were discharged for want of money to pay them; its fine conservatory has been destroyed by fire, and as water cannot be bought for irrigation the whole place stands a fair chance to go to utter waste and ruin. The street fund is to be curtailed, and, if possible, the street-sweeping contract is to be repudiated, although the contractor offers to take half the contract price and trust to private subscriptions for the balance. Swept or unswept, however, can make but little difference in their appearance, judging from past experience. And, lastly, the heads of departments are to be asked to dismiss half their clerks and put the remainder upon reduced pay. But the Supreme Court has just ruled that salaries fixed by law cannot be reduced, and that these are preferential claims upon the proper fund. Should the city officers consent to these terms, and should the Board of Supervisors leave the city in darkness, without adequate police protection, the streets and sewers filthy beyond expression and dangerous to life, permitting Golden Gate Park and the smaller parks within the city to be ruined for want of care and water, the expenditure may be kept within the income for the current half of the financial year; but as this Board of Supervisors are similarly pledged to a dollar tax levy, the financial difficulty will be a continuing one, because 1 per cent. on $210,000,000 valuation is not sufficient.

Fortunately the school fund is not quite depleted, owing to the unexpended balance of the state apportionment, otherwise several of the schools would probably be shut up. There was the device of borrowing left, and several members of the joint committee advocated the procuring of an empowering act for the issue of $500,000 bonds to cover the deficiency on the current fiscal year. This act, if passed, must be ratified by the voters at a special election by a two-thirds majority vote, under the state Constitution.

And this brings us to the point of the charter election, which is fixed for Saturday next. The new Constitution took away the control of San Francisco from the legislature and restored it to the citizens, who are empowered to elect a board of fifteen freeholders, which is to draft a charter to be submitted to popular vote. If adopted by the people it goes to the legislature, which is required to enact it without amendment. A charter was so drafted, submitted and rejected in 1880, the potential opposition coming from the Catholic church, because of a provision for closing and removing the cemeteries beyond the city limits. A board of freeholders was elected last November, and its draft charter will be voted upon, as already said, upon Saturday, March 3. It contains a provision limiting the tax levy to 1 per cent. upon $210,000,000 annually for eight years following its adoption, with an increase each succeeding decade based on the ratio of population as compared with the census returns of 1880. In other words, the proposed charter would perpetuate the existing trouble and prevent the construction of sewers or the repair and improvement of streets, the erection of schools, public buildings, etc., except by special loan, because the proposed revenue is clearly insufficient for all municipal purposes. It is felt by many that this is running economy to earth, although the majority of the press, the Board of Trade and large property owners approve it.

The Board of Supervisors is also at war with the Spring Valley Water Company, which supplies the city. Under its charter the company appointed two commissioners and the supervisors two, whose duty it was to fix the water rates; but in consideration thereof the company was bound to supply the city with water free for all public purposes, which was never done, $300,000 a year being claimed, in round numbers, for that service, and admittedly collected from the consumers in their water bills. The new Constitution makes it mandatory on the supervisors to fix water rates in February of each year, and in accordance with this provision rates have been so fixed since the Constitution came into operation. The company disputed the constitutionality of this provision of the state Constitution, and Senator Edmunds argued the point on its behalf before the Supreme Court in Washington, a decision not being rendered yet. If the company succeeds and the former machinery be restored, it will doubtless continue the old device, and, while rendering no bill to the city, spread the amount among the consumers, because it contends that somebody must pay for the water, although the city should technically receive it free. The effect has been hitherto that the householders of San Francisco have paid for the protection of property from fire and all public uses to which water has been applied, and that property has escaped payment.

The present Board of Supervisors was pledged to a material reduction of water rates, as its predecessors had been, and proposed to fix the reduction at 37½ per cent. on the general rate, leaving the special rate for the city untouched. This order was passed to print. The directors of the water company thereupon issued a notification to the public that, in consequence of the action of the supervisors, they would cease pumping water and furnish the city by gravitation, which would reduce the daily supply by one-half. In pursuance of this notification the water was shut off for twelve hours. It was fortunate that no accident or fire occurred, because the company was liable for special damages through breach of contract with its customers, who pay their water rates monthly in advance. Moreover, the new order, if adopted, could not come into operation until July 1, wherefore the company had no justification in fact for their action. Instead of frightening it exasperated the people.

On the evening of the day appointed for final action on the order an injunction was served upon the supervisors restraining them from passing any order fixing water rates. This injunction was granted by Judge Sawyer, of the United States District Court, on application by the Water Company, the grounds being, first, the corrupt nature of the general pledge taken by the supervisors before election to make a material reduction in the water rates; and, second, the unconstitutionality of the provision in the state Constitution which violated the original contract between the city and the corporation. This blocked the entire proceedings at the board, and the case has been argued before Judges Sawyer and Hoffman by a strong bar since Monday last. The action of the Water Company in shutting off the water supply from the city was brought before the legislature, and a resolution was adopted instructing the Attorney-General to inquire whether, by so doing, the franchise had not been forfeited. If so, he was to take steps to have it annulled.

The Board of Supervisors has taken final action on the financial question. A sweeping order of retrenchment has been passed, which will dispense with a great many clerks. The police force has been docked 40 per cent. in their pay for the next four months, and it has been ordered that no work of any kind shall be done upon the country roads for the

remainder of the fiscal year, while the city is to be left entirely without gaslight on the public streets during March, April, May and June. This is the desperate straits to which San Francisco has been reduced through municipal mismanagement and corruption. If, however, the accumulated sinking fund in the city treasury can be made available for current expenditure the city government will go on as heretofore, but the law bars any misapplication of the sinking fund as contemplated. Failing capturing the sinking fund, a loan bill will be submitted to the legislature, which has only a few more days' official life under the Constitution. Just what view the legislature may take of the question remains to be seen. The pay-as-you-go principle is a wholesome one, however, and if the present severe lesson leads to an improvement for the future it will not have been in vain.

LETTERS TO THE EDITOR.

DAYS OF GRACE.

To the Editor of BRADSTREET'S.

SIR—It is noticed that the Institute of Accountants and Bookkeepers of the City of New York has begun to agitate for an amendment of the laws of the state in regard to days of grace at the maturity of paper, with a view to their abolishment altogether. It is a movement in the right direction. This legalized custom has become a nuisance, and nothing but a nuisance. Work in preparation for its invalidation has begun none too soon. The reform, by reason of conflicting laws on the subject of grace, is of national or rather world-wide importance. Why may not the National Bankers' Association devote a little of its time at the next annual meeting to the appointment of committees in the various states to memorialize their legislatures and agitate for the reform in other ways? In order to prepare the business public for the change why may not bankers and others interested in it begin at once to make their blank promises read, "after date, without grace"? This might produce a little temporary confusion, but would, on the whole, be productive of good. GEORGE STICKNEY.

Grand Haven, Mich., March 2.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The Supreme Court of the United States on the 5th inst. rendered its long-expected decisions in the Louisiana bond cases. In the elaborate opinions delivered the subject of the enforcement of state debts was much considered, and the idea of the existence of any coercive authority on the part of the Supreme Court to compel the payment by a state of its obligations was distinctly repudiated. The first cases disposed of were those of Elliott et al. vs. the Auditors, Treasurer and Board of Liquidation of Louisiana and of the same plaintiffs against the Governor and other state officers of Louisiana. The facts in these cases were in substance as follows: The legislature of Louisiana in 1874 provided for an issue of bonds to be designated consolidated bonds of the state, to run forty years and to bear interest at the rate of 7 per cent. per annum. A board of liquidation was created, with power to issue these bonds to a large amount and to exchange them for other valid outstanding bonds of the state at the rate of sixty cents in new bonds for every dollar of the old. In order to raise funds to pay the principal and interest of these obligations a tax of 5½ mills on the dollar was ordered to be levied annually on the assessed value of the real and personal property in the state. The new Constitution of the state, which went into effect in January, 1880, by a provision known as the "debt ordinance," sealed down the interest on the consolidated bonds referred to to 2 per cent., fixed the maximum rate of taxation for all purposes at six mills on a dollar per annum, and gave to the consolidated bondholders the privilege of exchanging their bonds for new obligations of the state at the rate of seventy-five cents of the latter for one dollar of the former, the new bonds to bear interest at 4 per cent. The plaintiffs, as holders of the consolidated bonds, brought suit in the United States Circuit Court to have the "debt ordinance" of the Louisiana Constitution declared contrary to the Constitution of the United States, and therefore void, and also for a mandamus to compel the executive officers of the state to take the necessary steps to pay the principal and interest of the consolidated bonds in the manner prescribed by the act of 1874, under which they were issued. The Circuit Court denied the relief prayed for in each of the suits on the ground of want of power, and from its decisions the present appeals were taken. The Supreme Court of the United States affirmed the judgment of the Circuit Court. In the opinion prepared by Chief Justice Waite the view is expressed that it was the intention of the state of Louisiana to enter into a formal contract with the holders of bonds issued under the act of 1874 to levy and collect the tax referred to above, and to apply the revenue derived therefrom to the payment of the principal and interest of the bonds and to no other purpose. The object of the "debt ordinance" of 1879-80, on the other hand, was to stop the further levy of the promised tax, and to prevent the disbursing officers from using the revenue derived from previous levies to pay the principal and interest of the bonds. The new Constitution, on its face, took away the power of the executive officers to comply with the terms of the act of 1874. As against everything but the outstanding bonds and coupons that Constitution was the fundamental law of the state, and it was only invalid in so far as it impaired the obligation of the contract on the faith of which the bonds and coupons were taken by their respective holders. The question to be decided was whether the contract could be enforced, notwithstanding the Constitution, by coercing the agents and instrumentalities of the state, whose authority had been withdrawn, in violation of the contract, without having the state itself in its political capacity a party to the proceedings. The relief asked would require the officers against whom the process went to act contrary to the positive orders of the supreme political power of the state, whose creatures they were and to whom they were ultimately responsible for what they did. The remedy sought by the bondholders, the court said, implied a power in the judiciary to compel the state to abide by and perform its contracts for the payment of money, not by rendering and enforcing a judgment in the ordinary form of judicial procedure, but by assuming the control of the administration of the fiscal affairs of the state to the extent that might be necessary to accomplish the end in view. In the opinion of the court the judiciary does not possess that power. Again, the officers sought to be coerced owed a duty to the state alone, and had no contract relations with the bondholders. They could only act as the state directed them to act, and hold as it allowed them to hold. Although they could be moved through the state, the state could not be moved through them. In order to be complete, the remedy sought would require the court to assume all the executive authority of the state so far as it related to the enforcement of the law in question, and to supervise the conduct of all the persons charged with any official duty in respect to the levy, collection and disbursement of the tax referred to, until the bonds, principal and interest, were paid in full, and that, too, in a proceeding to which the state, as a state, was not and could not be made a party. It needed no argument, the court said, to show that the political power could not be thus ousted of its jurisdiction and the judiciary set in its place. When a state submitted itself without reservation to the jurisdiction of the court in a particular case, that jurisdiction might be used to give full effect to what the state had, by its act of submission, allowed to be done; and if the law permitted coercion of the public officers to enforce any judgment that might be rendered, then such coercion might be employed for that purpose. But this was very far from authorizing the court, when a state could not be sued, to set up its jurisdiction over the officers in charge of the public moneys so as to control them as against the political power in their administration of the finances of the state.

Two cases closely allied to the above were those of the state of New Hampshire and the state of New York vs. the state of Louisiana, both of which were brought to enforce payment of certain of the consolidated bonds of 1874, which were in controversy in the suits brought by Elliott and others against the state officers of Louisiana. The facts in the New Hampshire case, from which the New York case did not materially differ, were as follows: In 1879 the General Court of New Hampshire passed an act providing that any citizen of the state holding bonds or other obligations of another state might assign them to the state of New Hampshire and have that state bring suit in its own name against the delinquent state for the recovery of the amounts due. Under the provisions of this act six consolidated bonds of the state of Louisiana were assigned to the state of New Hampshire by one of its citizens, and the latter state filed a bill in equity in the United States Supreme Court against the state of Louisiana, and the Louisiana Board of Liquidation, in order to recover the amounts alleged to be due on the contested obligations. The question raised was whether these suits could be maintained. The court took the view that they could not, and the bill in each of the cases was dismissed. Chief Justice Waite, who read the opinion in these cases also, said that under the operation of the eleventh amendment the actual owners of the bonds and coupons held by New Hampshire and New York were precluded from prosecuting these suits in their own names, that amendment providing that "the judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another state or by citizens and subjects of any foreign state." The real question was, therefore, whether they could sue in the names of their respective states after getting the consent of the state; or, to put it in another way, whether a state could allow the use of its name in such a suit for the benefit of any one of its citizens. The court was satisfied from the pleadings and testimony in these cases that they were in legal effect commenced and prosecuted solely by the owners of the bonds and and coupons, that the states were in the position of mere collecting agents of the owners of the bonds and coupons, and that while the suits were in the names of the states they were under the control of individual citizens, and were prosecuted and carried altogether by and for them. The court held that the evident purpose of the eleventh amendment was to prohibit all suits against a state by or for citizens of other states, or aliens, without the consent of the state to be sued, and that one state could not create a controversy with another state, within the meaning of the term as used in the judicial clauses of the Constitution, by assuming the prosecution of debts owing by the other states to its citizens.

The case of Antoni vs. Greenhow, treasurer of the city of Richmond, involved the point to what extent state regulations requiring the establishment of the genuineness of coupons as a prerequisite to the receipt of them in payment for taxes was a violation of a contract made by the state to receive such coupons in payment of taxes and state dues. It appears that, in 1871, the General Assembly of Virginia passed an act to provide for the funding of the public debt, by which two-thirds of the amount due on the old bonds might be funded in new bonds, with interest coupons attached, receivable after maturity for all taxes and debts, dues and demands due to the state. The following year the General Assembly passed another law prohibiting the receipt in payment for taxes of anything but coin or Treasury or national bank notes. The Supreme Court of Appeals of Virginia afterward decided that the state, in issuing bonds under the first act, had entered into a contract with all persons taking the coupons to receive them in payment of taxes and state dues; that the act of 1872, in so far as it conflicted with this act, was void, and that mandamus would lie to compel a collector to receive the coupons in payment of taxes. In 1882 another act was passed by the General Assembly providing, first, that the taxes actually due should be paid in money before the court could proceed, after the collector had signified in the proper way his willingness to receive the coupons, if they were genuine and in law receivable; second, that the coupons should be filed in the Court of Appeals; and, third, that they should be sent to the local court to have the fact of their genuineness and receivability determined, subject to an appeal to the Circuit Court and to the Supreme Court of Appeals. Thereafter the plaintiff tendered a coupon to the treasurer of the city of Richmond in payment of taxes. It was refused, and the plaintiff petitioned the Supreme Court of Appeals for a mandamus to compel its acceptance. The writ was denied, the court being equally divided upon the points involved, and the case was brought to the Supreme Court of the United States for review. That court said that the simple question was whether the requirements of the advance of the tax and the change of the place and manner of trial impaired the obligation of the contract on the part of the state to furnish an adequate and efficacious remedy to compel a tax collector to receive the coupons in payment of taxes, in case he would not do it without compulsion. In the opinion of the court they did not. Justices Field and Harlan filed a strong dissenting opinion in this case.

A decision of much interest to stockholders in corporations organized under the general New York law of 1848, providing for the incorporation of manufacturing companies, was recently rendered by the Court of Appeals in the case of Farnsworth, as receiver, vs. Wood et al. The action was brought by the plaintiff, as receiver, to enforce against the stockholders the section of the law providing that the stockholders of an insolvent corporation who have not paid the full amount of their stock are liable to the creditors of the corporation to the extent of what remains unpaid upon their several shares of such stock, or of so much thereof as may be necessary to supply the deficiency in the assets of the corporation to pay its debts. The Court of Appeals, reversing the judgment of the General Term of the Supreme Court, holds that such an action cannot be maintained. The personal liability to creditors imposed by that act does not exist in favor of the corporation itself, nor for the benefit of all its creditors, but only in favor of a certain class of creditors—viz., judgment creditors.

BUSINESS NOTES.

The British Labor market is reported by the London *Labour News*, of February 21, to be in good condition, and the demand for labor brisk in nearly all lines of industry. In textile trades the agitation is said to be subsiding, and the situation at Bradford is reported better, with an improved outlook.

Reports from Bavaria, says *Nature* (London), announce the discovery of silver and gold sand deposits. It is added that 100 kilogrammes of sand contain 10 to 15 grammes of pure silver and between 2 and 10 grammes of pure gold. The sand is from 4 to 6 yards deep, and in places even more than that. The deposit is of gneiss and has been traced from 15 to 18 miles.

Considerable capital has of late taken its way into Florida. Explorations of the Everglades have been made, and plans adopted for reclaiming large tracts of land. The spirit of utility which is abroad in that state is exhibiting itself in many ways, besides providing accommodations for winter visitors from the north. The strong fiber of one species of Florida cactus is made into rope, its juice into a pleasant beverage, and its trunk, with the pith extracted, into pails.

A new electro-chemical process for obtaining aniline colors has been exhibited at Paris by M. Goppelsroeder, a Swiss chemist. The Boston *Journal of Chemistry* states that the process rests upon the decomposition of water by electricity. Under the action of the current the oxygen atoms collect at the positive and the atoms of hydrogen at the negative pole. The oxygen acts on substances such as aniline, toludine, etc., which by oxydation or dehydrogenation are changed into coloring matters.

The total number of failures in Great Britain, reported to *Kemp's Mercantile Gazette* for the week ending February 17, was 259, against 254 in the like week of 1882 and 290 in the corresponding week in 1881. Of these England and Wales had 232, against the same number in the same week last year and 264 in the like week in 1881. Scotland had 22, against 19 and 23 respectively in the weeks specified, and Ireland reported 5, against 3 and 3 each. The groceries and provisions trades, builders and the liquor dealers, suffered most in the order named.

Recent reports from German consuls in Australia discuss the prospects for German shipping between the English colonies there, the continent and Great Britain itself. It is pointed out that the coal shipments to New Zealand and British Columbia, and the quantity of wheat exported to England, offer remunerative engagements. German steamers are even now engaged in carrying Australian frozen meat to England, and German insurance companies have secured a strong footing in Australia. A German firm in Brisbane has urged that a direct German line would prove remunerative, considering the mineral productions, the timber and ornamental woods, and the merino wools for consumption in German spinning mills with which Queensland could supply Germany.

In an article published in BRADSTREET'S last summer the subject of the utilization of asbestos in the United States was discussed at some length. Among other valuable products formed from the manipulation of this valuable mineral is incombustible paper. A firm in this city have prepared the same by a process of their own, and claim for it special advantages which will readily suggest themselves. A German technical journal, the *Chemiker Zeitung*, in a recent issue, prints a recipe for the preparation of an incombustible paper which is deserving of attention. By this method the best asbestos is treated with a preparation of permanganate of potash, and then with sulphuric acid. Ninety-five per cent. of this asbestos is mixed with five per cent. of wood-pulp in water containing borax and glue.

The imports of silk manufactures at the port of New York, as reported by the Silk Association of America, shows a larger total value for February than for that month in any preceding year, it being $3,441,868, against $2,408,854 in February, 1882, $2,317,235 in 1881, $2,579,142 in 1880, and $2,845,801 in February, 1879. The principal articles imported last month, in excess of receipts in February, 1882, were velvets, $128,368, against $41,730; gloves, $52,219, against $28,185; and hose, $41,012, against $21,493. Of the total value of February importations given above, $2,590,653 was the value of that entered for consumption, and the remainder, valued at $851,215, was warehoused. Inasmuch as silk manufactures to the value of $809,568 were withdrawn from warehouse during the same month, the value of all silk manufactures placed on the market in February was $3,400,221.

The following national banks have been organized: Farmers' and Traders' National Bank of Oskaloosa, Iowa; capital $100,000; John Siebel president, H. S. Howard cashier. Central National Bank of Green Castle, Ind.; capital $100,000; De Witt C. Bridges president, D. W. Lovett cashier. The Citizens' Bank of Bowling Green, Mo., has been incorporated with a capital stock of $10,000, paid up. The National Bank of Kutztown, Pa., has removed to Reading, and the name has been changed to the Keystone National Bank. The Poughkeepsie (N. Y.) National Bank has elected J. G. Boyd president, in place of S. M. Buckingham. The Citizens' National Bank of Evansville, Ind., has elected S. P. Gillett president, in place of M. Hening. The First National Bank of North Bennington, Vt., has elected J. G. McCullough president. The Spring Garden Bank of Philadelphia has elected Francis W. Kennedy president, in place of Thomas W. Kennedy.

A useful publication is that entitled the "British Life Insurance Chart," which has been gotten out in London by Messrs. Charles & Edwin Layton. It states that there are 107 life insurance companies in the islands, the oldest dating from 1721. The aggregate income is given at £20,623,509, and the expenses at £15,976,086, the latter "including £10,506,664 in payment of claims on policies." Other items in the outgo were "management and expenses" £2,743,096, and "dividends and bonuses to shareholders" £500,831. In 1882 fifty-seven of the companies issued 56,543 new policies, representing an assured sum of £24,644,022. The corresponding annual premiums amounted to £828,879. In seven companies the expenses exceeded the income. The net accumulated funds amount to £153,582,169. The ratio of expenses to premiums in the case of the ordinary life insurance companies appears to have been 13.83, which is equal to £13 16s 6d per cent.; and in the case of those companies which transact industrial life insurance business (8) 47.68, equal to £47 13s. 8d. per cent.

The official returns of the foreign trade of Spain for 1880 have just been published, whereat the *Imparcial* expresses satisfaction at the activity which is now displayed in the publication of official statistics. The results are:

	1880.	1879.
Imports	£28,481,855	£24,197,829
Exports	25,998,725	21,127,942
Totals	£54,480,580	£45,325,841

Spain's exports to Italy, Portugal, Russia and Venezuela decreased in 1880. Spanish imports increased from France, Germany, Portugal and Sweden, and decreased from England, Belgium, Denmark, Italy and Russia. The Manchester *Guardian* adds that England, Portugal and Holland were the only European countries to which Spain exported more than she received, the non-European markets belonging to the same category being Cuba, the Argentine Republic, Uruguay, Porto Rico, and Algeria. On the other hand, Spain imported more from Germany, France, Belgium, Denmark, Greece, Italy, Sweden, Russia, Turkey, the United States, Morocco, Mexico, and several of the South American republics than she exported thither.

The correspondent of BRADSTREET'S at San Francisco writes as follows under date of March 1: There is little prospect of the California legislature regulating pilotage, harbor and towage dues. A bill will be passed legislating the harbor commissioners out of office. The pilot board holds office during pleasure and may be removed any time. But the law regulating pilotage will not be touched in all probability; neither will towage or dry dock charges, which are excessive, be regulated by law. The monopolies, as hinted at in a former letter, will certainly win the fight. The Board of Trade adopted a memorial to the legislature in favor of a renewal of the Pacific mail service, via San Francisco, and requested that body to adopt an address to Congress embodying its views. Concurrent resolutions were consequently passed, praying for substantial aid from Congress, without which the mail service must lapse. These resolutions were ordered telegraphed by the Governor to the President of the Senate and Speaker of the House of Representatives for presentation and subsequent action by Congress.

There is little reason to doubt that Buffalo bids fair to become one of the most important points of coal distribution in the United States. Situated just west of north of the great Pennsylvania anthracite and bituminous tracts, at the junction of four trunk-line railways, the center of a web of nine railways, with ample lake and harbor facilities and the Erie canal as a regulator in the matter of transportation rates, its growth during the past six years as a coal distributing center has not been unwarranted. In 1876, says the Buffalo *Commercial Advertiser*, in an excellent article on this subject, the receipts of anthracite coal were but 502,000 tons. In 1881 they had grown to 1,246,000 tons, and in 1882 to 1,933,00 tons. Of this last named quantity 1,700,000 tons came by rail and 233,000 tons by canal, via Syracuse. The estimated increase in receipts during 1883 is placed at 40 per cent., which, if realized, will make this year's business cover 2,706,200 tons. The receipts of bituminous coal in 1880 were 800,000 tons, in 1881 924,000 tons, and last year 1,025,000 tons. The total receipts of coal in the past two years were, then, as follows:

	Tons	
	1882.	1881.
Anthracite	1,933,000	1,246,000
Bituminous	1,025,000	924,000
Total	2,958,000	2,170,000

The gain in receipts of anthracite in 1882 was, therefore, 687,000 tons, and bituminous 101,000 tons, or in both varieties 788,000 tons.

The estimated bituminous coal receipts for 1883 are placed by the trade in Buffalo at 1,500,000 tons, which if realized will, with the expected gains in anthracite, give a total tonnage this year of 4,200,000 tons. The New York Central Railroad expects to regain the anthracite tonnage, lost by the Lackawanna completing its line to Buffalo, by connecting with the Reading road, and such a link is now building. The Erie road gives the Lehigh Valley access to Buffalo, where that company's dock and handling facilities are equaled, perhaps, only by those of the Lackawanna company. The Buffalo, New York & Philadelphia road already counts heavily, and the Rochester & Pittsburgh's prospective branch to Buffalo, with a line into the Clearfield bituminous regions, will go far to stimulate that branch of the trade. The *Commercial Advertiser* suggests that Cleveland's prominence as a bituminous coal center will have to wane before the advance in that direction making at the eastern end of the lake. In this connection the well-known increased western demand for anthracite, and the fact that the leading producing companies intend taking measures to meet it, is of special meaning to Buffalo. Nearly all the anthracite companies have possessed themselves of extensive facilities for storing and shipping coal at Buffalo, and thitherward west-bound coals are evidently destined to take their way.

The relative value of Chinese and "white" labor in building railways is discussed by Herman Clark, who has done most of the work of constructing the Northern Pacific Railway, in the columns of the Portland (Oregon) *Northwest News*. Mr. Clark said to a reporter of that paper that he "has no use for 'Chinese cheap labor.'" He claims that "white labor," although demanding higher wages, is in reality cheaper, and alleges that his experience with both varieties in building the Northern Pacific warrants him in that statement. While the Chinamen choose their own foremen and work as they please, the Scandinavians and Danes employed divide the work among themselves, hire the boss, whom they require to do his share, finish their self-imposed task, and then, having drawn their pay, are ready for another job. They are peaceful, industrious and sober, and when the railroad has no further use for them they buy land along the line, build villages, cultivate farms, and straightway begin adding to the wealth of the country. Several towns, some of them containing from 1,000 to 2,000 inhabitants, have been laid out and are principally peopled by Scandinavians. No such good result, adds Mr. Clark, has ever come from the employment of Chinese, and the Northern Pacific would not have been completed till the summer of 1884 unless a liberal supply of white laborers had been secured. There does not seem to be any special fault found with the Chinese in the above, unless it is that they do not settle and form towns along the line of the railway, or that they do not work rapidly enough.

The Manchester *Guardian* is authority for the statement that Messrs. Charles Cammell & Co. (Limited), of Sheffield, England, have contracted with the government of New South Wales to supply 72,695 tons of steel flange rails, weighing 71½ pounds to the yard, deliveries to extend over four and one-half years, for £5 per ton, free on board. These rails will be made at this firm's new works at Workington, where, it is stated, "they will form the start." Even for British rails, in Great Britain, this quotation is said to "look low," but, considering the quantity, is reported to be quite equal in price to what is being obtained at present. The lowest price that has been accepted here for steel rails (weight not stated) is $37 per ton at the mill, or about $39 at New York. Reckoning £1 at $4.86, the above quotation for English rails is equal to $24.30. The new duty on steel rails is $17 per ton, which, without including cost of ocean freight, will bring the price of English rails at the wharf in New York up to $41.30. The rate of ocean freight on imported steel rails, therefore, constitutes the amount of protection to domestic rails with the competing article quoted as low as £5 per ton, inasmuch as domestic rails are now quoted at $39@$40.

A FRENCH VIEW OF AMERICAN SILK CULTURE.

The acting French consul at New York, Mr. Truy, has made a report to his government concerning the efforts making in the United States to organize and establish sericulture. Mr. Peixotto, our consul at Lyons, France, in referring to Mr. Truy's official communication, says of it that while it contains much that is well known in this country, it is of special interest in that it furnishes a good example of how our efforts at silk culture are regarded by one of the oldest and richest silk-producing countries. Mr. Truy says:

"Before the war of independence the raising of silkworms occupied very little of the attention of the Union. Later on breeding commenced. In 1843 mulberry trees were planted with a sort of frenzy; sericulture was proposed on a vast scale; the infatuation took the form of speculation; then came the disease to the trees, financial crises and heavy losses, the souvenirs of which remain even after forty years. * * * Though the raising of silkworms has not yet come back to the point of 1843, still the proof then afforded has since been fully established of the suitableness of the climate to such production, and there is every reason to believe in its assuming its former importance.

"The Silkville colony, formed in 1870, supplies to-day about 10,000 pounds of cocoons per annum. In Texas and California mulberry trees have been planted on the new lands. The yield in Kansas increases yearly, and in 1880 the value of cocoons harvested represented the sum of $75,000. * * * The quality of the cocoons—are they equal to similar produced in foreign countries? This is a disputed question. A journal of Paterson, the great center of silk manufactures, asserts that American-raised silk is generally inferior and inadequate for the production of silks of the finest quality.

"At the Franklin Institute, Philadelphia, at a recent meeting, Mr. Blodget gave the results of a comprehensive study made between American raw silk and raw silk imported from foreign countries. Mr. Blodget was of the opinion that the fiber of the American-raised cocoons was stronger than that of foreign silk. But this question of the manufacturing value of American-raised silk, however important, must yield to another, viz., the cost of production, upon which must always depend the employment, whether of the native grown or foreign imported article.

"Now, in consequence of the high price of manual labor in the preliminary operations, such as the reeling of silk from the cocoon, American silk costs much more than that which is imported from abroad. This fact would seem first and last beyond all to render the wide use of native-grown silk impossible. Americans, it is true, reply to this all but insurmountable objection, by one of their most reliable journals, that 'the astonishing progress made by our silk manufacturers has been principally owing to the discovery and use of improved machinery, far superior to any yet known or employed in Europe. Similar inventions in machinery for reeling silk from the cocoon would give the same remarkable development toward the raising of silkworms.'"

Mr. Peixotto adds that Mr. Truy thinks this argument is more theoretical than practical, and he goes on to say that no mechanical invention, however ingenious, can replace the human hand in the reeling of cocoons, the essential point being (which he asserts no mechanism can attain) not to break the filament.

It will be recalled by readers of BRADSTREET'S that in previous dispatches to the State Department at Washington Mr. Peixotto has announced that an American engineer, Mr. Edward W. Serrell, Jr., had attempted this pronounced insurmountable obstacle, and had succeeded by his invention of automatic machinery in thoroughly and completely accomplishing this object. He adds, in the January number of Consular Reports: "I have great pleasure in reporting to-day (September 28, 1882), that fifty of the Serrell automatic reeling machines are about being placed in a filature in the celebrated silk-growing department of the Drome, within fifty miles of Lyons." The concluding passage of the report is as follows: "On the eve of the application of an American invention for the reeling of silk by automatic machinery, which is destined, I believe, to have as important results for the people of the United States as the great inventions of Hargraves, Arkwright, Compton and Cartwright have had for cotton in England, I may be permitted to take issue with Mr. Truy, and in an early dispatch descriptive of this new mechanical process demonstrate the perfect feasibility and practical value of this discovery."

ENGLISH TRADE WITH FRANCE.

At the recent annual meeting of the Manchester Chamber of Commerce, Mr. G. Lord, the president, said that the course of trade between Great Britain and France since the lapsing of the treaty, on May 15 last, had left little room for doubt that the action of the chamber, in advising the government not to conclude a treaty which should not be an improvement upon the previously existing treaty, was very sound. He found that during the last six months—since we had been trading with France without a treaty, but with the advantage of the most-favored nation treatment—no important branch of our textile trade had suffered very materially, with the exception of one. It was scarcely fair to take the last six months alone, because when it was thought that the treaty was about to lapse very heavy shipments were made in the early part of the year, and those had to be worked off. He had taken first the course of trade in the last six months, and then during the whole year. During the last six months, taking certain yarns, there had been a diminution in our shipments to France of only 4 per cent., but during the whole year there had been an increase upon the year 1881 of 10½ per cent. With regard to cotton goods, there had been a decrease of only ⅛ per cent. in the last six months. Therefore we might say that the shipments had been the same, but during the whole year we had sent to France 79 per cent. more cotton goods than we did in the year 1881. Taking woolen yarns, the increase for six months was 13 per cent., and for twelve months 16 per cent. In woolen goods and worsted goods—and this was the exception to which he called attention — there had been a decrease on the six months of 53 per cent., and on the twelve months of 26 per cent. But those who were most conversant with that branch of trade told him that this was in some measure owing to the fact that previous to last year many of our woolen and worsted goods were sent to France simply to be passed on to Spain. In linen yarns there had been a decrease during the last six months of 6 per cent., but an increase for the year of 13 per cent. In linen goods there was an increase for the half-year of 45 per cent., and for the whole year of 50 per cent. Therefore, so far as they could see, they were no worse off without the treaty than with it. So far as they could see there was growing up in France a free-trade spirit, which, left to itself, they might hope would in the course of a very short time lead to a reduction of the duties on many articles. Mr. Jacob Bright, M. P., speaking of trade prospects in general, said he supposed it was scarcely likely we should have a further fall in raw materials. There probably never was a time when prices were so moderate in the whole range of our raw materials. That being so, he should be much surprised if the present year, on the whole, were not a prosperous year. A resolution to petition for setting aside the standing orders by which the Manchester Ship Canal bill has been arrested was moved by Mr. P. Spence. An amendment to this was negatived, and the resolution was passed.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS

The promise which last week seemed to hold out that the stock market would advance has been redeemed in a mild way this week, and the temper of Wall street has become distinctly bullish. Prices have advanced slightly, and the expectation that they will continue to do so is very pronounced. Public expectation is an important factor in speculation, for when men expect prices to rise they are ready on very small inducement to assist in raising them; and the buying temper of the traders has become sufficiently strong to move one or two of the large operators still on the bear side to extra exertions in the way of repressing an advance. The adjournment of Congress, and the passage, at the last moment, of the tariff bill, are circumstances distinctly favorable to an advance, since, crude and contradictory as the new tariff law is, it is yet better than a continuance of agitation and uncertainty. Then the floods have quite subsided in the Ohio valley, where they are most dangerous; and there are no indications of new floods from the northwest. The trunk lines are making large earnings, as they should be at this time, for it is their harvest season; and no bank has failed, nor has there even been a rumor of one being in trouble. But the most prominent of all the events of the week in stimulating the market has been the recommencement of gold imports. This, and the annual report of the Union Pacific Company made at its Wednesday's meeting, have been the two events most actively discussed in Wall street.

Last week it was said in these columns that foreign exchange, under the effects of large exports and the virtual exhaustion of the inpour of our securities from abroad, had fallen to a point low enough to cause talk of the possibility of importing gold in the near future. This week rates fell to a point which showed a profit in importing it, and something over $3,000,000 are on the way here. Discussion was naturally renewed as to what rate of exchange here is what is called "the gold-importing point," any decline from which represents the profit of the importer. The point varies. A rate at which it will pay to import gold bars is fractionally higher than that at which it will pay to import British gold coin; and as during the time which the money is in transit from market to market it can draw no interest, the rate of interest at which it can be obtained in London is another factor. Loss of interest, freight, recoinage and insurance are the elements entering into the calculation; and, as some importers do not insure, they can profitably import gold at a rate which insurers do not. There are, indeed, many practical considerations entering into the problem of importing gold at a profit, as with any other commodity, which are determined by the special circumstances of the time. We have seen one financial writer enter into elaborate calculations to show the mathematically true "importing point," the value of which calculations were questioned by the hard fact that no gold was withdrawn from the Bank of England for shipment here until the exchange rates had fallen much below his figures. The posted rates were $4.82 and $4.84½ until Wednesday, when they fell to $4.81½ and $4.84. At this point the shipping orders for gold were given in London. There was a profit, we are informed by the exchange dealers, of a little over ⅛ of 1 per cent. in importations at these rates—or rather the rates actually charged. Yesterday the posted rates rose again to $4.82 and $4.84½, actual rates being $4.80¾ @ $4.81, and $4.83¾ @ $4.83¾.

The gold imports have done much to neutralize in the public mind the adverse effect of comparatively high rates for money. Last week it was remarked that a very slight upward move of the market would give us a 10 per cent. rate on call loans, and that the small surplus of the banks above their 25 per cent. reserve would probably be shown to be all swept away when the bank statement (issued at noon on Saturday) should come out. It will be seen below that the surplus reserve was swept away and a considerable inroad made on the main reserve. In respect to the loan market, that began to show an increasing scarcity of loanable funds without waiting for the stock market to make much advance; indeed, it is not unreasonable to assume that some of the large bear operators were ready to forestall such a movement by locking up money. We have had an average 10 per cent. rate for the week, and exceptional rates of as high as 16 and 17 per cent. Still, a 10 per cent. average does not hurt much, and would certainly fail to give any severe check to the stock market if that market had much public support on the bull side. So far, it must be confessed, it has not—or at least the members of the commission houses say it has not—for they are as destitute of orders as ever, and talk very blue about business. They say that all the trading—outside of room trading, of course—is done by a few of the big men; and their customers will not buy and don't like to sell—that is, sell short.

The Union Pacific report, above alluded to, came out on Wednesday, and very rarely has a similar document been more eagerly looked for or more actively discussed than this has. Perhaps the most prominent feature of the discussion, so far as it has appeared in print, is the exhibit of the helplessness of the average financial editor when confronted with the exhibit of the operations of a large railroad corporation like the Union Pacific. The question to which every one sought an answer was simply this: What is the exact financial condition of the company? The astonishing fall in the price of the stock within the past three months naturally had the effect of making people suspect there was a "nigger in the fence" somewhere, and that when the report came out he would be discovered if only one were able to do the uncovering. The "floating debt" was the one point to which the average investigator turned first. "Floating debts" are the bugbear of Wall street. They are easy to conceal, at least for a time, and therefore it is easy to charge a corporation with having one. Wall street has had some extremely disagreeable discoveries about debts of this character, and is sensitive on the subject. The Union Pacific was charged with having one of $10,000,000. The report showed that the company owed nearly that amount of money; but on the credit side it showed offsets bringing it down to about one-tenth of that sum, which would be a trifle for so vast a corporation. Hereupon arose the hottest discussion as to what was or was not properly an offset, whether the items the company had placed in its asset column should be there or not. Upon this there was a diversity of opinion sufficiently wide. Some writers accepted the company's statement as it stood and insisted that it was a triumphant vindication, while others cut off this or that offset, making the debt range from $2,000,000 up to $8,000,000. The figures we have seen on this, made by a practical railroad man and accountant, make the net debt, in round numbers, $6,400,000. As to the value of the large and mixed array of assets in the company's treasury, chiefly bonds and stocks of branch roads, the writers referred to have shown themselves to be all at sea. Of one leading newspaper's utterances on the subject it was remarked that it was as impossible to follow his argument as to follow the incoherent talk of a spiritualistic medium. It seems to be agreed, however, that the dark part of the report is that relating to the vast system of branches attached to the main line, they being, for legal purposes, all separate corporations, yet actually owned or controlled by the parent company. The report is vague, general, and incomplete as to these roads, and so far is completely baffling. The data for determining exactly how the Union Pacific corporation does stand financially at this moment is not, therefore, supplied by this report, and it would seem that only an inspection of the company's books can determine it. Altogether the report has made a rather favorable impression, notwithstanding its conceded deficiencies. The addition of Mr. Charles Francis Adams, Jr., to the directory has also been well received.

Among minor incidents of the week the sudden drop of 17 per cent. in Virginia state bonds, on the decision of the United States Supreme Court, deserves mention, though Wall street is less affected than the southern exchanges, to which dealing in southern state securities has been relegated since the New York people got their dose on the Tennessee bonds. Since that time southern bonds have been regarded in the light of a species of wildcats very dangerous to meddle with.

Mention was made last week of President Dowd's statements that the Hannibal & St. Joseph road would be extended to Chicago, the effort to make the Chicago, Burlington & Quincy Company buy it having failed. It only needs to add that the present is a decidedly unfavorable time to launch new railroad enterprises, especially such an one as a costly extension to a road in bad odor in Wall street; and as Mr. Gould still has on his hands the capital stock of the Hannibal & St. Joseph which he had to take from Mr. Duff, any large subscription from him to the new enterprise can scarcely be expected.

The government bond market is quiet. The following were the closing prices yesterday:

	March 2, bid.	March 9, bid.	March 9, asked.
U. S. 4s extended (3½ p. c.)	103½	103½	—
U. S. 6½s 1891, registered	112⅝	112⅜	112⅝
U. S. coupon	112⅝	112⅜	112⅝
U. S. 4s 1907, registered	118½	118⅛	118¼
U. S. 4s 1907, coupon	119½	119⅛	119¼

The bank statement was as bad, or a little worse, than had been looked for. The loans showed a further expansion of $2,081,300, and the reserve was decreased $3,523,775, which swept away the previous week's surplus over the 25 per cent. line of $1,209,000 and carried the reserve $2,314,775 below that level. The following are the comparative totals of the statements of February 24 and March 3:

	February 24.	March 3.	Differences
Loans	$325,391,000	$327,472,300	Inc. $2,081,300
Specie	58,504,300	55,332,900	Dec. 3,171,400
Legal-tenders	20,023,500	18,915,800	Dec. 1,107,700
Deposits	309,275,200	306,253,900	Dec. 3,021,300
Circulation	16,498,700	16,545,200	Inc. 46,500

The proportion of total reserve to liabilities is now 24.25 per cent., as against 24.10 per cent. at the same date last year.

By telegraph from Boston, Mass.: Stocks closed at the following prices: Atchison, Topeka & Santa Fe, 80¼; American Bell Telephone, 275; Mexican Central, 20⅞; Calumet & Hecla Mining Company, 235.

By telegraph from New Orleans, La.: Louisiana 7s declined four points in consequence of decision of Supreme Court in New York, New Hampshire case vs. Louisiana, which it is apprehended leaves a door open for a dishonest legislature to further reduce the interest or repudiate the whole debt altogether. Premiums one point lower. Stocks generally well maintained.

By telegraph from Halifax, N. S.: Sterling, 9¾c.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The telegraphic reports to BRADSTREET'S this week from all the leading trade centers of the country are confirmatory of the anticipated improvement of business consequent upon the adjournment of Congress and the enactment of a tariff bill. The dispatches are uniformly favorable as regards the prospects of the spring trade. Wheat has shown a declining tendency during the week, owing to the fact that the accumulation of foreign wheat in the United Kingdom is large, and that, consequently, there seems to be less urgency there to provide against the shortage in the next crop. The rumors of damage to the winter wheat in Indiana and Illinois have, however, sustained the market and prevented an important decline. Corn has remained comparatively unchanged. The leading iron markets throughout the country report an improved feeling, due to the adjournment of Congress and the cessation of tinkering with the tariff. American pig-iron makers have announced their readiness to accept contracts for immediate or season delivery. The latter are offered at $24 for No. 1 anthracite, and $22 for No. 2. These prices were foreshadowed in this column last week. Consumers, however, are inclined to hold aloof a while longer. Manufactured iron is in improved request, as is spiegeleisen, although the latter is quoted at $22@$22.50 only. About 20,000 tons of steel rails have been contracted for during the week at $39@$40 at mill. The situation, therefore, is one of a moderate gain only. The speculative petroleum market continues to fluctuate as the reports of new wells are made good or are proved to be false. Stocks of refined oil abroad are heavy and the outlook here for an increased production and the large stocks have prevented exports in spite of the decline in prices during the week. The coal trades, both anthracite and bituminous, continue quiet, the former awaiting the arrangement of the spring schedule of prices and the latter the opening of navigation and the spring demand. The output of anthracite to date is about 400,000 tons in excess of a like portion of 1882. Ocean freights continue low, and the demand for charters is very light; berth rates are not high, and the movement of produce abroad is rather quiet than otherwise. There has been a fair consumptive demand for wool in all markets, and prices have ruled steady. There were 208 failures in the United States reported during the past week, 52 less than the preceding week, 31 more than the corresponding week of 1882, and 78 more than the same week of 1881.

BREADSTUFFS.

The foreign markets for breadstuffs have exhibited less strength during the past week, and the general situation is less favorable to a continuance of the export movement from this country than a few weeks ago. The principal cause of this is in the fact that the United Kingdom has been accumulating an unusually large surplus stock of wheat as the result of heavy imports during the last few months. The estimated increase in the surplus reserve or visible supply of wheat in the United Kingdom in the twenty-four weeks to February 10 was 24,514,470 bushels, against an increase of 8,807,641 bushels in the corresponding twenty-four weeks to February 10, 1882, and an increase of 7,498,138 bushels in the corresponding twenty-four weeks to February 10, 1881. These additions to the visible supply of wheat of course do not include the stocks on hand at the beginning of the twenty-four weeks in each year. It is estimated that if these amounts were added it would show the "surplus" supply of wheat in the United Kingdom on February 10 to have been about 30,000,000 bushels, against an average of 10,000,000 bushels in the two or three previous years. It will therefore be seen that if the wheat crop of 1883 in the United Kingdom should turn out—as is now estimated by conservative English authorities—to be, say, 26,000,000 bushels short of last year's crop, the shortage has already been to a large extent anticipated—at least so largely anticipated that there will be no special pressure for increased importations, even if the present very unfavorable expectations of the British crops are realized. There seems little reason to doubt that the United Kingdom, western Europe and the West Indies will take all the surplus wheat that the United States will have to spare from the crop of 1882 at moderate prices, but certainly not at higher prices than the present. On the contrary, now that Great Britain has fortified her position by the accumulation of an unusually large supply of foreign wheat, it seems probable that the English markets would take more only at lower prices. The Black Sea ports also are now open for navigation, and supplies from there to southern Europe must soon begin to have some influence on the continental markets. As mentioned a week ago, the 1882 wheat crop in all southern Russia was good, and the supplies to come from there will be much larger than last year. India still has a considerable exportable surplus of wheat, though the excessive cost of rail transportation to the seaboard and the expensive ocean transportation through the Suez canal will probably prevent any large movement from there to Europe at lower prices than the present. Speculation in the United States has advanced prices of wheat to a point which has checked the export movement from this country to Europe. This latter fact seems to be temporarily holding up the foreign markets to some extent. The reports of damages by floods in this country are also the cause of some apprehensions in Europe of diminished crops in this country next summer, and this also has helped to sustain the foreign markets; but even with these influences the foreign markets are not strong, and it seems pretty certain that the greatest anxiety in Great Britain about supplies of wheat during the next six or eight months is over. Germany and France have not accumulated any such increase of supplies of foreign wheat as Great Britain, but they are looking to Russia as a source for a large part of the wheat they may require.

The general prospect for next year's crops both in Great Britain and France continues quite as unfavorable as at any time this winter. The *Mark Lane Express* of February 19, referring to the heavy rains and general bad weather, says: "Preparations for spring sowing have been an impossibility, and the situation in its entirety at this stage is without precedent. With regard to the wheat crop the changes brought by the past week amount to a slow and partial improvement in the late sown wheats, and a rapid and general deterioration of the early October sown wheats." Advices from Paris to the 17th ult. say that while it cannot yet be called 'very late' for the spring sowing, there is so much more than usual to be done that there is much uneasiness. Advices from Saumur, France, to the 19th ult., say it is estimated that only two-thirds of the autumn sowings have been done, so that at least one-third more than ordinarily remains to be done yet, and that therefore it is likely that much less wheat but more barley and oats will be sown than last year."

The foreign markets for corn have shown more strength during the past week than they have for wheat, and this has induced a pretty free export movement of that grain from the United States; but on Tuesday the effect of this free export of corn was shown by a decline in Liverpool. The exports of wheat from the United States, however, show a large falling off in the last ten days. The decline in the foreign markets from the causes cited above, viz., the accumulation of supplies in the United Kingdom, together with the speculative high prices of wheat in the United States, have coöperated to make a disparity of prices for wheat which prevents exportation.

The course of the foreign markets for breadstuffs for the past week is shown by the following London quotations per quarter for American red wheat on the dates mentioned, viz.: March 3d, 48s. 3d.; 5th, 48s. 3d.; 6th, 48s. 3d.; 7th, 48s. 3d.; 8th, 48s. 3d.; 9th, 48s. 3d.

AMERICAN WHEAT MARKETS.

Prices have been sustained in the American markets lately mainly by the apprehensions about the weather and the possibility of further damage to the winter wheat. But there are also a good many who claim that as wheat is still from 15c. to 18c. per bushel below the prices of a year ago, and is also below the average price of the last seven or eight years, it is a cheap and safe investment to hold, at least until the prospects of the next crop in this country are more clearly foreseen than at present. Telegraphic reports from Indiana on Thursday estimate the damage to winter wheat in various parts of that state by winter killing at from 10 to 50 per cent. of the crop planted. It is also true that the exportable surplus of wheat in this country yet from the crop of 1882 cannot be over 60,000,000 or at the most 65,000,000 bushels. If exports of wheat and flour continue until July 1 even at the moderate rate of 1,500,000 bushels of wheat per week, it would leave, say 40,000,000 bushels on hand in this country on July 1. The amount required for home consumption in the month of July, while the new crop was being harvested and distributed, would be, say, 15,000,000 bushels, and this with, say, 5,000,000 more exports, would really reduce the surplus to be carried over into the next crop to not above 20,000,000 bushels, which is a much smaller amount than has frequently been carried over to that time of the year in previous seasons. The movement of wheat at the west is, however, increasing. Farmers seem to be better satisfied than the speculators about the prospects of the next crop, and are willing to sell freely at present prices, as is indicated by the increasing arrivals of wheat at the principal western points. The total arrivals at Chicago, St. Louis, Milwaukee, Detroit, Toledo, Indianapolis and Peoria in the week to March 2 were 1,307,566 bushels, against 883,772 in the preceding week, 819,458 two weeks previous, and only 375,541 three weeks previous. The arrivals have, therefore, quadrupled in the last month. This, in conjunction with the decrease in exports, is making a rapid increase in the visible supply in the United States.

The course of the American wheat market in the past week has been as follows, viz.: April wheat in Chicago at 1 o'clock, March 3d, 109⅛; 5th, 109⅝; 6th, 109⅛; 7th, 108⅝; 8th, 108⅞; 9th, 108⅜. April wheat in New York, at 2 o'clock, on March 3d, 126⅛; 5th, 126⅜; 6th, 126; 7th, 125½; 8th, 125⅞; 9th, 122¾.

The visible supply of wheat in the United States on March 3, compared with February 27, showed an increase of 822,357 bushels.

Under date of March 1 our San Francisco correspondent writes as follows: Under continued dry weather the produce market keeps hardening, and for the past week No. 1 wheat ranged from $1.92½ to $1.95; No. 2, $1.87½ to $1.90. Holders are asking higher prices, with limited transactions. Reports from the great wheat growing sections of California continue favorable. Fall-sown wheat never looked better; and, although winter-sown is somewhat stunted, the prevalent warm, growing weather will give it a fair start. The usual March and April rains will insure a very heavy crop. Farmers have begun plowing for summer fallowing. Fruit trees are coming into bloom, and buds are everywhere pushing forth, giving evidence of an early spring. There has been a large increase in the price of barley to cover shorts. Ocean freights are weak; wooden ships are practically out of the market.

Oregon has ceased to ship grain to San Francisco and must become an importer. The great increase of population and the destruction of winter-sown seed, owing to the very severe weather, combine to create a strong local demand. Local millers are selling their stocks to farmers for seed, but this source of supply is insufficient. The Portland Board of Trade met on the 28th ult. to consider what steps should be taken to secure rapid transportation of seed-wheat for spring sowing from San Francisco. The Oregon Railway & Navigation Company offered to transport the wheat to Portland at $1 per ton, and the Oregon Central Railroad has undertaken to distribute it at a nominal figure throughout the Willamette valley. The entire valley will be resown as soon as possible. Telegraphic orders were sent for 10,000 bushels for immediate distribution. The wheat belt east of the Cascade range in Oregon and Washington Territory has also suffered from the severe winter, and a great proportion of it must be resown. The railroad management is doing its utmost to enable farmers to tide over the difficulty.

By telegraph from San Francisco: Crop reports from twenty-nine counties of California agree that unless heavy rains fall within a fortnight grain will be greatly injured. Only Colusa county now makes any serious complaint. There is a strong demand for wheat at advancing rates for home requirements and export. More favorable advices have been received from the northwest coast. Heavy snow protected seed during the winter in eastern Oregon and Washington, where the crop outlook is excellent. Oregon is importing seed wheat from California, 80 per cent. of the Willamette valley requiring reseeding. All of the northern coast, including British Columbia, is drawing flour from San Francisco. Australia has 130,000 short tons of wheat surplus.

CORN.

Corn has been sustained by the firmness of the foreign markets and the active demand for home consumption, and partly also by the belief that the crop of last year was overestimated, and that this latter fact must have an effect on prices before another crop could come in. While this latter point may be founded on fact, it seems to have no effect to retard the marketing of the last crop. Farmers seem to realize that prices of corn are comparatively high, and especially so as compared with prices for wheat, and they are therefore willing to sell. The result of this is a continued increase in the arrivals of corn at the principal western points. The arrivals at the seven principal western points above named, in the week to March 2, were 3,438,794 bushels, against 2,027,042 one week previous, 1,739,777 two weeks previous, and 1,258,421 three weeks previous. The receipts of corn have, therefore, almost trebled in the last month. It is true that the increased movement of corn, as also that of wheat, is largely due to better weather than a month ago, when traffic on the country roads was almost impracticable. But, whether the increased movement of grain is due to this or to other causes, the fact of larger supplies and an increase in the visible supply points to lower prices in the near future.

The arrivals of oats at the west have also increased in the last month, but not nearly so largely as those of corn and wheat. Prices of oats also are maintained by the speculative holding of a few large houses, who hope to make the shorts for March settle at high figures.

The course of the corn markets in the past week has been as follows, viz.: May corn in Chicago at 1 o'clock March 3d, 62¼c.; 5th, 62⅞c.; 6th, 62⅝c.; 7th, 62⅛c.; 8th, 62¼c.; 9th, 62¼c. May corn in New York at 2 o'clock March 3d, 72⅝c.; 5th, 73c.; 6th, 72⅞c.; 7th, 72⅜c.; 8th, 72⅞c.; 9th, 72¼c.

The visible supply of corn in the United States on March 3 as compared with February 27 showed an increase of 2,116,688 bushels, and of oats 497,187 bushels.

PROVISIONS.

The tendency in prices of all varieties of hog product has been rather downward during the past week, though not sufficiently so to show any marked decline, while prices of shipping cattle at the west have been firm, and with an advancing tendency. The appearance of a disease among cattle in the United Kingdom in the past few weeks may have some effect to make a better demand for American meats. The weakness of the American markets for hog products, however, is difficult to explain upon any other theory than the manipulation of prices by speculators at the west, who are fishing for a short interest in order to help them advance prices later on. The statistical position of the stocks and prospective supplies of hog product are certainly in favor of firm markets and higher prices. The monthly statement of the stocks of provisions in store at Chicago on March 1 shows a decrease of about 3,000,000 pounds, or about 4 per cent. in the aggregate amount of the various varieties of bacon, side meats, etc., as compared with February 1, and of about 28,000,000 pounds, or about 27 per cent., as compared with February 15, 1882. Fairbanks & Co.'s monthly circular for March 1 also estimates the stock of prime steamed lard in the United States at 190,000 tierces, against 259,000 tierces at the corresponding time last year. The stock of all kinds of lard is also estimated at 224,000 tierces, against 306,000 at the same time last year. The stock of lard in Europe is also estimated at 97,800 tierces, against 130,000 tierces one year ago. The receipts of hogs at the west are not only small but are diminishing. The aggregate arrivals at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee in the week to March 8 were 138,348, against 167,149 the preceding week, and 105,303 the corresponding week of last year.

THE PROVISION MARKETS BY TELEGRAPH.

From Buffalo, N. Y.: Provisions are quiet, but firm.

From Cincinnati, Ohio: Provisions have exhibited animation, with full consumptive demand, and there are not a few holders for higher prices.

From Louisville, Ky.: Provisions are fairly active, with an advance during the week, and an easy feeling at the close. The cattle market is well supported.

From St. Louis, Mo.: Provisions dull and weakening. Cattle and hogs very active, higher, and in large receipts.

From Kansas City, Mo.: The provision market has been quiet, without any special feature; prices steady. Shipping cattle firm and higher. Hogs dull; prices weak. Packers claim that present prices are too high, and hold aloof.

From Des Moines, Iowa: The provision market is quiet, but is growing stronger daily.

From Leavenworth, Kan.: The provision market is firm at quotations. The demand from the west is large.

From Wilmington, N. C.: There has been a fair business doing in provisions, at full prices.

From Memphis, Tenn.: Meats are weak, with an unsettled feeling. Live stock receipts continue moderate, and the demand for all grades is good.

From Nashville, Tenn.: Provisions firm; demand fair. Cattle receipts for the week only moderate;

demand very good; prices continue high. Meats in good demand, and meet with ready sale at high prices.

From Chicago, Ill.: Pork quiet, with no pressure to sell; buyers slow, with few outside orders. Lard active, with a steady demand and fair offerings. Meats steady. Hogs gives holders confidence in all provisions. Supposed that small stocks are concentrated in strong hands. Cattle advanced 50c. since opening of week; hogs 25c. higher.

From Halifax, N. S.: The provision market is steady and firm.

THE NEW YORK DRY GOODS MARKET.

We were not wrong last week in stating that trade was evidently on the increase. It has steadily improved with each succeeding day, and though not as brisk or general as it ought to be at this season, still a very fair volume of business is reported. Jobbers are but lightly laden with goods, as they have been buying only for requirements and allowing the commission houses to carry the stock. Agents consequently expect an improved later business, and if the weather proves seasonable they will not be disappointed. Business with first hands for the week has been fairly satisfactory, no great complaints or growlings being heard. A goodly number of buyers are in the market, and jobbers appear about satisfied with what they are doing. The near-by trade is just showing itself. Jobbers of men's wear and furnishings report good business for the week, better in fact than in any other line. The clothing trade remains dull, the improvement being so slight as not to be worth mentioning. The outlook for the cloak manufacturers is not very encouraging this spring, trade so far being rather slow. It is full early enough however for them to give up hope, and we think they will have better business than some of them look for. The importations and marketings for the week are as follows:

	No. of packages.	*Value.*
Total amount of dry goods imported during past week	10,840	$3,420,429
Total amount of dry goods, duty paid, for past week	14,099	3,101,132

This shows a decrease of $1,000,000 each on last week's importations and marketings, and an increase of $1,000,000 on the week prior.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, March 9.—There is no improvement at Manchester. Concessions are still sought.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The trade in dry goods has been the dullest known for years, and the outlook is discouraging, as in any event the season must be short here. Manufacturing is generally restricted by extreme cold and heavy snows.

From Providence, R. I.: The print-cloth market is somewhat unsettled, the amount of sales being fair; 64s are quoted at 3¾c., less 1 per cent., and 56x60s at 3 3/16c., but this latter quotation is nominal; there are about 128,000 pieces on hand. The cotton market is steady, sales being moderate; middling uplands are quoted at 10⅝c., and middling gulfs at 10⅞c.; there are some 8,000 or 10,000 bales on hand.

From Boston, Mass.: The dry goods trade has been only fair. The cold weather and snow throughout the country prevent any general movement of spring goods. This is especially true of the clothing trade. Business men generally express the belief that the adjournment of Congress is a benefit to the country.

From Buffalo, N. Y.: In jobbing departments dry goods show a very satisfactory gain over corresponding week of last year, and a good feeling exists in the trade. In retail lines business is quiet on account of the continued cold weather. Collections are fair.

From Philadelphia, Pa.: The jobbing trade is decidedly more active, and orders for package lots are coming in more freely. Sales are mostly in moderate selections, but more frequent, and the range of distribution is widening. The market is very steady for standard brands of both cotton and woolen goods.

From Pittsburgh, Pa.: In dry goods trade continues light, and spring business has not yet commenced, though it compares fairly with same time last year. Collections fair.

From Cincinnati, Ohio: Dry goods and clothing manifest no animation. Cotton enjoys fair local demand under liberal receipts.

From Cleveland, Ohio: The dry goods market continues quite satisfactory. The trade thus far this year in this line has been exceptionally good, notwithstanding the new schedule is not entirely satisfactory.

From Columbus, Ohio: The dry goods trade still maintains itself, and is reported as being fairly active, and business is in excess of this season last year, with some improvement in collections.

From Dayton, Ohio: Trade in dry goods is said to be improving.

From Chicago, Ill.: Dry goods have been rather more active. Trade with the northwest is still restricted by adverse weather.

From Peoria, Ill.: In dry goods no new feature has occurred, and prospects are very favorable.

From Indianapolis, Ind.: The dry goods trade is good. Evansville reports the dry goods trade very satisfactory, and prospects for a heavy spring business are fair.

From Louisville, Ky.: Dry goods jobbers note animation in spring orders and a fair attendance of country buyers. Clothing is in good seasonable demand.

From St. Louis, Mo.: Dry goods stocks are very extensive, and complete sales during January and February aggregate nearly double the totals of the same months last year. Business is now fairly active and prices are being revised, but there is little change in the average of values.

From Kansas City, Mo.: Dry goods sales are unusually large and stocks much reduced. A large territory in southern Missouri and northern Arkansas has been connected with this market by rail and buyers in unexpected numbers have come here. This season's trade in dry goods will far excel any previous one.

From Detroit, Mich.: Dry goods jobbers report a very satisfactory business for the week, both in volume and margins.

From Burlington, Iowa: The dry goods trade during the past week has been satisfactory and shows a steadily increasing inquiry for staple and seasonable fabrics.

From Milwaukee, Wis.: Dry goods sales have not met all anticipations, nevertheless the aggregate sales have been in excess of those of last week. Somewhat of a stimulus is noticeable.

From Des Moines, Iowa: The dry goods trade is quiet, but has been gaining steadily since February 1. Bad roads tend greatly to cause present condition of trade.

From St. Paul, Minn.: Dry goods sales have been moderately increased by improved weather. Country store stocks are depleted, owing to conservative policy after last fall's overtrading and light purchases in winter months.

From Minneapolis, Minn.: Dry goods are moving quite freely, but the season is backward and the call for spring goods is not large. All the firms engaged in the trade are receiving large stocks.

From Leavenworth, Kas.: The dry goods trade is improving with the good weather.

From Omaha, Neb.: Dry goods sales during the past week have been fully 10 per cent. better than those for the previous week.

From Baltimore, Md.: There has been little change in the dry goods market since the previous week. Jobbers report orders coming in fairly and say the outlook is promising, but thus far the spring trade is rather backward. Prices remain firm.

From Norfolk, Va.: Dry goods jobbers have fine stocks of spring goods and anticipate a good trade.

From Richmond, Va.: Trade in dry goods is only fair.

From Wilmington, N. C.: The dry goods jobbing trade has been good, with a quiet retail trade.

From Savannah, Ga.: Trade in dry goods continues active.

From Montgomery, Ala.: Dry goods are in good demand, mostly necessities. Fancy articles are neglected. Merchants are in a better condition.

From Selma, Ala.: The dry goods trade is in a better and a healthier condition than it has been at a corresponding season for several years.

From Marshall, Tex.: Trade in dry goods is fair.

From Memphis, Tenn.: Jobbers in dry goods report sales as holding up in volume.

From Nashville, Tenn.: The dry goods trade has been without change.

From Halifax, N. S.: Trade in dry goods has been very quiet during the past week.

COTTON.

The New York cotton market has remained unchanged at 10 3/16c. for spot middling uplands. The sales for the week have been for export 300 bales, for consumption 3,427, and for speculation 1,263 bales. Included in the above are 700 bales to arrive. The deliveries on contract amount to 1,400 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7½c.	7½c.	9¼c.
Strict ordinary	7 15-16	7 15-16	9 13-16
Good ordinary	8¾	8¾	10⅜
Low middling	9 11-16	9 11-16	11½
Middling	10 3 16	10 3-16	11 15-16
Good middling	10⅝	10⅞	12 5-16
Middling fair	11⅜	11⅜	13 1-16
Fair	12⅞	12⅞	13 13-16

The market for spot cotton closed steady.

The future market at New York has been higher, the price having advanced an average of 3 points for near months, and 5 points for later months. The sales for the week foot up 331,700 bales, against 530,600 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
March	10 16c.	10.18c.	11.92c.
April	10.30	10.27	12.11
May	10.43	10 39	12.30
June	10.55	10.52	12.47
July	10.69	10.65	12.64
August	10.80	10.77	12.78
September	10.53	10.50	12.38
October	10.23	10.18	....

The future market at New York closed weak.

The southern markets during the past week have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports, as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	9,426	9¾	11¾c.
New Orleans	31,755	9⅝	11¾
Mobile	8,700	9½	11⅝
Savannah	7,250	9⅜	11½
Charleston	5,700	10	11¾

The total receipts of cotton at the ports since September 1 are 5,020,615 bales, an increase of 952,118 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	691,393	389,613
New Orleans	1,457,661	1,110,037
Mobile	291,856	240,204
Savannah	722,458	677,486
Charleston	516,960	506,867
Wilmington	117,964	126,958
Norfolk	679,685	842,092
Baltimore	47,618	25,533
New York	125,042	144,193
Boston	135,040	108,352
Philadelphia	54,165	44,081
Other ports	237,797	229,161

The receipts at the ports for the week were 122,628 bales, against 133,783 last week and 58,538 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 40,717 bales, against 44,877 bales last week and 17,252 bales for the corresponding week last year. The shipments for the week were 48,584 bales, against 61,296 bales last week and 43,411 bales for the corresponding week last year. The stocks for the week were 277,088 bales, against 279,403 last week and 287,054 for the same week last year.

At Liverpool the spot market is reported easier, at unchanged quotations, the prices remaining at 5 9/16d for middling uplands, and 5 11/16d for middling Orleans.

The sales for the week at Liverpool were 52,000 bales (of which 38,000 were American), against 91,000 bales (of which 61,000 were American) last year. The stock in port is 968,000 bales (of which 692,000 are American), against 734,000 bales (of which 535,000 were American) last year. The total imports for the week were 81,000 bales (of which 44,500 were American), against 103,000 bales (of which 64,000 were American) last year, and the amount afloat 290,000 bales (of which 220,000 are American), against 431,000 bales (of which 216,000 were American) last year.

The Liverpool future market has been dull and fairly steady. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery:

	To-day.	*Last week.*	*Last year.*
March	5 38-64d.	5 35-64d.	6 38-64d.
March—April	5 38-64	5 35-64d.	6 38-64
April—May	5 44-64	5 39-64	6 43-64
May—June	5 42-64	5 42-64	6 47-64
June—July	5 47-64	5 46-64	6 51-64
July—August	5 51-64	5 50-64	6 55-64
August—September	5 56-64	5 54-64	6 59-64

The Manchester market closed dull and lower, especially for yarns.

COTTON REPORTS BY TELEGRAPH.

From Wilmington, N. C.: The weather is cold and raining. Cotton receipts fair and market steady.

From Columbus, Miss.: Since last report the weather has been good, except one day, on which it rained. Cotton receipts good and now in excess of last year about 40 per cent.

From Helena, Ark.: City protected from overflow; favorable weather. Remnant of crops are freely marked.

From Dallax, Tex.: Cotton receipts for the week have been light, owing to rain and bad condition of roads. The total receipts for the season are 35,850 bales.

From New Orleans, La.: Throughout the week the cotton movement has been moderate; spot quiet; low ordinary to good ordinary, inclusive, ⅛c. off; futures steady at an advance of from 1 to 6 points; bears confident of present and future; bulls apprehensive. The National Cotton Exchange makes February overland 76,574; spinners' takings, 183,636; this year's overland, 842,317; takings, northern mills, 1,245,283.

WOOL.

Seaboard wool markets have not been active, but the volume of business has been very fair, and the general situation as regards values has developed no important change. There is no speculation, but consumers are meeting requirements without hesitation at current prices. As a rule, there is less disposition to anticipate future wants, owing in some measure to the yet undetermined effect of the revised tariff schedule on the goods trade. Manufacturers are evidently awaiting a clearer discernment of the conditions of the future. The reductions in duty will not be likely to affect the wool market to any extent. They have been already discounted as much as possible, and are measurably offset by the advance of 1@2c. per pound that has recently taken place at the colonial sales in London. The moderate available stock of clothing wools is the main element of strength in the market, as it has been for some time past. It is probable that the modified tariff schedule will become a factor of more importance two months hence, when dealers go into the country to negotiate for the new clip. It will then be used as a lever to depress values and to induce growers to unload at lower prices than they would be inclined to accept if the eastern markets sustain their present firmness. The general outlook for the trade is fairly encouraging.

IRON.

Reports from various iron centers mention an improved tone to the market, but as yet no special improvement in prices has been developed. The adjournment of Congress afforded some relief, but the Tariff bill itself will hardly be regarded as any stimulation. The reduction of 28 cents in duty on pig iron is met by an increase of 25 cents on iron ore. While the latter was unnecessary, the former amounts to nothing, except that it will be a trifle more difficult to reckon the duty on a lot of pig iron at $6.72 than at the old rate of $7. These samples fairly characterize the importance of many of the changes in the metal schedule, and, as a whole, have no effect in protecting the interests referred to, and, on the contrary, do not constitute an appreciable reduction so far as the consumer will be able to realize. The most that can be said is that these changes constitute a beginning. Pig-iron makers have opened their books, and contracts are offered for $24@$22 respectively for No. 1 and No. 2 anthracite iron. No rush of consumers to place their orders has been observed. Usually at this time there is a slight flurry in the market and considerable discussion takes place in the trade in connection with the opening contracts. Consumers this season do not appear to be in a hurry and no large orders for season delivery are yet reported. Scotch iron continues quiet at unchanged prices. The arrivals during the week aggregated about 1,200 tons, part of which was stored. The sales this week have been about 900 tons at previous rates.

Manufactured iron has been inquired for more freely, but continues to be quoted as heretofore noted. Several lots of spiegeleisen have been sold at current rates, and Bessemer pig, is rather more in demand. The aggregate sales of steel rails will probably foot up about 20,000 tons. Prices therefor continue at $39@$40 at the mill. The outlook in the iron trade at present is for a fair season's business. Buyers are feeling very conservative in their views and are in no hurry to close contracts.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, March 9.—The iron trade is distinctly more cheerful this week. There is a larger movement in pig iron, at an average of 6d. higher. The export of railroad iron to America in February was 5,000 tons, against 23,000 tons, and of steel 4,000 tons, against 18,000 tons for the same month last year.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: There is a better feeling in this market, and more business has been under negotiation during the week than for some time past. A number of orders have been placed, and the general tone of the market is steadier.

From Pittsburgh, Pa.: No perceptible improvement is noted in the iron trade since the passage of the Tariff bill, but there is a better feeling among the manufacturers, and an improved demand is expected, though present prices are unsatisfactory.

From Cleveland, Ohio: The settlement of the tariff question has produced a feeling of relief in iron circles, and an improvement in the business in some degree looked (or hoped) for in the near future. The demand for pig iron during the last ten days has been a trifle more active, though prices remain weak and unchanged. As yet little has been done looking toward season contracts for ore, which have heretofore been made as early as January. Consumers have but little on hand at furnaces, but the surplus on docks is much larger than in former seasons, and the summer's outlook for other than the leading standard ores is at present regarded as not very favorable.

From Cincinnati, Ohio: Iron has been a trifle more active on the part of sellers. Buyers experience no difficulty in placing their orders for pig at prices of last week. Merchant iron is in good demand and firm, with light stocks.

From Chicago, Ill.: Pig iron in better demand. Finished iron and nails slightly more active and steadier.

From Louisville, Ky.: Pig iron dull and easy; merchant iron and hardware in active jobbing request.

From St. Louis, Mo.: Iron is in good actual demand; rates unchanged. Concessions are still made on pig iron, which is not so brisk as manufactured. Settlement of the tariff question seems to have had a good effect on this trade here.

From Detroit, Mich.: In iron only a hand-to-mouth demand, at low prices, is noticed.

COAL.

There is no change to report in either the anthracite or bituminous markets as yet. In the former, production and consumption about keep pace. Business, however, is comparatively slack, and dealers are waiting the announcement of the spring schedule of prices. A meeting of the Western Coal Dealers' Association will be held on the 13th to arrange for rates affecting western markets. A compilation of the official totals of anthracite produced during the first eight weeks of 1883, as compared with the corresponding period in 1882, gives the following:

PENNSYLVANIA ANTHRACITE PRODUCTION.

	Tons. 1883.	1882.
Week ending January 6	422,675	374,998
Week ending January 13	585,243	594,829
Week ending January 20	573,499	398,073
Week ending January 27	595,550	321,814
Week ending February 3	579,511	409,773
Week ending February 10	099,348	341,980
Week ending February 17	407,904	409,233
Week ending February 24	484,885	361,034
Totals	3,708,998	3,271,734

The increased output of anthracite coal during the current year to the 24th inst. has been, therefore, 437,264 tons. There is little doing in bituminous coal at present. The market for this variety is about as last reported. When navigation opens the brisk season will have been reached.

PETROLEUM.

The bears on the petroleum exchanges now appear to be in charge. The Cooper tract producers agreement to cease operations until spring has expired by limitation, and renewed attempts to increase the production of petroleum have not only begun with great vigor but have in several instances been met by success. The bulls have endeavored to stem the tide which has been setting against them by assertions that the new gushers will draw off from the pools underlying other wells and not specially increase the aggregate production. This may or may not be the case. It can have no effect, however, until demonstrated. It is undeniable, then, that certificates are lower and weak, and that petroleum products, "in sympathy," follow after. The movement during the week has been gradual, the progression to a lower level of prices increasing in velocity during the past day or two. On Saturday last there was no news of importance from the regions, and no special fluctuations in prices of certificates of crude. Trading was active on Monday, but there were no other features worthy of mention. The market was weaker on Tuesday, and considerable trading was done. The special element in the depression was the announcement that several new wells were down in the vicinity of the Cooper tract, that old ones, in some instances, were redrilling, and that the outlook was for increased production. On Wednesday the Reed & Brenneman well No. 2 (McCalmont well) came in with a reported production of 1,400 barrels in 24 hours. The day's business on the various exchanges was heavy, and the fluctuations were noticeable, there being several attempts made to rally. A marked decline in prices of certificates was recorded on Thursday. Great excitement prevailed among traders in certificates, among whom transactions were heavy. The Patterson well, 200 feet north of the one reported Wednesday, was said to be "showing heavy," and the Reno No. 2 and the Shannon No. 5 were reported drilling, with good prospect for more oil. The decline in prices of certificates for the day was 3¾c.

On Friday the speculative market opened at 88c., but weakened under the influence of reports that the Patterson well had shown good producing capacities. Under this influence the market declined to 86c. The receipt of news that this well had been drilled six feet further into the sand and had turned out worthless brought about a change in affairs. Prices reacted at once, and the bears becoming frightened jumped in to cover. The advance continued until 90¾c. was touched. The morning's session closed with prices at 89½c.

PRICES OF CERTIFICATES.

	Opening.	Highest.	Lowest.	Closing.
Saturday	97	97½	95⅛	96⅛
Monday	96½	97	95⅝	96
Tuesday	96	96	93	93
Wednesday	93	93⅜	91½	91⅞
Thursday	92	92⅛	88	88⅛
Friday	88	91	86	89¼

Refined oil naturally has been weaker since Friday of last week. Prices of refined oil, 70° Abel test and 110° were reduced ⅛c. each on Saturday last, and again on Wednesday, but little or no business was done at the decline. Prices of crude and of naphtha and of plain brands of naphtha were in light request, but firmly held. The quotations last evening, as compared with those of one week previous, were:

	March 2.	March 9.
Certificates of crude	97⅛c. bid.	89¼ bid.
Refined petroleum, 110°	7⅞	7⅝
Refined petroleum, 70°	8	7½
Crude, in barrels	6⅞@ 7⅜	6⅞@ 7⅜
Case oil, plain brands	10¼	10¼
Naphtha	6¾	6¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to March 3 was 87,431,682 gallons, against 81,355,017 gallons in a like period of 1882, an increased exportation in favor of 1883 of 6,076,665 gallons, against an increase of 6,902,310 gallons reported up to February 24. For the week ending March 3 the foreign shipments were 12,994,980 gallons, against 11,840,894 gallons in the preceding week. New York city's exports of petroleum from January 1 to March 3 amounted to 74,547,271 gallons (leaving but 12,884,411 gallons for all other ports), against 65,846,696 gallons in a like period in 1882.

OCEAN FREIGHTS.

Ocean tonnage rates has improved but little since last week. A few grain charters have been contracted, but no business of importance has been done and quotations are low and not in special request. The drop in the price of petroleum offered no inducement to foreign importers of American oil in view of the outlook here for increased production and the heavy stocks in tank in the oil regions. Another reason is to be found in the heavy supplies held in European ports. There has been a fair movement on the berth only. On the whole, therefore, the movement of domestic produce and products has been light and rates low. Yesterday rates were somewhat firmer through renewed shipments of grain.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Quotations remain the same. General trade dull and backward.

From Boston, Mass.: There has been a tolerably good trade in boots and shoes, and shipments for the week are the largest ever known in any week in the spring season. Reports of the condition of trade outside New England are favorable and the usual good April business is expected. Shipments to places outside of New England for the week 65,228 cases, against 60,141 cases the tenth week in 1882. Total shipments since January 1, 516,497 cases, against 466,873 cases same time last year.

MIDDLE STATES.

From Buffalo, N. Y.: With few exceptions trade in general lines is still reported quiet, but generally regarded in a healthy condition and only awaiting the advent of spring weather to develop, the prevailing feeling being one of confidence. In boots, shoes and leather sales are behind corresponding week of last year. Groceries are moderately active on near-by orders. Lumber is quiet and stocks large for the season. Coal is in fair request for the season, but no particular animation in the trade; prices are subject to some concessions from March circular; prospects are that navigation will open late and that present card rates will remain materially unchanged for the present.

From Philadelphia, Pa.: Business has been better in some lines during the past week, and the general situation and outlook at the close are more satisfactory. Merchants express relief at the settlement of the tariff question, though the bill as passed comes in for a good deal of unfavorable criticism. It is yet too early to determine its effect upon general trade, but there appears to be a better feeling in business circles, and activity is reasserting itself in some departments. In detail there are not many changes to note in the markets. The grain trade has been depressed by larger receipts of leading staples at western centers and unfavorable cables. Export business has been dull, speculation rather tame and prices unsettled and, on the whole, lower. Petroleum has also eased off slightly under a slow foreign demand. Groceries have been jobbing more freely. Provisions have continued in good consumptive demand. Receipts of farm products have been running light and are well sold up. Butter and eggs have declined under larger arrivals. Cotton has ruled very dull at unchanged prices. Wool has sold fairly and closes firm. There is no change in the local industrial situation. Mercantile collections, as a general thing, are reported satisfactory.

WESTERN STATES.

From Cincinnati, Ohio: The leading lines of trade still manifest the lethargy usual to this season of the year, and the prevailing opinion is that the volume of general business for the past week will not compare favorably with the corresponding week last year. Cereals and flour have drooped, and still manifest a downward tendency. Whisky is in fair consumptive demand; dealers anticipate no immediate trouble from the refusal of Congress to extend the bonding period. Tobacco is in fair demand, with good stocks on the brakes. Collections unchanged.

From Cleveland, Ohio: The week has developed nothing materially new so far as business in general is concerned. Groceries continue active, and there has been a very good demand for boots, shoes and hardware. In most other lines orders are somewhat behind other years at this season, yet a fair week's business has been done, and fairly satisfactory to jobbers. There is an active local demand for money, the supply being quite well absorbed. A new savings and trust company has recently been chartered to begin operations here at an early day, and another national bank is about to be added to the financial institutions of the city.

From Columbus, Ohio: Trade in general lines shows more animation than a week or so ago, and buggy manufacturers, and manufacturing interests as a whole, are busy.

From Dayton, Ohio: Trade in all lines reported dull. The demand for money increasing. Collections are hard to make.

From Indianapolis, Ind.: Trade appears to manifest more activity in consequence of improving weather, and collections are better; there is not much speculation, and prices are quite uniform; manufacturers are busy, and there is plenty of money for all ordinary requirements of business.

From Evansville, Ind.: Trade is fairly active, with no change in monetary affairs. The weather is fine, and farmers report wheat looking well.

From Chicago, Ill.: Boots and shoes are selling more freely. Hardware, tools, metals and tinners' stock more active. Groceries active and firm. Wheat weak, depressed by the prospects of better weather causing increased stocks. The chief demand is to fill shorts. Corn receipts larger. Market weak, with moderate offerings. Quality improving. Receipts of oats are unusually heavy for season. Market is weak and declining. Rye lower; the stocks are the largest ever here.

From Peoria, Ill.: Business in this city among jobbers is reported good. The action of Congress in regard to liquor in bond it is not believed will affect trade this year to any extent, as an outlet is afforded by exporting, and it is believed a relief acceptable to trade will be offered next year.

From Detroit, Mich.: General business is of good proportions; collections hardly up to standard, but with some houses very fair.

From Louisville, Ky.: The general trade situation shows a gradually increasing movement and a favorable outlook. Receipts of grain are somewhat larger and prices firmer. Cotton quiet and steady and in moderate demand; receipts fair but chiefly stained. Field seeds and implements very active. Flour steady and a good shipping trade. The leaf-tobacco market shows continued heavy receipts and sales, with fuller prices ruling; the quality of offerings lately is inferior. Plug tobacco manufacturers are again working full capacity, and since the settlement of the tax question the demand from this branch has given additional stimulus to the leaf market. The distributive movement of Kentucky whiskies is on a liberal scale; since the adjournment of Congress the uneasy feeling has given way to a settled tone, and strong holders are confident that the market will gradually work into a healthy condition by regular action; with no threatened change in legislation, for the present, and the banks being favorably disposed to the trade, the whisky people are in a more confident and contented attitude. Abolition of bank taxes has produced active trading in local bank stocks, some of which have advanced 4 to 5 per cent.

From St. Louis, Mo.: General trade is improving. Growing wheat is doing fairly well. All grains are quieter, with a downward tendency. There is a very heavy export movement by river. Horses and mules in higher receipt, and values firm. Cotton markets exceedingly tame, and receipts still heavy. Leaf tobacco dull, and offerings are low grade. Money remarkably active on a miscellaneous demand.

From Kansas City, Mo.: Increased activity is manifest in all departments of trade. Collections have improved. Country advices are favorable, and the outlook is encouraging.

From Burlington, Iowa: Business generally has shown a noticeable activity during the past week. All lines of trade are anticipating a good spring business, as the weather favors an early spring. Jobbers are filling desirable orders through the country. Merchants are buying prudently and only what goods are in actual demand. Collections are fair.

From Des Moines, Iowa: General trade is fair and gradually improving.

From Milwaukee, Wis.: The volume of business among merchants is somewhat greater, as are also collections, but there is still considerable room for improvement, as both have been very light for past few weeks. Business among local banks continues active, and generally satisfactory; demand for loans is good, and banks find no difficulty in placing their funds at remunerative rates.

From Minneapolis, Minn.: The weather has been variable throughout the northwest during the last week, but in the main milder. The large body of snow on the ground on the first of the month has been gradually melting, but thus far has caused no material rise in the streams; present indications are that this section will escape the flood so generally prevalent; ice in the river and lakes is still solid. Country roads are generally in fair condition, and railroads open to most points. Farmers are selling wheat more freely, but the opinion is general that the quantity in the hands of farmers is not large.

One half of the milling capacity of the city and state is shut down from lack of wheat; receipts at Minneapolis for the week, 420,000 bushels; market firm at $1.15 for No. 1 hard. Flour firm with light production, but only moderate demand; shipments for week 65,000 barrels. Jobbers report a decided improvement in trade and better collections.

From St. Paul, Minn.: A better demand is noticed for spring and summer clothing, boots and shoes, groceries, hardware, iron and lumber. Trade in agricultural implements has opened. City merchants are cautious in giving credits, owing to losses, mostly by new houses who had trusted indiscriminately in the past two years to get trade. Money is in active demand, with no surplus of loanable funds; currency is returning from the west.

From Leavenworth, Kan.: The weather has been more favorable for spring trade. General trade has steadily improved during the past week. Large orders are coming in to all our manufacturers. Wheat and corn are coming in rapidly to our mills and elevators. Reports from all parts of the state show that the winter wheat is looking well. Flour firm at quotations.

From Omaha, Neb.: Spring-like weather continues, and as the country opens trade is slowly increasing. All lines of trade report both collections and sales on the increase, and an early spring trade is looked for. Corn now brings 32c., and shippers report good receipts.

CALIFORNIA.

From San Francisco, Cal.: The export trade continues active. The spring trade has opened hopefully, Oregon buyers having begun their purchases. Local manufactures are improving. Great expectations are based upon the probable railroad competition, consequent upon the new steamer and rail route from New York to San Francisco, which has been opened by the Southern Pacific. Through freight is billed 10 per cent. lower by it than by the old overland route.

SOUTHERN STATES.

From Baltimore, Md.: The volume of trade the past week was fair. Very little was done in grain, but prices remain steady. Jobbers of coffee are amply supplied for the present, and show no disposition to anticipate their wants, but importers are not trying to force business. A moderate inquiry is reported in the cotton market, which is easier in tone, though there is no actual offering at lower prices. Stock speculation has been quite brisk and the market is quoted firm.

From Richmond, Va.: Business is not so good as last week and is now only fair.

From Norfolk, Va.: For the past week the weather has been variable, consequently business has not been so active. Wholesale grocers active as usual. All other departments of the jobbing trade doing their usual business. Cotton is commencing to fall off in receipts. Stock of peanuts on hand quite large, and are being held firmly by the factors for better prices; crop about 1,500,000 bushels.

From Wilmington, N. C.: There has been a fair business doing in grain and breadstuffs at full prices. Naval stores close firmer. Timber firm. Lumber and shingles dull. Freights, foreign, steady; coastwise, quiet. Exchange and discounts unchanged.

From Savannah, Ga.: Trade generally steady, with a more active movement than previous week, except in naval stores, which still rule quiet. Rice market looking up for all grades, with fair demand. Lumber trade for the season quiet, and the tonnage offered is in excess of shippers' requirements. In Brunswick, Ga., there has been exported to foreign ports 752,150 feet of lumber, valued at $10,831.

From Selma, Ala.: General trade is better and in a healthier condition than it has been at a corresponding season for several years past.

From Montgomery, Ala.: General trade is in a good condition.

From Columbus, Miss.: Trade is light, as it is mostly for cash. Buyers and sellers are disposed to try the cash system, showing a healthy disposition in our community.

From New Orleans, La.: There is an apprehensive reawakening in regard to the rivers. Though the effect of the tariff on sugar was already discounted, the passage of the bill depressed the market, which subsequently recovered the loss and became steady. Molasses is dull and nominal. Rice quiet and unchanged. Liberal receipts weakened flour, which subsequently rallied in sympathy with the west. Fair coffee, 9¼c.; considerable future business springing up here in coffee, with moderate supply. Corn and oats have improved in prices 2c. Oilcake, 22c. Cottonseed oils steady.

From Dallas, Tex.: Wholesale trade in all lines is fairly active. Grain receipts light and not equal to the demand.

From Marshall, Tex.: General trade has been dull, and farmers are all busy preparing for planting. There is a fair prospect for a good spring trade. The weather is fine for farmers.

From Memphis, Tenn.: Business continues fairly active this week. Hardware men are especially busy, and other lines are doing their share. Corn steady, with supply ample. Meal is easy, with demand light. Flour firm, with good stocks on hand. Potatoes rule firm in price, with good demand.

From Nashville, Tenn.: General trade for the week has been moderately active. Flour quiet but firm. Corn steady. Country produce steady, and without change.

NOVA SCOTIA.

From Halifax, N. S.: Groceries steady and firm. Results of last year's business generally well spoken of.

LATE MAILS.

Chicago, March 7.—Although the banks continue to quote discount rates at 6@7 per cent. for collateral loans, with 6½@7 as the ruling figures, the tendency of the market is in borrower's favor. There is also a growing desire on the part of lenders to find desirable customers who will agree to keep funds for 60 to 90 days, and those who have choice collaterals to offer and want large loans have the advantage as to rates. There is, however, the usual caution in regard to mercantile paper, but the improvement in collections from the country is gradually lessening the demand for bank favors from merchants. New York exchange is in good supply, and is quoted between banks at 75@80c. discount per $1,000, and bankers continue to order gold from New York with which to replace shipments which they are constantly making to the interior. But the general tone of the advices from the interior today justifies the opinion that country bankers are pretty well supplied with funds for present use, and the orders for money from that source are smaller than at any previous time in a fortnight. There are also increasing orders for exchange on New York, which indicate more liberal remittances from interior western merchants to their eastern seaboard creditors. The jobbing trade shows a steady improvement, buyers of dry goods arriving more freely, and each day brings an increase in the number of mail orders. The orders also embrace fuller lines of goods. It will, however, require at least a fortnight of spring-like weather before trade becomes really active in all departments. Nor are we likely to see a general rush, such as usually marks the spring business, as interior retailers whose credit is good will be more than usually inclined to feel their way and buy in small lots, as their sales justify, while customers of doubtful credit will be kept under close control. As yet scarcely anything has been done in millinery; the large houses have full stocks, and anticipate a good trade when the season fully opens. Clothing, hats and caps are ordered in small bills, but trade is still kept in check by unfavorable weather. Boots, shoes and rubber goods are selling more freely, and orders cover more general lines. Tanners report a fair demand for leather from manufacturers, but say goods are sold on such close margins that there is no profit in the business. Building and general hardware is meeting a much better demand. There is also an increased call for staple cutlery, mechanics' tools, and agricultural implements, and dealers say the outlook for selling goods is much better than the show for profits, the sharp competition among dealers frequently inducing them to sell regardless of margins between the cost of the goods and prices realized. Bar, plate and angle iron sell slow, and in small parcels. Pig meets about the same demand reported last week, and there is no change in prices or improvement in the general tone of the market. The mills report a few orders for steel rails, but are exceedingly reticent regarding prices. The proprietors also talk blue regarding the future, and express disgust at the newly-enacted tariff, which, they say, will ruin their business. Nails are in good supply, and sell slowly in small parcels, as wanted for immediate sale by interior dealers. A few sales of Bessemer iron ores are reported, but the terms are withheld. It is understood, however, that the price is about $4 at the mines in the Menomonee range. This is a decline of $1.50 from the ruling prices last year, but it will return a good profit to the mines. The lumber trade is slightly more active, without improvement in prices.

TRADE EMBARRASSMENTS.

There were 208 failures in the United States reported to BRADSTREET'S during the past week, 52 less than the preceding week, 31 more than the corresponding week of 1882, and 78 more than the same week of 1881. Compared with the previous week, the middle states had 52, a decrease of 13; New England states 27, a decrease of 10; southern states 38, a decrease of 17; western states 63, a decrease of 16; Pacific states and territories 28, an increase of 4; Canada and the provinces 34, a decrease of 5. The important failures were J. A. Hatry & Son, wholesale drugs, New York city; Joseph Myers & Son, manufacturers of ladies' cloaks, Philadelphia; Malster & Reany, bridge and elevator builders, Baltimore. In the principal trades they were as follows: General stores 39; grocers 35; liquors 18; hardware 11; manufacturers 9; drugs 9; bakers and confectioners 9; shoes 8; clothing 8; dry goods 6; fancy goods 5; millinery 5; furniture 4; leather and tanners 4; commission 3; books and stationery 3; lumber 3; jewelry 2; produce 2; gents' furnishing goods 2; crockery 2; hotels and restaurants 2.

ALABAMA.

LIVELY.—L. N. Chalmers, groceries and liquors, offers to compromise at 33 1-3 cents.

TROY.—Haley, Posey & Hutchinson, general store, are advertised to be sold out by the sheriff.

ARIZONA.

BENSON.—Barnett & Block, general store and teaming, have assigned. They recently claimed assets $49,000; liabilities $14,000. They carried on freighting between Yuma and Tucson, and had a contract for hauling lumber for $30,000, for which they were under considerable expense for new teams, etc., and recently tried to borrow from $5,000 to $10,000, giving their teams, etc., as security. Liabilities about $30,000; assets $15,000.

CALIFORNIA.

AUBURN.—W. McClellan, varieties, has been attached. Liabilities $1,500; assets $500.

LIVERMORE.—T. Hayes, contractor, has filed a petition in insolvency. Liabilities $48,985; assets merely nominal.

MONUMENT.—Charles Tiner, saloon, is reported to have have left town.

SAN FRANCISCO.—W.H. Beard, fruits, has been attached.

SAN FRANCISCO.—P. Cohen, grocer, has been attached.

SAN FRANCISCO.—Fred. A. Freese, saloon, has been attached.

SAN FRANCISCO.—A. Giamboni, confectioner, has assigned.

SAN FRANCISCO.—William Hahn, butcher, has filed a petition in insolvency. Liabilities $3,376.

SAN FRANCISCO.—John Kelly, saloon, has been attached.

SAN FRANCISCO.—H. Mahlman, saloon, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—Fred. W. Meyer, cigars, has filed a petition in insolvency. Liabilities $981; assets $240.

SAN FRANCISCO.—William Nolte, jeweler, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—L. Sachse & Co., bakers, have been attached. Liabilities $2,500; assets $1,000.

SAN FRANCISCO.—Jacob Schneider, baker, has been attached.

SAN FRANCISCO.—T. Scully, livery, has been attached.

SAN FRANCISCO.—Wing, Yuen & Co., shoe factory, have been attached.

SAN PAULO.—S. P. Guiberson, drugs, has been attached.

COLORADO.

COAL CREEK.—A. Alexander, general store, has assigned.

DENVER.—James Johnson, trading as Johnson & Co., plumbers, has assigned. Liabilities $13,000; assets $16,000.

LEADVILLE.—H. T. Dodge & Co., drugs, are being sold out on execution.

LONGMONT.—Charles G. Holland, shoes, has assigned.

LOUISVILLE.—Michael Schaffer, hotel, has been attached and is reported to have left town.

CONNECTICUT.

BRIDGEPORT.—James H. Smith, house furnishing goods, has been attached.

MERIDEN.—C. Roesner, toys, has failed.

DAKOTA.

WILMOT.—Norby Brothers, general store, have assigned.

DISTRICT OF COLUMBIA.

WASHINGTON.—Isaac Gassenheimer, crockery, has assigned to C. T. Havenner, giving a preference to his mother for $600.

WASHINGTON.—Jared F. Sparks, millinery, has assigned.

FLORIDA.

KEY WEST.—J. M. De Cardenas, grocer, has sold out and been attached. Liabilities about $20,000; nominal assets $15,000.

GEORGIA.

AMERICUS.—J. E. Mathis, grocer, is offering to compromise at 25 cents.

ATHENS.—R. G. Gray, dry goods, is reported to have assigned.

BRUNSWICK.—Goldsmith & Nock, grocers, have assigned and been closed by the sheriff.

ILLINOIS.

CHICAGO.—M. Anderson, manufacturer of showcases, has assigned to C. J. Stromburgh.

CHICAGO.—B. B. Boynton & Co., wholesale teas, have been closed by the sheriff.

CHICAGO.—Mrs. S. Prior & Co., millinery, have been closed by the sheriff.

CHRISMAN.—T. A. Prunty & Co., furniture, have failed and sold out. Liabilities $1,000; assets $300.

DANVILLE.—Austin Jones, saloon, has been attached for $652.

FAIRMOUNT.—James Thomas & Brother, hardware and lumber, were attached, and confessed judgment for $5,382.

HYDE PARK.—Brown & Co., grocers, have been closed by the sheriff.

OLNEY.—Roberts & Gunn, general store, have assigned.

OTTAWA.—T. T. McMahon, confectioner, confessed judgment for $400 and assigned.

OTTAWA.—Maher Brothers, general store, have assigned to Alfred White. Liabilities $10,911; assets about $12,000. They confessed judgments for $6,692. Partnership disagreement is attributed as the cause of the assignment.

PEORIA.—John J. Steiger, saw and sickle manufacturer, has been closed by the sheriff on a claim for $1,594.

SPRINGFIELD.—Fisher & Judkins, musical instruments, have failed.

INDIANA.

EAGLETOWN.—Henry Couch & Son, general store, have failed.

EVANSVILLE.—Hudspeth & Sonntag, clothing, etc., have sold out, and Mr. Sonntag is reported to have left town. Liabilities $14,000.

MISHAWAKA.—The Mishawaka Paper Company is reported seriously embarrassed by the failure of Lucius Clark & Co.

ROCKVILLE.—Swank & Snyder, furniture, have been closed by the sheriff.

TERRE HAUTE.—McIntire & Dodson, grocers, have been closed by the sheriff.

IOWA.

CLARION.—A. Ellicott, grocer, has been closed on a chattel mortgage.

CLIO.—Elson Brothers, general store, have assigned.

ELKPORT.—Bayless, Kreibs & Co., drugs and groceries, have assigned to Charles Laxson.

EMERSON.—Tanner & Ewing, general store, have failed. They began December 1, 1882.

GATTENBERG.—Henry Eckhart, blacksmith, has assigned to Henry Schlake.

GOURIE.—O. T. Logerquist, general store, is reported to have failed. Liabilities $2,000; actual assets $2,000.

KIRKSVILLE.—A. Roop & Co., flour mills, have assigned.

LONE TREE.—M. R. Hill & Son, general store, have assigned. Assets $4,100.

MONDAMIN.—E. Jones, grocer, is reported to have failed.

POMEROY.—J. L. Williams, general store and lumber, has assigned.

QUASQUETON.—F. B. Williams, hardware, has failed. Liabilities $3,000; assets $2,000.

KANSAS.

LA CYGNE.—George Mosley, grocer, has assigned.

NORTH CEDAR.—J. S. Saunders (agent), farmers' store, is reported to have failed.

KENTUCKY.

BARDSTOWN.—A. B. Baldwin, grocer, has assigned.

ELKTON.—C. M. Russell, notions, is reported to have failed.

FRANKFORT.—O'Bryan & Banta, toys, have assigned.

LOUISVILLE.—Jaeger & Esch, plumbers, have assigned to Henry Miller.

PADUCAH.—Fisher & Paxton, grocers, assigned on the 6th inst.

LOUISIANA.

RAYVILLE.—Simms & Balfour, general store, and J. W. Simms, saloon, have been attached. The liabilities of both firms are about $16,000; nominal assets $18,000, mainly in outstanding accounts. The creditors were offered 25 cents, but think they ought to receive 33 1-3 cents.

MAINE.

AUGUSTA.—George E. Whipple, furniture, has been closed by mortgagees, who, it is said, will settle with the creditors.

LISBON.—H. N. Macurdy, stoves, offers 25 cents.

SACO.—N. T. Boothby, clothing, has failed. Liabilities $7,000; assets $4,000.

SACO.—Horace B. Stuart, grocer, has failed, and offers 50 cents. Liabilities $4,700; actual assets $1,900.

MARYLAND.

BALTIMORE.—Robert J. Davidson, plumber, has assigned.

BALTIMORE.—Franck Brothers, house furnishings, have assigned to Charles E. Hill.

BALTIMORE.—Malster & Reany, iron founders, bridge and elevator builders, and lessees of the dry dock at Locust Point, assigned on the 6th inst. to Ambrose L. Higgins. They have been reported unsatisfactory in payments for some time past, and it was said they were doing too much business for their capital. They succeeded Malster & Donnell in 1875. They built the elevators for the Pennsylvania Railroad Company at Jersey City and the elevators at Girard Point, Pa.

BALTIMORE.—Joseph Villner, merchant tailor, has assigned and offers 33 cents.

DENTON.—W. A. Stewart, general store, has assigned.

FAIRMOUNT.—Joseph A. Chilton, general store, has failed Liabilities $1,600; assets about $700. It is said he has paid some creditors 60 cents.

MASSACHUSETTS.

ARLINGTON—Charles A. Higgins, grocer, has failed and left town. Liabilities about $3,500; nominal assets $2,000. The estate has been put into insolvency.

BOSTON.—The liabilities of George W. Canterbury, produce, are about $1,900; no unincumbered assets.

BOSTON.—Thomas J. Egan, liquors, has failed, and offers 10 cents. Liabilities about $6,000. All the stock is mortgaged.

BOSTON.—The liabilities of James Haskins, liquors, are $4,350, of which $865 is secured. There are no assets for the unsecured creditors.

BOSTON.—The Union Elastic Goods Company has suspended. Liabilities $37,000; nominal assets $39,000. At a meeting of creditors an offer of 30 cents, in thirty, sixty and ninety days, together with the future payment of whatever shall be realized from the sale of the company's interest in vessels, nominally amounting to $4,000, was accepted.

BOSTON.—Withington & Austin, bakers, have failed. Liabilities about $11,000; nominal assets $16,000, of which $10,000 is machinery.

BROCKTON.—Charles H. Baker, saloon, is reported to have been attached.

BROCKTON.—I. S. Emerson, shoe manufacturer, offers 60 cents.

BROCKTON.—James A. Packard, shoemaker, is in insolvency.

BROCKTON.—John E. Smith, shoemaker, is in insolvency.

CANTON.—D. T. Hogan, grocer, has arranged with his creditors at 25 cents.

CHICOPEE.—John Goodwin, contractor, who recently absconded, is reported to owe about $75,000. His property has been attached.

INDIAN ORCHARD.—E. D. Chapman, drugs, has been attached.

NORTH ATTLEBORO.—Frank A. Bates, grocer, has failed, and offers 33 1-3 cents. Liabilities about $18,500.

SPENCER.—Stanley & Riley, woolen manufacturers, are reported to have failed.

MICHIGAN.

BIG RAPIDS.—E. E. Smith & Co., grocers, have assigned.

CASEVILLE.—Levi Warshofsky & Brothers, general store, gave chattel mortgages for $2,500. Two creditors attached, but the mortgagee replevied and is in possession.

GENEVA.—Frank Deal, grocer, has assigned.

MARCELLUS.—B. B. Frazee, marble, has been attached.

MINNESOTA.

JANESVILLE.—Cumings & Horan, hardware, have assigned. They have a branch at Elysian.

NEW RICHLAND.—Bakke & Bjorberg, shoes, have been closed by creditors.

NEW ULM.—Edward Dunkel, tailor, has compromised at 50 cents.

MISSISSIPPI.

BROOKHAVEN.—Powell & Co., general store, have failed. Liabilities $1,100; assets $700.

MISSOURI.

BOONVILLE.—M. Schiebert, merchant tailor, has assigned.

GILLIAM.—W. T. Cook & Co, general store, have been closed by the sheriff.

KANSAS CITY.—Charles A. Reade & Co., music, etc., have assigned.

KIRKSVILLE.—S. T. Furrow, drugs, has failed.

RICH HILL.—V. M. Brooks, hardware, has been closed by the sheriff.

ST. LOUIS.—The Douglass Bagging Company has been sold out under a deed of trust for $8,500 to Charles E. Pearce.

MONTANA.

PHILLIPSBURG.—Nick Connolly, hardware and groceries, has assigned. Liabilities $50,000. He has been in business about twenty years.

NEBRASKA.

ALBION.—J. W. Riley, agricultural implements, is reported insolvent.

BLAIR.—Mrs. S. E. Higley, millinery, gave her son a chattel mortgage for $500, and he has taken possession.

LINCOLN.—J. R. Hill, confectioner, has been attached.

OMAHA.—A receiver has been appointed for F. J. Allen, grocer, to close up the business. Liabilities $1,100; nominal assets $2,700.

ORLEANS.—D. E. Bomgardner, general store, has failed.

PAWNEE CITY.—J. W. Kleinfelt, grocer, has sold out and has not paid his creditors.

PLATTE CENTRE.—H. G. Seidel, lumber, is reported to have failed.

NEVADA.

CARSON CITY.—David Bain, drugs, has been sold out by creditors.

NEW HAMPSHIRE.

MANCHESTER.—John Fenton, groceries and liquors, has failed. Liabilities about $4,000; assets about $2,000.

OSSIPEE.—Charles P. Moore, general store, has failed. Liabilities about $1,600; assets $900.

STARK.—Smith & Pike, general store, have been attached for $6,000. Liabilities about $10,000.

NEW JERSEY.

BELLEVILLE.—The liabilities of F. B. Chandler, grocer, who has been closed out by the sheriff, are about $800.

DUNELLEN.—T. C. Bodine, tinware, has been closed by the sheriff.

NEW YORK.

ARCADE.—B. F. Hurty & Co., bankers, have assigned to Marvin Austin. Liabilities about $30,000.

BROOKLYN.—John E. Joslin, hardware, has assigned to Thomas F. Randall, giving preferences for $1,000.

BUFFALO.—Mrs. Charles Herger, books, has assigned to James A. Roberts.

COHOES.—Frederick Brischke, shoes, has assigned to Henry A Strong.

EAST BLOOMFIELD.—W. P. Taft, carriage maker, has assigned to Caleb Taft, having previously given a chattel mortgage for $3,500.

ELLENVILLE.—S. I. Benson, grocer, has failed. Liabilities $1,000; assets $600.

NEW YORK CITY.—Baer & Rinaldo, wholesale hats, assigned on the 3d inst. to Isaac Rinaldo. They began in July, 1881, claiming $10,000 capital. Liabilities $24,734; nominal assets $8,933; actual assets $7,601.

NEW YORK CITY.—The schedules of Jacob Bloch, jeweler, show liabilities $2,940; nominal assets $2,595; actual assets $1,730.

NEW YORK CITY.—Paul Hahlweg, confectioner, assigned on the 6th inst. to Henry W. Goodrich.

NEW YORK CITY.—J. A. Hatry & Son, wholesale drugs, assigned on the 3d inst. to William S. Spooner, giving a preference to Joseph A. Hatry as executor for $7,825. Liabilities about $80,000; assets $60,000. Unsuccessful operations in quinine and other drugs are ascribed as the cause of the failure.

NEW YORK CITY.—Abraham B. Hyman, millinery, assigned on the 6th inst. to David Kohn, giving a preference to B. Hyman for $450. Liabilities $1,657; nominal assets $978; actual assets $144.

NEW YORK CITY.—The schedules of J. Levy & Co, neck wear, show liabilities $34,630; nominal assets $26,925; actual assets $17,004.

NEW YORK CITY.—The schedules of McCabe & Conway, hosiery, show liabilities $69,228; nominal assets $68,449; actual assets $41,907.

NEW YORK CITY.—McCauliff & Co., stationers, assigned on the 7th inst. to Frank Bowman, giving two preferences for $1,556, of which the largest was to Daniel Slote, $1,028.

NEW YORK CITY.—John McCue, liquors, assigned on the 8th inst. to Michael J. Costello, giving preferences for $3,095.

NEW YORK CITY.—Julius Marcus, liquor broker, is reported to have victimized merchants to the extent of about $25,000, and to have left for parts unknown.

NEW YORK CITY.—W. H. Vass, tallow broker, has been suspended from the Produce Exchange. His liabilities are reported at about $6,000.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MARCH 17, 1883.

NOTES OF THE WEEK.

The stock market received a severe blow this week in the failure of Ives, Beecher & Co., which was considered to be the forerunner of other failures from the same cause in the whisky trade. The blow came just as the combination of bull operators were advancing prices most briskly, and the market since then has shown no vigor. In the opinion of some the late reaction has spent its strength. Recovery was made almost impossible by a continued stringency in the loan market, which has given an average rate on call loans during the week of 12 per cent., and brokers have to spend a good part of the business hours each day running about to keep their bank balances good. The marvel is that, under such depressing influences, the market holds up so well as it does, destitute as it is of public support.

The City Reform Club does well to direct attention to the pending amendment to the Constitution of New York state concerning municipal government. The amendments provide, first, that "it shall be the duty of the legislature to provide for the organization of cities and incorporated villages * * * by the passage of general laws only, applicable alike to all incorporated cities." Second, "the legislature shall not pass any special or local bill affecting the local or municipal government of a city." Third, "the people of every city shall have the power to organize their own local and municipal governments and to administer the same for local and municipal purposes, subject only to such general laws as the legislature may enact; provided such local government shall be republican in form." So far as these amendments propose to secure to cities the exclusive right to manage their own affairs, independent of interference by the legislature, they are to be commended. They are defective in that too much stress is laid upon the incorporation of cities by general law, for the charter which would suit the conditions of one city would not answer for another. In connection, however, with an amendment which aims to guarantee to each city of the state freedom from interference the defect pointed out should not work against furthering the adoption of the amendments.

An association of window-glass workers having headquarters in Pittsburgh have in contemplation an extreme application of the principles of the protective system, which seems to have advantages, at least from a logical standpoint, over the measures usually advocated as securing protection to the American laborer. A bill embodying the views of the association has, it is said, been prepared, and is to be presented at the opening of the next Congress. Under the provisions of this proposed act it is to be an offence punishable by fine and imprisonment to import any class of workmen under contract to work for certain wages for any length of time. Thus much only is known regarding the forthcoming measure, those having the matter in charge declining to give the bill for publication until it shall be finally approved by the proper authorities. Thereupon copies of it are to be distributed among the various labor organizations throughout the country with the view of concentrating opinion in favor of it. This is as we have said an extreme application of the principle at the basis of the protective system. It remains to be seen whether the object aimed at will commend itself to manufacturers and others engaged in large industrial operations, and who have sometimes been regarded as the especial guardians of the interests of labor in this country.

Our correspondent at Sydney, New South Wales, in a letter to which we give place elsewhere, sets forth some facts regarding the agricultural development of Australia which the importance of the country as a factor in the world's food supply render of general interest. It appears that the colony has not yet advanced to that stage of progress at which tenure becomes settled, immense areas of the best agricultural land being held under squatting licenses. The public domain is being rapidly disposed of, not always in a manner which results in bona fide settlements, owing to the dishonest practices of dummy selectors or land grabbers, who accumulate land holdings solely with a view to speculative purposes. Victoria and New Zealand, it is stated, have relatively less land to dispose of than the other colonies, being respectively much smaller; but they are richer and more desirable fields for industrial settlements, and have made greater progress than the others. Our correspondent, it will be seen, believes that New Zealand is destined, on account of its natural advantages, to take and keep the lead in the South seas.

In the House of Commons, on the 26th ult., considerable time was given up to discussing the causes of the existing depression in agriculture in the United Kingdom. In an elaborate argument Mr. Goschen maintained that it was due to the general depreciation in value of nearly all commodities except cattle, sheep, butter and cheese, while rents remained unchanged. Mr. Chaplin took a wider range, and said it was due to (1) a succession of bad seasons, (2) foreign competition, (3) increased cost of production, and (4) losses of stock suffered by farmers. He dwelt upon that last named, saying that while the present system of importing diseased animals continued there would be no chance of getting rid of the disease, which, he said, extended through England, Ireland and Scotland. He was answered by Mr. Mundella, who pointed out the increase in importations of foreign live animals from 1881 to 1882, and demonstrated that if these supplies had not been received the price of meat in the United Kingdom would have been 2d. to 3d. higher than it has been. The argument that preventing the receipt of foreign live animals would be met by extra supplies of dead meat was also denied, and the view was supported by statistics from continental countries which had been prevented from shipping live animals to the United Kingdom and which had sent no dead meat to replace them. As to the spread of contagious diseases, Mr. Mundella pointed out that since 1878 there had been no cattle plague and no sheep-pox, while the ravages of pleuro-pneumonia had declined from 5,000 cases in 1877 to 1,200 cases in 1882. It was denied that the foot and mouth disease had "ravaged" the herds of the United Kingdom, for the number of cases in 1882 was but 37,000 in a total of 33,000,000 animals in the country, against 183,000 cases in 1881. Against this it was mentioned that fluke among the sheep, caused by wet weather, had carried off nearly 3,000,000 in one year. Again, as to the "ravages," it was stated that the number of cattle in the United Kingdom was 4,900,000 in 1867, 5,900,000 in 1873, and had since touched 6,000,000.

Time was when the attention of Europe was engrossed by dynastic quarrels, when the important events were marriages between ruling houses, and when the issues of peace or war depended on family compacts or settlements. The idea of the existence of a lower class in the state with aspirations demanding some degree of satisfaction did not occur to the minds of the rulers save at rare intervals, and when the matter was forced upon their attention by spasmodic and fitful efforts at revolution it was speedily disposed of by the exertion of force. Now all this has changed. The spread of information in recent times, the stimulation of the aspirations of the long enthralled proletariat, the wide extension of political rights in the more advanced countries, and the facility of communication between distant points, have gradually operated to raise up a new political force with which, it is becoming more and more apparent, European statesmen will soon be called upon to deal. Add to the circumstances already referred to the facts that something of motive and direction has been given to this new power by the teachings of leaders thoroughly in sympathy with the emotional side of the socialistic movement, and who bring to the discussion of fundamental social questions a degree of learning and of skill in propagandism that render them very formidable antagonists, and one arrives at an idea of the magnitude of the task with which the statesmen and diplomats of Europe are confronted.

The recent past has witnessed numerous indications that a large amount of unrest and discontent has been massing itself in different European countries, and at present it is beginning to be feared that something like concert exists among the members of the socialist organizations throughout the old world. Russia has been for years a constant hotbed of revolutions and of attempts at assassination. Attempts at the destruction of property and life by means of dynamite are of weekly, if not of daily, occurrence there. In France the evidences of social disturbance are hardly less marked. Within the week the troops were called out to disperse a riotous meeting of socialists, and explosive machines were found in various parts of the city. In Portugal the existence of a "Black Hand" society has been discovered, and troops have been sent to the locality in which the society is operating. In England an attempt has been made to blow up some of the government offices. The powers are taking alarm, and now evidently recognize that the commotions that are taking place in so many directions either indicate the existence of some system of concert or else are indications of a general spontaneous movement. The Russian government, it is reported, has proposed to the other powers that an international detective force be organized to cope with Anarchists, Nihilists, Fenians and Socialists, and France, Switzerland and Austria have acquiesced in the proposal. Altogether the political and social conditions in the old world are anything but reassuring.

JOURNALISM.

The place of the modern newspaper as a factor in shaping legislation has of late been receiving a deal of attention on both sides of the Atlantic. It is not very long since the London *Economist*, in writing of the "Decadence of Parliamentary Government," asserted that "the people, except upon rare occasions, no longer look to the House of Commons for either information or discussion; in all important matters the press has, as a rule, already provided it with enough of both long before the question has become ripe for a parliamentary debate." Professor Goldwin Smith has declared in the *Nineteenth Century* that parliaments are losing much of their importance because the real deliberation is being transferred from them to the press and the general organs of discussion by which the great questions are virtually decided, parliamentary speeches being little more than reproductions of arguments already used outside the House, and parliamentary decisions little more than registrations of public opinion. Mr. Frederic Harrison has declared, through the same medium, that nine-tenths of what is rehearsed in Parliament are old leading articles and stale platform speeches.

So much for the optimistic view of the question so far as relates to the place occupied by the press. Unfortunately, the point which most needs clearing up is scarcely touched at all by the writers above quoted. Thus, how is it that the work of legislation is not carried on with more speed and precision if, as the *Economist* insists, the preliminary work of legislation is done outside of Parliament, it being notorious that never before have legislatures, both in England and the United States, dealt so ineffectively with the questions confronting them. In the United States some attempts have been made to check the evil through forbidding special legislation by constitutional enactment—a getting rid of representative government in part. While granting the utmost to the publicity afforded by the press, both here and in Europe, as a distinct influence in the shaping of legislation, we cannot avoid the conclusion that the opinions set forth by the English writers above referred to are exaggerations. Regarded as the one main vehicle of publicity as to all that is going on in the legislatures the press at first sight would seem to be all that is claimed for it. But the inquiry needs to be carried further. This done, it will appear that much remains to be accomplished by the press before the above claims can be justified.

In the past, and fairly up to the present period, the office of the newspaper has been to teach the conventional prejudices of a certain set of readers rather than to break the ground for reformatory legislation. Perhaps the most conspicuous example of this exists in the course of the London *Times*, which has scarcely ever failed to stand athwart the path of legislative progress. This fact was, perhaps, never more clearly brought into relief than in the famous correspondence between Richard Cobden and editor Delane of the *Times*, which Mr. Morley, in his life of Cobden, does well to reproduce in full. The *Times* was usually wrong because, up to a certain point, England was usually wrong. This was inevitable in relation to the questions which were at the front during the period of which Cobden wrote. They were for the most part questions in relation to which intense feeling was easily aroused, and in dealing with them the newspaper of the day was forced to follow its readers or run the risk of losing them. This condition of affairs obtained during the period when politics related mostly to forms of government—the location of the sovereignty, whether in the hands of one person, of a few, or of the people themselves. This controversy, which goes back to the beginnings of the race, is now nearly everywhere decided in favor of the people, with a strong probability that the representative principle will ere long be acknowledged where it is now denied. While the controversy over the location of the sovereignty was raging it was the most natural thing to regard the legislature as the end rather than as a means to the desired end—a nearer approach to perfection in the art of government. The legislature, having been too much regarded as an end in itself, the world's legislators find themselves poorly equipped for dealing with the questions of administration which now confront them. In relation to those questions which, having arisen from the greater complexity of modern society, are of the day, there is room for great advancement on the part of the public press. In times past the office of the newspaper as a teacher was for the most part to preach industriously the position of a particular party on some great burning question like the slavery issue. But a distinct advance has been made in that there has grown up an independence on the part of the press which essays to deal with public questions after investigation, and as a judge rather than as an advocate. This, of course, is but part and parcel of the scientific tendency of the times to act upon information in public matters rather than upon prejudice or superstition, as was formerly the case. In this way the press, both here and in Europe, is beginning to lead rather than to follow; to instruct and direct its readers rather than to learn first what they think, and echo that. Perhaps the most conspicuous illustration of leadership on the part of the press is afforded by the recent course of the London *Pall Mall Gazette*, under the editorship of Mr. John Morley, on the Irish question. Since Mr. Morley's accession to the editorship, following upon the success of the Liberal party, the *Gazette* has been constantly in advance on the Irish question, while the English Parliament and the English people have been as constantly approaching the position held by Mr. Morley. This position is sufficiently illustrated by the following from the leading article in the *Pall Mall Gazette* of February 24:

> If "the government has clearly made up its mind to govern Ireland against the wish and opinion of the great mass of the population of that country," it is evident that the House of Commons has not even begun to realize in the faintest degree the real difficulties of that undertaking. To govern a country against the wishes and opinions of the majority of its inhabitants is a task which strains, and in the end almost invariably overstrains, the capacity of the strongest despot, even when he is untrammeled by constitutional fetters, and able to silence by a word every hostile criticism. To govern a country against the wishes and opinions of the majority of its inhabitants by no other agency than an assembly like the House of Commons, cramped at every turn by constitutional restraints, and affording a free arena for the most passionate and destructive criticism of every act of the executive government, is an undertaking to which there is no parallel in history.

That the editor of the *Gazette* has been able to find readers in a community so bound up in contrary views as are the people of London is an overwhelming tribute to the masterly ability displayed and a striking proof that successful editorship at this day and date means something more than merely following in the wake of so-called public opinion.

It is believed that both here and in England, for the future, journalism is to have more and more to do with the actual shaping of legislation. The questions of the future being for the most part administrative rather than having to do with the location of the sovereignty, or in general with the liberty of the individual it is possible for the public journal to lead without risking the loss of its subscribers. But to bring about a result so much to be desired the daily newspaper must needs draw to its service men of special talent, having well-equipped minds capable of solving in a practical way questions of administration. The newspaper which would deal effectively with the questions indicated must, in short, be better prepared to interview itself instead of regarding this or that official or wise layman as an oracle to be always consulted in the public interest.

MR. GOSCHEN ON THE MONEY QUESTION.

During the recent debate in the British House of Commons on the Queen's speech the claims of the agricultural interest received due attention. It was pointed out that remedies for agricultural distress have scarcely been mentioned in the address, and several members took the government severely to task for the omission. In the course of the debate Mr. G. J. Goschen, who is far better known by reason of his deserved repute as an economist than as a politician, remarked that he had asked himself whether some part of the agricultural distress was not due to the fact that there was a fall in the price of almost all farm produce except cattle, butter, cheese and similar commodities. To the speaker it appeared that "a considerable appreciation had taken place in the value of gold," and that this "appreciation in the value of gold had had a general effect on the prices of almost all commodities unless there were very special counteracting circumstances." He then pointed out that the agriculturist has to pay the same number of sovereigns for his rent while he has to receive (owing to the appreciation in the value of the sovereign) a lessened number of these same sovereigns for his produce. This being true, the one natural result must be that a reduction in rents must come about. Mr. Goschen urged that the arguments presented could only be met by a denial of a general fall in prices. This, he believed, "would be very difficult to substantiate."

It thus appears that no less an authority in economics than Mr. Goschen is fairly convinced that a general decline in prices has come about through an appreciation in the value of gold. It may be sufficiently plain that the prices of commodities have generally fallen, and that the English agriculturist is entitled to a reduction of rents, but we cannot admit that the value of gold has risen to an appreciable degree. We do not believe that the grounds alleged by Mr. Goschen are sufficient to establish the fact of the appreciation of gold. So far as relates to the practical operations of the world's mints, gold does not fluctuate in value. Mr. Goschen's speculations, as given out from his seat in the House, have been taken up by the London *Spectator* with the addition of a demand for a royal commission to inquire into and consider the entire subject. Strange to say, neither Mr. Goschen (so far as indicated in the reports at hand) nor the *Spectator* appears to make allowance for the great economy in the use of gold by means of the check and clearing-house system. This system is best developed in the United States and Great Britain. The Frenchman is still too much inclined to bank in his stocking, but the remedy of the check can be instituted both there and in Germany as fast as necessity may compel. We believe that in general the check and the clearing house have largely taken the place of silver, or that the more extended use of the check preceded the partial disuse of silver. The fall in the price of commodities, so far as any general fall can be proved, is just now to be traced to the fact that all over the world production through the development of machinery, the quicker transmission of intelligence, etc., has been carried to a very high point. So much so, indeed, that, taken with the increased competition and reduced profits, prices have, to an extent, been generally forced downward. While it is admitted that gold has undergone fluctuations in supply in times past, it must nevertheless be borne in mind that any changes in value have been so slight and the changes have been extended over periods so long that, practically speaking, gold has been the one stationary measure of values. This is at least so far true that to consider it as a fluctuating measure, and endeavor to change from time to time in accordance with this or that theory the amount of gold in the sovereign or the dollar, would be to introduce the last degree of confusion. One danger from such speculations as those of Mr. Goschen is that they who are proposing to lessen the gold in the American dollar may find encouragement therein. The British farmer is doubtless entitled to a reduction of rents for more reasons than one; but the remedy for the existing monetary trouble, so far as any is available, is to avoid juggling with a double standard, so-called, while utilizing silver to the utmost as a subsidiary coin.

THE WAY OUT OF THE IRISH DIFFICULTIES.

Apart from the ordinary grounds upon which the continued agitation of the Irish question is deprecated there are certain considerations not commonly referred to which render the probability of the settlement of that question a matter of immediate interest, not so much because of the principles involved as on account of the fact that the question itself, while unsettled, is likely to be, as it has hitherto been, an obstruction to the ordinary processes of legislation in England. For many reasons it is unfortunate that this should be the case. Some of the most important measures concerning business interests that have been brought before Parliament in recent years are now waiting an opportunity for consideration by that body. Among these measures may be mentioned the reform of the law of bankruptcy—a matter of the first importance to a trading community—and the proposed codification of the commercial law, a project which, if successfully carried through, is likely to exert a wide influence on trade regulations everywhere. The relation in which Great Britain stands to the world of trade makes such a disturbing influence as the irritating Irish question felt far and wide.

There has never been a time perhaps when commercial topics and legislation dealing

with economic questions have attracted so large a share of public attention as at present. The administration of Mr. Gladstone was understood to be charged particularly with the duty of carrying through needful home legislation of an economic character; discarding, as far as possible, questions of a political nature. Yet how little that was not bound up with a political question has been touched upon, and what a vast amount of purely business legislation remains yet to be enacted by Parliament. The inconvenient prominence assumed by the Irish question was remarked upon in the Queen's speech, in which the opinion was expressed, in effect, that Parliament had during recent years devoted its time liberally to the most urgent needs of the sister island, and that the claims of general legislation and of other parts of the kingdom demanded regard. Thus far, however, the hopes of those who have thought it possible to dispose of the Irish question without a sincere and sympathetic endeavor to reach an equitable adjustment of it, have proven illusory, and they are likely to continue to be disappointed. There is one way, and, as far as can be seen, only one way of disposing forever of the troublesome and inconvenient problem which is taxing the intellects of British statesmen. It is simply this, to impose upon the Irish representatives the responsibility for legislation peculiarly affecting Ireland. This would be only applying to the case of Ireland a principle which has been found to work well in the case of Scotland. The practical steps toward bringing about this arrangement would be the leaving purely Irish concerns to be dealt with by the Irish members, as Scotch questions are dealt with by the Scotch members, subject to the ratification of the majority, and the appointment of an Irishman to the office of Chief Secretary on the same principle as that which reserves the office of Lord Advocate of Scotland for a Scotchman. These measures have been hitherto suggested and their adoption has been urged with great cogency, but the experiment has never been fairly tried. There are very strong reasons for believing that the simple expedients proposed would be successful. The imposition upon the Irish members of responsibility for legislation affecting their country could not fail to raise the standard of their acquirements, to endue them with a soberness which is usually wanting in the absence of responsibility, and to deprive them of their standing complaints of British tyranny. In addition to this, the officer charged with the Irish administration would naturally (under the plan referred to) have a ready understanding of the characteristics of the people and an active sympathy with their emotions—conditions which are in the highest degree desirable, but which are very unlikely to be attained under the present system.

THE NEW YORK MERCANTILE EXCHANGE.

It has been pointed out in BRADSTREET'S how the prominence of New York city as a business center has given rise to the formation and development of business exchanges, around which, whether of purely commercial or financial tendencies, the lines of trade most interested have ranged. The article referred to was printed July 22, 1882, and included a list of the trade exchanges of New York, dates of formation, incorporation, if so organized, number of members, methods of transacting business, and the standing and position of each in the business community. It will be recalled by the readers of this journal that prominently among those mentioned was the Mercantile Exchange, originally styled the Butter and Egg Exchange, which was formed in 1873, and incorporated in the following year. This useful association of those engaged in the general lines of trade incorporated within it ranks fifth in point of age among New York's business exchanges, and third only when considered with reference to those formed within the present century. This fact, together with the relative age of the various leading exchanges of the city, will be best shown by a tabular arrangement of the organizations, together with the dates of incorporation, or, when not incorporated, time of formation. From the list which is given below it will be noted that the Mercantile Exchange is an older body than several which have taken high rank in the commerce of the metropolis, notably the Petroleum, Iron and Mining exchanges, and is next younger only than the Cotton Exchange, which is itself preceded only (within the present century) by the New York Produce Exchange. The list, together with dates as specified, is as follows:

LEADING NEW YORK TRADE EXCHANGES.	*Date of Incorp'n.*
‡ Chamber of Commerce	*1770
† Stock Exchange	1792
New York Produce Exchange	1862
New York Cotton Exchange	1871
New York Mercantile Exchange	1874
Maritime Association of the Port of New York	1874
‡ New York Board of Trade and Transportation	1875
New York Petroleum Exchange	1877
Stationers' Board of Trade	1879
New York Coffee Exchange	1881
New York Building Materials Exchange	1882
Retail Dealers' Protective Association	1881
New York Certificate Exchange	1882
Iron and Metal Exchange Company (Limited)	1882
Iron and Metal Exchange	1882
† New York Mining Exchange	1877
† American Mining Exchange	1880
New York Furniture Board of Trade	1872

* Reincorporated in 1874. † Unincorporated. ‖ ‡ Do no business on the floor.

The following branches of trade have been organized within the Mercantile Exchange by the appointment of committees and adoption of rules to govern transactions therein: Butter, cheese and eggs; lard and provisions; canned goods; oleomargarine; domestic dried fruits and nuts; fresh fruits and vegetables. The exchange occupies large and commodious quarters in the Erie Railway Building, corner of Reade, Duane and West streets. These comprise a spacious call-board room, sample and general trading room, and a reading room, in addition to comfortable offices for the superintendent, inspectors and other officers. A regular call is held at 11 o'clock daily. The butter call leads, followed in order by cheese, eggs, lard (infrequently by provisions), oleomargarine, canned goods, dried fruits and nuts (prominently peanuts.) The fresh fruit and vegetable call has not been established as yet. The trade in this line have organized that department, but have not gotten fairly to work, owing in part to a short crop of apples this year, which causes a dearth of supplies in which to deal. Many of the most prominent fresh fruit and vegetable houses in the city are members of the exchange, and, with the establishment of grades of fruit and vegetables now being perfected, they expect to do an increased business during the coming year.

Most of the merchants dealing in the lines named, prior to their membership in the Mercantile Exchange, had but limited or unsatisfactory facilities for doing the amount of business which they have since been able to transact. Some of the original members, observing that the entry of general domestic produce, green fruits and vegetables into New York was almost exclusively along the North river shore, and believing that an exchange taking cognizance of the receipts and shipments of such commodities, and affording means for the more efficient handling of the same, would be of greater service to dealers, who are mostly located in the locality named, than the New York Produce Exchange, had the temerity to form the original Butter and Cheese Exchange, with the expectation that it would in process of time prove quite as important a bulwark to the commerce of the city as its elder sister. While time has shown the value and efficiency of what is now termed the Mercantile Exchange, all thoughts of possible rivalry with any kindred organization have disappeared. The Produce Exchange does not afford the facilities in the way of calls and other special means required by the traders who compose the Mercantile Exchange. This fact, together with the latter's prosperous growth, is sufficient evidence on this point. In short, in this day of special work and special development, the Mercantile Exchange may be regarded as a more complete extension of the work and efficiency of certain departments which, nominally or otherwise, come under the general scope of the New York Produce Exchange. Thus, while the latter deals more particularly in provisions and in lard in quantity, as in tierces, the younger organization handles principally tub lard, the refined article, such as commonly finds its way into domestic use. Provision sales on the floor of the latter have as yet seldom found their way there, although the title is used in that general classification of its trading. None of the Mercantile Exchange calls are held on the Produce Exchange except that of lard and provisions. The non-interference of each and the general harmony between the two exchanges can be best illustrated, perhaps, by the following incident: A letter was recently sent to the secretary of the New York Produce Exchange asking the ruling price of certain specific grades of eggs on a certain day some time past. The letter was "respectfully referred to the superintendent of the Mercantile Exchange" by the Produce Exchange official for reply. One feature of the trade organization under discussion renders it quite conspicuous among those where option calls are in vogue. The dealings are to a large extent bona fide transactions, and are seldom "settled on margin," as is frequently done on all or nearly all commercial exchanges. In brief, in nine cases out of ten when an option for, say, next month for one hundred barrels of eggs at 19c. is closed the eggs are delivered and the money paid. In a large proportion of instances elsewhere such transactions would be settled on margin by the payment of the difference between the contract price and the day's quotation for eggs at the time of settlement. There are those who would characterize this difference as the difference between legitimate transactions and gambling. Standard grades of the commodities dealt in have been established, rules provided for the government of dealings in the same, and inspectors are on hand to examine and report for the exchange on the condition and grade of goods sold by houses here for customers out of town and in other ways to assist in simplifying the methods and preserving the morale of the commercial community coming under its influence. The measure of success which has been attained may be inferred from the evidences of prosperity and favor which are to be observed in an outline of the growth of the exchange.

As stated, the Mercantile Exchange was formed in 1873. It started with less than one hundred members, and was known as the Butter and Cheese Exchange. It occupied the Stuart sugar refining building on Greenwich street, where it continued until it entered upon its present site. No initiation fee was demanded at that time, and the yearly dues were placed at $25, making the annual income something under $2,500. The first president was Walter S. Fairfield, an enthusiastic gentleman, who was very solicitous for the future of the exchange. Henry N. Morgan was treasurer and J. M. Peters secretary. In 1875, in April, the title became "The American Exchange," the design being to enlarge the scope of the organization. In 1876, after Mr. Fairfield had served three terms, Mr. Thomas K. Egbert was elected president, re-elected in 1877, and was succeeded in 1878 by John A. Willett, who succeeded himself in 1879. In 1880 a more conservative view of the situation was taken, and the name of the organization was again changed to "The Butter, Cheese and Egg Exchange," and dealings were confined to transactions in these products. About this time, also, an initiation fee of $50 was made a requisite of membership. More interest in the now growing commercial body became manifest. That which cost something was looked upon as possessing some value, and accessions to its membership were noted frequently. In this year Washington Winsor was elected president, and again in 1881. The era of widened usefulness and conspicuous prosperity began at that time and increased in 1882, when Mr. James H. Seymour was president, Mr. W. H. B. Totten treasurer, and L. F. Dodd superintendent. In that year a by-law was adopted raising the membership fee to $200 until the list of members should number 800, after which the sum was to be increased to $500 until the membership is increased to 1,000. Within a short time the list of members was increased to 800, a share of the demand for seats undoubtedly being speculative. The aggregate membership to-day is 801, but many certificates issued while the demand was heavy were taken out in the names of clerks and others by various firms and have since been transferred to active members. The speculative price of certificates has fluctuated within the past year between $200, the nominal price, and $375. In May, 1882, the exchange moved into the quarters it now occupies. In March, 1882, the present corporate name was assumed. Since that time it has been constantly affording new business facilities to its members and enlarging its sphere of usefulness.

On August 2 the present superintendent of the exchange, Mr. Benjamin Urner, was installed in that office. The date of election of officers having been changed from May to January 1, the president for the current year is again Mr. Washington Winsor, the treasurer W. H. B. Totten, and the secretary, Rufus L. Cole. The exchange has of late years lived within its income, and now has an invested surplus fund of $80,000. During 1882 nearly $6,000 was carried from the income to the surplus fund. The lard and provision men organized that department a little over a year ago. In June, 1882, the oleomargarine trade established a regular call. Some opposition was manifested to this at first, but without avail, as a commercial product of its importance required the regulating influences and the oversight of the exchange. In August or September the domestic dried fruit and nut trade organized their branch of business, and it was placed on the call list. The fresh fruit and vegetable trade first took steps for official recognition in December last. Their list comprises apples, cranberries, potatoes, Florida oranges, onions, etc. The canned goods trade wheeled into line in the Mercantile Exchange in 1882 also.

The heaviest sales continue to be of eggs, with those of butter a good second. The exchange has as yet issued no annual report embodying statistics of receipts and shipments at this port of articles dealt in by its members, although such a publication is contemplated for the year ending April 30 next.

On the floor of the exchange are telephones free to members, gold and stock and provisions tickers. Telegrams are received daily from the leading provisions trade centers and bulletined. Like dispatches are also sent out by the exchange. The power of the exchange to establish a board of arbitration, with authority of a court of law to call and examine witnesses, to settle differences arising among its members, is a feature possessed by only a few of the exchanges of this city, and one which in its practical workings is said to have proved of great utility. As in the case of other exchanges, a gratuity fund has been established for the benefit of the families of deceased members. The exchange is open from 8 A. M. to 5 P. M., and the call hours are at 11, 11.30 and 11.45 A. M., and at 12 M., daily.

PETROLEUM STATISTICS.

Even a casual examination of the reports of the petroleum markets, from day to day, is likely to impress one with the fact that the price of crude oil is more susceptible to unexpected and violent fluctuations than that of any other commodity in which there are extensive speculative dealings. It requires but a little reflection upon the relative positions of the wheat, cotton, corn, pork and the petroleum "crops"—so to speak—to note differences between that last-named and those remaining. Of the four commodities first mentioned it is easily perceived that what may be called their statistical positions are sooner or later determined within a fair approximation to the actual outcome, and this, prior to the crop in mind having all come "in sight." The counties in which cotton, wheat and corn are raised in excess of consumptive demands are known, and the surplus shipped for a series of years is a matter of record. A careful report by counties as to the increased acreage in each county affords a basis for a reliable estimate as to the forthcoming harvest, subject, of course, to modifying influences, such as the weather, insects, drouth, flood, etc. The prospects of the corn crop exercise an important influence on the character if not the number of hogs to come into market, and the weekly receipts of hogs and packing returns, compared with those of preceding years, afford a fair check on reports concerning live-stock in farmers' hands. In these and kindred ways are the statistical positions of wheat, corn, cotton and hog products kept well in hand. When causes arise tending to change the outlook they are generally of such a nature that they may be seen and read of all men, and the consequent variations in current quotations are often anticipated and very readily taken advantage of. When an analysis of the petroleum situation is attempted like results are not found. The statistical position of petroleum has ever been and still remains in part problematical. Unlike the other "crops" named, it furnishes a harvest daily instead of annually. The reports of operations in the producing regions are compiled by one of the Pennsylvania exchanges and are published monthly. These relate to the number of wells completed, the number of rigs up and building, the total new production of oil in barrels and gross, and the average new production in barrels daily. These figures with comparative data from the month preceding, or the corresponding month one year ago, affords certain gauges of production. In addition, however, there are the statistics of stocks on hand and quantities received and shipped out of the region from month to month, the number of barrels in stock against which certificates have been issued, credit balances, etc. This class of information comes from two sources, the United and the

Tide Water pipe line companies, who, together, carry in tank all but about 1,500,000 barrels of the whole quantity of crude oil in stock in the regions. While there is known reason for questioning the accuracy of the pipe line company figures as to stocks of oil on hand, there is unfortunately good cause for doubting the information given out from month to month regarding the character of territory, the prospects of new wells, their rate of production and, in short, many reports on current operations. As an instance of this, the information has from time to time been given out on the various petroleum exchanges that such or such a new well is flowing at the rate of 2,400 barrels daily. This may be in one sense true, but the statement is manifestly put in that shape to affect prices, for the probabilities are that the well only spurted 100 barrels for one hour, and was then plugged to prevent the possibility of early exhaustion and that the owners might take advantage of the market which they knew would be offered them on the announcement of a 2,400-barrel well. They sell thousands of barrels of oil short through a cipher dispatch to brokers at Oil City, Bradford, Philadelphia or New York, and immediately forward the news of a 2,400-barrel well. This breaks prices perhaps 7c. or 8c. a barrel, and they close out the deal at a handsome profit. As in the case of Wall street, it is again the dear public that pays for this. Were it not for the thousands of outsiders, who want to mount fortune's ladder with one long stride, speculation in oil would not run the aggregate sales at four cities up to 74,687,000 barrels, twice the aggregate stocks of crude in the regions, as it did between Monday and Saturday of last week. The well referred to above is allowed to "come in"—*i. e.*, the plug is pulled out after the market is whipped down. Within twenty-four hours the oil is flowing at the rate of 1,200 barrels a day, and within a week the hole has become an ordinary affair and has dropped out of sight and mind as an influence on prices. This instance is one out of many during the past six months. Now, it is the absence of any facilities for checking this jugglery with speculative prices of crude oil that is referred to when it is said that petroleum differs widely from wheat, cotton, corn and pork, in that it is susceptible to such manipulations. New oil wells are often boarded up and armed guards placed about them to prevent any knowledge of their value as producers from going abroad. One might naturally inquire why the owner desires to keep such information secret, but the opportunities to sell oil short, with the knowledge that the well will gush for a few hours and thus break prices and possibly many not on the short side of the market, is often too great a temptation to be resisted. Thus has that peculiar character known as the "oil scout" come into existence. He spends his time trying to find out for the benefit of employers the very information which others conceal by the aid of barricades, guards and shotguns, and for a similar end—speculation. There are other causes of mysterious variations in the price of petroleum and which are often at odds with the so-called statistical position of the product. The price of refined oil is established from time to time by the proper representatives of the Standard Oil Company, who manufacture the bulk of all that is produced in this country, and therefore control that department of the trade. It is perhaps needless to add that the same people comprise the United Pipe Line Company, and therefore hold nearly all the crude oil in stock subject to demand by certificates issued upon receipts. One is continually reading that "in sympathy" with the advance or decline in the price of certificates of crude refined advanced or declined. This "sympathy" is all very well, but inasmuch as the whole of the refined product is in the hands of virtually one corporation, the "sympathy" between its manipulation as to price and the quotations on certificates, of course held in trust by the same men, rather inclines to prejudice the so-called "statistical position" of petroleum. Statisticians in the wheat, cotton and pork trades are not uncommon, but there are none who can even claim any special advantage over competitors except it be as to greater range of comparative data or the deductions drawn from results. The totals are practically alike, in most instances exactly alike. How is this in the petroleum trade? It has its statisticians also, who (properly enough) sell their information to exporters, oil brokers and others. But here the similarity noticed ceases, for no two of the petroleum statisticians, so far as their reports have come to our notice, furnish the same figures as to annual or monthly average prices, total annual production, or average daily production. Some of them claim special or exclusive opportunities to get figures as to the statistical position of petroleum, and therefore increase the sale of their exhibits. It is not our purpose to find fault with the petroleum statisticians. The peculiarities concerning them are mentioned as going to show that, like the majority of the transactions in oil themselves, the generally accepted reports concerning the production and consumption of petroleum are in many important particulars speculative. This can best be attested by reference to the current reports that the average daily production of oil is about 56,000 barrels. The total stocks, including that held by pipe line companies and stocks at wells, cannot be less than 36,000,000 barrels. The average daily consumption is conceded to be but little less than the production. If it was equal to it and the region should suddenly become exhausted there is oil enough above ground to last nearly two years. Yet, with a small daily excess of production over consumption, the announcement that a new well has "come in" flowing at the rate of 1,800 barrels, "which may extend the oil-bearing territory 500 feet further north," will knock prices down 7c. a barrel, reducing the nominal value of stocks of crude over $2,500,000 within twenty-four hours. The importance of knowing the exact quantity of oil in stock in the hands of the pipe line companies has been recognized by the movement at Harrisburg to provide state inspectors to gauge the oil in tank in the region at regular intervals and report thereon. Considering the magnitude of speculative transactions in crude petroleum and the fact that these dealings are dependent on the venturesome outsider, it would seem as if some movement for comprehensive and reliable data, weekly, from a recognized responsible source had become a necessity.

NEW ENGLAND COTTON INDUSTRY.

Nearly all the New England cotton mills are running full time, and some of them have large orders ahead. The business of the past year (1882) was not as good for the manufacturers generally as the two preceding years, and it will be noticed that the average dividend paid by the cotton manufacturing industry of New England for that year, as given in our table below, was 2½ per cent. less than in 1881 and five-sixths of 1 per cent. less than in 1880. The number of establishments in 1860 was 570; in 1870, 508; and in 1880, 439, making 131 less than in 1860. The number of spindles in 1860 was 3,858,962; in 1870, 5,498,308; in 1880, 8,806,417, an increase of 4,947,455 over 1860. The average number of hands employed in 1860 was 81,403; in 1870 there were 94,775, a gain of 13,372; in 1880, 127,185—deduct 1,406 officers and clerks, making 125,779 operatives, an increase over 1870 of 31,004 and 44,375 over 1860. The capital invested in 1860 was $69,260,279; in 1870, $100,103,770; and in 1880, $156,754,690, or $87,494,411 increase over 1860. The total amount of wages paid in 1860 was $16,720,920, an average of $205.40 to each operative; in 1870, $28,740,788, an average of $303.25 to each operative; in 1880, $32,170,861, an average of $255.70. The amount of cotton consumed in 1860 was 283,701,306 pounds; in 1870, 275,652,218 pounds, 8,049,088 pounds less than in 1860; in 1880, 541,373,880 pounds, or 257,672,574 pounds more than in 1860, and an increase of 265,721,662 pounds over 1870, or a gain of about 97 per cent. of cotton consumed in ten years. The value of the total products in 1860 was $79,359,900; in 1870, $124,959,053; and in 1880, $143,363,030, a gain of $64,003,130 over 1860. It must be remembered that in 1870, with gold at 125, the above showing of capital invested, wages paid and value of product is 25 per cent. more than it actually should be when comparing that year with 1860 and 1880, when gold was at par; hence, in order to draw a correct comparison with those years, the capital invested, wages paid and value of product should be 25 per cent. less than that shown above, or, capital invested, $75,077,828; wages paid, $21,555,591, an average of $227.44 to each operative; value of product, $93,719,290. These figures, we think, are correct, and comparisons can be accurately drawn and compared with the years 1860 and 1880. The largest average amount paid to each operative was in 1880—$255.70—an average increase of $50.30 per hand over 1860 and $28.26 over 1870.

TABLE SHOWING THE AVERAGE DIVIDEND DECLARED BY THE COTTON MANUFACTURING INDUSTRY OF NEW ENGLAND FOR EACH YEAR FROM 1863 TO 1882 INCLUSIVE.

	Per cent.		Per cent.
1863	15½	1873	11
1864	13 1-3	1874	8½
1865	12 1-3	1875	5¾
1866	18½	1876	4½
1867	11½	1877	5¾
1868	10½	1878	5½
1869	11	1879	6 2-3
1870	7 2-3	1880	8½
1871	10½	1881	9¾
1872	13 1-3	1882	7 2-3

When comparing the above the years when currency was at a discount should be noted.

1860.	Number of establishments	Number of looms.	Number of spindles	Number of operatives. Males	Females	All	Capital	Wages	Pounds of cotton consumed	Value of products

OUR LEADING INDUSTRIES.

Since the taking of the tenth census, and during the late tariff discussion in and out of Congress, much has been heard concerning "our leading industries," although it may well be doubted whether there has existed in the minds of many a well-defined notion of the exact relation of such industries in point of value of products or number of hands employed. The various bulletins issued by the census officials respecting a few of the more prominent industries have furnished information on this head, although the classifications are not always satisfactory, and comparisons with exhibits from reports of other industries are lacking.

Census bulletin No. 304, giving data concerning manufactures by specified industries, affords an opportunity to gather the facts necessary for a bird's-eye view of the totals of the leading industries. In compiling an exhibit of this character considerable difficulty is encountered in grouping various subtrades under the appropriate general head, but the arrangement given below is believed to do justice to those so incorporated. The order observed in the census reports has been altered so as to show, in the first grouping, the relative importance of the fifteen leading industries with respect to the number of hands employed and amount of wages paid, the number of establishments being given last instead of first. This arrangement will indicate at a glance the prominence of each industry named, with reference to the amount of employment it furnishes. The fact that the amount of wages paid in each instance does not recede in value from the top to the bottom of the second column, in a manner corresponding to the number of hands employed, is suggestive, and the different rates of wages paid in different industries, as shown by the data in the first and second columns, will also be found of interest. The table is as follows:

LEADING INDUSTRIES IN ORDER OF HANDS EMPLOYED.

Industries.	No. hands employed.	Total amount wages paid.	Total No. estabs
Iron and steel	306,958	$128,787,924	6,498
Lumber and wood	244,926	79,843,837	38,093
Cotton and mixed textiles	228,845	58,931,172	1,475
Men's and women's clothing	185,945	52,541,358	6,728
Woolen goods	169,807	49,259,324	3,390
Boots and shoes	137,635	52,352,126	18,360
Carriages and smithing	104,718	38,185,271	43,122
Tobacco, etc.	87,587	25,054,157	7,674
Brick, tile, etc.	67,203	13,764,723	5,697
Furniture and upholstery	64,127	25,571,831	6,087
Leather, harness, etc.	63,136	25,081,913	13,708
Printing and publishing, etc	62,800	32,828,959	3,634
Flour and grist-mill prod'ts.	58,401	17,422,316	24,338
Agricultural implements	39,580	15,359,610	1,943
Shipbuilding	21,345	12,713,813	2,188
Totals	1,844,102	$627,708,634	182,935

The total number of hands employed in all the industries in the census year was 2,738,895, the aggregate of wages paid was $947,953,795, and total number of establishments is given at 253,852. Gauging it roughly it will be noted that the totals of the trades incorporated include two-thirds of the whole. The statistics of iron and steel manufactures include blast-furnaces, bloomaries, forges, rolling-mills, steel works, forge products, machinery and finished and ornamental iron work of all kinds; of lumber, sawed, planed, turned, carved, sash, doors and blinds; brick and tile include drain-pipe and terra cotta statistics, and printing and publishing incorporates lithographing. The importance of the iron and steel industry, as shown above, is of first rank as to the number of hands employed, but it has not been as generally known that the woodworkers of the country rank second in point of numbers. If the furniture makers, who might under certain circumstances be classified with those in second place, were added the total number of hands employed would almost equal that opposite iron and steel. Cotton goods workers, and those employed upon the manufacture of fabrics into which cotton enters, come third, and perhaps expectedly so, but it has not been a matter of common repute that the makers of men's and women's clothing formed an army nearly 186,000 strong, fourth in size only among these industrial corps, and over 16,000 more numerous than their friends the woolen goods workers, who rank fifth. The boot and shoe makers come sixth, 138,635 strong. But with a slightly different classification, including them with leather and saddlery and harness makers, these preparers of skins and producers of finished articles therefrom would aggregate over 202,000, and take fourth place.

In the second table which has been compiled we have given the same classification of industries, arranged in the same order as above, followed by the aggregates of annual value of products, amount paid for materials and capital employed. The changes made in the relative importance of the industries gauged by the annual value of their products are interesting.

Industries.	Value product annually.	Value materials used.	Total capital.
Iron and steel	$351,513,109	$319,594,960	$405,626,070
Lumber and wood	407,015,968	245,980,332	242,248,783
Cotton and mixed textiles	277,172,086	150,993,278	257,500,851
Men's and women's clothing	241,553,254	150,922,509	88,068,969
Woolen goods	271,910,746	166,040,743	160,798,466
Boots and shoes	207,387,963	122,542,745	56,548,665
Carriages & smithing	139,410,873	57,522,275	76,048,143
Tobacco, etc.	118,070,166	65,384,407	39,995,292
Brick, tile, etc.	33,868,131	10,119,538	28,659,329
Furn'e and upholstery.	85,004,618	40,005,090	47,231,529
Leather, harness, etc.	241,056,230	177,821,175	91,310,030
Printing & publishing.	97,701,679	35,216,159	67,485,529
Flour and grist-mill products	505,185,712	441,545,225	177,361,878
Agricul. implements	68,640,486	31,531,170	62,109,668
Ship-building	36,800,327	19,730,358	20,979,874
Totals	$3,284,527,288	$2,035,561,974	$1,821,973,076

The total value of products of all industries reported by the census was $5,369,579,191, the value of materials used was $3,396,823,549, and the total capital was $2,790,272,605. It will, therefore, be observed that the totals of the industries in the second table are, likewise, approximately two-thirds of the grand totals named. A general inspection of both tables reveals the singular fact that there is about $1,000 of capital invested in manufacturing and mechanical industries to every employé. Thus, while the aggregate capital of all industries is $2,790,272,606, the total number of employés is 2,738,895, of which number 713,560 are women and children. In the fifteen lines of industry mentioned above, there are 1,844,102 employés accounted for, and the total capital engaged by the industries given is $1,821,-973,076.

In the table last given the value of flour and grist mill products place that industry second only to iron and steel, forcing lumber and wood workers to third place in point of value of products. Cotton and mixed textiles rank fourth, but woolen goods are fifth and men's and women's clothing operators follow sixth. Leather and harness makes a heavy exhibit, and mounts from eleventh place as to number of employés to seventh with respect to value of articles produced, the total of the latter, $241,-056,230, being but a trifle less than that credited to the makers of clothing. Boot and shoe makers' products, if added to the corresponding total opposite "leather, harness, etc.," would give third place to this class of manufactures. In point of capital employed cotton and mixed goods come second, lumber and wood third, flour and grist mills fourth, and woolen goods fifth. Judging from the considerations already given, it appears to be somewhat difficult to arbitrarily classify "our leading industries" beyond iron and steel, for totals of "capital employed," "value of products" and "number of hands" preserve no fixed ratio. There is little doubt, however, that the industries which furnish employment for the most individuals can justly be ranked as leading in that order.

OCCASIONAL NOTES.

Some statistics regarding cotton production in the Bombay Presidency are collected in the Manchester *Guardian* from official sources. It appears that, in the year 1881–82, 600,000 more acres were devoted to cotton in the Bombay Presidency than in the preceding year, and 186,000 more bales were produced. This increase is said to have been induced by the better returns from cotton than from food grains. In the districts referred to the area under cotton has increased from about 3,000,000 acres five years ago to nearly 5,000,000 acres at present. During the same time the production has increased from 286,000 to 714,000 bales. The total area sown with this staple is equivalent to about 9 per cent. of the total arable lands, and the production averages about half a hundred-weight to an acre. There is, however, much scope for the further cultivation of cotton, the arable lands capable of producing cotton amounting to 29 per cent. of the whole. Some of the native states, it seems, are recognizing this fact and are acting upon it. Of the cotton produced last year 90 per cent. was indigenous and 10 per cent. exotic. In some districts exotic cotton is grown increasingly, and is said to yield a better outturn, but in many places the foreign seed is still regarded with disfavor. An increase is noted in the imports of cotton into Bombay in 1881–82 over those of previous years. The average annual imports for the last five years were 1,200,000 bales, of which the average quantity exported was 914,000 bales, and the average quantity consumed by local mills was 229,000 bales. The imports for 1881–82, on the other hand, reached the aggregate of 1,800,000 bales. In 1882 there were forty-nine factories in the Presidency, with 1,237,536 spindles and 13,046 looms, employing 37,000 persons, and the consumption was 315,000 bales. There are reports of the increasing prevalence of the adulteration of cotton by the admixture of sand, podseed, etc., with good cotton and of inferior with superior staples. In consequence, it is said, many persons competent to judge maintain that a moderately stringent law is indispensable in order to put an end to these practices, and there is a growing feeling in favor of the reënactment of the Cotton Frauds act.

At the closing session of the Associated Chambers of Commerce in London resolutions looking to the establishment of a commercial code were brought forward. One was adopted declaring that recent judicial decisions had almost revolutionized the law of joint stock companies, and urging the codification and simplification of that law. A motion was adopted recommending that mortgages, debentures and other securities issued by limited liability companies be required to be registered in like manner as those issued by private firms and individuals. A resolution requesting the executive council to introduce and press forward in the ensuing session of Parliament the bill prepared by them for the codification of the law of partnership was likewise agreed to. The present state of the law of partnership with reference to the continued liability of an innocent partner for debts incurred by the fraud of his copartner, notwithstanding that such innocent partner had given up all his property and obtained his discharge under the Bankruptcy act, was declared unsatisfactory, and amendment in this respect was advised. The need of increased facilities of communication was recognized and pointed out in a series of resolutions in regard to the telegraphic service. Some of these were resolutions requesting the government to enter into negotiations with foreign countries for the cheapening and facilitating telegraphic communication, urging that the principal lines of wires be placed underground, recommending lower rates for short inland telegrams, and calling the attention of the Postmaster-General to the present high rates for telephonic messages. The chambers show a very commendable concern in regard to legislation affecting commercial interests. Among the last acts of the session was the appointment of twelve members to be a committee, along with the executive council, to watch the Bankruptcy bill.

Some facts of general interest were set forth by the chairman of the Corporation of Foreign Bondholders at the annual general meeting held recently in London. Recalling the fact that four or five years ago they issued in their report a table of the debts of the states which were in default, he said that from that list Turkey had disappeared, and the consequence was that the total amount of the indebtedness of the states in default was much less—less than a moiety of what it was three or four years ago. The arrangements made at Constantinople with regard to the Turkish debt had been working satisfactorily as far as they had gone, and the council there had been doing its work with diligence and success. The arrangement made with the assistance of the corporation in regard to the Egyptian debt had worked satisfactorily till the dual control showed some of its disagreeable features, and the situation was further complicated by the political difficulties. These difficulties, he thought, were owing to the success of the system of Egyptian finance which was inaugurated under the arrangements which controlled the funds. For the first time they were regularly managed and the prospect of a full exchequer excited the cupidity of the Egyptian army and its chiefs. This view, of course, is to be regarded with reference to the source from which it came. Others might not be willing to take the same view of the situation as the chairman of the bondholders. Another topic touched upon by the chairman was the Virginia state debt, which he said was in a lamentable position. With regard to Virginia as well as some other American states, he had noticed that the real difficulty lay in the fact that the states themselves raised all their revenue by direct taxation, the indirect taxation belonging to the United States government. Direct taxation appeared to be so intolerable to some that they could not be convinced of the ultimate advantages of keeping good faith, and of their states being in good credit among the bourses of Europe. The recent decisions of the Supreme Court have no doubt been received by the chairman with very mingled feelings, a decision in favor of the bondholders having been expected. As far as the Central and South American states were concerned, he said that industry and commerce would naturally progress as the security for life and property went on increasing. The mineral wealth and natural productiveness of these states was so astonishing that he could not but believe that sooner or later their debts would be considerably diminished and they would become very wealthy.

An estimate of the cost of the late Egyptian war has recently been issued in a Treasury minute. The total expense of the expedition amounts to a little over £4,500,000. The charge for army service to the imperial exchequer is about £1,640,000, and for navy service about £1,776,000, making the total charge for the imperial forces about £3,416,000. The charge to the Indian exchequer is estimated by the government of India at about £1,142,000. It is intended to ask Parliament to grant £500,000 during the current financial year as a contribution toward the charge incurred by the government of India in conducting its share of the expedition. The greater part of the charge upon the British exchequer has been already voted, and all but a small portion of the remainder will come into course of payment before the close of the current financial year. The London *Daily News* expresses some dissatisfaction at the plan adopted by the administration for dividing the expenses of the war. It says that the war was one of British policy and should be paid for out of the British exchequer, and it declares its belief that the people of Great Britain would have been better pleased at the presentation and payment of the whole bill than at the placing of any sum at all on the overburdened population of India. Under the arrangements proposed by the government the portion of the expense to be borne by India will amount to £642,000.

The *Pall Mall Gazette* has some interesting remarks upon the changes in the French export and inport figures for the ten years since 1873. In that year and the two following, it says, the exports exceeded the imports by an aggregate of £30,000,000. In 1876, however, the tide turned, and the imports began to be in excess, the excess reaching £16,-500,000. The excess was somewhat less in the following year, but since then the figures have risen steadily. Last year the excess of imports over exports reached the sum of £55,000,000. This state of affairs has begun to alarm traders, and recently the appointment was urged of a commission to examine into the causes of this marked decline in the trade of France. The origin of the present unsatisfactory condition of things is traced in part to the apathy and indifference of French consular agents abroad, in part to the bad management of the railways, and partly also to the neglect of opportunities to form new trade connections. The *Gazette* remarks that while the causes enumerated may have had something to do with the trade troubles, there are still others of a more intelligible order which should not be disregarded in an analysis of the situation. It points out for example that the period when France was exporting more than she imported coincided either with that when she was paying her war indemnity to Germany, or with that of the greatest activity in repurchasing her national obligations at first sold abroad. These payments and purchases it is very reasonably suggested, would naturally give a great stimulus to the export trade, and would cause a corresponding diminution in the buying of foreign goods. On the other hand, of late years the bad harvests and especially the bad vintages of France have communicated an immense stimulus to the imports, and it is possible that the country has been impoverished by what it has had to buy. The considerations put forth by the *Gazette* in partial defence of the French Foreign Office and consular administration appear to be very reasonable. The last of them especially should not be lost sight of in an endeavor to understand the situation. There can be little doubt that much of the perplexity in which French financiers have found themselves of late has been traceable directly or indirectly to the depression of the agricultural interest.

An Italian journal lately printed some figures tending to show that the gradual displacement of French wines by those of Italian production in the English market is not an impossibility. From tables of British imports of Italian and French wines the fact is elicited that while there is a falling off in the imports of French wines there is an actual, though a somewhat slight increase in the imports of Italian wines. The figures given do not seem to justify the inference that Italy has been supplying the deficiency of the French yield, and the fact is apparently overlooked that the French vintages have been very disappointing of late years. In regard to the probability of establishing a substantial trade in Italian wines in the English market the outlook is not entirely clear, although some circumstances seem to favor the introduction of those vintages at present. It is noted that Italian wines are already found in the principal hotels, restaurants, coöperative stores and clubs of London, but they still remain unknown to the great majority of the English public. The scarcity of hops and the increasing quantities of German beer imported are thought to be circumstances favoring a well directed endeavor to establish a market for the wines of Italy in England, it being possible to sell these wines at a cost only slightly exceeding that of beer. The decline in French production, some results of which are already apparent in the tables of statistics, and the cheapening of transportation arising from the construction of railways in Italy, and the establishment of new steamship connections, are additional elements in favor of the Italian merchants and wine-growers; though it is to be hoped that the former of these influences is not to be a permanent clog on the general trade in wines.

SPECIAL CORRESPONDENCE.

AGRICULTURE IN AUSTRALIA AND NEW ZEALAND.

Sydney, January 18.—The long-continued drouth, early in the season, all over the mainland of Australia, will very materially reduce the average yield of cereals. The quantity of wheat for export from Victoria and South Australia will be short of an average of former years, whereas advices from New Zealand and Tasmania are favorable. Late rains, however, have greatly improved the pastoral interests, which suffered equally with the agricultural from the dry spell.

As Australia has of late become an important factor in the world's food supply, a brief statement of its agricultural development, drawn from official sources of information, may not prove uninteresting to readers of BRADSTREET'S. At all events, it will enable those interested in the handling and raising of breadstuffs in America to understand the status of agriculture in the South Pacific, and estimate at its true value the opposition they may anticipate from that quarter.

There are five great political divisions on the Australian continent, exclusive of the Northern Territory; but for the purposes of this communication they will be treated as one. The parent colony, New South Wales, was founded as a penal settlement in 1788; Western Australia in 1829; South Australia in 1836; Victoria in 1851, and Queensland in 1859. Practically, however, they may be said to date from the discovery of gold in New South Wales and Victoria, before which time the country was purely pastoral, having little communication with the outside world. Since then their development has been very rapid and satisfactory.

New Zealand was annexed by England in 1840, under the so-called treaty of Waitangi, by which certain Maori chiefs, for a consideration of shawls and blankets, bartered away the sovereignty of the three large and many small islands forming that now prosperous colony. At that time the New Zealanders were atrocious cannibals. They have since then made remarkable strides in civilization and a knowledge of the industrial arts.

According to latest census returns the total population of Australia and New Zealand is 3,000,000 in round numbers, and although they have the largest aggregate debt in the world in proportion to population, they have valuable assets to show for the expenditure. Official statistics place the aggregate land sold and crown-granted (patented is the American equivalent) at 139,910 square miles up to December 31, 1881. This represents 86,342,671 acres, in addition to which there was a very large area hypothecated, the title to which was maturing under the free-selection and deferred-payment system. Immense areas of the best agricultural land are held under squatting license, and it was dissatisfaction with the squatting tenure that recently caused the defeat of the Parkes government in Sydney and an appeal to the people, who indorsed the hostile work of the Assembly. The public domain is being rapidly disposed of in Australia; but a halt has been called in New Zealand, where the policy of creating a class of crown tenants in perpetuity has been adopted with satisfactory results to the revenue and settlers of limited means. It does not follow, however, that bona fide settlement always results from this process of free selection in Australia. On the contrary, the dishonest plan of "dummy" selectors is brought to perfection, and land-grabbing is one of the settled industries. The colony of New South Wales has been a great sufferer in this respect; but in time wise land laws and a sound fiscal system will cure this evil.

After the first rush and excitement of the gold fields had abated, men turned their attention to the land as an unfailing source of profit, and the high average price of wool and live stock during the past ten years stimulated land speculation enormously. From 1873 to 1881, inclusive, 38,000,000 acres of crown land were sold. Victoria and New Zealand have relatively less land to dispose of than the other colonies, being respectively much smaller, but they are richer and more desirable fields for industrial settlement, and have made greater progress than the others. In the future New Zealand, on account of its superior climate, fertility of soil, unlimited mineral resources and magnificent harbors and rivers, will undoubtedly take and keep the lead in the South seas. There is still unsold territory open for settlement in the aggregate estimated at 734,000

square miles. The money realized from land sales by the respective colonial governments (exclusive of Western Australia, where large estates were granted to English capitalists on condition of locating tenants thereon, which they failed to do), was £84,956,162, or an average of over $5 an acre in American money. In judging of the area of land under cultivation, as returned by the various registrars-general, it should be borne in mind that grass land is included. The returns show a proportion of 1 acre cultivated to 123 acres freehold estate. The quantity of farm, orchard and vineland under actual cultivation would show a much smaller relative proportion, however.

Wheat is the staple Australian food crop. In 1881 there were 3,361,530 acres in wheat, yielding 27,625,921 bushels, giving an average of about eight bushels per acre. A comparison of the various colonies displays a wide disparity in the average yield. Thus:

1881-82	Acres.	Bushels	Average per acre.
South Australia	1,768,781	8,037,082	4½
Victoria	926,729	9,727,369	9½
New Zealand	365,715	8,297,890	22½
New South Wales	221,888	3,405,066	16
Tasmania	51,757	977,365	18¾
Western Australia	21,952	153,057	7
Queensland	3,554	30,612	8½

The necessity for irrigation is generally acknowledged, but no comprehensive plan has as yet been suggested. It is doubtful whether wheat will be grown extensively in Queensland, and without irrigation it is a very risky crop in all the colonies on the mainland. Allowing for home consumption and seed in 1881–82, there was an available wheat surplus for export of about 7,500,000 bushels.

Oats rank second among cereals in the estimation of colonial farmers. The following figures exhibit the oat crop yield of 1881:

	Acres	Average, bushels.
New Zealand	243,387	28½
Victoria	146,995	28
Tasmania	27,535	25
New South Wales	16,348	21¾
South Australia	3,023	12¾
Western Australia	827	10½
Queensland	88	10

The total yield of oats was 11,717,254 bushels. The yield of barley was 2,005,554 bushels in 1881. The average yield in bushels per acre was: New Zealand, 22½; Tasmania, 22¼; New South Wales, 21; Victoria, 19; Queensland, 11¾; South Australia, 11½; Western Australia, 8¾.

The practical application of the refrigerating process of preserving meat, vegetables and dairy products, has opened a new market for Australian meat in Europe, and large capital is now invested in this trade, which so far has been fairly remunerative. Mistakes were made at the start, but experience has rectified them. This is a very important economic problem solved, because heretofore there was no market for surplus stock. A fixed market value has been given to sheep and cattle, also to land, through this discovery, inasmuch as the grazing capacity of pastoral estates will be the measure of value under the new economic conditions.

The aggregate number of cattle in 1881 was 5,760,476; sheep, 78,356,486; pigs, 1,802,570. Australia will depend, for many years, upon America for its pork products, which are mainly imported through English agencies and not direct. Northern Queensland is especially adapted for raising cattle, and very large herds have been formed there available for shipment. It is much better for this purpose than New South Wales. Sheep and cattle have developed larger frames and finer flavored meat in Australia than the original types, but although merino sheep weighing 150 pounds are now common enough, it does not pay to export them to England, as New Zealand shippers have discovered to their cost. An average of 75 to 80 pounds is the favorite weight for mutton sheep in England. The fleece is also longer and of a finer staple, owing to the genial climate of the antipodes. Wool is the leading agricultural product of Australasia. Colonial wine took high rank at the Bordeaux exhibition, but the acreage in vineyards has been decreasing of late years, owing to the destruction of vines in an attempt to check the spread of phylloxera.

Australia imports vast quantities of canned goods from the United States, also salmon, dairy products, etc., and if the American tariff admitted of freedom of commercial exchanges to any considerable extent, direct purchases in America would rapidly increase. A great deal of our American trade is at second-hand through London houses. Agricultural machines and implements made in the United States are going into general use in the colonies, which offer a paying and growing market for American inventions. Dairying is at a low ebb, although a general movement is on foot to adopt the American coöperative system. Several special agents visited the United States recently to acquire practical information on dairying.

THE DENVER EXPOSITION.

Denver, March 12.—The importance of holding expositions and presenting the products of particular sections of the United States to the attention of capitalists gained impetus from Atlanta's grand cotton exposition, which, it is alleged, influenced the investment of $4,000,000 alone in the state of Georgia within twelve months after the close of the exposition in December, 1880. In addition to this, it demonstrated that the only successful way to enlist the sympathy of capital and invite immigration to aid in the development of what was almost an unknown industry and country to many people of the north, was the opportunity of bringing the two elements in active contact. Wherever expositions are held, progress surely follows; and in no case was this more successfully demonstrated than at the Denver exposition in 1882. A few enterprising gentlemen, ex-Governor H. A. W. Tabor, Mr. W. A. H. Loveland and Mr. Joseph T. Cornforth contributed largely with their means, and devoted their time almost entirely, for a period of six months, to organizing and conducting an exposition for the purpose of displaying the mineral wealth of Colorado and adjacent states and territories located in the Rocky mountain mineral belt. The success attending the venture astonished the originators. Commencing with the ceremony of laying the corner-stone on the second day of May last, in a tract of land of forty acres purchased for that purpose, these gentlemen succeeded in erecting a model exposition building (pronounced by eastern visitors complete in every particular) at a cost of $250,000, and within three months thereafter opened the doors to the public with an exhibit from twenty-nine states and territories, and also from nineteen counties in Colorado. Every promise made by the management was literally fulfilled.

At one time during the exposition the value of the bullion and mineral exhibit contained in the building was estimated at over $700,000. The jewelry display was appraised at $400,000. The collection in the art department, paintings and statuary, was valued at $200,000, and every department presented a like degree of munificence in making exhibits. Over $500,000 worth of mining machinery was sold, and it is impossible to determine the amount of money invested in mines, as the commissioners in charge of mining exhibits failed to report sales when made. Two counties in Colrado, Pitkin and Park, secured $100,000 during the exposition; and New Mexico, deriving possibly the greatest benefit, as towns and mining camps were built as if by magic throughout the districts represented from that territory, has concluded to make a finer and grander display this year.

Unlike the exposition held at Atlanta, the Denver enterprise is a permanent affair; the second exhibition, to be given during the months of July, August and September, 1883, beginning on July 17, promises to exceed in every respect the collection of 1882. The board of directors has been reorganized and is constituted as follows: Ex-Governor H. A. W. Tabor, president; Mr. W. A. H. Loveland, general manager, Mr. Thomas M. Nichol, secretary, and Mr. Joseph T. Cornforth, treasurer. The governors of the respective states and territories have been elected honorary vice-presidents, and the Governor-General of the Dominion of Canada and the President of the republic of Mexico have been requested to name representatives to serve in a similar capacity. Letters of acceptance have been received in nearly every instance. The demand for space, even in advance of the publication of programmes, has determined the board of directors to erect a building, in addition to those already provided, and containing fully 200,000 square feet, for the purpose of accommodating farm and agricultural implements, carriage and wagon and hardware exhibits. Railroad and express rates have been secured from all points in the United States, and passengers and exhibits can be landed at the doors of the exposition building; no need for transferring.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The question what constitutes a fraudulent preference was somewhat discussed in a recent case in the English Court of Appeal. The Bankruptcy act of 1869 provided that every transfer of property made by a person unable to pay his debts as they became due, with a view of giving any creditor a preference over other creditors, should, if the person making the same should become bankrupt within three months after making the same, be deemed fraudulent and void as against the trustee of the bankrupt. The interpretation of this clause was in question in the case referred to. The facts were as follows: One Wilcoxon, a cabinetmaker, had employed one Griffith as his traveler at a salary of £500, which was allowed to fall into arrear. In 1875 Griffith obtained from Wilcoxon authority to deduct the arrears of his salary out of moneys which he received from customers of the firm in the course of his traveling. This authority was only partially acted upon and the balance due Griffith continued to increase. In 1881, Wilcoxon's firm being in straitened circumstances, Griffith was called to London by a letter explaining the situation of the firm. Griffith, in the course of an interview with Wilcoxon, received an authorization to receive certain debts in part payment of the sum due him, notice of the same being given to the customers owing the debts in question. Under this authority Mr. Griffith received certain moneys, which were claimed by the trustee in liquidation on the ground that the transaction amounted to a fraudulent preference. In the London Bankruptcy Court an order was made that the money be paid over to the trustee, as forming a legitimate portion of the estate. In the Court of Appeal the Master of the Rolls said that the case was a very plain one and within the very words of the statute. He held that Wilcoxon was under no obligation to assign those debts to Griffith, and that the circumstances showed that he did it merely for the purpose of giving him a preference. Even under the old law before the statute, his lordship thought that the case was a plain one of fraudulent preference.

What is and what is not a proper stoppage *in transitu* is a question of much interest to traders everywhere. A recent case bearing upon this point was that of Kendall (trustee) vs. Marshall, Stevens & Co. et al., decided in February by the English Court of Appeal. The action was brought by the plaintiff as trustee of the estate of one Leoffler, who carried on the business of a dealer in cotton waste in Manchester, to recover the value of a certain quantity of cotton combings consigned to a firm in Rouen. It appeared that in the latter part of 1880 Leoffler filed a petition in liquidation, and the plaintiff was appointed trustee. The goods were consigned previous to the liquidation proceedings to the defendants, Marshall, Stevens & Co., who were shipping agents at Liverpool and Garston. The vendors of the goods, hearing that Leoffler had filed a petition, telegraphed to Marshall, Stevens & Co. to stop delivery of the goods, which was accordingly done, and the plaintiff lost his property in them as trustee of Leoffler. On the trial Mr. Justice Matthew held that the stoppage was a good one, and that the transit was not over until the goods were delivered at Rouen. He gave judgment for the defendants, and the plaintiff appealed. In the Court of Appeal Lord Justice Brett, in delivering judgment, said that the case was one of some difficulty, but that he was of opinion that the decision of Mr. Justice Matthew could not be upheld. The goods at the time they were stopped were in the constructive possession of the vendee, and it was then too late to stop them. Lords Justices Cotton and Bowen concurred in the reversal of the judgment below.

The case of Hack vs. The London Provident Building Society, decided by the English Court of Appeal on February 24, is of interest, not only to members of societies registered under the English Friendly Societies act of 1874, but also to all organizations incorporated under laws containing similar provisions in regard to the settlement of disputes. According to a provision of the act mentioned, disputes were to be determined by arbitration in cases where the rules of the society directed a reference to arbitration, and by the rule of the society it was provided that a reference of every matter in dispute between the society and any member should be made to the arbitration of the Registrar of Friendly Societies. In the case referred to it appeared that the plaintiff had, in 1881, applied to the society for a loan, and, to obtain it, became an advanced member of the society and gave a mortgage to that body under the terms of which the rules of the society were expressly made applicable. The society took certain steps to realize the security, and the plaintiff brought an action in the Chancery Division to recover a certain balance which the society contended was more than covered by the quarterly repayments accruing due from the plaintiff. Mr. Justice Pearson, on the application of the society, stayed the action and directed the matter to be referred to arbitration. His decision was upheld by the Court of Appeal. In delivering the judgment of the latter court, the Master of the Rolls said that the words of the statute were quite plain, and, although the decisions upon the point under previous statutes were conflicting, it was mischievous to attempt to construe the modern statute by the light of those earlier cases. It was part of the plaintiff's contention that he was entitled to come to the high court because his action involved difficult questions of law, but there was nothing to prevent the Registrar, if he found himself in difficulties, from stating a case for the opinion of the court. Lord Justice Lindley added that the plaintiff could not disregard the extension which the statute had made as to the powers of arbitration, and said that the court would be frustrating the intention of the legislature if it did not agree with Mr. Justice Pearson in stopping the action.

The case of Harris et al. vs. The Hanover National Bank, decided by Judge Coxe in the United States Circuit Court at New York on the 8th inst., involved some points of interest to bankers and traders. It appeared that a promissory note for $1,598.28 was, prior to November 29, 1881, owned by the plaintiffs. The note was made by Levi & Co., of New Orleans, and was sold after eleven o'clock on the day mentioned, by Hess Brothers, note brokers in the city of New York, to the defendant. On the same day about 10.30, New York time, an attachment was issued against Levi & Co. in a suit by local creditors, the property of the firm was seized and their office closed by the sheriff. The members of the firm, however, considered themselves in business and continued to draw checks and collect bills until three days later, when their first note went to protest. The amount of the note in suit was paid into court by Hess Brothers, and the question to be determined was whether the plaintiffs or the defendants, all parties having been ignorant of the attachment and having acted in good faith, should bear the loss. The judge said that an almost unbroken line of authority had established the doctrine that if bills of a broken bank or the notes of a party who has previously failed, are transferred in payment of a debt, both parties being ignorant of the failure and innocent of fraud, the creditor may repudiate the payment upon a tender or return of the worthless note and recover the amount due. While the note in suit was yet in the possession of the plaintiffs and owned by them, it became worthless, or greatly impaired in value. Judge Coxe was of opinion that under the circumstances judgment should be entered awarding the money in court to the defendant. He regarded as untenable the plaintiff's contention that the bringing of the attachment did not in contemplation of law amount to a failure on the part of the makers of the note and was not evidence of insolvency.

The bond of an agent of a manufacturing company embraced "every indebtedness now existing or which hereafter may exist," and the contract of agency provided that the agent should "furnish satisfactory security for every indebtedness, as well as for the faithful performance of his duties." In an action against the sureties on the bond, it appeared that the bond and contract of agency had been executed at the same time; that afterward, without the knowledge or consent of the sureties, the contract was materially changed several times, and was at length entirely annulled and a new indebtedness created on a different account. In this case, Burns et al. vs. The Singer Manufacturing Company, decided on the 23d ult., the Supreme Court of Indiana held that the agency contract and the bond should be construed together, and that the words, "every indebtedness now existing or that may hereafter exist," should be taken to have reference to indebtedness in the business of the agency, and not to indebtedness incurred after the contract of agency was terminated and all its liabilities settled.

In the case of Taylor vs. Gilbert et al., decided by the Superior Court of Kentucky on the 7th inst., it appeared that N., H. & Co. executed to the appellant their note, which recited that it was secured by a note of B & C. On the same day N., the owner of the note of B & C, gave appellant an order on N., H. & Co., requesting them to deliver the note to him. N. subsequently indorsed this note in payment of a debt to appellees, who had no notice of appellants' claim. On this state of facts the Superior Court decided that the appellees had the better claim to the note, holding that while between mere equities the one older in time must prevail, yet that the rule has no application where a junior equity is united with the legal title.

A case of a rather unusual character was before the English Court of Appeal on the 26th ult. In this action, Hind vs. Brett, the plaintiff sued four Lords Justices of the Court of Appeal and three Justices of the Queen's Bench Division of the High Court of Justice, each in his official capacity, for having obstructed the course of justice, abused their

powers, etc., and claimed damages for the alleged wrongful acts in the sum of £60,000. It appeared that the judges against whom action was brought had decided against the plaintiff. The latter, unfortunate in his choice of defendants, was still more unfortunate in the presentation of his case, and judgment was given against him without calling upon the counsel for the defendants. The Master of the Rolls dismissed the appeal and affirmed the decision of Vice-Chancellor Bacon, who had made an order staying the action. He remarked that all the defendants were judges of the superior courts and were sued for acts done in their judicial capacity, and said to be done improperly and in neglect of their duty. He referred to the well-settled rule that an action would not lie against a judge of a superior court for an act done in his judicial capacity, even though it were done maliciously and corruptly—a circumstance not alleged in the case under discussion. It was clear, he said, that the action brought would not lie, and the proper practice was to stay such actions as vexatious. Sir James Hannen and Lord Justice Bowen concurred.

BUSINESS NOTES.

A report by the French Minister of Public Works states that the total mileage of French railways on January 1 last was 17,870 miles, of which 779 miles were constructed during 1882.

The London *Daily News* announces that a universal congress to consider methods organizing "institutions connected with the thrift and welfare of the peoples," is to be held at Paris July 2 to 7 next.

A dispatch from Berlin states that the decree has been gazetted prohibiting the importation of American hog products, including sides, bacon and sausages. In order to prevent an evasion of the law Bismarck has recommended that hog products only be admitted into the country on attested proof that they are not from America.

The number of failures in the United Kingdom reported to *Kemp's Mercantile Gazette* during the weed ending February 24 was 259, against the same number in the corresponding week in 1882 and 284 in the like week in 1881. The total for England and Wales was 228, against 235 and 266, respectively, in the other weeks referred to; for Scotland was 25, against 17 and 5, and for Ireland was 6 against 7 and 3.

An engine is now building in England, of 4,000 horse-power, for the cotton mill of a Mr. Durshaw, a wealthy Parsee merchant at Bombay. The largest previously turned out were of 1,800 horse-power, and are in use in English cotton mills. The 4,000 horse-power engine mentioned will have cylinders with an eight-foot stroke. The fly-wheel will weigh 140 tons, be 30 feet in diameter, and 15 feet wide on the face.

The London *Engineer*, in referring to the fact that an American engine is to be used to operate the Edison electric plant with which the British House of Commons is to be illuminated, comments on the fact that the engine was imported free of duty, while the United States tax like imports about 40 per cent., and adds: "We may hope that when the engine does get into the House of Commons it will answer its purpose better than some of those brought over to this country for the same purpose have done."

A London exchange states that a substitute for ivory is wanted, as none of those yet tried will take the polish of natural ivory. The price of ivory has increased 100 per cent. during the past three years. Pearl, which is largely used in hafting cutlery and other goods, has also become relatively costly. Manilla shells, from which the main supply is derived, were quoted in London in May last at £8 5s. per cwt., but in December they had advanced to £11 15s. @ £12 10s. per cwt. During ten months past the price of manilla shells is said to have appreciated from £160 to £240 and £250 per ton. Shell cutters are paid high wages.

A national exposition will be held at Caracas, the capital of Venezuela, July 24. At that time, also, the railroad between the port of La Guayra and Caracas will be opened, and as the Venezuela charge d'affairs in this country explains, a monumental statue to George Washington will be unveiled at the last-named city—"The father of the great people who created in the new world the republic which has been a model for Spanish-American nations." It is added that Venezuela is anxious to enlarge her trade relations with the United States, and an opportunity is therefore afforded Americans to exhibit their products at the forthcoming exhibition. It is pointed out that while Venezuela exports products to the value of $6,000,000 annually to the United States, she receives goods from this country of but one-third that value annually. There is, therefore, an opening for a wide extension of trade with Venezuela. The representative of that country has appointed Messrs. E. Valiente & Co., No. 76 Broad street, N. Y., agents for receiving and forwarding all exhibits.

There are not many changes in the British labor market, as indicated by the general summary of the situation in the London *Labour News* of February 28. The American and Australian demands are said to continue satisfactorily, and the improvement mentioned last week as having been shown in textiles, and particularly at Bradford, has grown. The iron trade in general is said to have improved, and some new blast furnaces have been started. The Scotch railway employés' agitation has extended into England and some inconvenience was expected to result therefrom. There is, in general, a good "demand for work-people."

A general commercial intelligence bureau has been formed in Austria by the Ministry of Commerce and various organizations connected with trade in that country. The business of the bureau will be to collect information respecting commercial houses in Russia, Spain, Portugal, the Danubian countries, the Levant and the transatlantic countries. It will also collect intelligence as to the adaptability of home products for export, or of foreign products for import, and as to foreign traffic facilities, transfer charges, etc.; to furnish reliable reports as to insolvencies in the Danubian countries and the Levant; to supply regular and authentic foreign market reports, freight tables, customs tariffs, accounts of commercial arrangements, etc.

The use of the telephone in Paris has grown remarkably within the past two years and a half. On November 1, 1880, the total number of subscribers was but 454. On January 1 last it had grown to 2,392. The annual cost each is 600 francs. Communication is to be obtained at all hours, night and day. At the central offices 103 young women provide nearly 20,000 communications during the day, or an average of eight per subscriber. At night 35 men take the places of the young women. The total number of communications from 7 P. M. until 8 A. M. average about 1,000. One form of instrument is used throughout the city, what is known as the Aden transmitter and receiver being supplied. There are 11 stations and 2,187 miles of wires in use. The latter are in the form of cables, covered with lead, and suspended in the sewer vaults.

The subject of ostrich farming in the United States has excited some attention of late, and recently twenty-two birds were imported here and sent west for a practical solution of the question. A mooted point has been whether ostriches will breed in this country as readily as elsewhere. The San Francisco *Chronicle* mentions that about two weeks ago one of the ostriches at Woodward's Gardens, in that city, began laying eggs, and bids fair to continue for some time to come. It appears that the ostrich lays an egg every other day, generally until ninety are hatched. A company has been formed, with $30,000 capital, called the California Ostrich Farming Company, and a tract of 640 acres of land secured in Los Angeles county, where the experiment indicated by the name of the organization will be tried, under the direction of "an old and experienced Cape Town ostrich farmer."

Mention was made in BRADSTREET'S two weeks ago of a conference held between leading wholesale dry goods merchants and representatives of the freight departments of the four trunk lines of railway leading out of this city. The meeting was held in order to obtain a reclassification by the railway companies of print cloths and domestics, which, it appears, are now charged a high rate of freight. It was claimed that the existing rates discriminate against the eastern manufacturer and jobber, in favor of those south and west, and that they are unjust in any sense, in that said staples constitute the rough goods of the fabric trade. No result was reached. Another meeting was held Wednesday, with closed doors. It is reported that the railroad representatives are reluctant to make the desired reductions, claiming that they would be obliged to raise the rates on the fine grades of goods, a measure which would be almost as objectionable. No decision was reached.

The Penn National Bank of Reading, Pa., has been organized; capital $100,000; Isaac W. Levan president, Calvin D. Moses cashier. The Saxton National Bank of St. Joseph, Mo., has been organized; capital $100,000; A. M. Saxton president, R. W. Hocker cashier. The First National Bank of Aurora, Neb., has been organized; capital $50,000; T. A. McKay president, W. C. Wentz cashier. The First National Bank of Grafton, Mass., has elected H. S. Warren president in place of L. F. Allen. The First National Bank of Indianola, Ia., has elected J. G. Sandy president in place of A. R. Henry. The Lexington (Ky.) City National Bank has elected R. P. Stoll president in place of J. M. Graves. The National Bank of New Castle, Ky., has elected L. M. Sanford president in place of G. C. Castleman. The First National Bank of Union Mills, Pa., has elected John Landsrath president in place of Eli Hatch. The Citizens' National Bank of New Ulm, Minn., is closing up with the intention of becoming a private bank.

Among unique publications in the interest of the business world abroad there is perhaps none which would appeal more forcibly to the American mind than the English "Directory of Directors." It is issued annually, and the attempt is made to leave out from year to year all names which have ceased to be identified with some board of directors, for any reason, and to include all the new names which have reached that distinction. A year ago, says the *Pall Mall Gazette*, this work contained 8,500 names; this year the total is 9,000. The great increase (for there were 1,193 of last year's names omitted) is due in part to greater care in compilation, but also to the "new company mania," which visited England during the past year, and which must to a large degree account for the 1,774 new names. On the average each name has two titles of companies appended to it, but the number who are credited with a longer list of directorships is said to be visibly increasing. There are, for instance, about 220 persons who are directors of from six to sixteen different companies, many of them representing the most divergent qualities requiring a business experience which ranges from mining to life insurance.

The Glasgow *Herald* states that for several years past no branch of industry in Scotland has prospered more steadily than the oil trade. The nine large firms and several smaller ones engaged in oil refining in Scotland are said to represent a capital of £2,000,000. Excellent transportation facilities, economy in methods, and utilization of products, are reported to have been introduced until the cost of production has been materially lessened. The ruling prices to the consumer, however, are higher than formerly. The *Herald* adds that the Scotch oil merchants are in no wise afraid of competition from Russian oil, but that they read the American cable advices respecting petroleum with marked interest. It is also stated that "the Americans are at present placed in an awkward dilemma with respect to the oil trade. If they produce too much they depreciate the price at home until the output will not pay the working, and if they produce too little they raise the price in America to the advantage of the Scottish makers." This statement will hardly appeal to the American oil trade, and it looks as if too much stress were placed on the effect on the Scotch oil business by American markets. The further remark that "as a matter of actual fact there are large territories supposed to contain oil which are still untouched, and it is unlikely that they will be tapped at existing prices," calls for correction. These tracts, "supposed to contain oil," are continually being drilled, and contain the wells which have been making the recent disturbance in the price of oil.

A recent report by a commission appointed to determine the advisability of constructing a double-tracked railway under Broadway reported adversely thereon, owing mainly to the enormous expense which the project would entail, the small amount of capital known to be interested in the scheme, the lack of any evidence that a sufficient sum to complete the work, if undertaken, would be forthcoming, the heavy losses the work would entail on the daily traffic passing up and down Broadway, and other reasons which appear good and sufficient. Not least among these was the necessity which would be created for taking up and relaying all the pipes, mains, sewers, etc. Whether this report will have the effect of deterring the venturesome projectors of the Broadway underground railway or not is not now known. The difficulty raised may at least be regarded as not insurmountable if the gentlemen referred to have the money, persistence and skill in devising ways and means for accomplishing their purposes which have characterized the managers of other important enterprises in this city and country. In this connection it is of interest to note that the committee of the Paris municipality appointed to report upon the various schemes for providing Paris with a "metropolitan railway" has agreed to recommend the construction of five separate lines. The main line is designed to extend from the Arc de Triomphe to the Arc St. Lazare, Place de l'Opera, the Central Boulevard and the Bastile. The municipal council will shortly decide whether one or more of the proposed lines shall be constructed. The New York project for an underground railway gathers new interest from the recent expression of expert opinion that the elevated railways will have to come down and be rebuilt in about twelve years. What would New York do without them, even temporarily?

The Treasury Department ruling under which vessels carrying goods for export are permitted to file supplementary manifests four days after date of sailing has proved a source of much annoyance to merchants and others at New York. These delays of complete abstract of exports, particularly those referring to exports of produce, have been complained of by members of the trade for a long time, for the reason that they are unable to form any idea of the state of this or that foreign market, owing to incomplete manifests of shipments thereto. Mr. Benjamin Urner, superintendent of the Mercantile Exchange, has addressed several letters to Collector Robertson as well as to the Treasury Department on this subject. From the latter source an explanation was vouchsafed as follows: "The regulations were adopted for the benefit of individual shippers who might desire to return merchandise to the United States and secure the right under the law to free entry. Under the system in force prior to these regulations the steamship agents were quite as dilatory in filing their manifests as they appear to be now, and it is apprehended that, were the department to rescind its order, it would not have the effect that Mr. Urner anticipates. The order was issued not for the benefit of steamship companies or the Mercantile Exchange, and, as at present advised, I see no reason to revoke it." In reply thereto Mr. Urner has written the Treasury Department that if he is correctly informed the Custom-house officials "have the right to prohibit the sailing of any vessel from our port until her owner or officers have complied with the law in filing a sworn manifest of its cargo. If that is so it would seem that your officers have the power to enforce promptitude, and that they should exercise their power in the interests of the public." Here the matter rests. It is an important one and should be decided promptly.

THE FOREIGN TRADE OF ITALY.

The *Pall Mall Gazette* has the following: "The foreign trade of Italy for the past year cannot be described as of a very satisfactory character. Take away the imports of precious metals, the proceeds of the specie loan issued abroad, and both sides of the trade account show considerable decreases. On the export side of the account the decrease would be about £1,500,000, and on the import side the falling off would amount to considerably more than that but for the fact that some £5,400,000 in gold and silver was imported. The trade of Italy has in fact been disturbed for two years back by this specie payment loan, the imports of gold for the two years having been £5,340,000 and of silver £2,900,000. About £720,000 of silver was also imported in 1880, and last year the exports of the precious metals naturally almost ceased through the effect which the foreign loan had in turning the exchanges in favor of Italy. The fact that the whole of this increment pro and con has been artificial is rather ominous, for when the specie payments are resumed this spring it is probable that their first effect will be to release gold for export. Italy, however, is undeniably making progress, so much so that the chief regret caused by the currency legislation is that it may check instead of furthering this progress. Agriculturally Italy seems to make more strides than as a manufacturing country. Her manufactures last year mostly show a falling off, but there was a notable increase in the export of cattle and poultry. If this continues it may be accepted as a proof that the agricultural classes in Italy are beginning to struggle out of their terrible miseries. Prosperity is needful on many grounds, were it only to enable the nation to bear the heavy increases made to its debt. That now costs £2,640,000 annually more than it did seven years ago, and imposes, all told, a burden of more than £19,000,000 per annum. As a very large part of this debt is held abroad, it is to no small extent a constant menace to the commercial credit of the kingdom."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS

The worst blow the stock market received this week was from the failure of Ives, Beecher & Co., the large whisky and tea firm. When the information came over the news-tape that Bradstreet's reported the failure of that house the worst fears of many were realized, for the importance of the refusal of Congress to pass the Bonded Whisky Extension bill was well understood in Wall street, and grave apprehensions had been expressed of disastrous consequences to firms which had large amounts of liquor in bond and to the banks which had made advances on their paper. The whole subject had been very thoroughly discussed, and the more it was discussed the less it was liked. The liveliest fears were expressed about the stability of the western banks, which, it is well known, have always favored the paper of the liquor dealers, because theirs is a cash business and their paper from that cause has ranked among the best. That the first house to go should have been an eastern one in high standing was looked upon as decidedly ominous. The first effect on the market of the announcement of the failure was to give an impulse to prices, for the cliques who were bulling stocks sent in strong supporting orders for their various specialties in order to counteract as far as possible the depressing effect of the news. Nevertheless the stock market since then has had all the vigor taken out of it. Add to this the paralyzing effect of a continuous stringency in the loan market, and it will be seen that the bulls have had long odds against them. So far they have received no support from the public. Though prices were advanced, as it was pointed out in these columns when the movement started that they would, there seems to be no more outside buying at this time than there was three weeks ago, and it may reasonably be doubted whether the operators who have been engaged in putting up prices have not accumulated stock. When operators discover that they can only buy and not sell, they soon stop. The discouraging feature mentioned last week, namely, that the market became dull as prices were advanced, has been more conspicuous this week than last, and this is the sure proof of the absence of public support. Indeed no one pretends that the public is buying at all, since the universal complaints of the commission houses of absence of business are everywhere heard. In the opinion of many the reaction of the market which began about three weeks ago has spent its force.

One peculiar feature of the week's business has been much spoken of. The most active sellers of stocks at the advance were the foreign houses, and to their sales was attributed the quick rise in foreign exchange. It is supposed that they must have had orders to sell on their books, and as prices rose they reached the limits given. While this is mere conjecture it is certain that these houses were active sellers, and that on Monday their purchases of foreign exchange sent the posted rates up to $4.82½ and $4.85, the rates having risen on the the previous Friday to $4.82 and $4.84½, which stopped the imports of gold. When this flurry had exhausted itself the rates fell to $4.82 and $4.84½, which they did on Tuesday, and on Wednesday they declined again half a point to $4.81½ and $4.84. With posted rates at this figure actual rates, which always rule about ¾ to 1 per cent. below, are under the gold importing point, but no shipments of gold were telegraphed until yesterday, when some gold from Germany was reported as on the way here. The amount of gold shipped from London last week appears to have been something less than $3,000.000. This is all that we know of from statements of actual shipments. Various reports were afloat of over $4,000,000 being on the way here, but there is always a tendency to exaggeration on this matter, since every shipment of gold is regarded in the light of a bull argument for stocks, and it is necessary, therefore, to exercise caution in accepting such reports. A statement of gold actually withdrawn from the Bank of England for shipment here may be relied upon. Less precise reports require to be received with reserve, and confirmatory dispatches awaited.

As money can be borrowed in London now at 3 per cent., and is lending here at from 10 to 15 per cent., there is a strong motive for sending money to this market; and it is to the high loaning rates which have ruled since Tuesday that the decline in foreign exchange is attributed. The banks, as will be seen by last Saturday's statement, are very low down in their reserves, and call loans this week have ruled at an average of about 12 per cent. This has been felt severely on the stock market, because the pressure has been steady and continuous. Occasional flurries in loan rates may cause like flurries in the stock market, but a steady pressure of 12 per cent. gives a severe check to business. The usual allegations are made that the bears are locking up money, though the bank statement might seem to show that this was unnecessary, and the fact that money is lent at low rates on government bonds is cited as a proof of manipulation. This argument is fallacious. The fact is, so far as the Stock Exchange is concerned, loan rates on governments are nominal. In these days there are very few government bonds afloat; so few, in fact, that they are very rarely offered on the floor of the exchange as collateral. People who have them and want to borrow on them go direct to the banks where they can get money on them as readily as they could get greenbacks for gold coin. The condition of the loan market is tested by the rates at which money is lending on good dividend paying stocks and railroad bonds, for this is really the only good collateral now available. Loud demands have been made of the Secretary of the Treasury to anticipate the interest on the last lot of called bonds, which mature May 1; but so far the answer from Washington has been that the condition of the Treasury did not justify it. After all, the present rates for money are less than those to which Wall street was well accustomed before the Kiernan law was enacted, for 15 per cent. is less than 6 per cent. plus 1/64 commission, which was the first jump above the legal rate under the old usuary law, and no one seemed to think money was tight until it rose to 1/16 commission.

It is somewhat difficult to guess out at this time the position of the leading operators in the stock market. Mr. Gould is away in Florida, and his faithful follower, Mr. Washington E. Connor, is with him. Mr. Keene is here as usual. He seems to have no need for rest, and no attractions outside of Wall street. What either of these leaders is doing now is rather mysterious. Of course Mr. Gould is reported to be a bull; and since he has made his Western Union a 7 per cent. stock, it is held that he proves himself to be one. But it has been conjectured by those who are able to look under the surface a little, that this course was adopted by him to counteract the depressing effect on the price of Western Union which the selling of the late ex-Governor Morgan's large holdings must have. It is certain the price of the stock has declined since the fact of the increase of dividend was announced. There is also a report in circulation that the Wabash is to be leased to the Missouri Pacific (technically to the Iron Mountain, in order to avoid certain prohibitions in Missouri laws), and the price of Wabash stock was for a time stimulated by the rumor. Supposing the lease actually to be made, it is understood that it will be of such a character as to secure the interest on the Wabash bonds, which the Wabash road is not earning now, as its own statements show. It has been falling behind for two years past, and the bonds have been ranging at very low prices in consequence. Lately they have advanced, which would seem to give some color of truth to the rumors. The Vanderbilt party are credited with being on the bull side, and the late advance of the market is attributed mainly to them. It is said that they are heavily loaded up with stocks, too much so, indeed, to be free to do effective service in sustaining prices, as they have already all they can very well carry. Mr. Keene seems to be waiting and meditating mischief. It is known that he considers the financial situation to be very critical.

It is remarked as an unusual circumstance that at the meeting of the Governing Committee of the Stock Exchange, on Wednesday, the Committee on Securities reported that they had not a single application to list new securities before them except some too immature for action. This is certainly most significant of the check which has been given to railroad building, and may be accepted as proof that the promoters of railroad enterprises are recognizing the fact that this is a bad time to put new securities on the market. Nevertheless, at the former meeting of the same committee, about three weeks ago, no less than $55,000,000 of new stocks and bonds were listed at once—a supply which ought to be sufficient for some months. The annual meetings of several railroad companies have been held this week, and it must be confessed that the statements for last year which some have put forth have not been calculated to encourage investments in new enterprises. The St. Paul report was particularly bad, for it was drawn up in a way calculated to deceive the uninitiated, and to conceal the alarming fact that the company had accumulated a floating debt of over $6,000,000. The figures of the report had leaked out beforehand, and the actual condition of the company exposed. When the statement was issued it appeared that the previous reports were true in all essential particulars. Nevertheless, the stock did not decline in price, for the good reason that it has accumulated in the hands of a few men, who are able to maintain the market quotations.

Government bonds have been stronger this week on the expectation that further redemptions will be restricted by the reduction of revenue made by the Tarift and Revenue law, and by a decline in the volume of exports this year. The following were the closing quotations yesterday:

	March 9,	—*March* 16,—	
	bid.	*bid.*	*asked*
U. S. 4s extended (3½ p. c.)	103½	103½	—
U. S. 6½s 1891, registered	112⅜	112¾	—
U. S. coupon	112⅜	112¾	—
U. S. 4s 1907, registered	118⅛	119⅛	119¼
U. S 4s 1907, coupon	119⅛	119⅛	119¼

Saturday's bank statement rather frightened the street, so deeply did it show the reserves of the banks to be dipped into, and the figures given by the system of averages did not show their state to be so bad as it actually was at the time of the publication of the statement. The banks had contracted their loans largely, probably as much as $5,000,000, though the average figures give $2,292,300, which sufficiently explains the 10 per cent. loan rate we had last week. The reserve, notwithstanding, was still further reduced $2,851,375, so that it is now $5,166,150 below the 25 per cent. line. The following are the comparative totals of the statements of March 3 and March 10:

	March 3.	*March* 10.	*Differences.*
Loans	$327,472,300	$325,180,000	Dec. $2,292,300
Specie	55,332,900	51,519,700	Dec. 3,813,200
Legal-tenders	18,915,800	17,917,000	Dec. 998,800
Deposits	306,253,900	298,411,400	Dec. 9,842,500
Circulation	16,545,200	16,609,200	Inc. 64,000

The banks are now poorer than they were at any time last year. The proportion of total reserve to liabilities is now 23.27 per cent., against 25.26 per cent. at the same date of 1882.

By telegraph from New Orleans: Money is working closer. Under offerings pressed on market Louisiana 7s sold down to 59 on Tuesday, subsequently partially recovered, but still 1½ points lower than last week, being now 61 bid. Premiums 1 point off. Sterling 50c. lower.

By telegraph from Baltimore, Md.: The stock market for the past week has been very dull. State bonds are steady. Virginia consols advanced a fraction. City stocks rule quite firm. Nothing of consequence was done in railroad securities. Mining stocks are dull and values nominal.

By cable from London: There is not much doing in American securities, but some purchases are reported, mainly, it is said, for American operators to cover bear sales made on the New York market. The recent decision of the United States Supreme Court, and the severe fall in the price of Virginia funded bonds, have put those securities entirely out of favor and have had a depressing influence on other southern state bonds. In railroads there is more activity. Wednesday was fortnightly settlement day, and generally higher prices were made for the new account.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The reports by telegraph to BRADSTREET'S this week from the trade centers of the country show improvement in localities, but it cannot be said that the spring trade is generally satisfactory to those who expected an active and profitable movement. The cotton market remains without special feature under continued large receipts. The foreign breadstuffs markets are now governed by the changing outlook in the United States. The correspondent of BRADSTREET'S at San Francisco telegraphs that the wheat growers in California are apprehensive, owing to the continued dry weather. Some slight animation in the pig iron market at Philadelphia, and a few notable contracts for steel rails at the same city, constitute the only features in the iron market during the week. The improvement throughout this industry continues, but business does not progress with the animation that was looked for. Prices for pig iron and steel rails are unchanged. Petroleum is steady, but lower under the influence of the high rates for money on call. Transactions in certificates are light. The anthracite coal trade is quiet, but fair for this season of the year. The full time at the mines arrangement for next week is to be carried out solely because of an agreement at the first of the month to work fifteen days and shut down twelve days during the working days in March, not with any intention to increase the supply. Beginning with the last week in March, half-time will be resumed and continued, probably, until May 1. There has been an advance in rates for ocean tonnage, and a further advance is looked for. The demand for tonnage for petroleum has increased. Trade in wool has been quieter in all markets, but owing to the moderate stocks holders retain confidence in values. There were 233 failures in the United States reported during the past week, 25 more than the preceding week, 93 more than the corresponding week in 1882, and 83 more than the same week of 1881.

BREADSTUFFS.

The foreign markets are now governed entirely by the prospects in the United States. Foreign advices from various sources concur in saying that the British markets are governed by what they believe will be the course of the American markets. The large increase in the receipts of grain at the west during the last month, together with the improvement in the weather in the grain-raising sections of the west, has created the belief in Liverpool and London that prices in America must decline. Therefore British operators are buying less, and the fact that they are doing so allows prices there to decline, which in turn is reflected on the American markets, thus producing the result they looked for. It is generally conceded, however, in all the foreign markets that wheat is low and is safe to buy and hold. Grain firms in London and Liverpool say to their correspondents on this side, "Our markets depend on yours. If yours advances, ours will also."

The statement made in this article of a week ago to the effect that the United Kingdom had accumulated a surplus reserve equal to 30,000,000 bushels of wheat, against an average of 10,000,000 bushels for several years previous, has caused considerable comment and also some misapprehension. One foreign house, upon being interrogated by its New York correspondent, has cabled back that the surplus of wheat in the United Kingdom is only 700,000 quarters (5,600,000 bushels) greater than last year, and that the amount afloat for the United Kingdom is 700,000 quarters less than at the same time last year. The explanation of this misunderstanding is that the foreign house referred to has taken only the actual wheat in the grain, exclusive of the wheat flour, into the account in its statement of the reserve of wheat in the United Kingdom, but has included wheat flour with wheat in its statement of the deficiency in the amount afloat for the United Kingdom as compared with last year. It must, however, be kept in mind that the statement of wheat always includes the wheat flour reduced to wheat at the rate of 4½ bushels to the barrel of flour. There are no such statistics of the amounts of grain and flour in store in the United Kingdom as are made and published for the United States. The only methods of estimating the stocks in store in the United Kingdom are to take the weekly deliveries at the interior towns and the net imports of wheat and flour each week and deduct from this the average weekly amount of the consumption as arrived at by the experience of the several previous years, adding the remainder to the surplus. This method produces the result of an aggregate of wheat and flour in the United Kingdom equal to 30,000,000 bushels of wheat on March 1. The amount of wheat and flour afloat for the United Kingdom on March 1 was equal to 2,272,500 quarters of wheat, against 3,168,000 at the corresponding time last year, showing a decrease of 876,000 quarters, or 7,008,000 bushels, of wheat.

Cable advices from Calcutta on Wednesday stated that it was intended to reduce the rates of transportation for wheat on the railways to enable the producers in the interior of India to compete with American producers.

AMERICAN WHEAT MARKETS.

Fine weather, continued large receipts of both wheat and flour at the principal western points, increasing stocks and lower prices in the foreign markets, had given the wheat markets of the country a pretty strong downward movement during the early part of the past week, and from the first of the month up to Wednesday the average decline was from 3 to 4c. per bushel. But on Thursday further reports of damage to the winter wheat, and less favorable weather, together with the buying of parties who believe that at present prices wheat is cheap to hold, without reference to any cornering or manipulation of prices, alarmed the shorts, and their covering was largely the cause of an advance of over 1c. per bushel that day. The better weather at the west, while it is favorable for the next crop, is also favorable for the early field work which occupies the farmers at present, and therefore makes the prospect of diminishing receipts at the west, in fact there has already been a decrease of arrivals from this cause at the principal western points. The aggregate receipts at Chicago, St. Louis, Peoria, Milwaukee, Detroit, Toledo and Indianapolis in the week to March 9 were 1,074,789 bushels, against 1,237,596 bushels in the preceding week.

CORN.

Corn has sympathized with wheat, and the market followed in some degree the same course, declining to the lowest prices on Wednesday and reacting on Thursday, though the range of prices has been small compared to the range for wheat. The movement of corn at the west is very large. The receipts at the seven principal western points above named in the week to March 9 were 3,092,253 bushels, against 3,438,794 in the preceding week and 2,027,042 two weeks previous. The shipments from the same points eastward have also increased. The aggregate from the seven western cities above named in the week to March 9 were 2,207,500 bushels, against 1,496,243 in the previous week and only 444,927 two weeks previous. Should this move continue in anything like the present proportions it can scarcely fail to weaken prices.

PROVISIONS.

The provision market has been alternately dull and active in the past week, but without any important change of prices even as compared with the beginning of the month. It is believed in Chicago that Armour and one or two others control the pork deal and would advance prices if they could induce anybody to put out a good line of shorts at present prices. But in view of the very light stocks of all varieties of hog products in the principal points of accumulation—as specified in our issue of last week—and also of the small arrivals of hogs at the west, nobody cares to sell largely for speculation. The foreign markets for provisions are also firm and have advanced within the past few days. The aggregate receipts of hogs at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee, in the week to March 15, were 108,966 head, against 138,348 in the preceding week and 103,475 in the corresponding week of last year.

THE PROVISION MARKETS BY TELEGRAPH.

From Louisvllle, Ky.: The provision market is active and strong, holders of meats not free sellers at present prices, expecting an early advance. Stocks in first hands now much lighter than at same season last year. Demand for hams has been unprecedented, and if it continues stocks of choice brands will soon be nominal.

From St. Louis, Mo.: The provision market is again advancing with a free movement. The cattle market has broken down; values demoralized; receipts still large. Hogs continue high and active, with good receipts.

From Kansas City, Mo.: The provision market is quiet. Cattle receipts larger; prices 15c. lower; market for shipping grades still active, though not so high as last week's. Hog receipts show marked falling off; values are 15c. to 20c. lower; packers are now in market, and buying pretty freely.

From Memphis, Tenn.: In live stock receipts continue light, prices firm, and prospects are bright for high prices this spring.

From Nashville, Tenn.: The provision market is firm with a steady demand. Cattle receipts are light, but the demand is very good and prices are high.

From Macon, Ga.: Provisions are firm, but there is a small movement owing to large stocks. Merchants are benefited by competition between local brokers.

From Chicago, Ill.: Provisions quiet and rather weak, with small receipts of hogs; fears of corners prevent bears from selling freely; demand small. Howard's commercial bulletins report total hogs packed year ending March 1 at 4,222,780 head (decrease from previous year, 877,704), of which 2,557,823 were cut between November 1 and March. The winter packing included 76,000,000 pounds of short ribs, 281,000 tierces of lard and 365,000 barrels of pork, the latter the largest ever cut in same time. Cattle slaughtered, 774,578.

THE NEW YORK DRY GOODS MARKET.

The importing and commission trade report business for the week of very fair proportions, though with a quiet tendency toward the close. Silk and dress goods departments have shown the most activity; domestics fair, and hosiery is quoted rather slow. Woolens are also reported quiet. The talk of the woolen trade at present is the large sale at Wilmerding, Hoguet & Co.'s, next Wednesday, of 4,000 pieces of cassimere and 3,400 pieces of a miscellaneous assortment of coatings, worsteds, Italians and serges. The closing out of the entire stock of Cornell & Amerman is also looked forward to with interest. This sale is set down for Wednesday and Thursday. A large meeting of prominent buyers is expected at these sales.

The stock of goods in the hands of the commission houses is still quite large. It is stated on good authority that in the storage warehouses of the Hudson River Railroad freight depot there was over $22,000,000 at the commencement of this week.

Jobbers say they are doing a fairly satisfactory business, and it seems to be improving. The importations and marketings for the week are of good proportions and within a few thousand dollars of last week. Following is a summary:

	No. of packages.	*Value.*
Total imports of dry goods for past week	9,287	$3,449,811
Total amount of dry goods, duty paid, for past week	10,287	3,304,819

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, March 16.—The Manchester cotton goods market is depressed; there has been no recovery in prices. The production has decreased.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The dry goods trade is dull and slow.

From Boston, Mass.: The dry goods trade is good, and jobbers report sales ahead of corresponding period last year. There is an excellent movement in hosiery and small-wares. Very little change in woolens. Collections are fair.

From Providence, R. I.: The print cloth market is quiet and steady, with light demand. The amount of sales is small; 64s are quoted at $3^{11}/_{16}$c. and 56x60s at $3^{1}/_{16}$c. The stock on hand is about the same as last week. The cotton market is quiet and steady, the amount of sales being small; middling uplands are quoted at 10⅝c. and middling gulfs at 10⅞c. The stock on hand is about the same as last week.

From Philadelphia, Pa.: There has been a good jobbing trade in prints, cotton goods and fabrics adapted to late spring and summer wants. With agents business has not been brisk, but shows improvement over last week, and the general outlook is satisfactory. Prices are ½@1c. per yard higher on some lines of staple cottons and very steady on best makes of woolens.

From Pittsburgh, Pa.: Spring trade in dry goods and notions is opening fairly, and the outlook is considered good. Some houses report a better trade than at same time last year. Collections continue fair.

From Cleveland, Ohio: The local dry goods market is fairly active, without special change from that of the last quarter, which was quite satisfactory.

From Cincinnati, Ohio: Cotton, dry goods and clothing are in fair demand.

From Columbus, Ohio: Trade in dry goods is still as good as last week, and the increase over last year's sales is large.

From Dayton, Ohio: The dry goods trade is dull.

From Chicago, Ill.: Country collections are materially increasing. The dry goods market is very active; attendance of country buyers is large. Notions, millinery, clothing and furnishing goods are in better demand.

From Peoria, Ill.: Trade in dry goods is active, with a good demand for spring goods.

From Detroit, Mich.: The dry goods trade has been quite active during the week.

From Grand Rapids, Mich.: Local trade shows an increase, notably in dry goods.

From Louisville, Ky.: In dry goods a very satisfactory business is in progress, and leading jobbers report sales this year larger than for the same period last year. Weather favorable, and trade is active for visiting merchants as well as country orders.

From St. Louis, Mo.: Dry goods are exceedingly active and prices are marked up in several lines.

From Kansas City, Mo.: Dry goods sales are quite heavy, and the demand is well sustained by purchasers who have heretofore bought in other markets, and are now constantly coming here. Prospects very encouraging.

From Burlington, Iowa: The dry goods trade has been quite satisfactory; sales embrace all staple and most seasonable goods. Collections are fair.

From Lawrence, Kan.: Trade in dry goods and clothing is moderate.

From San Francisco, Cal.: The dry goods trade is no better than general business. There is general uncertainty, and cash buyers are invariably preferred. Oregon trade is insignificant, owing to large stocks carried over, and inability of consumers to buy because of the bad season. California buyers only filling to meet absolute requirements. There is a brisk trade in fancy goods. Millinery goods meet with ready sales. Clothing active.

From Baltimore, Md.: Business in dry goods the first part of the past week was very fair, and sales reached satisfactory proportions, but later there was not so much doing. Jobbers say that competition with outside firms has become very sharp this season, and profits are consequently lessened. Prices generally, however, are firm, and the trade appear to be holding their own.

From Richmond, Va.: The weather has been uniform and favorable during the week. The dry goods trade has not materially differed during the past ten days.

From Norfolk, Va.: There has been but very little change since our last report. Dry goods jobbers report a more active trade.

From Wilmington, N. C.: The dry goods jobbing trade is fair, while the tone of retail trade is firm.

From Savannah, Ga.: The dry goods market is firm and active, with a good demand for leading lines. Stocks are full to meet all demands, and seem more so for the season than usual.

From Macon, Ga.: Trade in dry goods is lively.

From Galveston, Tex.: The dry goods trade for the past two weeks has been excellent.

From Memphis, Tenn.: Sales of dry goods are larger this week, and collections are coming in very freely.

From Nashville, Tenn.: The dry goods market is steady, and shows a good demand.

From Halifax, N. S.: Trade in dry goods continues quiet.

COTTON.

The New York cotton market has been higher for spot middling uplands, the price having advanced to 10¾c. The sales for the week have been for export 480 bales, for consumption 2,835, and for

speculation 1,263 bales. Included in the above are 1,100 bales to arrive. The deliveries on contract amount to 3,600 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 9-16c.	7½c.	9½c.
Strict ordinary	8	7 15-16	10⅝
Good ordinary	8 13-16	8¾	11 5-16
Low middling	9¾	9 11-16	11¾
Middling	10¼	10 3 16	12 3-16
Good middling	10 11-16	10⅝	12 15-16
Middling fair	11 7-16	11⅜	13 5-16
Fair	12 3-16	12⅜	14 1-16

The market for spot cotton closed easy.

The future market at New York has been lower, the price having declined an average of 2 points for near months, and 4 points for later months. The sales for the week foot up 313,500 bales.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
March	10 15c.	10.16c.	12.17c.
April	10.27	10.30	12.29
May	10 40	10.43	12.49
June	10.54	10.55	12.68
July	10.66	10.69	12.90
August	10.77	10.80	13.01
September	10.49	10.53	12 58
October	10.22	10.23	11.90

The future market at New York closed steady.

The southern markets during the past week have been quiet and firm. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports:

	Week's sales.	*To-day.*
Galveston	6,462	9⅞
New Orleans	47,950	9 11-16
Mobile	5,500	9½
Savannah	10,000	9⅞
Charleston	2,800	10

The total receipts of cotton at the ports since September 1 are 5,130,758 bales, an increase of 1,005,588 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	706,442	382,812
New Orleans	1,428,925	1,005,489
Mobile	294,673	248,860
Savannah	733,308	679,367
Charleston	525,089	463,560
Wilmington	121,987	126,887
Norfolk	602,372	541,949
Baltimore	48,633	24,661
New York	130,080	146,683
Boston	139,574	173,612
Philadelphia	56,475	44,774
Other ports	252,948	223,097

The receipts at the ports for the week were 109,621 bales, against 122,628 last week and 57,280 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 37,658 bales, against 40,717 bales last week and 15,101 bales for the corresponding week last year. The shipments for the week were 48,381 bales, against 48,584 bales last week and 45,331 bales for the corresponding week last year. The stocks for the week were 268,531 bales, against 277,088 last week and 256,851 for the same week last year.

At Liverpool the spot market is reported easier. The price for middling uplands is higher, having advanced to 5⅝d. The quotations for middling Orleans remains unchanged at $5^{11}/_{16}$d.

The sales for the week at Liverpool were 61,000 bales (of which 45,000 were American), against 75,000 bales (of which 54,000 were American) last year.

The sales for export were 5,500 bales, against 5,500 bales last year. The sales for speculation were 3,500 bales, against 2,000 bales last year. The amount forwarded was 27,000 bales, against 12,500 bales last year. The stock in port is 920,000 bales (of which 658,000 are American), against 757,000 bales (of which 542,000 were American) last year. The total imports for the week were 37,000 bales (of which 26,500 were American), against 106,000 bales (of which 68,000 were American) last year, and the amount afloat 366,000 bales (of which 270,000 are American), against 423,000 bales (of which 203,000 were American) last year.

The Liverpool future market has been flat and barely steady. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery:

	To-day.	*Last week.*	*Last year.*
March	5 38-64d.	5 38-64d.	6 46-64d.
March—April	5 38-64	5 38-64	6 46-64
April—May	5 42-64	5 44-64	6 48-64
May—June	5 45-64	5 42-64	6 53-64
June—July	5 49-64	5 47-64	6 57-64
July—August	5 53-64	5 51-64	6 62-64
August—September	5 56-64	5 56-64	7 2-64

The Manchester market closed quiet and steady.

COTTON REPORTS BY TELEGRAPH.

From New Orleans, La.: Bulls say that as cotton receipts thus far have been so rapid, a considerable let-up must soon set in, which will improve the position; bears maintain that, even should this be the case, the weight of stocks by that time will neutralize the effect Spots steady throughout the week, closing firm at ⅛c. advance on low ordinary and ordinary, and $1/16$c. on middling. The movement is fair. Future business small, but steady throughout, with no briskness; 3 to 12 points higher than last week.

WOOL.

There has been no abatement of the firmness of seaboard wool markets during the past week, but trading has been less spirited at all points. The large purchases made during the previous month or six weeks have measurably supplied the pressing wants of consumers, and, as prices for the raw staple during that period sharply advanced without corresponding improvement in woolen goods, manufacturers are naturally inclined to greater caution. There are no elements of weakness in the situation aside from the lessened demand, and this is of less importance than usual, owing to the large reduction that has recently been made in the available supply. There is general confidence among holders that all the stock now within reach of manufacturers will be wanted before the new clip can come on the market in any volume, and there is consequently no pressure to sell except at full prices. Stocks of foreign are much reduced, and, though American buyers have been represented in London for several weeks past, purchases thus far have been very moderate, as the relative position of values discourages free buying. The colonial auctions are drawing to a close, and thus far the late advance has been well sustained. East India wools have declined slightly at the Liverpool sales, but the domestic markets for carpet stock have undergone no change. Western advices continue strong.

IRON.

The long-wished-for opportunity for business—the passage of a tariff bill and the adjournment of Congress—have come, but the iron market, as yet, has not responded to any extent. The improved feeling mentioned last week continues, but buyers are not impressed with the necessity for booking their orders to any great extent. The greatest improvement has been noted at Philadelphia in the pig iron market. Sales there of that variety of iron have been noticeably frequent, though not of large size. At New York sales of pig iron have been small, and the market is dull. Pittsburgh also has not witnessed the transactions in pig that were looked for. Scotch iron sales during the week at New York have been about 800 tons and the arrivals about 2,000 tons; very little of the latter, if any, having gone into store. Manufactured iron has moderately improved, but prices are unchanged and the capacity is far ahead of the demand. Several contracts for steel rails have been let during the week. In the vicinity of Pittsburgh some rail mills are contracted for four months ahead. Bessemer pig is neglected at $22 and Spiegeleisen at $32.50.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, March 16.—The iron market is steady, more especially in finished. Scotch iron is weak.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Trade has been rather more active at steady prices. The tone of the general market is improving. Orders, however, are mostly for immediate requirements and not sufficiently urgent to stimulate values.

From Pittsburgh, Pa.: There is but little change in the iron market since last week. Inquiries for prices have been more numerous, however, and the prospects are favorable.

From Cincinnati, Ohio: There appears to be an increased demand for pig iron and less disposition to sell. Manufactured iron is firm, with good demand.

From Cleveland, Ohio: There is a better feeling in the iron trade. Prices are no higher, but are firm, and the market has assumed a much more satisfactory outlook.

From Chicago, Ill.: Sales in hardware have increased 10 per cent. over last week's sales, but not up to same week last year. Pig iron in fair demand; stocks moderate. Bar and angle iron rather more active, with a steadier feeling. Nails in better request; stocks moderate and steadily held. Sales of Bessemer iron ore $4 per ton on board at Escanaba.

From Louisville, Ky.: Iron is active on a regular demand for current use, but there is no speculation, and prices rule low and easy. Foundries are doing an average business.

From St. Louis, Mo.: Iron is in gradually increasing demand for both pig and manufactured; present rates are very firm, with an upward tendency, and advances are likely to be listed soon.

From Detroit, Mich.: Indications apparently poin to a good season's business in iron. The situation is practically unchanged; mills are not running on full time. Ore companies have made few if any contracts as yet, not being willing to make concessions in price demanded.

From Baltimore, Md.: The iron market has assumed a more confident tone since the adjournment of Congress.

COAL.

The only feature worthy of note in anthracite coal trade this week is the intention to mine full time next week. The anthracite trade in general is in fair shape. The aggregate output of coal to March 3 is placed at about a quarter of a million tons. When the spring prices are announced it is uniformly believed that the supplies required will furnish a basis for full rates and perhaps full working time. There is little, if anything, new to report respecting the bituminous coal trade. Rates this year will not be so low to the consumer as last, and this may, in part, add to the prevailing dullness, although it is yet too early to expect many orders. Several contracts for season deliveries are said to have been made at low rates.

PETROLEUM.

The petroleum markets continued at the boiling point on Saturday and Monday last, owing to undoubted evidence that the new wells on the Cooper tract were turning out short-winded. As the current reports have it, the feeling on the exchanges was at "white heat," and prices were subjected to violent and frequent fluctuations. Since Tuesday there has been less and less excitement, and on Thursday the speculative petroleum markets were actually dull. Tight money was named as the cause of the heaviness of prices and the general apathy of traders of late. A gauge of the new wells on the Cooper tract made on Saturday showed a daily production of over 3,400 barrels. On Monday another measurement was taken, and the daily production was found to have declined to a little over 2,400 barrels. Wednesday a further decline had taken place, and the gauge showed 2,100 barrels only. These results point to the temporary character of the supposed prolific field, and are responsible for the price of certificates bobbing once more about the dollar mark. Most of the wells which looked ominous at the close of last week have dwindled to pigmies. There are a few to hear from yet—as there always are. A new mystery is reported among them and, as usual, contradictory rumors as to its being a dry hole and a "gusher" are already afloat. The advance in the price of certificates on Saturday was 4⅝c. and on Monday was 5⅛c. Tuesday evening's closing price was $1.00⅜, the same as that on Monday, but 1⅛c. below the opening on Tuesday, owing to cross-purpose reports about a new well. On Wednesday there were several fluctuations, but a tight money market prevented the advance expected and prices declined from 99c. to 98¾c. On Thursday there was a gain of ¼c. only.

High rates for money on call yesterday prevented any advance in the certificates of crude petroleum. The tendency of the market was upward, but $1 per day per 1,000 barrels for carrying, against 60c. at Oil City, restricted transactions. The market opened at 99¼c. and continued steady through the morning, closing at noon at the same figure. It opened in the afternoon at 99⅜c., but fell off immediately thereafter. The Sherman "mystery" well was reported dry shortly before 4 o'clock, which caused a sharp advance. At the close the quotation was $1.01⅞, an increase of 2⅝c. on the day.

The course of prices daily during the week was:

PRICES OF CERTIFICATES.

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	88⅝	93¼	88⅝	93¼
Monday	95½	100⅜	95	100⅜
Tuesday	101½	102⅜	98⅜	100⅜
Wednesday	99	100½	97¾	98¾
Thursday	98⅜	99¾	98½	98⅞
Friday	99¼	102½	97¾	101⅞

As might have been expected, refined oil advanced and refiners became stiff holders under the course of prices outlined above. On Saturday refined was quoted at 7¾c. for 110°, and 8c. for 70° Abel test. Case oil also advanced in price and was quoted at 10⅝c. for plain brands. Crude in barrels was not much in demand. Prices of this variety as well as of naphtha remained unchanged. Another advance was made on Monday to 8⅛c. for 110°, and 8¼c. for 70° Abel test. Cases were firm at 10¾c. for plain brands. Crude in barrels was quoted at 7@7½c., and sales were reported at those rates. Refiners withdrew from the market during the remainder of the week, and bids for refined oil at current rates were therefore not filled. The prices of petroleum and petroleum products last evening, as against Friday's figures last week, were as follows:

	March 9.	*March 16.*
Certificates of crude	89¼c. bid.	101⅞
Refined petroleum, 110°	7⅞	8⅛
Refined petroleum, 70°	7½	8¼
Crude, in barrels	6⅞@7⅞	7@7½
Case oil, plain brands	10¼	10¾
Naphtha	6¾	6¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to March 10 was 96,997,481 gallons, against 91,460,542 gallons in a like period of 1882, an increased exportation in favor of 1883 of 5,536,939 gallons, against an increase of 6,076,665 gallons reported up to March 3. For the week ending March 10 the foreign shipments were 9,565,799 gallons, against 12,994,980 gallons in the preceding week. New York city's exports of petroleum from January 1 to March 10 amounted to 81,980,728 gallons (leaving but 15,016,753 gallons for all other ports), against 75,374,573 gallons in a like period in 1882.

The Bureau of Statistics reports that the total exports of petroleum and petroleum products from the United States during January last amounted to 38,490,505 gallons, valued at $3,506,953, against 30,248,954 gallons, valued at $2,759,087, in January, 1882, a gain of 8,241,551 gallons, valued at $747,866. For seven months ended January 31 last, the total exports were 295,810,114 gallons, valued at $25,910,924, against 345,030,691 gallons, valued at $31,772,690, in the like portion of 1881–82, a loss during the later seven months of 49,220,577 gallons, valued at $5,851,766.

OCEAN FREIGHTS.

There has been a change in the ocean freights market during the past week, though as yet no pronounced results have been noted. The advance in the price of oil was met by renewed bids of foreign dealers. This was taken advantage of by shipbrokers, and rates on petroleum vessels are higher, with a prospect of a further movement in that direction. There has also been more inquiry for grain vessels during the latter part of the week, and the outlook is for higher rates for tonnage of this variety. During the earlier part of the week freights were dull, and, although no special improvement has yet taken place, a radical improvement is looked for. Baltimore has been shipping considerable grain, but Philadelphia has experienced great dullness in her export market. There is a fair inquiry for vessels for short voyages, or to the West Indies.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: The grocery trade is improving. Most other branches show but little, if any, improvement.

From Boston, Mass.: The boot and shoe trade is fair. The spring business is closing, and jobbers are preparing for fall. Reports from salesmen are encouraging. Shipment for the week to places outside of New England, 57,244 cases, against 55,594 cases the eleventh week in 1882. Total shipments since January 1, 573,741 cases, against 522,467 cases same time last year.

MIDDLE STATES.

From Philadelphia, Pa.: General business has not been active during the past week, but in many lines has shown a moderate increase in volume, and promises further improvement in the near future. The general jobbing trade is more active—favored by milder weather. Wool is dull but very steady. Cotton is inactive—spinners buying only for immediate requirements. A good many local looms are still idle, but the reduction in stocks and improving demand for dry goods point to an early change for the better in this branch of industry. Bear influences dominated the grain markets during the first half of the week, and prices declined 3@4c. per bushel on wheat, and slightly on both corn and oats; but within a day or two a reaction has set in, and the markets have recovered part of the decline. Exporters have done very little in either wheat or corn, but are bidding more freely at the close. Refined petroleum has advanced ½c. under a better demand from shippers. Provisions are firmer and in good jobbing demand. Butter is 2@3c. per pound lower under excessive supplies. Potatoes

are active and firm—supplies still running light. Southern farm products are beginning to come forward more freely, but sell promptly at full prices. Very little trouble is reported with collections in any branch of trade.

WESTERN STATES.

From Cincinnati, Ohio: Staples and manufactures move slowly under a fair consumptive demand. Breadstuffs are heavy, with a downward tendency, under which flour has declined 15c. The temporary suspension of a whisky house does not appear to affect money matters, which, however, are moderately hard under a good borrowing demand, with considerable calls from country banks. Whisky is selling at $1.04. There are no new features in tobacco. Warehousemen are awaiting the action of the legislature on the bill for inspection. Should it become a law, there is a belief that they will move to Kentucky.

From Cleveland, Ohio: Spring trade continues backward, and in most lines the jobbing business of the week has been comparatively light, without any special new feature. Manufacturing concerns are fairly busy, and there is a fairly active demand for lumber.

From Columbus, Ohio: General lines fairly active, and collections fair.

From Dayton, Ohio: General trade reported very quiet. Produce market brisk.

From Indianapolis, Ind.: Trade in most lines is satisfactory, although collections are still somewhat slow but improving. The weather is still cold, and wheat is thought to be injured some; still the prospects are favorable for a good crop.

From Evansville, Ind.: Spring orders are coming in fairly brisk, and all lines show an increase of business. Contractors report an unprecedented number of orders for buildings. Weather fine for farmers.

From Chicago, Ill.: Groceries more active, mainly in small bills; sugars scarce. Lumber active; sales 25 per cent. over last week. Wheat unsettled; much uneasiness is felt regarding the winter plant, but most reliable advices fail to justify fears of damage; opened firm; declined 1c. under large selling by heaviest operators. Corn weak, sympathizing with wheat; receipts large; quality better; market lacks individuality. Oats follow wheat and corn; receipts unusually large for season.

From Peoria, Ill.: The present spring weather has had a good effect on trade. The dealings in hardware and agricultural implements are heavy, and collections are somewhat improved.

From Grand Rapids, Mich.: The weather for the past week has been quite changeable. Local trade shows a slight increase, notably in groceries. The snow is fast disappearing and country roads are improving. Money in active demand, with no surplus of loanable funds.

From Louisville, Ky.: General trade is steady and conservative in tone, with a very fair distributive jobbing movement. Collections are a little slow and currency is scarce. Banks report a liberal demand for accommodations. There is still a great deal of unemployed labor in the cities. Cotton steady, with a fair inquiry. Leaf tobacco continues active and strong; offerings show an increased proportion of dark types and poor grades; the movement is large and sales readily made at full prices. Lumber has been dull, but the demand is improving; a brisk building season is expected. Whisky dull and stationary; the speculative demand is lacking and the market is in buyers' favor; large lots of whisky on which the tax is about to fall due are being exported in bond to foreign countries to be eventually brought back. Winter wheat appears to be well rooted and has improved during the past two weeks on uplands; a considerable acreage is on low, wet lands, and cannot make a good crop; at present the frosts at night and thawing by daytime is unfavorable for the wheat plant; the surplus of old wheat in Kentucky is about exhausted, not enough arriving to supply city millers, and dealers are getting shipments from the west for local and southern trade. Corn mostly sold and farmers holding above the market; the floods damaged large quantities of corn.

From St. Louis, Mo.: The general jobbing trade is steadily growing in volume, but is not really rushing yet. The disposition is to keep values as steady as possible. Wheat and corn continue declining, and the market is dull. Oats are active and strong on a feeding demand. Grain stocks on hand are much larger than last year. Flour is weakening and very slow. Cotton is a little firmer and selling better. Horses are in big supply, and all grades sell promptly and high. Mules are less active, but not dull, and receipts are somewhat less. Miscellaneous classes are taking money freely, and bank surpluses are reduced to about a normal standard.

From Kansas City, Mo.: With few exceptions, leading lines of trade report a satisfactory week's business. The liquor interest is disturbed, and trade unsettled by high-license legislation; sales are unusually light. Groceries, hardware, boots, shoes and kindred lines are doing a fair and increasing business.

From Detroit, Mich.: General business has shown some improvement during the week, but collections are not good and jobbers complain of them, the cause of which is not accounted for as produce and grain are moving largely at good prices, with the exception of butter, the stock of which is much larger than the demand.

From Burlington, Iowa: All lines of trade show a steady improvement with the advance of the season. Jobbers report no rush, but a steady and increasing demand. Prospects are favorable for a good spring business.

From Leavenworth, Kan.: Owing to the pleasant weather of the past week farmers are busy plowing. General trade is good. Collections fair. Wheat and corn are coming in lively; prices fluctuating. Large quantities of seed corn are being shipped to Illinois and Indiana from Kansas. Wheat prospects over the state are still good. All our manufacturers have full orders.

From Lawrence, Kan.: General trade is better than last year. Collections are fair. Money is moderately abundant. Wheat and corn are coming in rapidly, owing to an advance in price and continued fine weather; wheat $1; corn 40c. Wheat has come through winter in good shape, and the outlook for the season is encouraging.

From Lincoln, Neb.: The weather for the past week has been fair, and trade in all lines has improved. The jobbing trade report fair orders, with favorable weather; a good spring trade is expected. There is a good trade in corn, though producers are inclined to hold for higher prices. Potatoes are higher, and the market glutted.

CALIFORNIA.

From San Francisco, Cal.: Prices for wheat were somewhat easier toward the close of the week; the demand for milling varieties is good at high prices; quotations are slightly lower for shipping. The continued dry weather causes great uneasiness, owing to the uncertainty regarding rain. Farmers in the dry belt anticipate a loss of crop. General business is dull, transactions being from hand to mouth.

SOUTHERN STATES.

From Baltimore, Md.: Spring trade continues backward, and the general volume of business the past week was only fair. Retail dealers are laying in small stocks cautiously, and prospects for a very good season are not bright. Transactions in grain were moderate, and the market quoted quiet, but steady. Importers of coffee are holding stocks firmly, and the tendency is for higher prices. There is but little inquiry in the cotton market, and holders do not appear anxious to sell at present prices. The jobbing trade in provisions is fair, and prices are maintained. An active demand is reported for refined sugars, and, while the market is firmer, prices remain unchanged. A better feeling now prevails in the lumber market, and prices are firm. Some little business is doing in ocean freights, but the market is generally dull and rates are nominal.

From Norfolk, Va.: The recent fine weather has improved all departments of retail trade. Lumber is quite active and large shipments are being made weekly. Cotton is coming in moderately. The general outlook for spring business is fair.

From Wilmington, N. C.: The weather is clear and pleasant. Cotton receipts and sales are falling off. The business market is firm. Grain and breadstuffs are quiet and steady. Timber steady. Lumber quiet. Shingles firm. Freights, foreign and coastwise, quiet. Spirits turpentine, rosins, tar and crude turpentine quiet.

From Savannah, Ga.: There is but little excitement in trade. Sales are fair. Country merchants are more cautious than usual. Collections from country slow. There is but little doing in stocks and bonds. Rice firm, with good demand for all grades. Naval stores more firm than when last reported, and some good sales are made; receipts of spirits have increased, while rosins have decreased 19,784 barrels.

From Macon, Ga.: General trade is fair.

From New Orleans, La.: Open-kettle sugar 1/16c. higher; clarifieds steady. The stock of molasses is poor and the market is dragging. Rice—Inquiry limited; lower and higher grades strong; medium steady; mills working less than one-half their capacity; fair to prime 5½@6¼c. Flour 15@25c. lower. Provisions easier. Coffee quiet but steady. Grain receipts liberal, but exports slow. Crude cotton seed oil 54c.

From Galveston, Tex.: The general jobbing trade for the past two weeks has been excellent.

From Marshall, Tex.: The weather for the week has been clear and warm. To-day a cold north rain prevails. Farmers are feeling blue, not being able to plow. Trade is dull. Attempted railroad legislation has stopped railroad building. There is no demand for labor.

From Nashville, Tenn.: General trade for the week has been steady, and is showing signs of improvement. There is a fair demand for all classes of goods. Wheat in good demand for choice and fancy. Corn quiet. Country produce in good demand and firm. Mules scarce, but little demand; prices high. Banks report money in good demand.

From Memphis, Tenn.: Trade during the past week has not fallen off any. The falling of the river below Memphis has caused renewed confidence among planters in the bottoms. Flour and cornmeal are easy, with a light demand. Corn firm. The demand for potatoes for seedlings is slacking off, and values are lower.

NOVA SCOTIA.

From Halifax, N. S.: General trade has not changed during the week. Wholesalers are anxious, as unfavorable rumors concerning several houses are afloat, and business seems uneasy.

LATE MAILS.

Chicago, March 14.—Although the demand for money from merchants continues to decrease as trade improves and collections become more liberal, bankers state that the calls for loans from grain dealers and borrowers representing miscellaneous branches of business is sufficient to enable them to maintain pretty full lines of discounts. There is, however, a steady tendency to easier rates, and desirable customers are more readily met at 6@7 per cent. Bankers also express the opinion that ere the close of spring money will be abundant to borrowers on choice names and collaterals at 5 per cent. These predictions are based on the fact that there is still a liberal surplus of last year's crops in the country, and that the farmers as a rule are in an excellent condition financially. Speculation has also received a severe check; hence there will be less speculative borrowing, which will increase the supply of money for legitimate investments. New York exchange is in good supply, but the falling off in the demand for money from the country has enabled the banks to strengthen their home reserves, hence they are less inclined to draw against their eastern balances, and the market for bills is firmer at par@25c. discount per $1,000 between banks.

The bright weather of the past few days has proved a powerful stimulant to business of nearly every description. The dry goods houses are fairly busy filling orders and waiting on interior buyers who are daily becoming more plenty, and a cheerful feeling is observed with the trade. Retailers, as a rule, say their stocks are lower than at any corresponding time in years, hence they will open the spring trade with unusually clean stocks. The millinery houses report an increased call for goods in their line, and predict an active spring trade. Hats, caps, boots and shoes are selling more freely on orders, and a good demand is reported for leather from large manufacturers, but buyers adhere to their previous system of taking stock as their wants require. An improved demand is reported in all classes of hardware, cutlery, mechanics' and farming tools. Metals and tinners' stock show a fair improvement. There is an increase in the volume of orders for refined iron and nails, but the bills usually are small in size, and it is evident that both workers and retailers are only buying stock as their necessities compel. Pig iron is meeting a little more attention and a number of round lots have been taken; stocks are moderate and there is less pressure to sell. The steel rail mills are filling a few orders for rails, but the managers are so reluctant about reporting sales or prices that it is difficult to gain serviceable information regarding the business. Drugs and chemicals and all descriptions of druggists' sundries are receiving increased attention from the interior. Groceries are active, and the trade in a more healthy condition than at any previous time in the past fifteen months. The recent large failures have removed some of the houses who sought to do a large business at the expense of profits, and rendered others cautious. The steadiness of the market for most leading articles also prevents losses from depreciation of stocks as was the case during nearly the whole of last year. The interior demand for lumber is better, but the market is destitute of vim, and stocks are liberal with prospects of early arrivals by lake. Wool is meeting a good demand; sales within past few days include over 500,000 pounds deliverable here and at Milwaukee, and stocks are quite low. A dealer who has recently made a thorough canvass of the wool districts of this and adjoining states expresses the opinion that the quantity yet to come from the interior is less than at this date last year. The liberal stocks of wheat at the chief points of accumulation, and the absence of any considerable demand for consumption in connection with adverse eastern and European advices, and bright, soft weather have caused many of those who were strong believers in higher prices for that grain to modify their views, and induced many of them to part with their property. Large amounts held for outsiders on slender margins have also been closed out, and prices declined 4c. per bushel during the business week ending to-day. There is, however, a better demand from strong buyers who think the decline is sufficiently severe to warrant a sharp upward reaction. Corn is arriving freely, stocks in store continue to increase, and the market shows a weakening tendency, but there are many who have strong faith in higher prices, and every sign of a hardening market calls a large number of such buyers to the front. Oats are arriving freely; stocks are larger, but mostly held by strong operators, who persistently resist every effort to break prices, and it is evident that values for the near future will largely depend on the ability and disposition of such holders to sustain them. The small receipts of hogs has a tendency to stiffen prices for provisions, but while the market shows a strong resistance to the efforts of the bears to break prices, and every depression is followed by an instant reaction, there is no snap to trade in pork, and lard meats are in fair demand for shipment, including a liberal number of export orders for sides, and the market to-day shows a stronger position than any other part of the hog. The offerings are also small.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.		*Exchange selling on New York.*

SHIP-BUILDING IN GREAT BRITAIN.

The London *Saturday Review* says: "Of all British industries, perhaps the one that was most prosperous last year was the ship-building trade. The year 1881, it will be recollected, saw an unprecedented number of ships built, but last year there was even a larger number launched. The official statistics are not yet out, and we cannot, therefore, speak with entire accuracy. But from the local information available it appears that in nineteen ports of the United Kingdom about 780 vessels were built during the year, having an aggregate tonnage of almost 1,200,000 tons. This was an increase of about 20 per cent. upon the year before. On the Clyde the increase exceeded 54,000 tons; on the Tyne, Wear, Tees and Hartlepools, it amounted to 113,756 tons; and generally all the ports show very considerable increase. As usual, the greatest tonnage was built on the Clyde, amounting to 391,934 tons; the Wear came next with 212,000 tons, and the Tyne next with 208,000. In no other case has the tonnage reached 70,000. In Belfast the ships built measured 28,120 tons, against only 13,893 tons the year before, or more than twice as many, and it is noteworthy, too, that at the very beginning of the current year a steel steamship, named the Ionic, with a gross register of 4,700 tons, was launched at Belfast. It would seem, therefore, that the ship-building trade is really taking root at Belfast, though the amount of tonnage turned out is yet small compared with the great centers of the trade in Scotland and England. The tendency everywhere is becoming more pronounced toward very large vessels. Thus on the Clyde the average tonnage has risen from 915 tons four years ago to 1,347 tons last year; on the Wear it has risen from 1,404 to 1,727 tons, and on the Tyne from 1,075 to 1,573 tons. These three rivers between them turned out the great bulk of the tonnage, and it will be seen that in all of them there is a marked increase in the average size of the ships. On the Clyde one vessel of 7,500 tons was built and another of 5,600 tons, and vessels of between 4,000 and 5,000 tons were numerous everywhere. Steel is also coming into more general use, while, except for very small craft, hardly any wooden vessels were built last year. It is noteworthy, however, that the large iron sailing vessels built last year show an increase. As might be inferred from this great increase in the tonnage built, the freight trade was fairly prosperous last year. Ship-owners would hardly go on ordering more and more vessels unless they found their business remunerative. And, in fact, the reports of the freight agents leave no doubt that the business was fairly profitable last year. Except for the expedition to Egypt, which gave rise to a large demand on the part of the government for steamers to convey troops, ammunition and provisions, there was no exceptional demand in any quarter. Last year no new trades were opened up, nor was there any marked activity in any particular department. But the whole trade all over the world increased, and consequently there was profitable employment for the vast mercantile marine now afloat. We lately showed that the reports and dividends of the railway companies now coming out establish the fact that it has also been fairly profitable for the railway companies. Ship-owners, shipbuilders, railway companies and bankers—that is to say, the great transport companies and money lenders—found last year fairly profitable, and it is difficult to believe that trade itself was unremunerative. If it was able to give profitable employment to the subsidiary agents, it is difficult to believe that the employers found their business unprofitable."

TRADE EMBARRASSMENTS.

There were 233 failures in the United States reported to BRADSTREET'S during the past week, 25 more than the preceding week, 93 more than the corresponding week of 1882, and 83 more than the same week of 1881. The failures were of more importance, especially in the whisky trade. The middle states had 57, an increase of 5; New England states 32, an increase of 5; southern states 57, an increase of 19; western states 73, an increase of 10; Pacific states and territories 14, a decrease of 14; Canada and the provinces 42, an increase of 8. The important failures were Ives, Beecher & Co., wholesale liquors; Blossom, Hayne & Co., naval stores, and George W. Griffin & Co., shipping and commission, New York city; Pfirrmann & Pfau, wholesale liquors, Cincinnati; Todd, French & Co., wholesale boots and shoes, St. Louis. In the principal trades they were as follows: General traders 51; grocers 42; hardware, etc., 15; liquors 14; dry goods 13; shoes 12; drugs 11; manufacturers 10; furniture 7; fancy goods 5; tobacco and cigars 5; hats 4; millinery 4; millers 3; grain 3; produce 3; jewelry 3; clothing 2; books and stationery 2.

ALABAMA.

CLANTON.—J. H. Hennon, general store, has assigned.
FLORENCE.—C. W. Heldon, produce, has failed.
FLORENCE.—S. H. Young, general store, has assigned.
GAINESVILLE.—Bush & Geiger, general store, have failed.
SELMA.—J. A. Clancy, jeweler, has assigned. Liabilities $23,000; assets $8,000.

ARKANSAS.

BATESVILLE.—R. S. Weaver, saddlery, is reported to have assigned.
LITTLE ROCK.—A. Cutler, furniture, has been closed by attachment. It is thought he can pay in full if the assets are properly managed.
PINE BLUFF.—C. Patillo, general store, has assigned.

CALIFORNIA.

GRIDLEY.—Woodward & Babcock, grocers, have been attached.
JOHNSVILLE.—Willoughby Brothers, general store, have been attached.
OAKLAND.—F. Senram, shoes, has assigned. Liabilities $15,000; he claims assets about the same.
PETALUMA.—Joff Fine, cattle dealer, has filed a petition in insolvency.
SACRAMENTO.—M. Devine, grocer, has been attached.
SACRAMENTO.—J. Touley, saloon, has been attached.
SAN FRANCISCO.—Bacon & Decker, grocers, have been attached.
SAN FRANCISCO.—B. Heineberg, leather, has assigned.
SAN FRANCISCO.—Arthur McGuire, stair builder, has been attached.
SAN RAFAEL.—L. Mayer & Co., general store, have assigned.

CONNECTICUT.

ANSONIA.—Hugh McLarney, grocer, offers to compromise at 40 cents.
ANSONIA.—Eugene McMahon, grocer, offers to compromise at 40 cents.
HARTFORD.—William M. Miller, fancy dry goods and cloaks, has been attached, and a receiver is in charge.
WINSTED.—D. C. Peck, tool handles, has called a meeting of creditors.

DAKOTA.

BISMARCK.—John Friedland, grocer, has been closed on attachments.
PORTLAND.—Ray & Painter, general store, have assigned. Liabilities $9,000; assets $8,000.
WAHPETON.—Eli Vachon, restaurant, has assigned.

DISTRICT OF COLUMBIA.

WASHINGTON.—Mrs. H. Rosenbaum & Son, millinery, have assigned.

FLORIDA.

BALDWIN.—W. W. Coleman, grocer, has failed. Liabilities $1,691; actual assets about $1,000.
HAWTHORNE.—S. L. Hawthorne, general store, has assigned and offers 50 cents. He was recently burnt out.
PENSACOLA.—William B. Hoyt, grocer, has assigned.

GEORGIA.

ATHENS.—J. J. Threlkeld, fruits and confectionery, asks an extension. Liabilities $1,200; nominal assets about the same.
PINE GROVE.—A. H. Von Bakelen & Co., general store and turpentine, are reported to have failed.
SAVANNAH.—T. A. Mulrine, grocer, has assigned to John McLaughlin.

ILLINOIS.

CHICAGO.—The committee of creditors of W. T. Allen & Co., wholesale grocers, recommended 60 cents. The firm offered 50 cents, and the creditors adjourned without reaching any conclusion. Liabilities $360,000; assets $291,000.
CHICAGO.—Black & Co., dry goods, have confessed judgment for $2,165, and were closed by the sheriff
CHICAGO.—David H. Fritts, trading as David H. Fritts & Co., manufacturers of moldings, has been closed by the sheriff on a claim of $2,200.
CHICAGO.—I. Goldsmith & Brother, manufacturers of cigars, have been closed by the sheriff.
CHICAGO.—E. A. Hall & Co., grocers, have assigned to Robert E. Jenkins. Liabilities $4,823; nominal assets $9,449.
CHICAGO.—Charles H. Hansen, wire works, has been closed by the sheriff.
CHICAGO.—Henry P. Hull, hair store, has been closed by the sheriff for $2,000.
CHICAGO.—M. Koski & Co., scrap iron, have assigned to John S. McClune.
CHICAGO.—Otto Kruger, hardware, has been closed by the sheriff on confessed judgments for $2,526.
CHICAGO.—Krueger Brothers, hardware, have been closed by the sheriff.
CHICAGO.—Lhotka & Schwartz, manufacturers of picture frames, have assigned to Harry Rubens.
CHICAGO.—Martin Mullahy, saloon, has been closed by the sheriff.
CHICAGO.—Sherman, Ganson & Co., furniture, have assigned. Liabilities $11,200; assets $7,800.
CHICAGO.—The creditors of George H. Taylor & Co., paper, have agreed to accept 40 cents. Liabilities $367,000; actual assets $266,000; preferences $126,000.
CHICAGO.—Frank M. White, saloon, has been closed by the sheriff.
DAWSON.—O. C. Dougherty, grocer, has been closed by the sheriff on a judgment for $522.
LITCHFIELD.—George B. Litchfield, confectionery and restaurant, has assigned.
MOUNT ZION.—K. W. Conn, general store, has assigned.
QUINCY.—G. Kaiser, jeweler, has been attached.
WAUKEGAN.—W. Orvis, grocer, has had a chattel mortgage foreclosed.

INDIANA.

CANNELTON.—Christian Kielhorn, grocer, has failed and assigned to John Rauscher.
HUDSON.—A. M. Markel, general store, has failed. Liabilities about $2,000.
INDIANAPOLIS.—George W. Spotts, elevator and grain, has failed and turned his elevator over to his father-in-law, Adam Scott, who had indorsed for him largely. Liabilities about $45,000. The failure is said to have been caused by speculating in Chicago margins.
OAKLAND.—O. D. Jaquess, general store, has assigned to Parsons & Scoville.
UNION MILLS.—Frank A. Freeman, groceries and dry goods, is reported to have assigned.
WASHINGTON.—S. D. Baldwin, trading as S. D. Baldwin & Co., drugs, has assigned.

IOWA.

ALBA.—T. S. Thorp, butcher, gave a bill of sale for $1,200 and four chattel mortgages for $2,600.
BAGLEY.—W. G. Bremer & Co., grocers, have failed. Liabilities secured $1,757.
CLEAR LAKE.—J. H. Salisbury, general store, is reported to have failed.
DANVILLE.—L. S. Herrington, grocer, is reported to have failed.
FORT MADISON.—Charles H. Sandvos, dry goods, has assigned to J. D. M. Hamilton. Liabilities about $13,000; nominal assets $10,000.
IOWA FALLS.—M. Van Buskirk, general store, has assigned.
LADORA.—John Keil, Jr., shoes, has assigned.
NEW LONDON.—Mrs. Jane Sterrett, grocer, has failed.

KANSAS.

DANVILLE.—T. G. Moffett, general store, has assigned.
McPHERSON.—E. L. Waller & Son, furniture, have had a mortgage for $2,552 foreclosed.
PITTSBURG.—Vickers & Maloy, general store, have been attached for $1,596.

KENTUCKY.

BURNSIDE.—C. K. Drane & Co, general store, have called a meeting of creditors.
ELKTON.—C. M. Russell, dry goods, offers to compromise at 25 cents.
GREENUP.—M. S. Warwick, dry goods, has assigned.
LOUISVILLE.—D. R. Musselman & Co., tobacco, have assigned to J. P. Byrne. Liabilities reported at $40,000.
LOUISVILLE.—George Robben, chair manufacturer, has assigned to Robert Cochran.
RUSSELLVILLE.—Clarke & Price, general store, have assigned.

LOUISIANA.

BASTROP.—H. B. Newhall, general store, has failed.
BONNET CARRE.—G. Duhe, general store, has failed.
NEW ORLEANS.—Robert Fasnacht, liquors and commission, has assigned. Liabilities $22,267; assets $28,854.
NEW ORLEANS.—Lucius W. Miller & Co., machinery, have assigned. Liabilities $38,134; assets $25,070.
NEW ORLEANS.—Romain & Otis, produce, have called a meeting of creditors. Liabilities $9,000; assets $10,600.
NEW ORLEANS.—B. Rosenberg, varieties, has assigned. Liabilities $3,042; assets $1,200.

MAINE.

CALAIS.—W. A. McGlinchy (agent), dry goods, has compromised at 50 cents. Liabilities $9,000.
CANTON.—Edwin Thompson, stoves, is in insolvency.
FARMINGTON.—D. W. Austin, grocer, is reported to have failed. Liabilities about $12,000.
LEWISTON.—C. H. Pendexter, fancy goods, is in insolvency.
NORTH ANSON.—Samuel Bunker, shoes, has been attached.
SKOWHEGAN.—Brice M. Hight, agricultural implements, has been attached.
WINDHAM.—Jennie Mann, millinery, has been attached.

MARYLAND.

BALTIMORE.—Emanuel Lipper, liquors, has assigned.
BALTIMORE.—J. E. Sewell, grocer, has filed a petition in insolvency.
CUMBERLAND.—J. M. Foreman, grocer, has assigned to W. M. Price.

MASSACHUSETTS.

AGAWAM.—J. C. Kent, butcher, is in insolvency.
BOSTON.—Adams & Co., stationers, are in insolvency.
BOSTON.—Miss M. F. Barnes, millinery, has failed and offers 50 cents, which, it is thought, will probably be accepted. Liabilities about $3,000.
BOSTON.—George Dunbar & Co., railroad supplies, have failed. Liabilities $35,000. An offer of 25 cents has been accepted.
BOSTON.—George A. Hentz & Co., teas, offer 15 cents. Liabilities about $2,500.
BOSTON.—L. N. Tucker, laces, has failed, and offers 20 cents. Liabilities $16,000; nominal assets $8,000; actual assets about $4,000.
BOSTON.—Withington & Austin, bakers, offer 62½ cents, 12½ cents cash and 25 cents each in three and six months, which will probably be accepted.
BROOKFIELD.—Joel H. Rogers, general store, is reported to have failed. Liabilities $13,000; nominal assets $10,000.
EAST FALMOUTH.—J. H. Robinson, grocer, has settled at 25 cents.
HAVERHILL.—I. S. Davis, grocer, is reported to have failed. Liabilities $1,200.
HUDSON.—H. G. Regan, clothing, has failed.
LAWRENCE.—C. H. Cheever & Co., dry goods, are reported to have assigned.
LAWRENCE.—Michael Fitzgerald, liquors, has been attached.
LAWRENCE.—J. E. O'Connell, millinery, has failed.
MARLBORO.—Charles T. Berry, grocer, recently sold out, and offers 50 cents.
MILLER'S FALLS.—L. H. Sweetzer, grocer, has failed. Liabilities about $4,000.
NEW BEDFORD.—R. H. Crossman, stoves, is reported to have failed.
SALEM.—Vincent & Boucher, furniture, have failed.
SHELBURNE FALLS.—The Gardner Manufacturing Company, cutlery, offered 25 cents, which a majority of the creditors agreed to accept, but one of the large creditors refused to compromise, believing the directors personally liable, and it is said contemplates bringing an action against them.
SPRINGFIELD.—The Chapin Paper & Pulp Company offers to compromise at 40 cents, and if not accepted will go into insolvency.
SPRINGFIELD (Indian Orchard).—E. D. Chapman, drugs, has been attached. Liabilities about $7,000, of which $4,000 is to his mother, unsecured; the stock, valued at $3,000, is mortgaged for $1,500.
TAUNTON.—W. L. Gifford & Co., grocers, have been attached. Liabilities $7,600; nominal assets $10,600.

MICHIGAN.

DECATUR.—W. D. Scott, hardware, is reported closed on chattel mortgage of $2,000. He claims stock $4,300, and total liabilities $3,000.
EDMORE.—E. Hunt, groceries and drugs, has been closed up under chattel mortgage. Liabilities about $1,200; assets about the same.
FARMINGTON.—Frederick D. Smith, drugs, has failed.
LUDINGTON.—Rose Dundass, drugs, has been attached.
ST. LOUIS.—S. C. Hale & Co., shoes, are reported to have been attached for $850.
STANWOOD.—G. W. Reed & Co., general store, have assigned. Liabilities about $13,000; assets $10,000.

MINNESOTA.

FARIBAULT.—Lehman & Blume have assigned to T. S. Fellows.
GROVE CITY.—A. P. Nelson, agricultural implements, has assigned to O. N. Linnell.
NEW RICHLAND.—Laughlin & Palmer, agricultural implements, have been attached for $1,093.
WINONA.—J. Bartlett, hats, has been closed on attachments.

MISSISSIPPI.

BURTONIA.—Cohen & Linken, general store, have assigned to M. Wright. Liabilities about $17,000; stock valued at $1,000; preferences for $8,000 are reported.
FAYETTE.—J. B. McCormick, general store, asks an extension.
MAYERSVILLE.—W. S. Bennett, general store, has assigned. Liabilities $4,500; assets about $5,000.
RODNEY.—J. S. Vaughan, general store, has failed and gone out of business.
ROLLING FORK.—B. Sinai & Brother, general store, have been attached by New Orleans commission merchants for $15,000. They have a branch at McKinneysville, under the style of J. & B. Sinai, which has also been attached. The total liabilities are about $35,000.

MISSOURI.

KANSAS CITY.—The Rochester Grape Sugar Company has been attached for $1,000, and judgment has been entered against it for $76,755 in favor of the Bank of Monroe, of Rochester, N. Y.
PLEASANT HILL.—F. A. Little, Jr., jeweler, has failed.
ST. LOUIS.—W. B. Grubbs & Co., gents' furnishing goods, have been attached for $4,150.
ST. LOUIS.—Todd, French & Co., wholesale boots and shoes, assigned on the 10th inst. to Samuel Pepper, giving preferences for $8,950. The liabilities are said to be about $135,000; assets $99,250, consisting of stock $75,000, bills receivable $15,000, equity in hypothecated collaterals $9,000. The failure is attributed to doing too large a business for their capital. They began in November, 1881, with a capital of $25,000.
TRENTON.—L. Ballinger, stationer, has been attached.

NEBRASKA.

CULBERTSON.—W. Z. Taylor & Co., general store, offer 25 cents—10 cents cash and 15 cents on time. The creditors want more. Liabilities $14,000; actual assets about $5,000.
GRAND ISLAND.—Felix Gunter, confectioner, has been attached.
WYMORE.—A. C. Jansen, general store, has failed.
WYMORE.—L. Tessier, clothing, has failed.

NEW HAMPSHIRE.

CHARLESTON.—Wesley A. Hunt, general store, who was recently burnt out, is reported offering to compromise at 50 cents.
GORHAM.—F. C. Stevens, grocer, offers 50 cents.
ROCHESTER.—M. L. Burr, dry goods, offer 25 cents. Liabilities $4,400.
STARK.—Smith & Pike, general store, offer 25 cents. Liabilities $13,000; assets $3,500.

NEW JERSEY.

HACKETTSTOWN.—George W. Smith, carpenter and builder, it is said offers 50 cents. He was burnt out on the 23d ult., settling his insurance at $1,425.
PATERSON.—The Paterson Soap Works have been sold out on a judgment in favor of E. B. Atterbury, and the effects bought in by him, and he is now running the business.
PATERSON.—Schoonmaker & Gerow, dry goods, have been closed on a chattel mortgage for $3,500. Liabilities about $7,000; nominal assets $4,000.

NEW MEXICO.

ALBUQUERQUE.—W. S. Monroe, saloon, has been closed under a chattel mortgage.

NEW YORK.

ALBANY.—Friend Humphrey's Sons, leather, assigned on the 12th inst. to George L. Stedman, giving preferences for $123,300, the principal amounts being to John Ferris $10,000; Harriet L. Gregory $5,670; J. H. Humphrey, trustee, $5,000; Louise M. Purple $11,000; Annie O. Rider $6,500; H. T. Devereaux $7,029; Mechanics' & Farmers' Bank $11,500; First National Bank of Glens Falls $9,000; First National Bank of Rondout $3,500; contracts at the Johnsburgh tannery $13,600. The New York house assigned on the 2d inst.
BATAVIA.—At a meeting of the creditors of A. H. Chase, lumber and coal, he asked an extension of three, six, nine and twelve months, which was generally agreed to. Liabilities $82,000. Afterwards he assigned.
BATH.—W. H. Shepard, hardware, has assigned.
BROWERTON.—Christopher D. Walkup, speculator, has assigned.
BUFFALO.—The schedules of Sidney G. Poole, lumber, show liabilities $79,359; nominal assets $41,796; actual assets $8,546.
BUFFALO.—W. Zoern, tobacco and cigars, has assigned to George Woesner, Jr.
DANVILLE.—J. C. Finn, grocer, has assigned to M. O. Austin. Liabilities $2,600; assets about $1,800.
HERMAN.—T. P. Bellinger, general store, is reported to have failed.
HUDSON.—Ryan & Lape, cigar manufacturers, have been closed by the sheriff.
HUNTER'S POINT.—Mrs. S. E. Peck, grocer, has assigned.
NEW YORK CITY.—Albert Baumann, tobacco, assigned on the 16th inst. to Henry Schoen, giving a preference to Abraham Baumann, $2,300.
NEW YORK CITY.—Blossom, Hayne & Co., naval stores, have suspended and are in liquidation, Mr. Blossom to retire on the 1st prox. The liabilities are about $120,000, all on notes held, it is said, by seven banks. Their merchandise accounts have all been settled, and it is said that they have transferred property to secure the banks. They have been in business many years, and were formerly regarded as the principal brokers in the rosin and turpentine market, but for the past three years have been mainly exporters and merchants, buying principally in Wilmington and Charleston, and exporting to London and Trieste.
NEW YORK CITY.—The schedules of John De Wilde, harness, show liabilities $13,432; nominal assets $7,881; actual assets $521.

NEW YORK CITY.—George W. Griffin & Co., shipping and commission merchants, assigned on the 12th inst. to Edward Earle. The failure is attributed by the firm to shrinkage in values and bad debts. The liabilities are about $125,000, and the assets, it is said, will depend mainly on how they are managed, as they are mainly in Cuba and Porto Rico, where their principal trade was. The firm is composed of George W. Griffin and E. S. Churchill. They began in December, 1879.

NEW YORK CITY.—The schedules of Brace Hopkins, iron, show liabilities $26,568; nominal assets $25,553; actual assets $20,171.

NEW YORK CITY.—The schedules of Humphrey & Co., leather, show liabilities $826,477, including $67,727 contingent on indorsements, which it is thought will probably be good; nominal assets $667,204, not including $72,212 bills receivable pledged as collateral; real assets $119,507. A committee of creditors has been appointed, consisting of William Palen, Ambrose K. Ely and Edward H. K. Belcher.

NEW YORK CITY.—Ives, Beecher & Co., wholesale whisky, wines and teas, assigned on the 13th inst. to William J. Osborne. Preferences were given to Sazerac de Forge et Fils, Angouleme, France; F. W. Cosens & Co., Jerez, Spain; J. Girardeau, La Rochelle, France; James Latimer and Alexander Fleming, St. Croix; Bank of New York, National Banking Association; Merchants' National Bank $25,000; Platt & Woodward $48,000. The firm says that the assignment was the result of the depressed condition of the whisky market on account of congressional agitation and the failure of Congress to provide relief in not passing the bonded extension bill, together with the stringency in the money market, which affected the sale of their paper. They were large holders of whisky, in which the depreciation and shrinkage have been great, and, seeing no hope in the future, they determined to stop at once, as they found on the 10th inst., when their accounts for the year had been completed, that they had been doing business at a loss for some time past. The liabilities are said to be between $400,000 and $500,000, all on notes to the banks, and they claim to have no merchandise debts. The assets are not yet known, but the firm hopes to make a good showing. The firm has been doing business in this city since 1857, and has always been highly regarded.

NEW YORK CITY.—Pedro Lima, coffee, assigned on the 10th inst. to James B. Clark, giving a preference for $300. He began last June, claiming $8,000 capital.

NEW YORK CITY.—David W. McLean, and David W. McLean & Son, ship chandlers, assigned on the 14th inst. to Charles E. Pell, the former's individual preferences being $22,154, and the firm's $1,428. The principal preferences were to Dannatt & Pell $11,532; J. K. Rapp $5,069; Mrs. H. N. Parker $2,400; Peter S. Parker $1,000. The assignments, it is said, were made to protect the mercantile creditors. Mr. David W. McLean was dangerously ill with rheumatism of the heart; he had given accommodation paper which was falling due, and for which no provision had been made, and not knowing how matters stood, on account of his condition, an assignment was decided upon. He has considerable property, and his attorney thinks, aside from these noted, he is amply solvent and able to pay all he owes. The merchandise creditors of the firm are all preferred, and their assets are said to be about $12,000.

NEW YORK CITY.—William K. Peyton, dry goods, assigned on the 10th inst. to Richard B. Kelly, giving preferences to Ellen Brennan $500; H. B. Claflin & Co. $25,000. The schedules show liabilites $41,176; nominal assets $31,194; actual assets $18,859.

NEW YORK CITY.—Augustus Rice, Continental Chromo Company, assigned on the 16th inst. to Victor Hein, giving preferences to Moritz Stern $13,050; Louis Rosenstein $2,280; Moritz Senftenberg $975; total $16,305. Liabilities $35,000; assets about $27,000. Dull trade and poor collections are ascribed as the cause.

NEW YORK CITY.—The schedules of J. R. Royce, hay, show liabilities $7,242; nominal assets $6,392; actual assets $2,963.

NEW YORK CITY.—The schedules of Richard Salembier, laces, show liabilities $144,846; nominal assets $140,995; actual assets $46,424.

NEW YORK CITY.—S. W. Sheldon, grocers' sundries, assigned on the 13th inst. to Henry D. Hotchkiss, giving preferences for $1,175. Liabilities about $20,000; assets $10,000.

NEW YORK CITY.—F. C. Shotwell, iron pipe and brass goods, assigned on the 12th inst. to John Shotwell, giving three preferences, the amounts not being mentioned. The liabilities are reported at $30,000; assets $20,000. His failure is attributed to backing W. L. Schoener, brass manufacturer, of Brooklyn.

NEW YORK CITY.—John Wales, ladies' suits and cloaks, assigned on the 12th inst. to Arthur D. Williams, giving six preferences aggregating $1,177. Ill health, poor trade, strong competition and heavy expenses are ascribed as the causes of the failure.

NEW YORK CITY.—William H. Wheeler, glass, assigned on the 12th inst. to Billings Wheeler, Jr.

NEW YORK CITY (Mott Haven.)—Bartholomew Lynch, shoes, assigned on the 15th inst. to Gilbert Lloyd.

NYACK.—H. J. Blauvelt, manufacturer of ladders, is reported to have assigned.

ROSENDALE.—Alfred Palen, general store, has assigned to Simon Van Wagenen, giving preferences for $2,330.

SYRACUSE.—Levi W. Ellis, manufacturer of mill cogs, has assigned.

SYRACUSE.—Charles J. Powers, drugs, has assigned to Frederick C. Dillaye, giving preferences for about $10,000, of which $6,000 is to Nancy M. Powers. Liabilities $17,000; assets about $15,500.

WADDINGTON.—W. T. Marshall, general store, has been sold out by the sheriff on a judgment for $3,500.

NORTH CAROLINA.

LOUISBURGH.—E. G. Brown, general store, has assigned.

MILLS SPRING.—Cowart & Brother, general store, are reported to have failed.

WILLIAMSTOWN.—W. B. Williams, general store, has assigned to J. D. Liggs.

OHIO.

ANDOVER.—L. H. Merrill & Co., agricultural implements, have assigned to C. S. Darrow. Mr. S. C. Merrill assigned individually to W. Benjamin.

CINCINNATI.—Pfirrmann & Pfau, wholesale liquors, have suspended, the result, it is said, of over production and the failure of Congress to pass the bonded extension whisky bill. The firm claim a surplus of about $500,000, the liabilities being placed at about $425,000, and say they are amply able to pay in full if allowed time. The liabilities, it is said, are all on notes, $225,000 of which is secured by whisky in bond. The business was established many years ago by Mr. Pfirrmann, and the present partnership was formed about fifteen years ago. They had a very large business, employing, it is said, about $500,000 capital, and were formerly regarded as one of the strongest firms in their line in the city. Mr. Pfirrmann is president of the German National Bank.

CINCINNATI.—L. G. Schmidt, stoves, died suddenly on the 14th inst., and the store has been closed by the sheriff.

CLEVELAND.—Benjamin Schwartz, dry goods, has assigned to William H. Loew.

COLUMBUS.—L. Beck, restaurant and saloon, has failed.

COLUMBUS.—David J. Thomas, grocer, has assigned.

COSHOCTON.—Joseph H. Hay, hats, has assigned to H. C. Herbig. Liabilities reported at $12,000.

EAST LIVERPOOL.—The Liverpool Glass Manufacturing Company has assigned to N. U. Walker. The company has been in operation about six months.

GENOA.—C. F. Camper & Brother, general store, have failed.

LIMA.—East & Lewis, millers, are reported to have assigned to Israel McJenkins.

MOUNT VICTORY.—P. S. Howe, general store, has been closed by the sheriff.

NAPOLEON.—H. E. Casey, grocer, has assigned to William H. Brownell.

NEW PHILADELPHIA.—English & Dixon, founders, have assigned to William Campbell. They have been closing up and endeavoring to sell out for some time past. The property is mortgaged for $10,000.

PIQUA.—Sawyer & Co., grocers, have assigned.

TIFFIN.—Lewis Ullrich, drugs, has assigned to Frank Wagner.

WINDHAM.—J. S. Poultney, miller, is advertised to be sold out by the sheriff. His mill was appraised at $3,000.

BRADFORD.—Execution has been issued against D. F. H. McDowell, grocer, for $300.

DOYLESTOWN.—J. Howard Moore & Co., marble, have had execution issued against them.

EASTBROOK.—Jordan & Shontz, millers, have failed.

GRATZ.—E. J. Umholz, general store, is reported in the hands of the sheriff on judgments for $569.

HARRISBURG.—J. D. Breneman, florist, has been sold out by the sheriff.

HOLLSOPPLE.—Tobias Mishler, general store, is reported in the hands of the sheriff.

LA BOEUF.—V. R. Gillette, agricultural implements, was sold out by the sheriff. He added sewing machines to his business, and he attributes his failure to this.

LEBANON.—Execution for $1,400 has been entered against Philip F. McCaully, shoes.

LEBANON.—Henry B. Mann, carriages, is advertised to be sold out by the sheriff on the 23d inst.

MAHANOY CITY.—C. Metz, saloon, is in the hands of the sheriff, and it is thought doubtful if the unsecured creditors will be able to get anything. His real estate, valued at $10,000, is said to be fully incumbered. Liabilities about $18,000.

MILESBURG.—A. W. Rishell & Co., general store, have had execution issued against them on a judgment for $1,600.

PHILADELPHIA.—John G. Hack, shoes, has compromised at 30 cents.

PHILADELPHIA.—Samuel Hecht, trading as S. Hecht & Co., wholesale notions, has failed. He claims liabilities of $36,000 and assets estimated at $50,000, being a surplus of $14,000. Judgments aggregating $33,973 have recently been entered against him.

PHILADELPHIA.—George H. Immendorf, steam fitter, was advertised to be sold out by the sheriff on judgments for $795. His assets are nominally about $900.

PHILADELPHIA.—A. F. Kappella, shipwright, has assigned to E. L. Levy. He succeeded Doughty & Kappella after the former's death in January last. His means are believed to be limited, and on the 5th inst. he was attached by H. F. Burroughs for $5,000 for money loaned.

PHILADELPHIA.—L. Pucini, fruits, has been sold out by the sheriff, realizing $3,208. Liabilities about $9,000.

PHILADELPHIA.—The statement of D. W. Read, ores, shows liabilities $36,000; assets $44,700. D. W. Read & Co. in liquidation; liabilities $55,157; nominal assets $147,959; actual assets $59,481.

PHILADELPHIA.—The Mengel Manufacturing Company, tinware, has been sold out by the sheriff, realizing $400. Liabilities $600.

PHILADELPHIA (Germantown).—Brooks & Spiegel, furniture, are in the hands of the sheriff on judgments for $4,686.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

BRADSTREET'S MINIATURE POCKET ATLAS
OF THE UNITED STATES AND CANADAS.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MARCH 24, 1883.

NOTES OF THE WEEK.

The telegraphic dispatches from leading trade centers throughout the country, to BRADSTREETS', reveal a slightly improved condition of general trade, stimulated in certain directions by local causes, and retarded in other localities by influences of a like nature. In the east, while collections are reported somewhat slow, general trade is improving, and in some lines is quite active. In the middle states the improvement noted is moderate, general trade is quiet and somewhat lacking in spirit. An absence of speculative feeling is noticeable, and jobbers are buying for near wants rather than with a view to future requirements. Staples and necessaries, however, are steady and show a fair consumptive demand, and there is a general impression that the outlook will grow more encouraging with the coming of more seasonable weather. In the west the general movement of trade is fair, and its tone is upon the whole firm. Satisfactory sales for staples are recorded, and in jobbing lines trade has been fairly active, in some districts even excellent. Collections, upon the whole, are fair, though there are some complaints of the scarcity of money. Particular causes have operated to retard the movement of trade in certain localities, such as unfavorable weather, the difficulty of travel on account of the badness of the country roads, the fact that farmers are busy putting in spring crops, etc. Throughout this section, however, the feeling is general that with the advance of spring the outlook will become brighter. In the south, while there are no special features to note, trade is generally satisfactory, though business is quiet rather than brisk in tone. Collections from the cotton states were more satisfactory than usual, and the proportion of cash sales was somewhat larger. The general crop news received at New Orleans was favorable. At San Francisco there is some complaint about the continued dryness of the weather, and fears are expressed that unless rain falls soon the wheat crop will be a partial failure.

The continuous stringency in the loan market this week, which the Treasury Department has declared itself unable to relieve, has tended to restrict business on the Stock Exchange within narrow limits. Prices, however, have been well sustained, and a fractional advance has been recorded from day to day, though on Thursday this was broken by a sudden bear attack on the market at the close, which gave it the first ripple of excitement it had had during the week. The high rates for call loans, averaging about 12 to 14 per cent., have had the effect of sending money to this center from various quarters, which will doubtless make itself felt next week; and foreign exchange having fallen below the gold importing point, bullion is flowing in from abroad. The stock market is still left entirely to the professionals, and the steadiness of quotations, in the face of the money strain, is considered to be good evidence that stocks have fallen into strong hands. A renewal of activity may be expected as soon as loanable funds become more abundant.

The objections to bullion certificates as legal tender currency, published in our issue of March 10, have elicited no adverse criticism, so far as we know, except from the author of the project, whose response is in another column. Even Mr. Sylvester admits that the issue of his proposed legal tender silver bullion certificates would enable a gambling syndicate to "manipulate the price of silver bullion to their advantage;" but he strangely seems to doubt the evil of this, for the reason that it would be to the advantage of gamblers "to put the price up as often as down." At the same time he acknowledges that the question of its material fluctuation for an indefinite future is the real problem. It is unnecessary to follow Mr. Sylvester in his effort to render his proposition more attractive, so long as he admits that the proposed legal tender silver bullion certificates would enable gamblers "to manipulate the price of bullion to their advantage." The legal tender power of the silver bullion certificates being governed by the gold value of silver bullion, a fluctuating gambling margin in bullion quotations would render the certificates of but little more use than railroad stock as currency in the channels of legitimate trade.

Moreover, but one method of determining the gold value of silver bullion from day to day has been suggested. It is that the Secretary of the Treasury should issue daily bulletins of the gold value of silver bullion, and that the Treasurer's quotation of one day should govern the legal tender capacity of silver bullion certificates for the day following. It is reasonable to assume that if this legal tender bullion certificate project were carried into effect the magnitude of silver bullion operations in Wall street would control the London market. It would then be possible for the Secretary of the Treasury at Washington, in collusion with a New York syndicate, to establish, with a scratch of his pen, from day to day, a speculative price for silver bullion at New York and London.

Some progress is apparently being made in the direction of securing for the city of New York the water supply of which it has long been in need. According to the provisions of the bill introduced on Wednesday for that purpose, the officers composing the Board of Estimate and Apportionment, the Commissioner of Public Works, and two other persons to be appointed by the Mayor, are to be Aqueduct Commissioners; the Commissioner of Public Works is to submit plans, estimates and specifications for a new aqueduct; the work of constructing the aqueduct is to be done by contracts made at public letting, and is to be inspected and supervised by the engineers in the Department of Public Works. It is a matter for congratulation that even so much progress has been made, but one cannot help regarding it as a humiliating fact that the city of New York, the commercial metropolis of the country, has not the power to build the necessary works to give it an adequate supply of water, and is obliged, in consequence of its powerlessness, to be made the quarry of contending political factions and patronage-mongers.

In a letter in another column our San Francisco correspondent calls attention to the inaccuracy of some statements concerning the wine production of California, which appeared recently in the New York *World*. As our correspondent points out, the *World's* estimate of the production of the state amounts to but little more than half that given by the Viticultural Commissioners in their report for the year 1881, and he adds that the production has been on the increase since. In opposition to the *World's* statement that on account of the slowness of the returns from new vineyards most of those engaging in agricultural operations on an extended scale prefer to put their money into wheat, which pays at once, he sets forth the estimate of the Viticultural Commissioners as to the future value of the vines planted, and mentions that since the printing of their report in 1881 there has been some extensive planting, the area planted in 1882 not falling far short of 20,000 acres. Particular interest will be felt in the statements of M. Grossjean, a commissioner accredited from the French Department of Agriculture, who has been studying the viticultural and horticultural industries of California, and the system of irrigation there in use. Speaking with especial reference to the San Joaquin valley, M. Grossjean remarked in substance that the Sierra Nevada range afforded an inexhaustible water supply to irrigate the whole valley; that this water, in connection with the sandy loam, furnished the necessary means of successfully combating the phylloxera, and that if the irrigation question were once settled, the valley from end to end would become "the France of America, or the vineyard of the world."

Mr. John Bright has always been, by profession and practice, a man of peace. His course throughout his life has been a consistent one in this regard, and he has never hesitated to throw the weight of his influence in favor of peaceable settlements of civil dissensions and of international disputes. It is not too much to say that his benignant philosophy, always voiced in impressive and forcible terms, has contributed its share toward the growth of that better spirit and temper which, as the well disposed hope, is manifesting itself in political relations. In an address just delivered by him as rector of the Glasgow University Mr. Bright returned to his old theme and dwelt upon the advisability of a peaceable policy, even with a view to self-interest. He declared that the cost of the American civil war would more than have sufficed to free every slave without bloodshed, and with regard to Ireland, so long a thorn in the side of England, he said that if the Treaty of Limerick had been kept, and freedom of religion granted, the sad history of that country might not have been written. There can be little doubt that the doing of exact justice in this world would do away with many, perhaps most, of the causes of conflict that arise, and it is as little doubtful that a larger measure of justice would be obtained by the adoption of peaceable means for the settlement of controversies. But, while it is easy to accept Mr. Bright's philosophy, the fact must be recognized that mankind are still far from having reached that ideal of intelligence, unclouded by passion, which would permit of the unhindered rule of justice and peace. There have been few years, even in recent times, in which it has not been made plain that the last argument of nations has lost little of its potency.

THE CAUSE OF CITY MISGOVERNMENT.

The Chicago *Times* does not appear disposed to apprehend aright the position of BRADSTREET'S on the much-discussed city government question. It attributes to us "great admiration for the democratic principle," and a belief that there is "in it some miraculous saving virtue." We have declared just the contrary; and in the very articles which the *Times* undertook to review we said: "To reinstate representative government in New York city will not act as a specific for present evils. Government is a matter of practical business, and who offers a specific in politics is a quack.

The city of New York is just now suffering from quackery of the worst sort. The democratic principle should be restored to New York city, simply as the best thing obtainable, not as a cure-all." By a restoration of the democratic principle in this connection we mean that New York should be left to govern itself under a general scheme of an elective body, having the power of taxation and a mayor with full executive authority. Under such a system New York should be left to survive or perish at its own hands. If the Chicago *Times* were to go over carefully the history of New York city it would learn that the political corruption in relation thereto was facilitated by the very devices which were sent down from Albany to remedy the evils resulting from government by a city council and a mayor, for it is as true now as ever that in politics a board is a screen. It may be said that the supposed necessity of resorting to the devices of boards and commissions was in itself evidence of the breakdown of the representative principle. On the contrary, it only made more clear how ill-qualified human nature is at best to provide government for itself in masses. Experience, however, shows that the best thing attainable is the government of the people by themselves, through the device of a representative body. If the *Times* does not believe this, to be consistent, it should call for a speedy return of "the strong man." Practical men understand that local government under the representative principle will always be crude. A community is, indeed, not entitled to any better government than it can provide for itself.

The *Times* should know that the Tweed business in New York was essentially an abuse of credit. Tweed and his associates possessed what amounted to a power of attorney over the estates of the New York taxpayers. This power of attorney was abused. Their possession of it is traceable to the bad judgment of well-meaning men in the early years of this century, at a time when the virtues of the compound-interest sinking fund were supposed to be a cure-all for the evils of the funding systems. But this and kindred mistakes can be corrected. The late and current developments in Philadelphia form the best answer to those who fear that such misgoverned cities as Chicago and New York cannot work out their own salvation. Philadelphia has an advantage as regards the comparative number of householders, but it is believed that the average intelligence of the voters of either New York or Chicago is fully equal to that of Philadelphia. Since being deprived of a general credit in the loan market, Philadelphia has materially reduced its rate of taxation; simplified, in a measure, its accounting; compelled a close collection of taxes; cut off useless officials; dignified and improved the membership of the local legislature or city councils; and, finally, is in a fair way to secure the passage of a bill at Harrisburg consolidating and simplifying the multiplied departments of the city government. Yet Philadelphia has been quite as much a ring-ridden city as New York ever was, all of the reforms in which have been of local origin. So it will prove with New York if her government ever is reformed, and so with Chicago.

CONSTRUCTION OF THE TAX AND TARIFF LAWS.

A great deal was said in the discussion upon the Tariff bill as to "Treasury-made law." The phrase was used as one of reproach, to indicate that the Treasury authorities, in the construction of tariff statutes, give a different interpretation to them from what was intended by the framers of the laws. The criticism, in some instances, was deserved. But if Congress took the time or care to enact laws which are not ambiguous, which are not capable of double construction, which explain themselves, there would be no ground for the accusation as to "Treasury-made law." The main features of the Tax and Tariff act have not yet gone into effect, yet it is very evident that, in order to put the machinery of the new law in motion, there will have to be a great deal of "Treasury-made law." Not a day passes that important questions are not raised by importers and by customs officers as to the meaning of the new law, and for months to come the customs authorities will be engaged in "putting this new law upon its feet." For it is very evident that it is not sufficiently clear to stand alone. Already some important decisions have been made which have received strong condemnation from Congressmen. Yet any impartial expert, who carefully examines the law, will in the main be compelled to agree with the Treasury decisions.

The truth is, all legislation is passed with such haste that the wonder is, not that errors are found in the statutes, but that so few are found in them. Some of the problems which confront the Treasury construing officers are as interesting as they are complicated.

At the outset, nobody knows absolutely whether the act of March 3, 1883, is to take the place of all previous tariff legislation or not. Certainly that was the purpose of the framers of the act. They have not made their purpose clear in the language used. The enacting clause of the tariff portion of the new act, section six, reads:

> That on and after the first day of July, 1883, the following sections shall constitute, and be a substitute for, title 33 of the Revised Statutes of the United States.

Now, title 33 of the Revised Statutes of the United States contains the body of the Tariff law as it existed at the time the statutes were revised. It has been urged, however, that as to this there is some exception, for the reason that the revision is an abstract of all previous laws, and that in some cases it omitted important features of former laws. There is an express provision in the Revised Statutes (section 5,596), under which it has been claimed that acts which were omitted from the revision, for instance, are still in force. Section 5,601, Revised Statutes, expressly provides that the revision is not to affect or repeal any act passed after December 1, 1873, and that such later acts are to be regarded as subsequent statutes, which have a repealing effect upon the Revised Statutes in particulars in which they may differ from the latter. Now, it happens that title 33 of the Revised Statutes contained only such tariff laws as were in force December 1, 1873. The Revised Statutes did not contain all the body of the Tariff law which was in force on March 3, 1883, the time of the passage of the new law. More than ten years have intervened since the adoption of the Revised Statutes. In that period some important additions have been made to the Tariff law. On February 8, 1875, for instance (United States Statutes, vol. 18, p. 307), an act was passed "to amend existing customs and internal revenue laws, and for other purposes." This act changed the duties on silk goods, on still wines, on some articles in the metal schedule, and on a number of other articles. On February 18, 1875 (Revised Statutes, vol. 18, p. 316), there was an act passed "to correct errors and supply omissions in the Revised Statutes." On March 3, 1875, there was an act passed "to further protect the sinking fund and provide for the exigencies of the government." This act changed the duty on a number of articles—sugars, for instance, and bolting cloths. On the same date an act was passed restricting the refunding of customs duties. Now it does not affirmatively appear whether the new tariff act applies to these acts passed subsequent to the tariff revision or not. That must be a matter of construction. It possibly may give rise to two rates of duty on the same articles. The new tariff law is supposed to have anticipated such a possibility in that in section 2499 the following occurs: "If two or more rates of duty should be applicable to any imported article it shall be classified for duty under the highest of such rates." Yet it is very evident that this qualification was intended to apply to any two rates which might be found to have been provided for in the new law itself, and that the framers of this provision had not in mind any tariff statutes which were enacted subsequent to the enactment of the Revised Statutes.

The act of February 8, 1875, which is not a part of "title 33 Revised Statutes," imposes a different rate of duty upon certain articles from the rates in the Revised Statutes or those in the Tariff act of March 3, 1883. For instance:

Article.	*Rev. Stat.*	*Act Feb. 8, '75.*	*New law.*
Bichromate of potash.....	3c. per lb.	4c. per lb.	3c. per lb.
Macaroni and vermicelli...	free list	2c. per lb.	free list
Jute butts.....	free list	$6 per ton	$5 per ton

It will, of course, be argued that the new law repeals all preëxisting statutes which are in conflict with it in accordance with a general principle of law. But less significant technicalities than that have led to important litigation in tariff matters, and have kept the question as to the legal rates open for years. The Treasury is to-day, for instance, still refunding duties paid in 1857, under Treasury constructions of law which the United States Supreme Court has declared illegal. The Treasury will undoubtedly hold that the higher rates of the law of February 8, 1875, are not in force. Customs brokers may think otherwise.

One decision which the Treasury has made has excited the pottery manufacturers, who fear that in consequence of it foreign manufacturers will flood the country with their wares before July 1, and that American manufacturers will lose their market for the year. The decision is the one which declares that sections 7 and 10 of the new law, which repeal the law as to "charges, packages and commissions, etc.," went into effect upon the passage of the act, and not on July 1, when the duties upon the crockery schedule take effect. In opposition to the Treasury ruling some Congressmen who were active in framing the act say that it is absurd to assume that the packages and commissions provisions, which are logically a part of the earthenware schedule, can go into operation before the tariff upon that schedules does. However, the executive officers have construed the law, and importers can only save themselves from the effects of it by payments "under protest" and appeals to the courts. For the pottery manufacturers, who say that their trade will be ruined, there is no appeal to the court. The effect of the decision of the Treasury will undoubtedly be, that as soon as the ruling becomes known in foreign ports, there will be a change in the system of making invoices.

There was a change in the conference report in the earthenware schedule which was important, and which was not discovered until after the adjournment of Congress. The effect of this change was to raise all except common crockery to 60 per cent., and to increase the rate of that to 55 per cent. from 50.

One error has been discovered in the official print of the Tariff act, but it is not in the official copy of the law at the State Department. It is in the metal schedule. According to the printed law certain grades of hoop iron are made to pay "1 2-10 of one *per* cent. per pound." The first "*per*" should be stricken out. The law is "1 2-10 of one cent per pound."

The Treasury has received no information as to the report that any one proposes to test the constitutionality of the Tariff act on the ground that the tariff portion of the law originated in the Senate, and not in the House.

The higher rates on all-wool dress goods, as compared with the same goods when mixed with some other materials, have had the effect of causing large orders to be cabled to foreign mills to secure all the output they can produce before July 1. The new duty is 9 cents a yard and 40 per cent. ad valorem, as compared with 7 cents and 35 per cent. ad valorem. The trade in these goods is almost entirely in foreign hands. It is very possible that the large importations will glut the market, particularly in view of the very considerable reductions in the duty on raw wools.

An important question of construction has been raised as to the provision relating to Sumatra tobacco. The department is in doubt whether the 85 per cent. is to be computed upon the entire invoice or upon the contents of each separate package. The decision is reserved.

The regulations providing means for securing the tobacco rebate have been prepared. They are very voluminous, and have been drawn with the special object of preventing the possibility of fraud. The amount required to pay the rebate is estimated at $4,000,000. The First Controller of the Treasury has under consideration the question whether the Commissioner of Internal Revenue can pay these rebate claims in the absence of specific appropriation, which was not contained in the act. If all the 410,000 dealers in tobacco lay claim for the rebate, the lot of the Commissioner of Internal Revenue will not be a happy one.

BREADSTUFFS EXPORTS.

As anticipated, the February report of exports of domestic breadstuffs for that and the preceding month, and the eight months ending February 28, presents very gratifying totals when compared with shipments during the preceding fiscal year. The gains made are due to excess exports of wheat, wheat flour and Indian corn. In February the exports of wheat from the United States aggregated 5,666,035 bushels, as compared with 5,318,183 bushels in February, 1882, a gain of 347,852 bushels. This exhibit was a slight decline from the January movement, when there was 7,005,296 bushels of wheat exported, as against 6,772,511 in January, 1882, a gain of 232,785 bushels. It will be observed, however, that the February totals represent a greater gain over the corresponding time last year, although smaller in the aggregate, than were those of January. The foreign shipment of this grain has been checked again during March, and the report of its movement during the current month will possibly show a further decline in the total sent out of the country.

The exports of wheat flour during the opening months of 1882 and 1883 show a corresponding movement. In January last there were exported from all ports of the United States 935,486 barrels of wheat flour, against 482,731 in January of last year, a gain of 452,755 barrels, nearly 100 per cent. In February last, however, wheat flour exports declined to 902,633 barrels, 32,853 barrels less than in the month preceding, against only 526,499 barrels in February, 1882, a gain over the shipments of the month last named of 376,134 barrels, or about 71 per cent. Indian corn, on the contrary, went abroad in increased quantity in February. In the opening month of the current year the exports of Indian corn amounted to 4,170,706 bushels, against 1,659,619 bushels in January, 1882, a gain of over 240 per cent. In February the exports were augmented to a total of 5,304,689 bushels, 1,133,983 bushels in excess of the January movement, and a gain of 2,886,463 bushels, as compared with the shipments in February, 1882, which amounted to 2,418,226 bushels.

In the statistical exhibit, which is appended, are shown the aggregate exports of breadstuffs during January and February, 1882 and 1883, with values thereof, the number of barrels of wheat flour and Indian cornmeal being reduced to the equivalent number of bushels respectively of wheat and Indian corn:

BREADSTUFFS EXPORTS DURING JANUARY AND FEBRUARY.

	1883.		1882.	
	Bushels.	*Value.*	*Bushels.*	*Value.*
Wheat	12,671,331	$14,103,023	12,090,694	$13,875,680
Wheat flour	8,272,035	10,005,249	4,541,535	6,053,395
Indian corn	9,475,395	6,570,323	4,077,845	2,908,252
Indian cornmeal	154,140	137,091	150,892	125,643
Rye	111,476	89,323	149,334	147,388
Oats	30,839	22,792	45,667	26,256
Barley	39,910	20,785	20,234	16,073
Totals	30,755,126	$31,608,586	21,076,191	$23,152,717

From the above it appears that the total increase in exports of breadstuffs during the past two months was 9,678,935 bushels, and the value $8,455,869. The increased foreign shipments during the past two months have been of wheat 580,637 bushels, as compared with a like period in 1882; of wheat in the form of flour, 3,730,500 bushels; of Indian corn, 5,397,550 bushels; of Indian corn, in the form of meal, 3,248 bushels, and of barley, 10,676 bushels, or in all 9,722,611 bushels. The decreases are found in exports of rye and of oats. Of the former 37,858 less bushels were exported in January and February, 1883, than in those months in 1882, and of oats the falling away in shipments abroad was 5,818, or together 43,676 bushels. These, subtracted from the total of excesses, again give the net increased export movement of 9,678,935 bushels. For eight months ending February 28 last the excess of exports of breadstuffs were 5,316,591 bushels as compared with the like eight months of the preceding fiscal year, or a trifle over 54 per cent. of the excess exports for the months of January and February in 1883, as against that of those months in 1882. The following table furnishes the details thereof, with the number of barrels of wheat flour and cornmeal reduced respectively to bushels of wheat and corn:

BREADSTUFFS EXPORTS EIGHT MONTHS ENDED FEBRUARY 28.

	1883.		1882.	
	Bushels.	*Value.*	*Bushels.*	*Value.*
Wheat	88,300,407	$98,928,221	72,049,698	$85,913,163
Wheat flour	28,671,463	38,302,371	17,340,633	23,764,323
Indian corn	14,685,160	10,541,170	37,046,831	21,068,309
Indian cornmeal	661,228	640,828	856,764	709,114
Rye	910,983	689,529	502,098	512,108
Oats	205,095	115,101	440,473	224,739
Barley	288,288	203,922	172,526	124,796
Totals	133,725,624	$149,431,142	128,409,033	$135,296,632

The gains in shipments of grain to foreign countries during the past eight months were of wheat 16,250,709 bushels, as compared with the corresponding eight months in 1881–82; of wheat in the form of flour, 11,333,830 bushels; of rye, 408,885 bushels, and of barley, 115,662 bushels, or in all, 28,109,184 bushels. The decreases in shipments were of Indian corn, 22,361,681 bushels; the same, in the form of meal, 195,536 bushels, and oats, 235,378 bushels, or in all 22,792,595 bushels, leaving a net increase for the eight months, as stated above. The striking fact is here shown that almost the only significant decline in exports of breadstuffs during the past eight months, as compared with those of the corresponding portion of 1881–82, was in Indian corn.

In examining the record of exports of breadstuffs from the various ports during February, the two months ended therewith, and eight months concluding February 28 last, it is observed that the New York quota of 1882 has not been fully maintained in all respects. In February, 1882, the value of breadstuffs exported from New York amounted to 44 per cent. of the total value of all grains shipped abroad during that month, but last month New York's share amounted to 38 per cent., the figures being $4,922,057 in February, 1882—against a total value of $11,175,193—and $6,028,411 last month, against an aggregate of $15,773,009 for all breadstuffs exported. San Francisco, which city exported wheat next in point of value to that sent abroad from New York, shipped 24 per cent. in point of value of that exported in February, 1882, and about 21 per cent. last month, Baltimore, next in rank, possessing but .97 of 1 per cent. in point of value in February last year and 1.8 per cent. in 1883, a gain over the second month of 1882 of 1.1 per cent.

For the past two months, as compared with the total values of exports in January and February in 1882 and 1883, the following cities sent abroad, in the order named, the following percentages of the total value of breadstuffs exported:

PERCENTAGE OF TOTAL VALUE OF TWO MONTHS' EXPORTS.

	1882.	1883.		1882.	1883.
New York	42	39	Philadelphia	3.6	5.8
San Francisco	28	22	New Orleans	.4	.54
Baltimore	7.7	17			
Boston	7.5	6.1	Totals	89.2	90.44

The proportion of the total value of exports of breadstuffs shipped from New York during the past two months has therefore declined 3 per cent., as against the like exhibit one year ago; that of the shipments from San Francisco, 6 per cent., and from Boston, 1.4 per cent., or a total decrease in proportion of the whole sent abroad at these three cities of 10.4 per cent. On the other hand, Baltimore alone has gained 10.3 per cent. more than it possessed last year; Philadelphia, 2.2 per cent., and New Orleans, 1.1 per cent., or in all about 12.6 per cent. That proportion of the value of the breadstuffs export trade lost by New York, Boston and San Francisco during the current year, it will therefore be seen, is almost exactly equal to the gain in the same direction made at Baltimore.

CALIFORNIA WINES.

The correspondent of BRADSTREET'S at San Francisco writes as follows, under date of March 15:

A New York dispatch, dated yesterday, has created considerable comment among wine men. It was an extract from an article in the *World*, commenting upon the production and quality of California wine. The article states that "it is extremely doubtful whether the whole product of the state amounts to 5,000,000 gallons, and by far the larger part of this is consumed on the spot." The *World's* estimate is ridiculously low. The following appears in the report of the State Board of Viticultural Commissioners for the year 1881: "Owing to the general frosts throughout the state, both in fall and late in spring, the vintage was diminished in quantity at least one-third, and the most reliable authorities place the amount of wine made, of all kinds, at less than 9,000,000 gallons, including what was distilled into brandy." This was for 1881; but it is not an overestimate to put the vintage of 1882 at between 10,000,000 and 11,000,000 gallons. I incline to the latter figure, because a good deal of wine in the aggregate is made which is not marketed, or if so, is sold locally and is not taken into account in the general estimate of product. Certainly last year's California vintage was double that of the *World's* estimate. The amount of wine received in San Francisco from the interior was:

	gallons
In 1879	3,364,607
In 1880	3,759,743
In 1881	4,037,879

The shipments of wine by sea and rail to points outside the state, but chiefly to the east, were:

	gallons
In 1879	2,155,944
In 1880	2,187,353
In 1881	2,845,365

It should be remembered also that San Francisco is only one of several shipping points by railroad to the east, but the figures above quoted from the official record prove the inaccuracy of the *World's* generalization.

Touching the further remark by the *World*, that "no returns can be hoped for in less than four years from new vineyards, and that the consequence is that most of those who engage in agricultural occupations on an extended scale prefer to put their money into wheat, which pays at once," there is this to be said, first, experience proves that a new vineyard pays the expense of cultivation in the third year, and yields a profit upon all the outlay in the fourth, after which the return increases annually. Relative to the alleged preference for wheat over grapevines, it is sufficient to quote the following from the Viticultural Commissioners' report for the year 1881. Referring to 1880 and 1881, it states: "This board has received from the legislature up to date $14,000, and has, by its efforts, been the prime cause of the planting of over 40,000 acres of vines, whose value will be over $10,000,000 in four years hence, without the other accessory and needed improvements that must accompany their maintenance and which must be set at not less than $5,000,000 more. Yet this is merely the initiative of the gigantic strides of an agricultural pursuit whose production at this proportionate rate will in the near future rival, if it does not surpass, in extent the famed production of France itself." It may be mentioned here that many vineyards of from 100 to 2,000 acres in extent have been set out since this report was printed, the new area planted in 1882 not falling far short of 20,000 acres. These facts are a sufficient reply to the *World's* statement that "the wine-makers of California are crippled by the want of capital, and that the growth of their industry is much slower than the favorable conditions of the soil and climate would lead one to expect." Governor Stanford has planted a very large experimental vineyard in northern California, and a still larger one has been set out by a Los Angeles vigneron.

But the *World* furthermore remarks that California will not be competing in wine production with France or any other European country for a long time to come; that its wines are inferior to European vintages, chiefly through lack of experience in handling; that it is utterly impossible they should take a place for years to come in the European market; and that it is in other fields than wine production that Europe must take warning from the growth of this western world.

In reply to this, it is sufficient to refer to the dispatch of the French Minister of Commerce, M. Pierre Legrand, to the President of the Reims Chamber of Commerce, of date August 26, 1882, in which the Minister calls attention to the fact, reported to his bureau by the Minister for Foreign Affairs, "that the importations of champagne into the United States of America fell off from 123,574 dozens during the first six months of 1881 to 104,755 during the same period of the present year, a diminution of 18,819 dozens." The Minister continues:

"According to American newspapers this result is due not only to the competition of California wine, but also to the bad quality of the article imported into the United States by our manufacturers of champagne, who, after they have established their brands in public favor, send only wines of inferior quality. Under these circumstances the consumer is thrown back upon the imitations, which are not much poorer than the imported article, and are very much cheaper. The same observations may apply, at least to a certain extent, to all of our growth. As for California wines it is said that the white wines are improving in quality. The reds, in spite of the peculiar taste due to the soil and the methods of manufacture, are preferred by many persons to the cargo wines shipped from Bordeaux, which are said to be of low quality and a relatively high price."

The publication of this official letter by the Reims Chamber of Commerce was resented by the leading champagne shippers, and a meeting was convened to organize a committee of defense. The call was signed by Messrs. Heidsieck & Co., G. H. Mumm & Co. and Giesler & Co., and the meeting took place at Reims, September 19, 1882, twenty-five houses of Reims, Epernay, Ay, Mareuil and Avize being represented. Indignation resolutions were adopted because of the publicity given to the imputations in the Minister's letter, and the slackening of trade with America was attributed to bad grape harvests. That the French exporters feel California competition keenly is evident from the following passage in their resolutions:

"The sparkling-wine trade of California, in want of any better way to compete with French wines, may employ American newspapers to advertise; but that the Chamber of Commerce of Reims should seem to set the seal of its approbation upon the interested remarks of the manufacturers of sparkling wines in California, by making itself their benevolent and silent editor, seems to us a most extraordinary way of interpreting the duty confided to it of protecting the interests it represents. Our trade, of which loyalty has always been the fundamental principle, should not expect such treatment; it cannot rest under the unmerited injury that has been inflicted upon it. It seems to us to offer a sufficient answer to our California competitors, for we can show that, in spite of all the difficulties we have had to contend with, our American trade has not fallen off."

This is pretty conclusive as to the opposition side of the question, and it looks as if the *World* had become "the benevolent," though not "silent, editor" of French wine circulars.

There is just one other point in the *World's* comments requiring authoritative rebuttal in the interests of California wine products. That journal admits the excellence of some of the California red wine, but ignores the white wine entirely. There happens to be in California at present a gentleman who comes duly accredited from the French Department of Agriculture, whose mission it is to report upon the viticultural interests of this state. M. Henri Grossjean, the commissioner in question, has made a careful study of the system of irrigation in use, and of the viticultural and horticultural industries of California, and speaks in unqualfied terms of the outlook of this state as a wine-producing country. He likewise highly appreciates our light wines. Speaking of one section of the state—the county of Fresno, in San Joaquin valley—he said, recently:

"The advantage of your valley is that the snowy peaks of the Sierra Nevada will furnish an inexhaustible water supply to irrigate your whole valley, if the irrigation is properly understood and cared for; and this very water, in connection with your sandy loams, gives you the necessary means of successfully combating the phylloxera, that terrible scourge now destroying the wealth of France. * * * * Only the most valuable vineyards can afford to use chemicals. Submersion on adobe soil is the only remedy that is practical. On sandy soil,

where the insect cannot travel, the vineyardist does not need to fear the same. You have both these conditions here in the San Joaquin valley, especially in Fresno. In my own country no more vineyards are planted on hillsides, as they used to be, except with resistant vines. Our formerly most worthless sandy lands are now found to be the best adapted to grapes, and their price has increased enormously. If once the irrigation question is settled the San Joaquin valley from end to end will be the France of America or the vineyard of the world. You can here produce the costly sweet, heavy wines of France. I have tasted fine ports, muscat and madeira hardly to be excelled; but in regard to lighter dry wines, I believe the soil and climate are not adapted for them. Light wines may be produced, but they must be drank soon, as they will be heavier both in body and strength after a few years."

His testimony regarding the light wines of Napa and Sonoma counties was equally strong, and his report to his own government is looked forward to with a great deal of interest.

In conclusion, it is proper to say, as was pointed out several months ago in BRADSTREET'S, that the bulk of the wine consumed in the east is California vintage, either pure or mixed, and sold under foreign labels. The methods of this dishonest trade were exposed in that communication, and the facts then stated have been reproduced in a variety of ways by other organs without acknowledgment of the source of information. If the *World* and other leading eastern dailies would unite in exposing the frauds in the home wine trade, and insist upon selling all California wine for what it is, a great benefit would be conferred upon producers, consumers would be protected against fraud, and the question of competing with Europe in the production of wine would be settled.

FASHION IN RELATION TO TRADE.

The changes to which fashion owes its potency as a business factor exhibit, on the whole, greater variety and more rapid transitions as communities advance in wealth and taste. While the East adheres in textile and other productions to ancient types, in this country and Europe inventive design is free from past conventional trammels. It is only, however, within the latter portion of this century that changes in modes have been noticeably active. Mechanical science and chemistry have largely contributed to this result, the former in constructive means of production, the latter in new combinations of material, and, so far as relates to textile fabrics, in the extraction and application of dyes. It is evident that the more abundant the materials for working with, as increasing possible combinations, the more vigorously will fashion thrive, to the great benefit of trade. Imperious as are the exigencies of fashion—the public ever demanding something more attractive—requirements in this line are promptly met. The secret of this concurrence in taste, which renders the supply of demand on the part of manufacturers and jobbers possible, consists in the completeness of business organization carried so far as to be anticipative of wants. In former times the risk run by manufacturers acting independently in their endeavors to establish fashions were enormous; now all such risks are avoided. Fashions neither come by chance nor are they fixed so arbitrarily as is ordinarily assumed. Involving, as do fashions in leading departments, enormous outlay on the part of manufacturers and jobbers, it is of the first importance that there should be, on the part of producers, confidence in their stability or of their ready acceptance by the public. The public is not altogether passive, and among the means of securing favor to fashions is the maintaining certain characteristics of preceding styles, while otherwise modifying them, avoiding extremes, and so rendering more gentle the transition. To this end a season's fashions will be preceded by a comparison of views among manufacturers who have means to assert their influence at the quarters whence fashion emanates. Through the ample means of communication that exist between the great centers of production and consumption the element of uncertainty as to coming styles is being more and more eliminated from trade. The guiders of fashion are thus enabled to legislate authoritatively, and their whispers, unheard by the general world, set at work, in the confidence thus created, the countless looms of Europe and the United States, and shape activity in all departments of artistic industry.

Fashion has its suspensive periods in certain branches of trade, perplexing manufacturers and checking transactions. It is seen that the current of business, by its very sluggishness, is destined to turn, but the guiding influences are out of control. Paris, which gives the laws of fashion to the world, declared long since for the renaissance style, but its adoption in England was impeded by adherence to the cumbrous Queen Anne style, and later, under the æsthetic teachings of Ruskin, by Eastlake devices with stiff geometrical lines, carried even into upholstery. Just now the renaissance style, with quaint and subdued forms, rich carving and graceful curves, is in the ascendant, but furniture manufacturers and dealers rely for the greater part of their trade on the untrammeled individual taste of the public, who seek out what will please them independently of the all-permeating decrees of Parisian fashions. Paris may strike the keynote, as in this renaissance style, but the public have become so educated in art that they dictate the descriptions of furniture they deem most attractive, or suggest modications of presented styles. Dealers themselves incline to the belief that this prevailing taste largely increases the amount of business done. No fashion decrees will prevent a party, for instance, furnishing a reception room in Japanese, Persian or Indian style. In fact an eclectic taste in furniture prevails. It is similarly the case in the gold and silver smith trades. Sales are found to be enlarged by encouraging intending purchasers to gratify their own fancies in the choice of table ware. Thus any styles of ornament are judged suitable, whether the embellishment of the surface be by engraving, chasing, repoussé or raised figures, such as tendrils, leaves or otner devices. Fashion herself would declare for the richest styles of ornamentation. Metal work, even with the inferior metals, and in articles of construction in which efficiency is to be mainly looked for, are not without the sphere of fashion, serving in an important degree to stimulate sales in many departments. A striking instance is presented in the stove line, in which new styles succeed each other. Makers claim to turn out their own, but let an important advance be effected as in the parlor low feed tile stoves, superseding the tall round base-burner, with feed all but out of reach, and we find it turned out, with varied modifications, in every stove center, to meet the incoming demand. New activity in metal-working has been created by the elegant open parlor grates and fenders, nickel-plated and in gilt and bronze, with standards and andirons and richly decorated metallic tiles for linings for back and sides of fireplace, which have come so greatly into fashion.

No feature in the fashion trade is more interesting than what may be termed the compensations introduced. Thus the reduced production of silk in France is the less felt owing to the skill brought to bear in blending silk with wool in what are known as soft goods, and for which Japanese, Chinese and Persian silk suffices, as well as in other combinations, both for dress goods and the complementaries of dress, as trimmings, etc. The business done in silk goods in this country is enormous. The census report shows that in 1880 there were 382 silk factories in the United States, all but 26 of which were located in New Jersey, New York, Connecticut, Pennsylvania and Massachusetts. The capital invested amounted to $18,962,310. Last year the sales of silk in this country amounted to $75,000,000, about one-half of which was manufactured at home. Fashion has given an important aid to the sale of our home productions, characterized by fineness of texture and artistic patterns. It is the same with other departments of dry goods in which we compete with foreign productions. Competition with the fashion goods of Europe is intensified by the cheapness of ocean freights, and rapid transportation by steam rendering England, France and Germany our next-door neighbors. The dry goods, home and foreign, now in stock, abound with daintily effective styles. Prices, on the whole, closely approximate to those of the previously corresponding season, and with the fresh activity imparted to the business world from various causes, and the improved purchasing power of consumers, larger spring transactions than ever are looked for.

OCCASIONAL NOTES.

The Louisville *Courier-Journal*, in an aggressive article upon the southern iron situation, severely handles the persons who signed the Calera manifesto, and who, it declares, sought by so doing to put a stop to the development of the mineral lands in the southern states. The *Courier-Journal* charges that the men signing that 'manifesto have been guilty of inconsistency, to say nothing worse, in regard to the statements made concerning the cost of iron, and declares that certain of the signers had made and indorsed statements directly contrary to that manifesto. The same charge in substance is made against certain southern newspapers which, the *Journal* says, asserted that iron could be made at a small cost when they wanted furnaces established in particular localities, and afterward changed their tone for interested reasons. The journal referred to declares that the statements concerning cost of production criticised by it are evidences that the men who own the furnaces are beginning to fear competition, that the hoped-for development of the south proceeds too rapidly for them, and that they are anxious to put a stop to the march of improvement in order to maintain their present scale of profits. The Louisville paper says that the country is determined to have cheap iron, and that the south can make it, not only in a furnace here and there, but in furnaces throughout three or four states. It declares that the course the iron men referred to have adopted in striving to build up their own interests at the expense of the public welfare defeats itself, destroys public confidence and commercial credit, depreciates the value of their own securities and indicates a lack of judgment which may manifest itself in other directions. It says that the part of wisdom is to accept the situation as it is and to build up commercial structures on this foundation, and not on a false foundation constructed to prop "a thieving tariff." The *Courier-Journal* is well known to be an earnest advocate of a tariff for revenue only, and in that sense it may be said to be a free-trader of the free-traders. This fact is to be borne in mind when considering its arguments, but it cites facts to sustain its position regarding the cheapness of production which can only be disposed of by a preponderance of opposing evidence. Certain Tennessee and Alabama journals have declared the *Courier-Journal's* statements to be untrustworthy as a reflection of the general situation, saying that the Louisville paper has selected exceptional periods and localities from which to compile its statistics. This the *Courier-Journal* denies, asserting that its figures represent a fair average. The outcome of the controversy will be looked for with interest, the point involved being one of immediate concern to the country at large, and especially to those engaged in iron production.

Lieutenant F. V. Greene, of the U. S. Engineer Corps, has been investigating the experiments in underground telegraphy in New York and Boston, and the results of his researches have been made public. He notes that in Boston the telegraph and electric-light wires are still carried overhead. In the thickly settled business part of the city there are no poles because the sidewalks are narrow and are underlaid with a continuous line of vaults which render the pole system impracticable. In the absence of poles the wires are carried on fixtures secured to the roofs of houses. The telephone wires were carried in the same manner until recently, when in consequence of the accumulation of these wires near the central office, and the risk of their total destruction during a storm, the telephone officers lately undertook an experiment with the underground system, intending to apply it to all their trunk lines in the principal part of the city. Lieutenant Greene describes the plan adopted by the company, but says that it is intended merely for the relief of a trunk line which had become so overloaded as to be in danger of destruction overhead, and that it offers no solution of the problem of an underground system for house connections similar to a system of gas and water mains and service. One of the principal electrical difficulties, that arising from induction, is completely overcome in the cables used by the company; another, arising from retardation, is not overcome, and practical experience shows that with all the cable experimented in Boston this cause limits the direct use of the telephone with such cables to those having a length of two miles or less.

Lieutenant Greene observes that in New York nearly all the wires are carried overhead, partly on fixtures attached to the roof and partly on poles, and that in certain districts the number of wires is so great that cables containing a number of smaller wires are used on the poles. He notices the Western Union Company's lines of underground cables from its office to the Hudson river and to the Stock Exchange, and he refers to the contracts recently made by the company for the laying of some three miles of pneumatic tubes from its central office to its branch offices, Twenty-third street and Broadway. The telephone wires are all carried overhead, some as single wires and some in cables. The electric-light wires are also overhead, except in one district (Edison's "District No. 1"), where there are 4,000 incandescent lights in use, the electricity for which is supplied entirely by underground pipes. In this district mains are laid on both sides of the street, consisting of two-inch or three-inch wrought-iron pipes, carrying the two poles (copper bars) insulated in a compound of asphalt. The pipes are in sections of twenty-five feet, united in a junction box, which can be opened at any time in order to make the house connections. At each intersecting street there is a manhole, where the mains are brought together and put in electrical connection with a feeder (which is simply a large main) coming direct from the electrical machines in the central office. There are twenty such feeders, and in all twenty-one miles of mains and feeders, independent of the house connections. This system is in complete and successful operation at the present time, and it constitutes an unanswerable argument to the plea that such a system is not feasible for electric lighting.

The conclusion arrived at by Lieutenant Greene is that the experiments now in progress in New York and Boston and the long use of underground wire in London and other cities in Europe prove incontestably that the underground system is perfectly feasible for trunk lines. Its first cost, he remarks, is greater than that of the pole system, but the immunity from storms and overhead dangers may possibly make it cheaper in the end. The expense, however, is not, he thinks, beyond the means of the companies. Of the immense number of systems proposed, he says, it is for the companies interested to determine by experiments which is the best. The electric-light wires, the telegraph wires and the trunk lines of the telephone can all, he thinks, be carried underground with perfect success; but the distribution of the telephone wires to separate houses in the underground system is attended with difficulties yet to be overcome. Lieutenant Greene recommends that the Washington authorities pass an order prohibiting the further erection of any poles whatsoever on the public streets in that city for carrying electric wires, provided that such poles as may be necessary for distributing telephone wires may be erected in the alleys; also that certain experiments be made on the fire-alarm wires to test an underground system less expensive than those now in use; that estimates be submitted to Congress next fall for placing all the fire-alarm wires underground, and that a special report be made to Congress and plans of the underground routes proposed for the different companies in that city, and the draft of a bill to compel the removal of the overhead wires at an early date.

The Albany *Law Journal* discusses pleasantly the alarm felt by some well disposed people on account of the presence in the country of so large a number of lawyers as the census shows to be dwelling in the United States. This alarm the *Law Journal* says is wholly unnecessary. It asserts that on the whole the lawyers seem to get along pretty well, being as a class neither richer nor poorer than their fellows of other occupations. There is some truth in the Albany paper's declaration that it is no more dangerous to have 65,000 lawyers than it is to have 85,000 doctors and 44,851 barbers to practice upon the lives and throats of the community; and most reflecting people will heartily concur in the statement that the 12,000 journalists and the 19,000 plumbers make more mischief than the 65,000. The learned and witty editor of the *Law Journal* ought to know whereof he speaks, since he is both lawyer and journalist, and in common with most of his suffering fellows he has learned to know the plumber too well. We hope that it is no private grief that prompts our contemporary to ascribe to the 285,000 milliners, dressmakers and seamstresses the production of more mischief than is brought about by the lawyers. There is much weight in the suggestion made by the editor of the *Law Journal* that it is not the lawyers that make the litigation but the litigation that makes the lawyers. Those who set themselves up as critics of the much abused legal profession, especially as regards the admittedly full supply of its members, occupy the position of railing at one of the most striking symptoms of the varied and complex activity which marks our modern social development. Better have law even with lawyers than an absence of all law without them.

According to an abstract of the forthcoming report of Professor Henry E. Colton, the geologist of the Tennessee Bureau of Agriculture, which is printed in the Nashville *Banner*, the output of coal has been showing a very gratifying increase of late years. The total estimated amount mined in 1880 was 589,420 tons; in 1882 it reached 857,879 tons, and a certain increase is promised for 1883. The rate at which production has proceeded will be best understood by reference to the work of individual mines. The Sewanee mines, which are said to be the seat of the largest operations in the state, were first operated since the war in 1866, in which year they shipped 10,640 tons of coal. Coke was first made there in 1868, when 5,377 bushels were shipped.

In 1870 these mines shipped 36,926 tons of coal and 63,685 bushels of coke. In 1880, 114,170 tons of coal and 3,666,755 bushels of coke were shipped. In 1882 the quantity shipped amounted to 144,893 tons of coal and 5,407,645 bushels of coke, an increase over 1880 of 30,723 tons of coal and 1,741,889 bushels of coke. The increase in the coke-making business has, as will be seen, been notable. This has been in response to a greatly increased demand. In 1870 there was in the state but one iron furnace, using part coke and part raw coal, and making fifteen to twenty tons of iron per day. There were then twenty coke ovens in the state. In 1883 there are seven stacks in blast, all using coke, and there are 866 coke ovens making furnace and foundry coke. Besides this, some coke is made in pits, and 125 more ovens are being erected.

In the *North American Review* for April the scriptural and the legal aspects of divorce are presented respectively by the Rev. Dr. Theodore D. Woolsey, well known for his insistance on the indissolubility of the marriage tie, and by Judge John A. Jameson, a jurist whose long experience with divorce cases in Chicago, both on the judicial bench and at the bar, lends to his observations a very special value. Dr. P. Bender, a Canadian, who has studied to some purpose the political, social and economic conditions of his country, under the title "A Canadian View of Annexation," makes a forcible presentation of the reasons which incline many citizens of the Dominion to regard with favor the idea of absorption by the United States. Senator John A. Logan sets forth the need which exists for "National Aid to Public Schools" in the several states and territories. The Rev. Dr. Howard Crosby writes of "The Dangerous Classes" that menace the perpetuity of civil order and the peace of the community, meaning the manipulators of corporation stocks and the men who, having amassed enormous wealth, use it for nefarious purposes. James C. Welling, president of Columbian University, treats of "Race Education," the problem that confronts the philosophic statesman of the presence in our body politic of a strong negro contingent. "The Water Supply of Cities" is discussed by Charles F. Wingate, "Ethical Systems" by Professor F. H. Hedge, "Street Begging" by Rev. Dr. Charles F. Deems, and "Criticism and Christianity" by O. B. Frothingham.

The annual report on the penitentiaries of the Dominion, which has just been laid before the Canadian Parliament, shows some very gratifying results. The reduction in crime in 1881-82 exceeded that for 1880-81, and was on the whole more satisfactory in its nature. During two years there has been a falling off in the convict population of 151. The influences which have brought about this decrease have not been confined to particular localities, for it is found that in Manitoba and British Columbia, where the gain in point of numbers has been so large by reason of immigration, the differences between the statements of 1881 and 1882 are scarcely perceptible. The total number of convicts in all the penitentiaries of the Dominion on June 30, 1882, was 1,128, or 90 less than on the corresponding day of 1881. An increase in the salaries of the majority of the officers of the penitentiaries is strongly recommended, with the view of obtaining the services of a superior class of men to those now generally employed. Some such measure as this is certainly necessary, if the reform of the convict is to be made a feature of prison administration, since, without the payment of salaries higher than those usually paid to officials having charge of convicts, it will be difficult, if not impossible, to secure the services of intelligent and efficient men. Among the measures proposed by Mr. Moylan, the inspector, which are most deserving of attention, and which display an intelligent grasp of the true principles of penal science, are the separation of newly received convicts for some months and of the habitual and incorrigible from other prisoners, to the end that the well-disposed may not be placed in forced relations with the more hardened offenders, and the proper classification of the prisoners, as far as the means for doing so would permit. He also urges the appointment of a competent commissioner to examine into and report upon the details of the Crofton system, as carried out in Ireland, with a view to its adoption, as far as practicable, in Canada.

In a paper on the parliamentary representation of the metropolitan, agricultural and manufacturing divisions of the United Kingdom, recently read before the Statistical Society, Mr. Arthur Ellis gave some statistics from which he drew the conclusion that a state of things was fast approaching in Great Britain in which the borough and city electors would number double those of the county electors, and that while the growth of non-electors continued the stationariness of their representation was becoming more and more apparent. The drift of numbers, wealth and intelligence, it appears, has been distinctly from the county areas to those of boroughs and cities. Mr. Ellis thought that the time had arrived when it would be necessary to formulate some kind of basis upon which representation should rest. Instances were given of how the various tests proposed (such as the population test, the wealth test and the responsibility test) conflict with each other. It seems that for every member returned from the metropolitan (taking the acreage of Middlesex to represent that area) there are 8,227 acres, while the agricultural division returns one member per 78,235 acres; the manufacturing division, one member per 86,170 acres; Scotland, one per 336,138 acres, and Ireland, one per 206,089 acres. From this it might appear that the metropolis is over-represented, but, as was shown, this is far from being the case. Applying the population test, it is found that there is only one member per 172,480 inhabitants for the metropolitan area, while the agricultural division sends one per 37,161 inhabitants; the manufacturing, one per 58,776; Scotland, one per 64,386, and Ireland, one per 51,087 inhabitants. Taking the proportion of members to the number of qualified voters, the metropolis had one to every 15,904 inhabitants; the agricultural division, one to 3,156; the manufacturing division, one to 6,203; Scotland, one to 5,139, and Ireland, one to 2,235. An application of the wealth test also shows that the metropolis is severely ill-treated. The statistics, it was said, present a mute but strong protest against the startling way in which numbers and wealth alike are pushed in deference to the feudal attributes of "acres."

SPECIAL CORRESPONDENCE.

A VERY PROFITABLE CLASS OF BRITISH INVESTMENTS.

London, March 1.—As a class it is difficult to point out a more uniformly profitable description of investments than those of Great Britain in her colonial banks. There is, however, one exception to the rule—as, indeed, there is to most rules—and in this instance the exception is to be found among the Anglo-Indian banks. Ten years ago these Anglo-Indian banks were as profitable as the rest, but the depreciation of silver put them in the anomalous position of having to return their liabilities in appreciated gold, while their assets only consisted of depreciated silver. Their capitals were raised in this country, where also they had borrowed large sums upon deposit for employment in India. But all these millions thus obtained here it was found in the course of two or three years had to be written down to the extent of one-sixth, and the operation might have been a disastrous one. It is something to say that no failures were involved, though naturally reserve funds were almost completely annihilated, and for the time dividends were much reduced; nor have they yet recovered from the shock thus administered. It shows the danger which may attend even a thoroughly sound banking business when conducted on the principle of paying gold against silver or against paper, and it is curious to note that those Indian banks which are purely upon a silver basis—that is, only pay deposits in rupees—have of late years prospered well.

But even including the Anglo-Indian companies among the list of British investments in colonial banks, it is found that the total market value of such investments is not far short of double the amount of the capital invested. Below you will find a list of the twenty-two such undertakings in which this capital is fixed, and it must be borne in mind at the same time that many of these have obtained important amounts on what may be almost called permanent deposit—lent in fact for six months or a year certain:

	—Paid up capital—		—Market value—	
British colonial banks.	*Total.*	*Per share.*	*Total.*	*Per share.*
Agra Bank	£1,000,000	10	£1,000,000	10
Bank of Africa	500,000	12½	600,000	15
Bank of Australasia	1,200,000	40	2,610,000	87
Bank of Brit. N. America	1,000,000	50	1,100,000	55
Bank of British Columbia	250,000	20	281,250	22½
	96,000	10	105,600	11
Bank of New South Wales	1,000,000	20	3,350,000	67
Bank of New Zealand	1,000,000	10	2,750,000	27½
Bank of South Australia	800,000	25	1,312,000	41
Bank of Victoria	500,000	25	740,000	37
Chartered of India, Australia and China	800,000	20	940,000	23½
Chartered Mercantile of India, London and China	750,000	25	510,000	17
Colonial	600,000	30	1,320,000	66
Delhi and London	500,000	25	370,000	18½
English, Scottish and Australian chartered	720,000	20	1,044,000	29
London Chartered of Australia	1,000,000	20	1,175,000	23½
National of Australasia	800,000	4	1,750,000	8¾
National of India	465,250	12½	307,890	8¼
National of New Zealand	350,000	3½	375,000	3¾
Oriental Bank Corporation	1,500,000	25	960,000	16
Queensland National	500,000	5	1,000,000	10
Standard of South Africa	1,000,000	25	2,340,000	58½
Union of Australia	1,500,000	25	4,080,000	68
Totals	£17,831,250	..	£30,020,740	..

While the totals above show us what the average advance on the paid up capitals has been, a consideration of the names upon the list shows that the greater part of the advance in prices is to be credited to Australasian banking. The Australasian banks are at once the most numerous and, with the exception of the "Standard of South Africa," the most prosperous of the entire group, and when it is considered that in addition to these banks, in which home money is sunk, there are a large number of equally prosperous Australasian companies with capital and deposits obtained wholly within the colonies, it indicates what an extensive field there is for banking operations at the antipodes. It is only necessary to consider the enormous growth of banking operations in the Australasian group within the past ten years to be convinced of this fact. Here, for instance, is a contrast of the total Australasian deposits over the nine years 1873-1882, and the figures may be allowed, without further preface, to speak for themselves:

	Deposits, 1873.	*Deposits, 1882.*
New South Wales	£10,279,321	£22,214,694
Victoria	12,280,551	21,909,947
South Australia	2,183,754	4,900,506
Tasmania	858,784	2,775,493
New Zealand	4,713,807	8,883,672
Queensland	2,067,845	5,333,410
Totals	£32,384,065	£66,017,722

Here it is shown that on the nine years the increase exceeds 100 per cent.; in fact, it has reached upward of 11½ per cent. per annum over the whole of this period, and that in the face of an enormous extension of the loan, land mortgage and investment companies, which decidedly compete with the banks by lending money to squatters and merchants and by making advances on produce, while they borrow money from the public upon debentures. Yet, in the face of this increased competition, it is shown that the banks are not only enabled to hold their own but to extend their business very greatly, for it is to be remarked that the discounts and advances have increased with equal rapidity. It is not necessary to reproduce these, but it may be mentioned, in the instance of New South Wales, that the total of these sums due the banks in that colony have increased in the nine years from £9,712,895 up to £24,440,329.

The dividends paid by these companies are as a rule, large, and they are mostly maintained at uniform rates, while surpluses are carried to reserves half yearly, these reserves being now in some cases as large as the paid up capital. At the same time they are certainly profitable holdings, even at the present market values, most of them returning the investor, at the price of the day, between 5 and 6 per cent. for his money, a rate which could well be increased if the additions now made to reserves were divided.

These considerations will show what a truly vast field for the employment of British capital the Australasian colonies have become. Even at the present time these colonies cannot muster between them, all told, as many as 3,000,000 of inhabitants, and yet it has been recently computed by the Agent-General for New Zealand in this country that Great Britain has already sunk £260,000,000 therein, upon which a return of £18,000,000 a year accrues in the shape of interest. These figures would point to no less a sum than £90 per head lent by the mother country to the Australias, and it is computed that the total is growing at the rate of about £20,000,000 a year, including, of course, public loans, banks, companies and merchants' capital. There is no parallel to be found in history to the financial condition of these vast, yet almost unpeopled, countries, where, nevertheless, the railways are worked at a profit, and where settlers are, most of them, found to be well to do. But, then, Australia is enabled to pay the entire interest upon her debt to Great Britain in merino wool alone, and this is a class of payment which Great Britain greatly appreciates. In the last three years, for instance, the value of this import from Australia has averaged nearly £19,000,000 per annum, while, in addition, British South Africa has sent us about £3,200,000 worth per annum, making together an annual value received here of over £22,000,000. This has enabled us to demand a payment of about £7,500,000 a year from France alone, while Germany, Belgium, and even the United States, are our debtors for the Australian wool they obtain. The problem of developing the Australian colonies at such express speed is a most interesting one; but far from British investors being frightened at the prospect of this enormous indebtedness, it is to be noted that Australian investments have never been in greater favor with home capitalists than they are at the present time.

SAN FRANCISCO MUNICIPAL AFFAIRS.

San Francisco, March 14.—The California legislature passed a bill empowering the Board of Supervisors of San Francisco to issue bonds for $500,000, redeemable in twenty years, to cover the deficit in the current fiscal year, as suggested in a former letter. The Constitution requires a two-thirds affirmative vote of all qualified electors before a debt can be contracted by any municipality, and furthermore, that "before or at the time of incurring such indebtedness provision shall be made for the collection of an annual tax sufficient to pay the interest on such indebtedness as it falls due, and also to constitute a sinking fund for the payment of the principal thereof within twenty years from the time of contracting the same." The loan will probably be sanctioned, it being easier to pay interest than the principal sum, and because many parochial politicians would willingly make drafts upon posterity for temporary requirements to avoid the heavy drain of direct taxation upon the "pay-as-you-go" principle.

The United States District Court dissolved the injunction obtained by the Spring Valley Water Company to restrain the Board of Supervisors from fixing water rates, ruling that it was its duty so to do. The Water Company immediately appealed to the Supreme Court of California for its intervention upon precisely similar grounds, but the court promptly ruled against it, and intimated that it had previously passed upon the same point. In point of fact, the Spring Valley Water Company had itself applied to the Supreme Court of the state to compel a former Board of Supervisors to fix rates as required by the Constitution, and obtained a ruling in its favor. Its late application, therefore, was practically for a reversal of that decision, because it apprehended a diminution of its income. The Board of Supervisors subsequently met and rejected the proposition to reduce the water rate by 37½ per cent. It adopted another order however which, while making a substantial reduction, did not deal so harshly with the water company. The mayor has yet to pass upon the order. Should this order be approved the question is not settled by any means. It is a year's truce and nothing more.

As suggested in a former communication the legislature did not pass a bill regulating pilotage, neither did it interfere with towage charges. What it did was to legislate out the republican appointees on the Harbor Commission, and democratic successors have been appointed. The old pilot board has been replaced by new men, but there will be no reduction of the charges upon shipping.

The city remains without gas, and crimes against person and property are on the increase.

San Francisco, March 15.—The charter election resulted in the defeat of the proposed instrument by thirty-two votes. Not one-half of the qualified electors voted. The Legislature has passed a street law which may afford some measure of relief from existing evils. A county government bill has also passed. One of its chapters would operate as a charter for San Francisco if sustained by the Supreme Court, but such a ruling is doubtful.

LETTERS TO THE EDITOR.

BULLION CERTIFICATES AGAIN.

To the Editor of BRADSTREET'S.

SIR—While the following letter is suggested by the editorial on "Bullion Certificates" in your issue of March 11, it is written in no spirit of controversy, but simply with a view of more clearly stating the facts, and my own propositions in relation to them.

The present law provides for the issuing of coin certificates, but to procure such certificates the bullion must first be made into coin, and the deposit is of manufactured coin and not a bullion deposit. My proposition is that the conversion of the bullion into coin involves a useless and unnecessary expense, since bars will lie in the vaults of the Treasury quite as comfortably as coins.

What the denominations of the certificates may be matters little providing they are what the people ask for. The people's preference is the only criterion, and should always be respected, whether the demand be for large or for small certificates, or for coins.

The time is not very remote when to have a bill or "promise to pay" good for its face value in two adjoining states was considered quite an achievement. Our present banking system has materially improved on that state of facts, but there is no reason why the general government, which is legally and appropriately the fiscal agent of the people, should not issue a paper currency based on actual bullion, good for its face value in every state in the Union, and good for its bullion value the world over, or at least good wherever in the world the credit of the United States is respected.

In the matter of expense the bullion certificate system is materially preferable, but this advantage, great as it is, sinks into comparative insignificance

when one is led to appreciate the desirability of a sound paper currency, national in origin and character, and always redeemable in bullion or coin, not merely because only a small fraction of it is expected to be presented for payment at any one time, but because the metal is kept as a deposit in trust for the certificate holder. If a currency of this kind were once established, it would, in my opinion, be as permanent as the existence of commercial institutions.

I admit that the issuing of silver bullion certificates is "open to grave objections." To have these objections considered and carefully weighed side by side with the admitted objections inherent in our present monetary system was one of the objects of issuing the pamphlet.

Admitting that a "gambling syndicate" could manipulate the price of silver bullion to their advantage, is it not apparent that they would as frequently be interested in putting the price up as down, and that, therefore, they could not affect the permanent elevation or depression of its price? The amount of silver in this country and in the world ready to respond to a favorable bid is certainly large, and, one would think, too large to be easily handled. The market would have to be held well in hand, and the manipulations would have to be very rapid, or the plans of the operators would fail and they themselves be the injured parties, while the quiet holders of silver certificates would be neither the worse nor the better off.

Whether or not silver bullion would materially fluctuate in value and continue to do so for an indefinite future is the real problem. The demand for it would be created by the ability to turn it into certificates, and the use of these would depend on the scarcity of gold certificates. If their use became general this alone would tend to give stability to the value of silver bullion, and possibly there might finally result a mercantile ratio of value in place of a legal-tender ratio between gold and silver bullion. One thing is certain, the bullion certificate system eliminates two of the influences which now impede the use of silver, viz., excessive weight and excessive bulk in proportion to value, and leaves the question of ratio only to be solved. Can this ratio be determined by the ordinary laws of trade, or must it be determined by a monetary union or congress of nations, or must the country be kept perpetually balancing between a monetary system based now on gold, then on silver, and then possibly on both. It is more than probable that the formula or scheme that I have proposed may be improved upon; but one of my purposes has been to suggest a possible way of deciding the question of ratios through the instrumentality of trade itself.

There would be some variation in the value of the silver certificates; how much is the question. So does the trade dollar vary in value. In New York city it passes quite freely for 100 cents, while in Washington city it only passes for 90 cents. In Germany before 1873 silver thalers and a few louis d'ors were in circulation, and the relative value of the two coins was daily quoted. The prices of many things, especially house rents, were set in louis d'ors, but people would pay with silver at the day's quotation. Suppose some merchants do mark their contracts "payable in gold," is it not better to give them this privilege than to coin a silver dollar and force them to take it whatever its value? Other merchants may be glad to take silver at its market value, and assume the risk of loss, taking their chances of a possible profit from its rise in value.

The system has not been suggested as perfect, and yet it may be better than the one we now have, inasmuch as it does recognize and make prominent the commercial value of money as bullion, and it may lead to something still more perfect. At present we have a legal-tender silver dollar which threatens to drive away our gold. The American dollar is not a definite weight, or anything but a mere creation of law, and if it can be manufactured out of two metals, one of which is cheaper, the less valuable metal will be the one out of which they will be made, and by means of which all debts will be paid. The legal-tender silver dollar puts a power in the hands of the holders of silver bullion far more injurious than could be that wielded by any "gambling syndicate."

To demonetize silver is to very materially decrease the debt-paying material of the world, and with which millions of our fellow men are alone familiar. To say that silver is not needed when millions of paper bills are issued to increase or supplement the debt-paying power of gold is a little inconsistent.

If it be impossible to establish a mercantile ratio of value between silver and gold in some manner similar to the one I have suggested, still the possibility remains of a ratio established by the legal action of the principal commercial nations. Were this done all three of the possible objections to the unlimited use of silver would disappear.

With the paying material of the world similar it would only remain to make the unit of weight the same, and then the monetary systems of all nations would be uniform. Surely an object as important and as far-reaching in its consequences as this ought to claim attention, and anything pointing or leading to its realization should receive encouragement.

Respectfully yours,

I. W. SYLVESTER.

New York, March 20.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

In the opinion filed in the recently-decided case of the Escanaba & Lake Michigan Transportation Company vs. The City of Chicago, the Supreme Court of the United States laid down very clearly the constitutional principles relating to the congressional control of commerce and navigation. The suit was brought to test the validity of certain ordinances of the city of Chicago providing for keeping the bridges over the Chicago river closed during certain morning and evening hours, and establishing a ten-minute limitation during the rest of the day. The first of these requirements was called for to accommodate clerks, apprentices and laboring men seeking to cross the bridges, at the hours named, in going to and returning from their places of labor. The business of these persons, it was said, would be deranged, and they would be subjected to loss on account of any unusual delay in the morning. It was shown that at the hours named there were three times the number of pedestrians going and returning that there were during other hours of the day. The limitation of ten minutes for the passage of the draws by vessels was imposed for the purpose of preventing inconvenience and delays to foot passengers, teams and other vehicles. The case was decided in favor of the city in the lower court, and the Supreme Court, upon due consideration, sustained the judgment below. Judge Field, who wrote the opinion, said that, independently of any constitutional restrictions, nothing would seem more just and reasonable or better designed to meet the wants of the population of an immense city, consistently with the interests of commerce, than the ten-minute rule and the morning and evening hours which the city ordinance had prescribed.

Proceeding to consider the general principles of constitutional law governing cases similar to the one under consideration, Judge Field said that the power vested in the general government to regulate interstate and foreign commerce involves the control of the waters of the United States which are navigable in fact so far as may be necessary to insure their free navigation when, by themselves or in connection with other waters, they form a continuous channel for commerce among the states or with foreign countries. Such, he said, was the case with the Chicago river, which, together with its branches, must be deemed navigable waters of the United States over which Congress in its commercial power may exercise control to the extent necessary to protect, preserve and improve their free navigation. But the states have full power to regulate within their limits matters of internal police, including in that general designation whatever will promote the peace, comfort, convenience and prosperity of their people. This power embraces the construction of roads, canals and bridges and the establishment of ferries, and it can generally be exercised more wisely by the states than by a distant authority. The general doctrine now firmly established the learned judge declared to be that the commercial power of Congress is exclusive of state authority only when the subjects upon which it is exercised are national in character, and admit and require uniformity of regulation affecting alike all states. Upon such subjects only that authority can act which can speak for the whole country. Its non-action is therefore a declaration that they shall remain free from all regulation. On the other hand, where the subjects on which the power may be exercised are local in their nature or operation, or constitute mere aids to commerce, the authority of the state may be exerted for their regulation and management until Congress interferes and supersedes it." Where from the nature of the subject or the sphere of its operation the case is local and limited, special regulation adapted to the immediate locality could only have been contemplated. State action upon such subjects can constitute no interference with the commercial power of Congress, for when that acts the state authority is superseded. Inaction of Congress upon these subjects of a local nature or operation, unlike its inaction upon matters affecting all the states and requiring uniformity of regulation, is not to be taken as a declaration that nothing shall be done in respect to them, but is rather to be deemed a declaration that for the time being, and until it sees fit to act, they may be regulated by state authority. Bridges over navigable streams which are entirely within the limits of a state, are of the latter class. The local authority can better appreciate their necessity, and can better direct the manner in which they shall be used and regulated than a government at a distance. It is, therefore, a matter of good sense and practical wisdom to leave their control and management with the state, Congress having the power at all times to interfere and supersede their authority whenever they act arbitrarily and to the injury of commerce."

The question to what extent common carriers are liable for the delivery of packages improperly addressed, was considered in the libel suit of Scheuer against the steamboat Drew, decided by Judge Brown, in the United States District Court at New York, on the 20th inst. It appeared that certain goods were shipped without a bill of lading in boxes marked "J. Kastendike, or Jos. Kastendike, Albany." There were two persons named Kastendike doing business in Albany, one in Pearl street, and the other on Central avenue. The former, upon the goods being brought to him, refused to receive them, and they were brought back to the boat. On the following day an employé of the latter was allowed to take the boxes away from the boat. The libellant claimed that this was a delivery to the wrong person, for which the carrier was responsible. Judge Brown, in giving judgment for the Drew, said that, as far as he could see, the carrier in this case was not chargeable with knowledge of any suspicious circumstances, and should, therefore, be absolved from liability. The goods having been shipped without any bill of lading, no documentary evidence of title was required. Had the goods been addressed to Pearl street, it would have been negligence and a violation of the sender's orders to deliver them to any different person elsewhere; as they were not so addressed, however, when they were rejected, the carrier was warranted in the inference that they were intended for the Central avenue man of the same name, who was the purchaser in fact.

A decision upon a nice point in bankruptcy law was also rendered by the same Judge on the 19th inst. in the matter of Samuel W. Gillespie & Co. The firm, it appeared, had been adjudicated bankrupts and Daly & Co., holders of four of their promissory notes payable to their own order and indorsed in blank, proved the notes in bankruptcy, and in 1874 received a dividend of 25 per cent. thereon, which was indorsed on the notes. In 1875 Daly & Co. executed an assignment to A. A. Redfield, but did not deliver to him the notes held by them against Gillespie & Co., nor did he notify that firm's assignee in bankruptcy of the assignment to him. In 1876 Daly & Co., being still in possession of the notes, received from Gillespie's assignee a further dividend of 5 per cent. and in 1877 applied to Hatch & Sons for a loan upon the notes. Hatch & Sons made advances upon the notes, taking them as collateral, and notifying the assignee to pay all further dividends to them. In 1880 Redfield, the assignee of Daly & Co., claimed that the dividends should be paid to him, and the question to be decided was to whom they should properly go. Judge Brown remarked that the question involved in the rival claims to the dividends had been differently decided by high authorities. The claim for the dividend he said was not strictly a claim upon the note against the maker, but a claim for payment from the assignee of the bankrupt upon proof of the bankrupt's notes made prior to the assignment to either of the rival claimants. The principle of all the latter cases is that the first purchaser of the chose in action who neglects to give notice to the debtor or trustee holding the fund, and does not take possession of the proper evidence of the debt, acquires but an imperfect title as respects third persons, and by his tactics is in a sense a contributory party to the fraud perpetrated by his vendor in the subsequent sale to another purchaser of the same debt or fund, and where the latter has used all due diligence by inquiry and notice, the equity of the latter is to be preferred over that of the former. Judge Brown held that the equities of Hatch & Sons were plainly superior in the case before him through the negligence of the first assignee, and ordered the payment of the dividend to them.

The point under what circumstances and for what purposes the interest in an insurance policy on the life of a bankrupt will pass to his assignee was raised in the same court on the 16th inst. It appeared that in 1866 there was issued by the Berkshire Life Insurance Company, of Massachusetts, an insurance policy upon the life of one McKinney, which was made payable to his "executors, administrators or assignees" in consideration of the payment of a certain annual premium during his life. McKinney was discharged as a bankrupt in 1878, and this policy was mentioned in his schedule of assets. No steps were taken by the assignee in relation to it and no premiums paid by him thereon. The bankrupt's wife having another small policy for her benefit, and supposing this policy to be also for her benefit, paid the annual premiums upon the policy until the death of her husband, in 1882. McKinney's creditors contended that the policy passed to the assignee for all purposes whatever, and that he was legally entitled to the whole proceeds, although he did nothing to preserve the policy, and although it did not become due until five or six years after the assignment in bankruptcy, and between four and five years after the bankrupt's discharge, and after the widow had paid the premiums. Judge Brown, in granting an application by the assignee for leave to transfer to the bankrupt's widow whatever interest he might have in the policy, said that, in his opinion, nothing passed to the assignee in bankruptcy save the naked title to the policy.

A short time ago Mr. James Gordon Bennett obtained a verdict against the city of New York for a balance alleged to be due for printing and publishing the Mayor's message in his newspaper, the *Herald*, in 1871. A bill was rendered to the city charging at the rate of $1 a line, the rate charged by him for publishing matter as reading matter. The Board of Apportionment and Audit cut down the bill, allowing only 40 cents a line. The bill as thus reduced was paid, and Mr. Bennett's agent gave a receipt in full. The judgment in Bennett's favor in the court below was overruled by the General Term of the Supreme Court on the 20th inst. The General Term held that the award of the Board and the acceptance of it by Bennett's agent constituted a final and binding settlement of the claim.

A somewhat curious case, and one disclosing very careless business habits on the part of the persons concerned, was that of Mullany et al. vs. First National Bank, decided by the Supreme Court of Indiana on the 14th inst. Action was brought upon notes purporting to be indorsed by the firm of Mullaney & Hays. It appeared that the notes were not in fact indorsed by either member of the firm, or with their knowledge, but their firm name was so used by one Denis Mullany, at the request of one Ryan, the maker. It was shown in evidence that all the parties had been intimate business associates, and for a time partners, and were all related, and that the firm were under personal obligations to Ryan, the maker. Denis Mullaney had been a partner in the firm of Mullaney, Hays & Co., which had preceded the present firm, and was employed about the new firm, having some sort of claim for unadjusted partnership interest. He had, it seemed, previously signed the firm name in receipts for express matter; had collected money for them and had charged it to himself. In the absence of the firm, he signed the firm name to the notes in question. The members of the firm were informed about the signing upon their return, but did not disaffirm the signing until about the time the notes matured. The court took the view that, even if the evidence set forth above did not establish an agency on the part of Denis Mullaney in the beginning, it clearly tended to prove a subsequent ratification. It was held, also, that the use made of the firm name did not amount to forgery.

The cross actions growing out of the collision between the City of Brussels and the Kirby Hall were consolidated and reached a decision before Sir R. J. Phillimore in the Admiralty Division of the High Court of Justice on the 13th ult. There was little or no dispute as to the actual facts. The most important testimony was elicited upon the examination of the captain of the Kirby Hall, who said that when his vessel ran into the fog he slowed the engines. After hearing a whistle from the City of Brussels twice he ordered the engines to be stopped, and when the lookout reported a light the engines were reversed full speed. Notwithstanding this was done the Kirby Hall still had way on the other steamer when the collision occurred. He was of opinion that had the engines been reversed when the first whistle was heard the collision would have been averted, but he did not reverse his engines because he thought the other vessel was on the same course as himself, and that no vessel would

be leaving Liverpool in such a dense fog. Sir Robert Phillimore found that no blame attached to the City of Brussels. He said that a captain of a steamer in such a dense fog was not entitled to leave anything to conjecture as to the position of another ship whose whistle he had heard, but was bound to bring his vessel to a standstill as soon as possible until the whereabouts of the other ship could be ascertained. In the case before him it was plain that if the engines of the Kirby Hall had been stopped and reversed when the whistle of the City of Brussels was first heard no collision would have occurred. He therefore pronounced the Kirby Hall alone to blame.

BUSINESS NOTES.

There were 269 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* during the week ended March 3, four less than the total for the corresponding week in 1882 and thirty less than the total for the like week in 1881. England and Wales had 239, against 248 and 286 respectively in the corresponding weeks in 1882 and 1831; Scotland had 24 against 22 and 9, and Ireland had 6 against 3, and 4.

The February importations at Montreal were valued at $415,762 less than those which were entered in that month in 1882, the total being (including coin and bullion) $3,082,048, against $3,497,810 last year. The falling away on dutiable goods amounted to $246,446, the total value being $2,618,554, against $2,865,000. The value of free goods imported in February was $461,449, against $631,450 in February, 1882, a decline of $170,001.

An English exchange mentions that an American some years ago took out patents in Canada and the United States for the preparation of an illuminating gas from sewage. It is added that a cheap and good light, suited to towns unable to afford the expense of coal-gas works, is obtained, and that technical difficulties respecting the English patent are all that prevents this system of illumination from being tried in the United Kingdom. In the way of "utilizing waste products," this process for furnishing light, if practically successful, must take high rank. The only drawback suggested is the lack of sufficient sewage in towns of small size.

There is not much change to note in the state of the English labor market as reported to the London *Labour News* on March 7. It is reported promising, and the fine weather generally prevalent was said to have given an impetus to all branches of outdoor work. Building in London and at other cities was being carried on briskly, and the railways were enjoying a heavy freight traffic. Improvement was also noted in the textile trades, notably at Bradford, where prices for fancy yarns were stiffer and special-goods makers fully employed. At Huddersfield a threatened weavers' strike was operating unfavorably upon the situation.

The Baltimore *Journal of Commerce* states that the Standard Oil Company is laying a pipe-line from the Pennsylvania oil regions to Philadelphia, with a branch of the same from Millway, Lancaster county, Pa., to extend to Baltimore. It is added that the main line is expected to reach Philadelphia by June 1 next, and that the branch will be completed to Baltimore by October 1. The pipe is to be 6 inches in diameter, laid not less than 18 inches below the surface, and the privilege of thus laying it is to be paid for at the rate of 25c. per rod. Agents of the company are now at work soliciting right of way on the above terms. The paper named concludes by hoping that "there will be no disappointment in regard to it."

An interesting lecture, says one of our London correspondents, was delivered the other night at the English Society of Civil Engineers by Sir Frederic Bramwell, F. R. S., and vice-president of the society. Having explained what had been done in the way of transmitting sounds prior to the invention of the telephone, Sir Frederic described the Bell instrument, the Edison phonograph, the Hughes microphone and then explained Edison's chalk receiver. Mr. Shepard Bidwell, by the aid of a photophone, showed how by speaking to a disk, the front being a mirror on which a powerful light was directed, that light could be reflected into a selenium cell and as the disk vibrated under the influence of the voice the light in the selenium cell varied. It was therefore possible to cause the Bell receiver to speak and reproduce speech which had been uttered to the mirror disk. It was pointed out at the meeting also that the telephone had been developed to a far greater extent in the United States than in England. This was illustrated by comparative statistics. Washington, with 120,000 white population, uses 800 telephones, while London on February 28 last had but 2,541, or a little over three times as many subscribers, independent of private lines. The annual cost per annum to telephone subscribers in London is £20. It will be interesting to state, adds our correspondent, that there is a rival telephone scheme on foot for reducing this £20 subscription to £10. Indeed, there are several new inventions, American and English, spoken of in London scientific and financial circles which threaten the present monopoly.

The immigration into the United States during February and for eight months ending therewith fell considerably short of the total number of like arrivals during corresponding months in the preceding fiscal year. In February last the total was 17,065, against 28,247 in February, 1882, a loss of 11,182. For eight months ended February 28 the total number of emigrants reaching the United States was 300,484, against 375,093 in a like portion of 1881–82, a decline of 74,609, or about 20 per cent. In February, Germany sent 5,044, or 3,582 less than in February, 1882; Canada sent 2,564, or 1,207 less; England and Wales sent 2,802, or 235 less, and Italy 1,592, or 185 less. Ireland, on the other hand, sent 1,542, against 1,464 in February, 1882, a gain of 78.

There was a large meeting of leading southern cotton manufacturers at Atlanta, Ga., on Monday. The object of the meeting was to interchange views respecting the growing cotton manufacturing interests of the south and to complete the organization of the Southern Cotton Manufacturers' Association. When the convention adjourned it was to meet again at Augusta, Ga., upon call by the executive committee. Some notice was taken of the agitation of manufacturers and dealers in cotton goods at the north for lower freight rates to the west. No action was taken with reference to this subject, but a "well-informed member" said: "If eastern men get rates reduced we can get rates reduced also. We can whip them any way they want to fight. We are ready, but we want them to take the lead."

The following national banks have been organized: The Farmers' National Bank of Boyertown, Pa.; capital $50,000; Thomas J. B. Rhoads president, William R. Grim cashier. The Chester (Pa.) National Bank; capital $100,000; Samuel A. Dyer president, Richard Wetherill cashier. The Second National Bank of Lexington, Ky.; capital $100,000; David H. James president, W. D. Nicholas cashier. The First National Bank of David City, Neb.; capital $50,000; Thomas Wolfe president, J. W. Gross cashier. The First National Bank of North Manchester, Ind.; capital $50,000; Jesse Arnold president, John R. Wallace cashier. Hull's Banking Company of Independence, Kan., has dissolved, and the Citizens' Bank succeeds. The First National Bank of Washington, Iowa, has elected Norman Everson president, in place of J. Keck. The German National Bank of Cincinnati has elected John Hauck president, in place of Andrew Pfirrmann.

The telegraph during the past week has brought word of the consolidation of five of the large grape-sugar or glucose manufacturing concerns under the name of the American Glucose Company. The concerns swallowed up by this arrangement are said to be the Buffalo (N. Y.) Grape Sugar Company, the American Grape Sugar Company of the same city, the Firmenich Sugar Refining Company, also of Buffalo, the Peoria Sugar Refining Company, of Peoria, Ill., and the Leavenworth Grape Sugar Company, of Kansas. The dispatch referred to intimates that "other concerns in Buffalo" may decide to go into the consolidation, and later states that there are but two remaining grape sugar factories doing business in the country, one in Davenport, Iowa, and one in Chicago. The latter statement is probably correct, for census industrial bulletin No. 304 mentions but seven glucose manufactories in the United States in 1880. It is interesting to note that the census reports the aggregate capital of these seven concerns at but $2,255,000, while the capital stock of the new American Glucose Company has been placed at $15,000,000. In 1880, there were employed in the glucose industry 1,167 males, 5 females over fifteen years of age, and 20 children, a total of 1,192, to whom were paid in wages annually $605,802, or about $508 yearly on the average to each. The total value of materials used annually is given for 1879-'80 at $3,044,450, and the value of products at $4,551,212. All of the manufactories going into the new arrangement were the property of C. J. Hamlin and associates, or controlled by them, with the exception of the Firmenich concern, which was owned by Dr. Joseph Firmenich, of Buffalo. The latter gentleman has long proved a successful rival to the almost complete monopoly of the industry by the Hamlins. Inasmuch as he is to receive a one-fifth interest in the $15,000,000 capital of the new organization, while his capital contributed is nominally but $1,500,000, and $1,250,000 paid in, it is fair to presume that he was an unusually successful rival of a rich and powerful opponent. All the offices of the American Glucose Company are filled by the Hamlins, father and sons, except that of vice-president, which is handed over to the doctor.

The Louisville *Courier-Journal* prints a plain statement of the exact situation in the Kentucky whisky trade, based upon careful investigation. It was called forth by "wild and unreliable statements" that have been made in relation to this subject consequent upon late failures in the whisky trade and the failure of Congress to pass the Sherman bond bill. The *Courier-Journal* says that the quantity of tax-paid Kentucky whisky now in the country is very small, too small to affect prices. Of the crops of 1880, 1881 and 1882, there remained in bond March 1, 1883, 49,246,220 gallons. The consumption of Kentucky whiskies during the past six months points to a future consumption of the same of 15,000,000 gallons annually. This will call for 35,000,000 gallons for consumption between March 1, 1883, and July 1, 1885, leaving a surplus at that time from that now in bond of 14,246,220 gallons. The tax on that withdrawn prior to July 1, 1885, will not be felt by the trade, as the consumer pays for the same at once. The tax on 14,246,220 gallons to be (prospectively) carried over after July 1, 1885, at ninety cents per gallon, is $12,821,598. From this the *Courier-Journal* concludes that the outlook for the trade's having to carry tax-paid whisky is not serious, especially when it is recalled that stocks of 45,000,000, 41,000,000 and 39,000,000 gallons of tax-paid goods were being carried, respectively, on Nov. 15, 1870, May 1, 1871, and May 1, 1872. The rate of consumption of Kentucky whiskies is increasing also, which will ease the situation, whatever it may be. From 7,500,000 gallons consumed in 1878 it has grown to 15,000,000 per annum at the present time. The "whisky-scare" is therefore declared to be without cause. The probable crop of Kentucky whisky in 1883 is given at but 5,000,000 gallons. The same conditions which curtailed the crop of 1883 will operate with greater force in 1884. The total value of Kentucky whisky in bond is but $25,000,000, and the talk about Louisville banks being overloaded with whisky-trade paper is declared to be grossly exaggerated.

THE NEW BRITISH BANKRUPTCY BILL.

The following sketch of the new English bankruptcy bill is taken from the London *Times*: "The first characteristic of the new measure will be the attempt made therein to do away with the facilities—unknown to any law but our own—now offered by sections 125 and 126, relating to liquidation by arrangement and compositions for debtors to cast off their liabilities with ease and without public exposure. The worst incidents of the present system—the absence of a public examination on oath, the extraordinary power of the statutory majority, obtained often by improper means and sometimes acting collusively, and the position of practical independence of the trustee—will cease to exist. The bill will clearly recognize that the public has, apart from the creditors, a strong interest in seeing that the estates are wound up in a proper manner, and that fraudulent or reckless traders are not screened from publicity. In other words, sections 125 and 126 will be repealed. A public examination of the bankrupt as to his conduct, dealings and property will be obligatory in all cases and cannot be avoided by artifices on the part either of the debtor or his creditors; and the sanction of the court, which will be granted only after having had a report by the official receiver, to schemes of composition will not be an empty form. Another principle which the bill will recognize is that creditors who are entitled to have their debtor's estate distributed among them cannot be expected to give that minute attention to details which is required if economy is to be observed, and that it is essential they should receive more assistance than they now get. This is to be given through the medium of official receivers, particularly in the case of small estates, which at present are treated as waifs or left to be scrambled for by professional trustees. Perhaps of the greatest consequence is the public examination on oath, which will be universal. Insolvency is not, indeed, to be treated as a crime. We cannot revert to that primitive view of it. But under the new measure it will be regarded as an event which calls for explanation; and it will not be possible for creditors, friendly and somewhat dubiously bona fide, or for enterprising solicitors to prevent a bankrupt from being examined as to the causes which have led to the disaster. In short, the bankrupt will be treated very much as a captain who has lost his ship, and who is bound to justify himself before the Wreck Commissioner. One of the worst features of the present system is that traders who get into difficulties are tempted to go on struggling against terrible odds, and do not give up the fight and consult their creditors until their assets are wasted. No law will ever effectually prevent this mistake, which has its root in human nature; but by permitting the debtor as well as his creditors to present a bankruptcy petition—which will be the commencement of all proceedings—something will be done to prevent estates proving so often miserable trifles. It will be a marked feature of the bill that the court will keep a firm hold over the discharge of the bankrupt, that it will not be the mechanical process which it now is, but will depend much on the report of the official receiver, and that the court will be able to annul an adjudication and thus to mark its sense of the blamelessness of a debtor who has come to misfortune not by reckless trading, but altogether by unforeseen calamities.

"We have enumerated most of the chief features of the measure. But mention must also be made of the elaborate provisions for giving the creditors control and possession of the estates at the earliest possible date, for preventing retention by trustees of large sums which they at present may treat as their own, for establishing an effectual system of audit, and for remunerating trustees in a rational way. The bills of solicitors, auctioneers, and others, which are now often paid, however exorbitant, will be taxed; the present ineffective provisions for this will be strengthened. It will be found also that in framing the bill notice has been taken of the suggestions made recently by the London Chamber of Commerce, with a view to secure the appointment of fit and proper trustees."

THE FRENCH COCOON CROP.

The London *Times* has the following: "It is very satisfactory to find that sericulture in France has very much revived within the last year or two, and bids fair to again become a great French industry, which many circumstances, both primary and secondary, had most unfavorably affected. The principal of these was the competition entered into by Japan, as a seller and reeler of raw silk, in which great progress was made by the introduction of European systems and apparatus. Italy also entered largely into the field, the Italian reelers having built filatures which were better and more economically worked than those possessed by the French. The Lyons manufacturers helped the downward movement by selling goods made from eastern silks in figured patterns instead of the plainer but more solid fabrics which had hitherto been in fashion; but the *coup de grâce* was given to sericulture by the breaking out of the silkworm disease, due in all probability to lack of care and the endeavor of the growers to produce too much. Overcrowding and want of ventilation had been rife for a long time, so that when the disease commenced the worms were swept away by millions, and the trade was nearly exterminated. Fortunately for France and her silk producers, M. Pasteur's researches into the causes and remedies of the disease have borne good fruit, he having invented a method for the examination of the moths, by which it is possible to preserve the sound eggs and to detect and destroy all those which are infected. During 1880–1 there was a marked improvement in the strength and character of the worm, the chief difficulty then being to get sufficient food for them, as the great majority of the mulberry trees had been neglected, and in many cases pulled up for firewood. During the year which has just passed the difficulties appear to have been surmounted, 'the 'pebrine' and 'flachrie,' the technical names for the diseases, have very greatly diminished, and France has again become an exporter of cocoons. The filatures, which have been professedly unequal to their work, are now being renewed and enlarged, though it is not so easy to obtain the services of trained *fileuses*, who, in consequence of the failure of the industry, had betaken themselves to other occupations."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS

There was a strong effort made by a large portion of the Stock Exchange this week to have the exchange closed from Thursday till Monday next, but the Governing Committee decided to close only on Good Friday. This is not a legal holiday, and therefore the Governing Committee has to take action on closing or not closing on that day; but the action is purely formal, for the great majority of members of the exchange would decline to do business on Good Friday under any circumstances. The request to have the exchange closed on Saturday also was made simply on the ground that it may as well be closed as open, for there is no business doing. The Governing Committee could not deny the soundness of this reason or question its truth, for the business done this week on the floor has been about as much, or less, as is done in the hot weeks of midsummer, when nearly every one who can get away has fled from the city. Various are the reasons for this state of affairs; but they may all be summed up in the statement that the outside public is not trading in this market, and the inside leaders are disinclined at this time to take any decided action. Mr. Gould is away in Florida, and Mr. Keene is popularly supposed—and the supposition is a probable one—to be hampered and hemmed in by a large number of outstanding "puts," which, by the late rapid declines of prices, have been brought dangerously near to ruling quotations. Any considerable further decline would result in his having the stocks represented by them "put" to him—a load which he seems in no way desirous to assume. Then we have had a continuous stringency in the loan market, which will, apparently, have to look out for itself in future, instead of looking to Washington for relief whenever a pinch comes. It was obvious that some time or other this business of making the United States Treasury a part and parcel of Wall street speculation must come to an end; and the end appears to have come now. The unfortunate Secretary—who is in very poor health—has been so badgered by emissaries from Wall street, imploring him to do something for them, that he escaped from Washington on a revenue cutter for a brief time, and only returned when Assistant Secretary French, having caused examination to be made, announced that there could be no prepayment of called bonds, and the most he could do would be to anticipate by a few days the payment of the quarterly interest on the 4 per cents, which is due April 1. Thus left to its own resources, Wall street has had to get along the best way it could. The ruling rate for money this week has been from 12 to 14 per cent. It has been as low as 6 per cent. and as high as 25 per cent., both rates being quite exceptional and both quoted the same day—Thursday. The high rate was made by a sudden flurry just before the close of business that day, and was evidently manipulated, for previous to it loanable funds had appeared to be more abundant than on any other day of the week. Of course, in the present state of the loan market, a temporary squeeze such as that referred to may be effected at any time.

It was coincident with a sudden attack on the stock market from recognized bear houses, which broke down prices all round from ¼ to 1½ per cent.; at the same time rumors of a heavy defalcation in a leading insurance company were spread through the street. The consequence was that the market had a very weak close, and all the advance it had been making through the earlier hours of the day was more than lost. It gave the only ripple of excitement the Exchange had had during the week; for the market had been uniformly characterized by monotonous dullness and steady strength of quotations. The talk had constantly been that as soon as the loan market became easy there would be a quick advance of prices. Such talk had been heard from Keene quarters, indicating a change of position there from bear to bull. This, however, is opposed to past experience. Nine times out of ten a long period of waiting and straining, such as the stock market is passing through, is followed by a general break. The present may be the exceptional tenth time, but the odds are the other way. Indeed, the story that Mr. Keene has turned bull should be taken with a large grain of salt. It seems to be his object to create that impression at this time; but indications of the market are that there is simply an effort being made to advance prices slowly and steadily to a point where another onslaught can be made on them. With a market so purely in the hands of the professionals as this one is now, tricks and turns of all kinds must be looked for. This, however, can be surely affirmed of it—that, unless there be trouble with the properties of which outsiders have no knowledge, there are stocks selling a good deal below their real values, and a sudden jump in some of them, when the turn does come, is almost a mathematical certainty. There are, also, good bargains to be picked in certain of the new, and therefore low-priced, bonds. An intending investor, who will take the trouble to thoroughly examine the bond market, may buy cheap; for any security which is new is almost without a market in Wall street in these days, and sells accordingly.

The high rates at which money has been lending is bringing to this center all the loose cash which can be scraped up around the country. Most of the railroad companies have given orders to send here their cash balances for loaning purposes, and foreign exchange has gone down to a point where gold can be shipped here profitably. On Tuesday the posted rates were reduced by the foreign houses to $4.81½ and $4.83½. As the actual rates are always ¾ to 1 per cent. below these figures, and the point at which gold can be imported now without loss is about $4.83 6/10 for demand, it will be seen that a steady stream of gold may be expected so long as rates remain at this figure. Even at these rates, the foreign exchange market is barely steady. There seems to have been no great borrowing of exchange done on collaterals, as was done so extensively last year. Money rates were higher then than they are now on call loans, but the members of a firm which made the experiment of borrowing $50,000 that way informed us that when the transaction was closed up they found that the loan had cost them just about as much as if they had borrowed the money here in the regular way and paid the prevailing rates. It takes a good deal of money to run Wall street. We are informed that the Vanderbilt family—now the heaviest borrowers in the market—are borrowing the enormous sum of $50,000,000 on the securities they hold. It is well known that they are heavily loaded with stocks, and the amount of their loans indicate it. Necessarily, they are on the bull side of the market, and no one doubts their ability to hold out there. As to the London market, money can be had there at 3 per cent., and the Bank of England reserve has suffered a diminution of less than 2 per cent. during the week and is now 40 13/16 per cent. of the liabilities. Nevertheless, if there should be a threatening drain of gold to this side the discount, or loan, rate would be speedily advanced.

The government bond market is quiet, but prices keep up well. The following were the closing quotations Thursday:

	March 16, bid.	March 22, bid.	March 22, asked.
U. S. 4s extended (3½ p. c.)	103½	103	—
U. S. 6½s 1891, registered	112¾	112¾	113
U. S. coupon	112¾	112¾	113
U. S. 4s 1907, registered	119⅛	119⅛	119¼
U. S. 4s 1907, coupon	119⅛	120⅛	120¼

The bank statement of Saturday showed a further progress of the banks toward depletion, for the reserve was again reduced $1,604,725, leaving it at $6,770,875 below the 25 per cent. line. The following are the comparative totals of the statements of March 10 and March 17:

	March 10.	March 17.	Differences.
Loans	$325,180,000	$319,672,000	Dec. $5,508,000
Specie	51,519,700	48,551,900	Dec. 2,967,800
Legal-tenders	17,917,000	17,081,100	Dec. 835,900
Deposits	298,411,400	289,615,500	Dec. 8,795,900
Circulation	16,609,200	16,607,900	Dec 1,900

The proportion of reserve to liabilities is now 22.66 per cent., against 26.09 per cent. at the same date last year.

The annual meeting of the Wabash Company was referred to last week. This week the report for 1882 has been issued. A most cheerless document it is. There is a vein of quiet humor about Mr. Gould which manifests itself in various ways. One of them is his custom of always making "the other man" tell a disagreeable story. If he has anything pleasant to say, he says it himself. When he has something not so pleasant, he always refers the inquirer to the other man who can tell him all about it. As president of the Wabash Company, he prefaces this report with a two line reference of the stockholders to the reports of the vice-president and auditor "herewith printed." That is all he has to say. The other fellows have to tell their dismal story. The road earned gross, says Vice-President Hopkins, $16,851,690, which was not enough to pay fixed charges. (Early last year this gentleman was quite confident it would earn at least $20,000,000.) It has a floating debt of over $5,000,000. Its working expenses, after the most heroic system of reduction, were 69.22 per cent. (The Lake Shore can work well at 55 per cent.) But these are not the really discouraging features of the report, because a couple of poor years might temporarily throw any road back. It is the incidental allusions in the report to facts showing that the causes of poor earnings compared with expenses are, for the Wabash road, permanent. For example, speaking of the high rate of working expenses, Mr. Hopkins says that it "is not to be attributed to a neglect of economical methods in the operation of the road, but to the higher rates of transportation on the lines with which the comparison is made. Some of the lines, for example, which connect with the Wabash are able to charge from three to four mills per ton per mile on freight more than the Wabash." This is another way of saying that the Wabash road is almost destitute of local traffic, which is always the most profitable, and has to scramble for what traffic it gets at competing points everywhere. The number of these competing points must increase rather than diminish by the growth of other roads. Further on Mr. Hopkins says: "It is obvious from these figures that larger profits for our company are to be sought in a gradual advance of traffic rates, and to this end the best efforts of the management are now directed." What these efforts are does not appear, but this much is certain, that the progress of the science of transportation is steadily in the direction of lowering traffic rates, and any one can see this for himself if he will take the trouble to glance over the railroad statistics of the past ten years. The trouble with the Wabash is that it has doubled and more than doubled its mileage within about two years, mainly by the addition and incorporation of a lot of bankrupt roads whose securities were bought up by some one for a song and sold again to the Wabash Company at a high price—the profit going into the pockets of people who rumor in Wall street said were the high officers of the Wabash road.

From Baltimore, Md.: The demand in the stock market has been for small lots of desirable securities, but speculation continues to drag and values remain unchanged. State bonds are scarce. It is thought that any pressure to sell railroad stock would result in lower prices. In mining properties considerable business was done in Silver Valley, which ruled irregular and unsteady.

By telegraph from New Orleans, La.: Louisiana 7s are 1 per cent. higher, while premiums declined 1 per cent. Stocks generally quiet.

COMMERCIAL.

The dispatches to BRADSTREET'S this week from the leading trade centers of the country tell of further improvement in the general trade situation, and in particular throughout the west. During the week the price of cotton was marked down ⅛c., to 10¼c., in consequence of the growing estimates as to the size of the incoming crop. During the week the British breadstuffs markets have declined under an accumulation of supplies. The continued lack of rain in California has a depressing effect. Pig iron has continued dull at unchanged prices. There have been some sales of steel rails, but prices have been low. Pittsburgh steel rail mills are reported filled with orders sufficient to carry them through a good portion of the year. The iron trade in general is not experiencing the degree of improvement noted in most other lines of business since the adjournment of Congress. The spring rates for anthracite coal have been announced, and business is being transacted now by most companies on the basis of the new rates instead of waiting until April 1. Stocks of coal are low, and the demand is expected to equal the supply. The speculative petroleum market is more bullish, so far as the statistics and general reports bear on the situation, than it has been since the drop in the production of the Cherry Grove region. The Cooper tract production has declined from over 3,400 barrels daily, two weeks ago, to about 1,200 barrels, and Forest county has ceased to have any importance in controlling values. A tight money market, however, and free selling of outside holders on Wednesday and Thursday conspired to depress prices. Ocean freights for charters are dull. Less petroleum and grain is going abroad than there was during the earlier part of the week. Berth freights are also dull and featureless. There has been a steady, moderate trade in wool, without important change in the conditions of the market. There were 196 failures in the United States reported during the past week, 37 less than the preceding week, 78 more than the corresponding week last year, and 63 more than the same week in 1881.

BREADSTUFFS.

While the continental markets of Europe show comparatively little decline in breadstuffs during the past week, the markets of Great Britain have been inactive and steadily tending downward, under the influence of an accumulation of supplies and an increase of the amount in transit. In connection with this, the weather throughout the United Kingdom has been favorable for field work, and the outlook for the coming crop has been considerably improved. The receipts of breadstuffs from America at the principal ports of Great Britain have been supplemented by liberal arrivals from southern Russia and India. The latter country, under the patronage of the English government, is making strenuous efforts to increase its shipments from the crop now being harvested, and likely to exceed previous crops. This Indian wheat is of excellent quality, and it is claimed that it can be produced cheaper than it can be grown in the United States. Hitherto the great hinderance to its exportation has been the insufficiency of the railroad system and the high rates of inland freights. But these are now being remedied. Great Britain expects to derive considerable advantage in dealing with India rather than with the United States, because she opens her markets freely to the products of the United Kingdom, whereas in the United States they are burdened with heavy duties. As an offset to this, it must be remembered that the Russian farmer has during the past few years been gradually abandoning the culture of wheat and increasing the cultivation of maize, so that the sources of Great Britain's wheat supplies will not have increased as much as would at first appear. In the immediate future the course of the foreign markets are likely to be governed largely by the outcome of the American crop of 1883.

The course of the foreign grain markets during the past week is indicated by the following quotations per quarter for American red winter wheat off the coast at the dates mentioned, viz.: March 17th, 47s. 6d.; 19th, 47s.@47s. 6d.; 20th, 47s.@47. 6d.; 21st, 47s.; 22d, 47s.

AMERICAN WHEAT MARKETS.

The leading wheat markets have been somewhat depressed during the greater part of the past week, under the influence of unfavorable foreign advices and the sales of considerable quantities of wheat purchased by parties some time ago, when the foreign wheat crop promised less favorable than now. Aside from this, the stringency in the money market has acted adversely to any improvement in prices. Notwithstanding the depression that has occurred, the markets have not been without a strong undertone, and had there not been considerable decline in corn it is questionable if wheat would not have maintained its value. The decline in the New York market during the past week has been 1½c. per bushel on April wheat, while in the Chicago market there has been no reduction in price.

Much anxiety is expressed in regard to the growing crop of California, which appears to be suffering badly for lack of rain, and should it fail to come soon it is doubtful if more than half the usual crop is raised in that state. The price of wheat in San Francisco March 22 was higher than it has been at any time since 1879, being over $1.20 per bushel.

The course of the wheat market during the past week has been as follows, viz.: April wheat in Chicago at 1 p.m. March 16th, $1.05⅜; 17th, $1.05¼; 19th, $1.04⅝; 20th, $1.05⅜; 21st, $1.04½; 22d, $1.05⅜. April wheat in New York at 2 p.m. March 16th, $1.20¾; 17th, $1.19¾; 19th, $1.18⅞; 20th, $1.19⅛; 21st, $1.18¾; 22d, $1.19¼.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis for the week ending March 16 were 950,601 bushels, against 1,074,789 bushels the previous week, and the shipments 450,100 bushels, against 465,064 bushels the previous week.

The visible supply of wheat in the United States March 17, as compared with the previous week, shows an increase of 343,534 bushels.

CORN.

The movement of corn at the principal western receiving points during the past week has been much larger than was generally expected, while the active demand which existed for eastern shipment has greatly subsided. There has also been some improvement in the inspection of corn at Chicago, and the tendency of the market has been decidedly downward, and prices have declined 2c. to 3c. per bushel. The visible supply shows a large accumulation during the week, the principal portion of which remains at the west, though St. Louis makes a good showing in her shipments to New Orleans for final export.

The aggregate receipts of corn at the seven principal western receiving points, for the week ending March 16, amount to 3,093,733 bushels, against 3,092,255 bushels the preceding week, and the shipments 1,400,424 bushels against 2,207,500 bushels the previous week.

The course of the corn market in the past week has been as follows, viz.: May corn in Chicago at 1 P.M. March 16th, 60c.; 17th, 59⅞c.; 19th, 58⅞c. 20th, 59¼c.; 21st, 58¾c.; 22d, 57⅝c. May corn in the New York market at 2 P.M. March 16th, 60c. 17th, 59⅞c.; 19th, 58⅞c.; 20th, 59¼c.; 21st, 58⅜c.; 22d, 57⅝c.

The visible supply of corn in the United States March 17th, as compared with the previous week, shows an increase of 812,791 bushels.

The arrivals of oats at the west have also continued large, and prices have receded from 1c. to 2c. per bushel, although the bulk is supposed to be held by strong parties.

The visible supply this week as compared with the previous week shows an increase of 269,287 bushels.

PROVISIONS.

The tendency in prices of hog product has been downward during the past week, though not enough so to show any great decline, while the demand at Chicago from the south and Canada has at times been quite active. Stocks at the leading points have not increased, and are held with considerable confidence, and with the expectation that present prices at least will be maintained.

The aggregate receipts at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee, in the week ending March 22, amount to 111,354, against 103,966 the previous week, and 154,733 for the corresponding week last year.

The following shows the export of hog product from the places mentioned for the week ending March 17, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	4,185	7,822,210	4,067,343

Totals	30,506,605	$3,571,739	19,341,860	$2,051,203

SHOWING LOSSES IN 1883.

Beef, salted	8,573,610	$757,896	10,594,012	$954,221
Bacon	79,866,440	8,195,187	102,727,791	10,072,038
Lard	46,428,296	5,163,639	50,638,341	5,814,783
Pork	13,081,073	1,345,499	17,455,475	1,478,971
Tallow	6,137,351	521,622	10,271,227	847,291
Cheese	4,815,593	530,656	11,119,051	1,228,454
Totals	160,092,363	$16,534,479	202,755,900	$20,395,758

—or, in all, 190,598,968 pounds of provisions, tallow and dairy products, valued at $20,106,218 in February and January, 1883, as compared with 222,097,760 pounds of the same, valued at $22,446,961 in the two months of 1882, or a decline of 31,498,792 pounds and $2,340,743.

Messrs. Howard, White & Co.'s Chicago *Daily Commercial Bulletin* of March 16 states that for the season of 1882–83 the total packing operations at the city named aggregated 4,222,780 hogs, 877,704 less than in the previous twelve months; 1,664,957 hogs in the summer's and 2,557,823 hogs in the winter's packing operations, 1,067,427 less hogs than in the summer of 1881 and 189,723 more than in the winter of 1881–82. The hogs killed and packed in the eight months from March to October, inclusive, represented an average weight each of 217.64 pounds, against an average weight of 230.83 pounds in the summer season of 1881 and 233.69 pounds in 1880. The season's pack during the four months from November to February, inclusive, in 1882–83, represented an average weight per hog of 254.56 pounds, against 255.86 pounds in a like portion of 1881–82. The following figures represent the movement of hogs at Chicago during the year's named:

	Received.			*Shipped.*		
	Live.	*Dressed.*	*Total.*	*Live.*	*Dressed.*	*Total.*
1880	7,059,355	89,102	7,148,457	1,394,990	33,194	1,428,184
1881	6,474,844	52,835	6,527,679	1,289,679	46,849	1,336,528
1882	5,817,504	36,778	5,854,282	1,747,722	40,196	1,787,918

The aggregate returns of packing do not show as large a year's business as has been presented in former reports. The reduction in the pork-packing business at Chicago, and of the west, is due almost entirely to the decreased supply of hogs in the country tributary to the larger markets. Notwithstanding the fact that the high price of corn during the past few years, and the anxiety of farmers during the same period to dispose of the same as well as the hogs, have been the causes of hogs being sold close, and in spite of the restrictions placed on the provisions exportations, yet the trade has been able to do a fair season's business.

THE PROVISION MARKETS BY TELEGRAPH.

From Cincinnati, Ohio: The provision market is dull, but shows considerable firmness.

From Chicago, Ill.: Provisions unsettled. Receipts of hogs light, but cattle ample.

From Louisville, Ky.: The provision market is stationary, with a good demand.

From St. Louis, Mo.: The provision market is very depressed and operators are apart. Cattle are in good receipt, advancing, and unusually quick sales are made. Hogs are also active, and the upward movement is renewed.

From Kansas City, Mo.: Provisions firm and fairly active. Cattle fair supply; price unchanged. Hog receipts larger than last week. Values a shade lower.

From Des Moines, Iowa: The provision market is quiet.

From Omaha, Neb.: The provision market notes no change in prices.

From Leavenworth, Kan.: The provision market is fair.

From Wilmington, N. C.: The provision market is quiet.

From New Orleans, La.: The provision market is easy at a slight decline.

From Memphis, Tenn.: The supply of meat is good and prices do not tend upward. Receipts of cattle during the past week were light. Prices have advanced half a cent over the previous week's.

From Nashville, Tenn.: Trade in provisions good; prices firm and unchanged. Cattle receipts for the week heavy, with a good demand for better grades at high prices; for the poorer grades but little demand.

From Halifax, N. S.: The demand for provisions is quiet, but the market is firm.

THE NEW YORK DRY GOODS MARKET.

The volume of business transacted during the week has been of about the same proportions as the week previous. A more confident feeling prevails in the soundness of trade since the auction sale of Thursday. Prices were firm, and the bidding spirited and active. The sale was well attended, representatives of all the prominent houses being present. With the close of lent it is expected that the retail trade will become active, and next week is looked forward to with expectation. Woolen jobbers still complain of quietness, and the clothing trade is not as brisk as it ought to be. The importations for the week are $750,000 less than the previous, and the marketings have also fallen off $625,000. The following is a summary:

	No. of packages.	*Value.*
Total imports of dry goods for past week	11,429	$2,682,849
Total amount of dry goods, duty paid, for past week	12,873	2,678,944

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: There is a better feeling in dry goods, but several failures in the country restrict trade.

From Boston, Mass.: Dry goods jobbers report a good trade, better than at the same period last year in amount of goods sold, but there is some complaint of reduced margins in some staple lines. In hosiery and small-wares the trade is as good as before reported. These remarks do not apply to New England business, which is not expected to open till warmer weather.

From Providence, R. I.: The print cloth market is very dull, the amount of sales being small.; 64s are quoted at 3⅝c., and 56x60s at 3 1/16c.; there are about 120,000 pieces on hand. The cotton market is dull, the sales being few; middling uplands are worth 10½c., and middling gulfs 10¾c.; the stock on hand is light.

From Buffalo, N. Y.: The condition of the dry goods trade is a marked exception to the condition of trade in general. Wholesale departments in this line are ahead of corresponding month and week of last year. Dealers report a very satisfactory business doing. Retail trade is still restricted by backward weather.

From Philadelphia, Pa.: Jobbers have had a fairly satisfactory week in most departments. The package movement has been irregular, but on the whole very fair. Orders are mostly small, but more frequent. There is a marked absence of speculative feeling. Values rule firm on best makes of cottons, but concessions have been made in some lines of low grade and fine clothing woolens.

From Pittsburgh, Pa.: The dry goods trade is fair for the season, and with more favorable weather jobbers would be busy. Collections fair.

From Cincinnati, Ohio: In the dry goods market there has been a liberal demand, with a few country buyers in town who have purchased freely of staples and promise better trade in the near future. Woolens and clothing are dull, without change in price.

From Cleveland, Ohio: Dry goods are in good spring demand, and the trade is satisfactory so far for the season.

From Dayton, Ohio: The tone of the dry goods market is improving.

From Columbus, Ohio: The dry goods trade has been very satisfactory during the past week, and is still experiencing a very fair demand. Owing to state of weather, the spring trade has not yet fully opened, but dealers anticipate a good spring business.

From Chicago, Ill.: Collections good. Dry goods, millinery and fancy goods very active; sales increased over last week. Clothing in good demand.

From Peoria, Ill.: In dry goods there appears to be no relax, and sales will average the same as last year.

From Detroit, Mich.: There is but little change in the dry goods market since previous week. Jobbers report a fair amount of orders, but severe weather has interfered with business. Collections only fair.

From Louisville, Ky.: Dry goods and notions are active. The increasing spring movement was slightly checked by a spell of cold weather, but jobbers are fully employed on selections of visiting buyers' orders.

From St. Louis, Mo.: There is a stirring business in dry goods. Values are steadier than last week. Continuous activity is now relied upon.

From Kansas City, Mo.: The dry goods trade has been active. A fair number of buyers are still coming in and mail orders are very good. Sales are far in advance of former years.

From Burlington, Iowa: The dry goods trade, like other lines, has fully awakened to the spring demand, is steadily improving and covers a very general variety of goods.

From Des Moines, Iowa: The dry goods trade is very dull.

From Leavenworth, Kan.: There is a fair trade in dry goods; collections are reasonable.

From Lawrence, Kan.: The dry goods trade has been quiet.

From St. Paul, Minn.: The dry goods market shows moderate sales, while the daily volume of trade is alternating with March cold and sunshine, though aggregating less than a week ago. There is a fair demand for shirtings, colored goods, new styles of prints with light figures, dress styles, ginghams and grain bags for seed wheat. Western orders are arriving.

From Omaha, Neb.: The dry goods sales have been up to the average for this month.

From San Francisco, Cal.: The country buyers who are now in town make the dry goods trade active. Jobbers are pursuing a conservative policy.

From Baltimore, Md.: The dry goods trade the past week has been inactive and very little will now be done until the weather moderates. Orders for spring goods continue to come in slowly. Prices remain firm.

From Richmond, Va.: The dry goods trade is improving, and is quoted good. Most of the orders received are from travelers.

From Norfolk, Va.: Dry goods jobbers have been busy only in filling orders from travelers. The weather has been very wintry.

From Wilmington, N. C.: The dry goods jobbing and retail trades are dull.

From Savannah, Ga.: Dry goods have been steady for the week, and some fair sales made, but credit risks not so freely taken as some time back.

From Selma, Ala.: The dry goods trade is opening very fine, better than for several years.

From Waco, Tex.: The sales in dry goods show up very satisfactorily, indicating a very decided increase over the corresponding time for 1882.

From Nashville, Tenn.: The dry goods trade continues very fair.

From Halifax, N. S.: The dry goods trade is still unsettled, and jobbers are rather uneasy. The weather is softening fast, and there are indications of an early opening spring trade.

COTTON.

The New York cotton market for the week ending Thursday evening (there being no business transacted on Friday owing to the New York Cotton Exchange having closed on account of Good Friday) has been lower for spot middling uplands, the price having declined to 10⅛c.

The sales for the week have been for export 150 bales, for consumption 1,543 bales, and for speculation 305 bales. Included in the above are 300 bales to arrive. The deliveries on contract aggregate 2,000 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Thursday evening, as compared with last week:

	This week.	*Last week.*
Ordinary	7 7-16c.	7 9-16c.
Strict ordinary	7⅞	8
Good ordinary	8 1-16	8 13-16
Low middling	9⅜	9¾
Middling	10⅛	10¼
Good middling	10 9-16	10 11-16
Middling fair	11 5-16	11 7-16
Fair	12 1-16	12 3-16

The market for spot cotton closed quiet.

The future market at New York has been lower, the price having declined an average of 10 points for near months, and 9 points for later months. The sales for the week foot up 385,500 bales.

The following table shows the closing quotations for futures at New York Thursday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
March	10 09	10.15c.	12.12c.
April	10.14	10.27	12.15
May	10.20	10.40	12.32
June	10.43	10.54	12.51
July	10.55	10.66	12.68
August	10.66	10.77	12.83
September	10.39	10.49	12 83
October	10.15	10 22	—

The future market at New York closed steady.

The southern markets during the past week have been quiet and easy. Below will be found the sales for the week ending Thursday evening and the closing quotations for middling uplands at five leading ports:

	Week's sales.	*To-day.*
Galveston	4,297	9⅞
New Orleans	23,200	9⅞
Mobile	3,700	9⅜
Savannah	7,760	9 9-16
Charleston	2,400	10

The total receipts of cotton at the ports since September 1 are 5,210,416 bales, an increase of 1,023,177 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows:

Galveston	17,132
New Orleans	21,898
Mobile	1,874
Savannah	12,116
Charleston	7,104
Wilmington	1,185
Norfolk	9,214
Baltimore	611
New York	3,024
Boston	3,425
Philadelphia	2,175

At Liverpool the spot market is reported easy at unchanged quotations, the prices remaining at 5⅝d. for middling uplands, and 5 11/16d. for middling Orleans.

The sales for the week at Liverpool were 43,500 bales (of which 28,000 were American), against 72,000 (of which 47,000 were American) last year.

The sales for export were 5,800 bales, against 7,000 bales last year. The sales for speculation were 2,600 bales, against 2,700 bales last year. The amount forwarded was 17,500 bales, against 17,500 bales last year. The stock in port is 931,000 bales (of which 668,000 are American), against 776,000 bales (of which 537,000 were American) last year. The total imports for the week were 69,000 bales (of which 52,000 were American), against 102,000 bales (of which 48,000 were American) last year, and the amount afloat 331,000 bales (of which 248,000 are American), against 411,000 bales (of which 202,000 were American) last year.

The Liverpool future market has been dull and barely steady, prices having ruled a trifle lower. Below will be found the closing quotations at Liverpool on Thursday of low middling uplands for delivery, as compared with last week:

	To-day.	*Last week.*
March	5 36-64d.	5 38-64c.
March—April	5 36-64	5 38-64
April—May	5 38-64	5 42-64
May—June	5 41-64	5 45-64
June—July	5 45-64	5 49-64
July—August	5 49-64	5 53-64
August—September	5 51-64	5 56-64

The Manchester market closed dull, and tending down.

COTTON REPORTS BY TELEGRAPH.

From Waco, Tex.: The heavy rains having subsided and given place to fair weather, the planters are industriously preparing for the coming cotton crop, which is anticipated will greatly exceed in acreage that of last year, while the fair weather has stimulated collections somewhat.

From New Orleans, La.: Spots have been quiet throughout the whole week, with a fair business. Good ordinary to middling inclusive ⅛c. off, and good middling 1/16c. After a liberal movement of futures there was a drop of nearly ¼c. on spring and summer months, with fully ⅛c. on fall months. India receipts being larger and American greater than expected, added to several heavy bears holding considerable spot cotton, bulls became tired of carrying the heavy weight and let go much cotton, said to take better grip, which looks improbable, as April closes 9.63 bid and May 9.81. March reported squeezed, closing 9.68 bid.

WOOL.

Operations have been on a moderate scale in all wool markets during the past week. Manufacturers in nearly all cases have limited purchases to the supply of immediate wants, and there has been no speculative feeling developed in any quarter. There is a good deal of complaint about the backward trade in some lines of woolen goods, particularly in fine and low grade fabrics for men's wear and in the carpet trade, and manufacturers are watching the market closely in order to guard against over-production. Under the circumstances there is a general indisposition to pile up stocks of raw material in advance of need. The supply on the market is so well in hand that there is very little, if any, direct pressure to sell, but the position as regards values is not so strong as a fortnight ago, and shrewd buyers have in some cases secured fractional concessions. In a word, the market is easier without being quotably lower. With larger stocks, in the present condition of the money market, it is probable there would be more pronounced weakness in values, but the recent reductions in stocks have left the supply within the carrying capacity of trade capital, and there is little, if any, resort to the note-shavers either in New York, Boston or Philadelphia. The situation abroad has not radically changed, and there are no new features worth noting in domestic interior markets. The general outlook is for a quiet trade and fairly steady prices for the balance of the month.

IRON.

There has, as yet, been no improvement in the iron market. American pig is excessively dull at unchanged quotations, Inexplicable as it may appear, buyers do not come forward nor make offers even at the low prices prevalent—$22 for No. 2, $24 for No. 1. Well-informed members of the trade express doubts whether a reduction of 10 per cent. even would result in any business of moment, so dead does the situation appear to be. The contrast between the New York and the Philadelphia markets for pig is noteworthy, inasmuch as at the latter city late reports are to the effect that there "is a fair amount" of business at unchanged prices. Pittsburgh also reports a "fair amount of business" in pig iron. Telegrams to the New York Iron and Metal Exchange (Limited) state that at a meeting of the Western Pig Iron Association, held at Pittsburgh during the the week, the stocks of pig iron at furnaces west of the Alleghany mountains, including charcoal, amount to but 210,000 tons, which was less than was supposed, and in consequence the Pittsburgh pig iron market is reported somewhat firmer. Receipts of Scotch pig iron at New York during the week have aggregated about 2,500 tons of various brands, while the sales have been but about 2,000 tons. Prices of the same are unchanged and the tone unimproved. Business in Bessemer pig iron has continued quiet, holders asking $22. Offers are about $1 less, and it is reported that plump bids at the lower figure would probably be met. Spiegel is quoted nominally at $32, as before noted. Steel rails are quiet. There have been quite a number of inquiries during the week, and it is believed that some of them will result in sales. A few orders are reported at about $39, some of them at Philadelphia. Muck bars have been in more request at $36. Merchant bars are more active, if anything, the demand being fairly noticeable, and quotations are made at 2.2@2.3c. Tank iron continues quiet and the outlook is for some business at about 2.5c. For small lots prices asked are firm. A noticeable thing in the iron trade is that while other lines of business have experienced a moderate revival in the movement of distribution, this industry appears to lag behind with little outlook for an early improvement.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Standard brands of pig are firmer, but inferior lots are sold at concessions. Merchant bar, under western Pennsylvania competition, has been depressed one to two-tenths below card rates, and buyers are taking hold cautiously. Nails have declined under competition, and have sold as low as 3.10, card rate being 3.40. Construction iron is in better demand at low prices. Steel rails are under negotiation, and sales are probable at $38@$39, but no business is reported at the inside rate.

From Pittsburgh, Pa.: Iron manufacturers report plenty of inquiries, and mills could fill with orders to run six months, but buyers and sellers are so wide apart as to prices that little is doing except for immediate consumption. Some of the mills are cutting prices, thereby weakening the market. When this ceases and confidence is restored it is believed large orders will be placed. There is a fair demand for nails.

From Cincinnati, Ohio: Pig iron has moved freely at current prices, and some orders for future delivery have been booked. There is, however, a disposition on the part of sellers to hold for higher prices. Manufactured iron is active, without any change in price.

From Cleveland, Ohio: The iron trade continues in much the same shape as throughout the winter. Prices are unchanged, but firm.

From Chicago, Ill.: Bar and pig iron in better request; stocks of latter moderate. There is a better tone to the market. Nails are in fair request at steadier prices.

From Detroit, Mich.: The iron market is unchanged. Some bar mills are not running on account of the unprofitable prices.

From Louisville, Ky.: The demand for manufactured iron is increasing, and if the present activity continues for thirty days an advance is confidently expected. Sheet iron is in excellent request, something unusual for the spring season. Nails are weak, and buyers look for lower prices, yet stocks are light, and the demand is fair; the mills and foundries hereabouts are fairly active. The plow manufactories have enjoyed an exceptionally good season. The jobbing hardware trade has been good, but prices very unsatisfactory.

From St. Louis, Mo.: Pig iron shows more life than for a long time. Southern coke brands have advanced considerably; otherwise prices are unchanged, but firm. Manufactured iron is at previous rates, but concessions are not made so much, and sales are in better volume, with good outlook.

From St. Paul, Minn.: Hardware sales are mostly for assorting stocks. There is a fair movement in heavier iron. Nails weak.

COAL.

The spring trade in anthracite coal has begun, the circular rates having been made public during the past week. The prices announced are nominally to go into operation April 1, but several companies have gone openly into the market with offers at the spring schedule rates, and it is reported in the trade that on Thursday they were all doing business on the new basis. There have been advances made in prices on stove and chestnut of from 10c. to 25c. per ton as compared with last spring's circular, and in a few instances pea coal is 5c. higher. Shipments east have shown some activity, owing to lower freights, but western dealers do not expect a revival until after the opening of lake navigation. It is not probable that lake freights will be finally determined until next month. There is but little anthracite stock, and the demand is believed to be sufficient to take care of all the coal coming forward. Bituminous continues dull, with no new features of moment.

PETROLEUM.

The situation in the speculative petroleum trade at the present time presents exceptional reasons for believing in a bull market, although it may be fair to presume, from this, that a heavy decline is in order. The bull outlook is based as follows: Ever since the decline and fall of the Cherry Grove producing region the bulls have been waiting for a clear field to boom prices of certificates. On one rush the quotations were run up to $1.36, and $1.50 and $2.00 were freely predicted. It soon became apparent, however, that the move was a deliberate bit of manipulation and prices stumbled back, with occasional but ineffectual reactions, into the eighties. Since that time they have been above the dollar mark at intervals, but always under protest from a group of new wells "about to come in." At the present time the Cooper tract in Forest county, Pennsylvania, and the county itself, are reported and are generally admitted to be of small import. The production of the tract named has steadily declined for two weeks, and the total there is now given at 1,234 barrels daily, against 3,450 barrels a fortnight since. Even the older petroleum regions have shown a tendency to furnish less oil of late—if statements currently accepted by operators on 'change are to be given credence. The statement is that a gauge of stocks at 3,657 wells in the Bradford field shows a decrease of about 82,650 barrels of stocks at the wells during February. These statements are par excellence bull arguments and warrant some degree of faith in higher prices—"other things being equal." From the highest figure touched during the week, however ($1.10 on Tuesday), quotations have been gradually falling away. The decline on Wednesday and Thursday was quite marked, the opening on the former day being $1.07, and on the latter $1.05, while the closing quotation Thursday evening (the exchange being closed on Friday) was

$1.02⅞, or 1c. higher only than at the close on Friday evening of last week. The weakness of Wednesday is attributed to the stringency in the money market. This raises the carrying rates, and checks correspondingly the quantity of outside investment. The same deterring cause operated to weaken the situation on Thursday, but by far the stronger depression was the outgrowth of a very general desire to realize on holdings. Heavy sales of "long" stock were made on Wednesday, and still larger ones on Thursday, and, as a result, prices drooped. As may readily be seen, with an easier money market, there is nothing at present in sight to interfere with a rise in the price of oil. But the bear side will have forgotten its cunning if it is not able to spring something into view to take advantage of the anticipated troop of outsiders who are now expected to come forward and buy oil. The movement of prices of certificates of crude oil during the week March 16 to Thursday evening was as follows:

PRICES OF CERTIFICATES OF CRUDE.

	Opening.	*Highest.*	*Lowest*	*Closing.*
Saturday	102½	102¾	100⅞	101¾
Monday	102⅜	106	102⅜	106
Tuesday	107½	110	106	106
Wednesday	107	107¼	103¼	104½
Thursday	105	105¼	102½	102⅞

The market for refined oil was very firm last Saturday at an advance of ⅛c. On Tuesday another advance of ⅛c. was made, and the firmness was undiminished. Case oil, plain brands, went up ¼c. to 11c. There was less strength to refined on Wednesday. The quotations on Thursday, as compared with the same on Friday evening of last week are as follows:

	March 16.	*March* 22.
Certificates of crude	101⅞c.	102⅞c.
Refined petroleum, 110°	8⅛	8⅜
Refined petroleum, 70°	8¼	8½
Crude, in barrels	7@ 7½	7@ 7½
Case oil, plain brands	10¾	11
Naphtha	6¾	6¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to March 17 was 108,008,732 gallons, against 101,468,383 gallons in a like period of 1882, an increased exportation in favor of 1883 of 6,540,349 gallons, against an increase of 5,536,939 gallons reported up to March 10. For the week ending March 17 the foreign shipments were 11,011,251 gallons, against 9,565,799 gallons in the preceding week. New York city's exports of petroleum from January 1 to March 17 amounted to 92,635,925 gallons (leaving but 15,372,807 gallons for all other ports), against 84,770,210 gallons in a like period in 1882.

OCEAN FREIGHTS.

There has been no lasting improvement in ocean freights during the week. A number of petroleum charters were recorded several days ago, but they have been conspicuous for their absence of late. Grain has not gone abroad to any great extent. Berth freights are dull and featureless. Ocean freight brokers of late, in attempting an explanation of the apparently inexplicable dullness in the charter line, have stated that the number of vessels available is in excess of demands, and hence competition and low rates. This, however, was to be expected after the squeeze in ocean freights during the closing months of 1882 and for some time thereafter. The high rates then paid drew vessels hither with the natural result of creating a dull freight market, happening as it did when restrictive influences are at work on various shipments abroad.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Collections are slow. The condition of general trade is improving. Groceries are very active. Manufactories all busy with a full line of orders. Lumbering and fishing interests promise well.

From Boston, Mass.: The boot and shoe tradel is fair for the season; there is usually an interva about this time. Shipments for the week to places outside of New England 57,880 cases, against 51,912 cases the twelfth week in 1882. Total shipments since January 1, 631,621 cases, against 574,379 cases same time last year.

MIDDLE STATES.

From Buffalo, N. Y.: Trade in general lines shows a very moderate improvement over last week, but, with few exceptions, is still quiet and lacking the spirit that was expected would be developed by this time. Staples and necessaries show a fair consumptive demand, with a generally expected feeling that more seasonable weather will produce a more encouraging outlook. There is no prospect for an early opening of navigation. Shipments of coal and other coarse freights will be delayed for some time on this account. Collections are only fair.

From Philadelphia, Pa.: Trade has been only moderately active. There is a marked absence of speculative feeling in most of the merchandise markets. Jobbers and retailers, as a general thing, are buying for near wants rather than for stocks against possible future requirements. The aggregate distribution on interior orders is fair, but there is no decided vim or activity noticeable in any branch of trade. Unsettled weather and the stringency of money have contributed to retard active trading. There is not much direct complaint of hindrance from the latter cause in general trade circles, but its influence is felt. There is no appreciable change in raw materials. Some weakness is reported in fancy and special lines of the grocery trade, but staple articles are pretty steady and selling fairly. Provisions are jobbing more freely. Butter continues slow. The Easter trade in eggs has been very active, and large receipts have been promptly marketed. Petroleum has been in better export demand and closes firmer. The grain trade has ruled dull at declining prices. Exporters have bought very moderately, and speculation has been hesitating, and, on the whole, very tame. Flour has eased off slightly and closes dull. A few cargoes of molasses have been bought to arrive, but boilers have not yet commenced operations.

WESTERN STATES.

From Cincinnati, Ohio: The movement in various lines of trade, while possibly slightly retarded by the closeness of the money market, has been fair and satisfactory. A firm tone prevails, and confidence as to the future is freely expressed. Grain dull, with light receipts. There is an exception in rye, which has taken a sharp advance. Cotton dull and weak, with heavy receipts and large stocks, although the volume in this line this year is slightly smaller than last. Whisky is steady, with a fair consumptive demand, with no change in prices. The flour market is firm, but dull. Some few orders from the south lead holders to believe that the trade will open shortly with an active consumptive demand. There has been an animated demand for all grades of tobacco, of which there have been large offerings during the week, with perhaps stiffer prices, though without much advance, much of the new being taken for foreign account.

From Cleveland, Ohio: The weather throughout the week has been clear and favorable for general business, and in most lines jobbing trade has been fair; spring orders, however, are backward as compared with former seasons.

From Columbus, Ohio: General lines of trade are the same as last week, except, perhaps, that a little slowness in groceries is noticeable. Buggy manufacturers appear busy, and collections in all branches are up to the standard.

From Dayton, Ohio: Manufacturing interests are active. Money is in great demand. Collections very hard to make.

From Toledo, Ohio: The weather is very cold, and, as a consequence, trade generally is dull and collections poor.

From Chicago, Ill.: Staple groceries are moving fairly on orders. Trade is fairly healthy. Wheat unsettled; cold weather and uneasiness regarding fall-sown prevents a decline. Corn weak, due to large receipts and improved inspection. Oats held up by combination. Boots and shoes in better demand. Hardware shows increased activity.

From Peoria, Ill.: Business, aside from the grain trade, is rather quiet just now; in the latter there is a decided improvement, and prices sympathize with those in Chicago.

From Louisville, Ky.: The money market is quiet but close and firm. Currency is scarce. Collections from the cotton states are reported more satisfactory than usual, and the proportion of cash sales appears to be larger. The jobbing merchandise trade is generally active and well supported, the volume of sales comparing favorably with previous seasons. Grain is quiet and firm. Boot and shoe houses report trade considerably in excess of last year, the country demand being larger and city sales of average dimensions. Leather and saddlery is in good miscellaneous request. There is a fair business doing in cotton at rather easier rates; the receipts are liberal. Leaf tobacco receipts have diminished, owing to the dry temperature, and sales have been active at full prices. Plug tobacco manufacturers report a brisk employment on orders. The Kentucky whisky market is dull and heavy on account of the large stocks and pressure to sell; but, on the other hand, the continued large consumptive demand and the almost total stoppage of manufacturers tends to neutralize the otherwise depressed condition of the trade; exporting to defer payment of the tax is going on extensively. The produce market is quiet. Seed potatoes active. Flour steady and fair movement.

From St. Louis, Mo.: The jobbing trade is excellent, but collections are not so easy. A great many country merchants are buying in person, and hotels are full. Nearly all factories are busy with orders. Building is very brisk, but laborers and building mechanics are asking higher wages, and material is advancing. The cotton market is flat again. Flour is dull and weak. All grains continue slightly downward, but are more active. Horse and mule market continues brisk with heavy receipts and sales, and values at a stand.

From Kansas City, Mo.: General trade has been rather quiet during the week, caused partially by backward, unseasonable weather. Most staple lines report satisfactory sales and fair collections.

From Burlington, Iowa: Business generally shows a steady improvement for the week. Jobbers are filling good orders for general spring trade. Some lines show a gain of 50 per cent. over last season at a corresponding date, while all report a satisfactory and increasing demand for goods. Collections are fair.

From Des Moines, Iowa: The drug trade is improving. Grocery trade is quiet, but stronger and more active. Business men hopeful and confident of better things as soon as the spring fairly opens.

From Leavenworth, Kan.: Special reports from all parts of the state show early-sown wheat to be in a splendid condition, and late-sown in a fair condition and doing well; prospect now is for the average of last year. A large acreage of corn will be planted. The wheat and corn coming in is being stored in elevators; prices down.

From Lawrence, Kan.: All lines of trade have been moderate during the past week, owing largely to farmers being busy putting in spring crops.

From St. Paul, Minn.: The full average season expected is based on wheat yet to be marketed, and a large immigration has commenced. Groceries are fairly active for the season. Boots and shoes quiet. Drugs are in good demand. Lumber more active. Country roads are bad in many places, deep snow or mud impeding travel and trade. Mercantile collections slightly improved.

From Omaha, Neb.: Trade during the past week has been quiet, owing to somewhat colder weather. The whole trade appears to be simply waiting for spring to open. Jobbers are all looking for a fair spring trade, which will continue through the summer months.

CALIFORNIA.

From San Francisco, Cal.: Business is dull as a general rule owing to continued dry weather. Unless rain comes soon the wheat crop will be a partial failure. Three inches of rain wanted to insure crop. Mail brings favorable advices from Australia. The China trade shows a fair average.

SOUTHERN STATES.

From Baltimore, Md.: Owing to unfavorable weather the past week business was rather dull in all its branches. Jobbers reported some southern orders coming in, but a decided feeling of lethargy prevailed among them. Transactions in grain were moderate. The supply of southern wheat is small and uncertain as to quality; that market rules quiet and somewhat irregular. Holders of cotton are not anxious to push stocks, notwithstanding the little inclination of buyers to do business; about 100 bales were sold one day late in the week at current prices. The demand for finer grades of eastern cheese is quite active and the market firm. Offerings and receipts of wool are small and the market is weak in tone. Freights continue dull and prices nominal.

From Richmond, Va.: General trade is quite good.

From Norfolk, Va.: All departments of trade for the week past have been quiet with the exception of wholesale grocers. Cotton receipts about the same as last week's. Peanuts in active demand at advanced prices; stock on hand not large. Collections only fair.

From Wilmington, N. C.: Weather cold, with rain. Cotton market steady; receipts and sales fair. Grain and breadstuffs quiet. Foreign freights steady; coastwise dull. Timber easier; lumber dull; shingles firm. Spirits of turpentine firm, with an upward tendency. Rosin quiet. Tar and crude turpentine steady.

From Savannah, Ga.: Trade quiet in cotton, rice and naval stores. More doing in hay and grain. Money market very stringent, retarding operations; brokers more cautious than usual. Tonnage for lumber in full supply for coastwise trade.

From Selma, Ala.: Trade in the grocery line is rather dull and dealers are disposed to complain.

From New Orleans, La.: Sugar and molasses are dragging. General crop news favorable, though weather is reported too cool for sprouting cane. Coffee steady at 9¼. Rice quiet and steady, with ample stocks. Flour easy at a slight decline. Exports of grain considerable. Money working less closely.

From Waco, Tex.: The demand for goods in all lines is reported very active, and merchants are buoyant.

From Nashville, Tenn.: There is nothing of special interest to note in the trade for the week. Trade in all lines proves satisfactory. Flour is active, with an improved southern demand. Wheat is quiet and steady. Corn is dull, with a slight demand. Country produce is steady and demand good.

From Memphis, Tenn.: Business this week is satisfactory in most lines, especially in supplies and farming implements. Corn is easy and buyers scarce. Oats steady. Breadstuffs dull and weak. Jobbers say last week was the best this season in volume of sales.

NOVA SCOTIA.

From Halifax, N. S.: There has been no perceptible change in general business.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.	*Exchange selling on New York.*
Boston, Mass.	6 @ 7	25c. discount per $1,000.
Chicago, Ill.	@ 7	50@60c. disc't per $1,000.
Cincinnati, Ohio	6 @ 7	Par.
Columbus, Ohio	@ 8	Par.
Dayton, Ohio	6 @ 7	Par.
Des Moines, Iowa	8 @10	⅛ premium
Halifax, N. S.	6 @ 7	⅜@⅝ premium.
Kansas City, Mo.	10 @12	$1 premium.
Memphis, Tenn.	8 @ 8	¼ premium.
Nashville, Tenn.	8 @	$2 per $1,000
New Orleans, La.	@ 7	Par
Norfolk, Va.	6 @ 9	⅛@¼ premium.
Portland, Me.	6 @ 7	1-10 premium.
Providence, R. I.	6½@ 7½	Par.
San Francisco, Cal.	8 @ 9	20c. premium
Selma, Ala	8 @12	½ discount.
St. Louis, Mo.	7 @ 8	Par@25c. prem. per $1,000
Toledo, Ohio	7 @ 8	1-10 premium.
Waco, Texas	15 @	Par.
Wilmington, N. C.	6 @ 8	Par.

MILLING MACHINERY.

The following is from the *Journal of the Society of Arts* (London) of February 23: Milling, although one of the oldest mechanical processes in the world, is undergoing a complete revolution at the present time. Up to within ten or twelve years ago the system of milling in use, both in this country and America, was the familiar process which consists in passing the grain between the upper and nether millstones, set closely together so as to crush at one operation all the interior of the wheat-berry into flour, while the exterior skin, or bran, is spread out into flat cakes. A skillful miller endeavored to break the bran as little as possible; first, because fewer of its particles would then find their way into the flour; and, second, because large flakes of bran are commercially more valuable than small. After grinding there was nothing to do but to separate the flour from the "offal" by sifting or "dressing" the meal, the whole system having been modified in nothing except details since the day when two women first ground at the mill.

"Low or flat grinding," as it is called, is well adapted to wheats with tough skins, such as are grown in England; but the wheats of eastern Europe and western America, on which Great Britain now largely depends, are of a different character. These are very hard, and have such extremely brittle skins that any attempt to grind them in the usual way results in the bran breaking up into very fine particles, which cannot afterward

be separated from the flour by any process of dressing.

So long as the public was not fastidious in the matter of its bread the dark flours which "low grinding" produced from hard wheats found a sale on the continent. But the taste of consumers has grown more refined of late years, so that, first the Austro-Hungarian and then the American millers found themselves obliged to march with the times. Hence arose the practice of "high grinding," or setting the millstones just so far apart that they crack the wheat-berry into small particles, but do not grind it into powder. The cracking is repeated several times, and the products, called middlings or "semolino," are winnowed after every operation, until all the bran has been removed. Nothing then remains but granular fragments of the interior of the wheat-berry, which are crushed down under "low-grinding" stones into flour.

By this system, at least three qualities of flour are produced, viz.: that from the first grinding, the ground middlings, and a flour obtained by finally grinding the bran. The first of these flours contains all the impurities which cling, even after careful cleaning, to the wheat-berry. The second is finer and whiter flour than can possibly be produced by low grinding; while the third is a coarse and comparatively valueless branny flour.

The success of high grinding depends on finding a market at a comparatively high price for the fine flour; and, a dozen years ago, Austro-Hungarian flours, produced from semolino, were selling in the English market at from 10s. to 20s. a sack more than the home-made article. For a long time, indeed, the continental maker was able to dispose of all his fine flours abroad at a high price, while he found a home market at not too low a price for the inferior bran flours.

But this state of things did not last. America adopted the "new process," and exploited it with her usual energy. Every miller who had a middlings purifier launched into making middlings flour regardless of yields, for, at the prices then ruling, he could afford to ignore the quantity of wheat it took to make a barrel of flour. The demand for very fine flours is, however, limited, and in the course of a few years the market became glutted, the price of "patent flour" was pulled down, and the question of yields forced itself again on the millers' attention. Then came modifications of the "new process," and, finally, the system of "gradual reduction," concerning which the minds of the millers are greatly exercised at this moment.

It is admitted on all hands that this is the process under which the highest quality of flour can be manufactured; but it is complex in working, and its complete adoption would seem to threaten the time-honored millstone itself with extinction. British millers naturally hesitate before taking a step which involves erecting a perfectly new plant; but something was gained by the party of revolution when they persuaded a number of these gentlemen to pay a visit to Buda Pesth, and see with their own eyes what was being accomplished there by means of roller mills.

Roller mills date back to 1820, when three of them were built on the continent, one at Vienna, one at Paris, and one in Switzerland. All three were failures; but, ten years later, Mr. Sulzberger, of Faurenfeld, brought out a new roller mill, which created an extraordinary sensation among continental millers. Rollers were erected throughout Germany, Italy and Austria. Everyone thought that the days of the millstone were numbered, and, indeed, there was something to justify these anticipations. The new mills made good flour and good profits, yet before 1840 they had, all but one, reinstated their old millstones. Several reasons have been given out for this, the most probable being that the rollers were too indiscriminately used for all kinds of work. Be the cause what it may, roller mills were lost sight of for a long time after the fiasco of 1830–33.

A new revival in favor of roller-milling is again in full blast, and it now becomes necessary to describe the process of gradual reduction as it is carried out under this system. The wheat, having been first cleaned, is led between a pair of fluted and differentially speeded rollers, which are set so as scarcely to allow the grain to pass through them. The corn is thus slightly cracked, after which it is purified for the removal of any dust that may have been disengaged. It next passes between another pair of rollers, more closely set, which break the grain again; the resultant meal is sifted, and some semolino, accompanied by a little break-flour, is obtained. These operations are repeated again and again, but always between closer rollers and with finer sieves, until most of the inner part of the berry has been freed from the bran. A meal is thus produced which consists of middlings of various sizes, particles of bran of corresponding sizes and break-flour. The last is sifted out, and then the semolino is winnowed in order to separate out the light particles of bran. But, as the amount of wind which would suit the larger fragments would blow away the smaller ones, the meal is first sized by wire cloth and silk gauze into a number of different qualities, and these, after being purified of their bran by air currents of suitable strength, are separately crushed into flour between smaller rollers under considerable pressure. The system is a delicate and intricate one in comparison with the simple process of "low grinding," but the fine flours obtained are of the highest quality, and, where a suitable market can be found for them all, it gives good commercial results.

Rollers are almost always made of chilled cast iron, and are fluted, fine-grooved or smooth, according to the functions which they fulfill in milling. A few years ago, however, Mr. Wegmann, a Naples miller, introduced rollers of unglazed porcelain as rivals to chilled iron. Their surface has a texture similar to, although much finer than, that of French burr-stones; but the proper place of porcelain in rolling-milling is to reduce the finest or branless semolino into flour. When bran is present the very grinding power of the porcelain reduces it to such minute particles that by no process of purification can these be afterward separated from the flour.

The middlings purifier is one of the most important of all recent improvements in machinery connected with milling. By its means semolinos, which is the object of gradual reductions to produce, are freed from the small particles of bran mixed up with them, and are themselves separated, according to their densities, into lighter and heavier samples. No sifting can accomplish this, because the middlings and bran are often of the same sizes, although differing in specific gravity.

In the ingenious exhaust machines now universally employed in Austria and Hungary a stream of semolina falls through a vertical pipe fitted with baffle-boards, so arranged as to cause the stream to cross and recross the pipe repeatedly, while a current of air is sucked upwards through the latter by means of an exhaust fan. The strength of the current can be regulated so as to carry away the whole stream of semolino, or only the lightest particles of bran, every falling fragment being thus weighted and reweighted many times in a delicate pneumatic balance.

Another type of machine which finds much favor in England and America, where the semolino is small, is well represented by Mr. Child's "Excelsior" middlings purifier. This is a combination of silk riddles and exhaust. The former are given a downward beat by the action of a pair of cams, which, compressing four india-rubber springs at the corners of the riddle frame, causing the riddles to rise and strike against a stationary buffer, and the sudden stopping of the sieves, throwing the middlings into suspension, enables the exhaust to act with the greatest effect on them. The air current, which sweeps upward through the silks, carries its lightest particles away altogether, but is not powerful enough to prevent the heavy granules of semolino falling through the riddles. The branny particles, however, which are lighter than semolino, are kept floating on the silk, through which the air current prevents them from passing, and are ultimately discharged as overtails.

TRADE EMBARRASSMENTS.

There were 196 failures in the United States reported to BRADSTREET'S during the past week, 37 less than the previous week, 78 more than the corresponding week of 1882, and 63 more than the same week of 1881. The middle states had 48, a decrease of 9; New England states 28, a decrease of 4; southern states 37, a decrease of 20; western states 61, a decrease of 12; Pacific states and territories 22, an increase of 8; Canada and the provinces 32, a decrease of 10. The important failures were James F. Pendergast, ship broker; Schloss & Heilbronner, wholesale cloths, and Moritz Wetzlar, importer of leather, New York city; R. E. & H. Hoopes, bankers, New Brighton, Pa.; The Exchange Bank of Denver; Camp, Morrill & Camp, dry goods, Jackson, Mich. In the principal trades they were as follows: Grocers 38; general store 30; liquors 13; dry goods 11; clothing 10; shoes 10; fancy goods 7; manufacturers 6; lumber 6; drugs 5; hotels and restaurants 5; commission 4; books and stationery 4; hardware 4; tobacco and cigars 3; produce 3; millers 3; leather 3; banks 2; coal 2.

ALABAMA.

ELYTON.—C. L. McWilliam, saloon, has assigned.

MONROEVILLE.—A. Kinsky, general store, has failed and sold out. Liabilities $2,500; assets $600.

TALLADEGA.—Lewis & Co., general store, have assigned Liabilities $0,500; assets $7,500.

ARIZONA.

CONTENTION.—Leopold Alexander, varieties, was burnt out, and the insurance money has been attached by two creditors for $655.

ARKANSAS.

NEWPORT.—Schuuyers & Heinbach, grocers, have failed.

CALIFORNIA.

BAKERSFIELD.—E. P. Wheeler, general store, offers to compromise at 30 cents.

FRESNO.—Chiuda & Co., fruits, are reported to have failed.

RED BLUFF.—Isaac Haberland, general store, has called a meeting of creditors.

SAN FRANCISCO.—H. A. Grant, ship carpenter, has filed a petition in insolvency.

SAN FRANCISCO.—Krudener & Koster, grocers, have filed a petition in insolvency.

SAN FRANCISCO.—Frank A. Mackert, saloon, has filed a petition in insolvency.

SAN FRANCISCO.—M. Neisser, commission, has filed a petition in insolvency.

SAN FRANCISCO.—William Noething, brewer, has been attached.

SANTA CRUZ.—Harry O'Donnell, dry goods, has been closed on an attachment for $1,105.

SANTA CRUZ.—D. B. Ryder, shoes, is reported to have failed.

SCOTTSVILLE.—Nesbitt & Reed, shoes, have dissolved and been attached.

SPENCERVILLE.—John Tembly, hotel, has been attached.

COLORADO.

ALAMOSA.—James Boyd, saloon, has assigned. Liabilities $500; assets $250.

DENVER.—Thomas Kane, transfer, has suspended, having been embarrassed through the failure of others.

DENVER.—Frank J. Medina, grocer, has assigned to D. T. Sanderson. Liabilities about $1,800; assets small.

DENVER.—N. J. Slocum, clothing, has assigned to E. R. Cowan.

DENVER.—The Exchange Bank has been placed in the hands of J. M. Strickler as receiver. He has been the cashier for several years past. The bank was incorporated January 1, 1876, with a paid in capital of $200,000, which was afterward reduced to $100,000 on account of impairment by bad loans. The deposits were about $260,000.

DENVER.—Henry Tuggy, manufacturer of boots and shoes, has assigned to Chamberlain & Co. In December last he claimed assets $45,700; liabilities $26,000. The banks backed him heavily, and he lost ground last summer through sickness and other causes. He began in 1875.

RED MOUNTAIN.—E. G. Segner, general store, has been closed by the marshal.

CONNECTICUT.

DERBY (Birmingham).—Henry Van Hoosear, dry goods, has been closed on attachments for $9,200 in favor of New York creditors. He began in December last, having previously been at South Norwalk.

NEW HAVEN.—S. C. Northrup, books, has assigned.

WATERBURY.—Mrs. C. McCarthy, saloon, has been attached.

WEST WINSTED.—Thompson, Stacker & Co., manufacturers of bolts, have assigned. They were recently burnt out.

DAKOTA.

BISMARCK.—L. A. Scudder, shoes, has assigned.

SIOUX FALLS.—Allen & Lee, music, have been closed by attachments.

DELAWARE.

SMYRNA.—H. D. Boyer, livery, is reported to have failed.

DISTRICT OF COLUMBIA.

WASHINGTON.—Joseph H. Rosenbaum & Son, millinery, offer 25 cents.

GEORGIA.

COLUMBUS.—R. R. Kidenhour, general store, has assigned.

SAVANNAH.—Application has been made for the appointment of a trustee for the estate of Daniel H. Wilcox, of Wilcox, Gibbs & Co., fertilizers. The application was made by George A. Wilcox, on the ground of insolvency at New Haven, Ct., and a hearing is set down for the 26th inst. In January last Mr. Wilcox gave a realty mortgage for $55,000 and Wilcox, Gibbs & Co. for $70,974, then believed to have been done to debar the claim of Babcock & Co., of Liverpool, who sued them on a claim for $60,000.

SMYRNA.—W. W. Pace, notions, has been closed by the sheriff. He had a branch at Mableton.

ILLINOIS.

ANDOVER.—N. P. Lindquist, dry goods and groceries, has assigned. Liabilities $3,000; assets $500.

CANTON.—C. H. Smith & Co., grocers, have failed and offer 20 cents. Liabilities $1,800.

CENTRALIA.—Barton & Stevenson, grocers, have compromised at 50 cents.

CHICAGO.—At a meeting of the creditors of W. T. Allen & Co., wholesale grocers, on the 17th inst., the firm offered 50 cents cash or 60 cents in four, eight and twelve months. Some additional signatures were obtained, but no conclusion was reached.

CHICAGO.—Albert Heyman, leaf tobacco, has been closed by the sheriff on a claim for $4,224.

CHICAGO.—John Keogh, stationer, has been closed by the sheriff.

CHICAGO.—P. R. Higgins, furniture, has been closed by the sheriff.

CHICAGO.—The Novelty Brass Manufacturing Company has assigned to Isaac E. Adams. It was incorporated in October last, claiming $10,000 paid in capital.

CHICAGO.—Charles Todd, trading as E. Todd & Co., produce commission, assigned on the 20th inst. to E. Moore, Jr. He was also a partner in Wickey & Todd, creamery, at Ashton.

CHICAGO.—Mark A. Waterhouse, trading as Waterhouse & Co., dry goods, has confessed judgment for $2,144, and was closed by the sheriff. He began last September.

PARIS.—A. C. Connelly, hotel, is reported to have failed.

PEORIA.—Charles Foreaux, grocer, has been closed by the sheriff.

SANNEMIN.—J. M. Rhoades, general store, is reported to have been closed by the sheriff on a claim for $1,900.

THOMPSONVILLE.—A. J. Davis & Son, general store, offer to compromise at 50 cents.

VALPARAISO.—O'Brien & Miller, notions, have been closed by the sheriff.

INDIANA.

COLUMBUS.—S. B. Samuels, clothing, has sold out for $2,200. He owes about $2,300.

HUNTINGTON.—John Skiles, grocer, has been attached.

INDIANAPOLIS.—Chambers & Baggerly, leaf tobacco, have failed.

INDIANAPOLIS.—The Ajax Cigar & Tobacco Company is reported financially embarrassed. A chattel mortgage for $3,000 was recently entered.

TERRE HAUTE.—Hall & Ewart, drugs, have been closed on execution.

WALKERTON.—C. W. N. Stephens, general store and hardware, has failed. He is also of Stephens & Wolf, clothing.

IOWA.

CARROLL.—C. J. Otto, harness, has failed.

EDGEWOOD.—Noble & Foote, general store, have been closed by the sheriff on chattel mortgages.

FARMINGTON.—M. Hummelreich, clothing, has assigned.

KENTUCKY.

EDMUNSON.—C. P. Spillman, dry goods, has been attached for $1,900.

LOUISVILLE.—Thomas McShane, dry goods, has assigned to The Fidelity Trust Company.

RAYWICK.—T. J. Clark, drugs, has failed.

ST. MARY'S.—W. S. Tandy, general store, has failed.

MAINE.

FREEPORT.—Edward P. Oxnard, general store, has been attached.

KINGFIELD.—S. & C. W. French, lumber, have been attached.

LEWISTON.—H. S. Garcelon, drugs, is reported to have failed.

LEWISTON.—C. H. Pendexter, fancy goods, owes $6,550; actual assets $2,500.

PORTLAND.—S. J. Clough, fancy goods, is in insolvency.

MARYLAND.

BALTIMORE.—E. M. Kirkland, hats, has assigned.

BALTIMORE.—H. R. Trockler, commission, has filed a petition in insolvency.

BALTIMORE.—L. G. Warfield, restaurant, has assigned.

DENTON.—W. A. Stewart, general store, who recently assigned, owes $4,500; assets about $3,500; no preferences.

STAFFORD.—E. M. Allen, fertilizers, is reported to have assigned to Stevenson Archer.

MASSACHUSETTS.

BOSTON.—H. G. Hawes, of H. G. Hawes & Co., fertilizers, has gone into insolvency with liabilities of $6,100, exclusive of his liability in the suit against the firm on the disputed claim of The Montauk Oil & Guano Manufacturing Company for $25,000 damages for alleged breach of contract. It is understood that the insolvency proceedings dissolve the firm, and they are doing no business as a firm at present.

BOSTON.—George A. Hentz & Co., teas, have increased their offer to 20 cents.

BOSTON.—Albert A. Robinson, wool and shoddy, has failed. Liabilities about $3,325; no assets.

BROOKLINE.—John J. McCormack, contractor, is in insolvency.

CHICOPEE FALLS.—W. H. Goldsmith, grocer, has been closed by the sheriff

FALL RIVER.—Gibbs & Clark, clothing, have assigned. Liabilities about $15,000; nominal assets $20,000.

HAVERHILL.—Thomas F. Finney, plumber, has failed. Liabilities $2,500; nominal assets $900.

HOLYOKE.—Fitzgerald & Co., stationery, are reported compromising at 40 cents.

HUDSON.—H. G. Regan, clothing, owes about $5,500. It is thought he will pay 30 to 40 cents.

LENOX.—A warrant of insolvency has been issued against The Lenox Glass Works. Andrew T. Servin, one of the proprietors, was attached. He owes about $20,000.

LOWELL.—James A. Gardner, wood, is reported to have left town owing considerable.

NEW BEDFORD.—R. H. Crossman & Co., stoves, owe $13,641; nominal assets $5,245. They offer 25 cents.

NEWTON.—W. H. Fullerton, grocer, has been attached.

NEWTON (Auburndale). George L. Wadsworth, grocer, has left town. He ostensibly sold out, but the sale, it is said, will be contested, and creditors petition in insolvency has been filed.

PITTSFIELD.—C. A. Saroni, stationer, offers to compromise at 20 cents.

QUINCY.—Frederick Hardwick, grocer, has filed a petition in insolvency.

SHELBURNE.—The Gardner Manufacturing Company, cutlery, is in insolvency.

SPRINGFIELD.—The Chapin Paper & Pulp Company has gone into insolvency. Liabilities about $35,000.

WALTHAM.—Whitney & Edes, grocers, have failed and offer 25 cents. Liabilities $3,500; assets $2,300.

MICHIGAN.

CLARE.—James E. Alger, grocer, has failed.

FARWELL.—J. A. McLellan, general store, has been attached.

GRAND RAPIDS.—William Dunham, stave manufacturer, has been closed out on a chattel mortgage.

JACKSON.—Camp, Morrill & Camp, dry goods, gave a chattel mortgage for $10,000 and assigned to S. S. Heywood. They succeeded H. M. Bennett & Co. in 1871. Liabilities $65,000, of which $30,000 is said to be secured; nominal assets estimated at $65,000

MONROE.—Joseph A. Loranger, dry goods, has failed.

NIRVANA.—Wall & Sipley, lumber, are financially embarrassed. Liabilities about $40m, and there are chattel and realty mortgages covering their property to the amount of about $35,000. They have given a bill of sale for $10,000.

ROSCOMMON.—John Mahoney, saloon, is reported to have left town. Liabilities reported from $15,000 to $25,000. He is also of the firm of Mahony & Drum, saloon.

TUSTIN.—A. M. Letson, dry goods, etc., has been closed under a chattel mortgage.

MINNESOTA.

GRACEVILLE.—Strong Brothers, lumber, have assigned.

MISSISSIPPI.

MAGNOLIA.—T. H. McGowan, saloon, has been attached.

MISSOURI.

QUITMAN.—Stoner & Omer, drugs, are reported to have left town.

ST. LOUIS.—J. H. Holsten, granite, is advertised to be sold out under a chattel mortgage.

NEBRASKA.

FRIEND.—Gilmore King, harness, is reported to have failed.

NORFOLK.—F. Steinkrause, saloon, is reported to have failed. He gave a chattel mortgage for $500.

OAKDALE.—O. A. Olsen, shoes, has failed.

OMAHA.—G. W. Hyde, grocer, has failed.

ORLEANS.—I. J. Charlton & Co., Orleans Wagon Company, have been attached for $1,137.

WILBER.—Edward Connell, grocer, is reported to have failed.

NEVADA.

CARSON.—Koppel & Platt, clothing, have given a bill of sale. They have a branch at Bodie, Cal.

CHERRY CREEK.—Grey & Collins, varieties, have been attached.

NEW HAMPSHIRE.

OSSIPEE (Centre Ossipee).—O. L. White, grocer, has failed on account of the failure of J. Q. Rolles.

STARK.—Smith & Pike, general store, offer 50 cents.

TAMWORTH.—Hatch & Emery, general store, are reported to have failed.

NEW JERSEY.

ELIZABETH.—Michael Keck, shoes, has been sold out by the sheriff on judgments for $1,031, realizing $800. He owes about $500 for which he has no assets.

NEW YORK.

ALBANY.—Near & Gardner, news, have assigned to Peter Putnam, Jr., giving preferences for $1,296.

ALBANY.—F. A. Wolfgang, grocer, has assigned to John T. Kelly.

ANGELICA.—C. A. Way & Co., coal, have failed and sold out.

BATAVIA.—A. E. Adams, grocer, has assigned to James R. Mitchell, giving preferences for about $400.

BROOKLYN.—Henry A. Harrison, jeweler, has assigned to J. Bunce, giving preferences for $4,850.

BUFFALO.—The schedules of L. H. Hager show liabilities $3,124; nominal assets $2,686; actual assets $2,546.

BUFFALO.—E. McAllister, grocer, has assigned.

CERES.—J. B. Gleason, general store, became embarrassed in building a saw mill and has sold out.

EARLVILLE.—George King, general store, has assigned.

FORT EDWARD.—The schedules of Sanford Smith & Son show liabilities $15,000; assets $7,000.

GENEVA.—G. C. Seeley (agent), general store, has assigned, giving preferences for $500.

GLOVERSVILLE.—W. J. Neal & Co., leather, have assigned.

GREENE.—Bowen & Turner, general store, have failed.

HEMLOCK LAKE.—A. B. Hosford, grocer, has assigned.

HORNELLSVILLE.—W. Rewalt, Jr., restaurant, has sold out without providing for his creditors.

HORNELLSVILLE.—Ryan & Powers, merchant tailors, have been closed by the sheriff on judgments for $1,500. Liabilities about $7,000.

HUDSON.—Horace Payne, grocer, has assigned.

LACONA.—William T. Tifft, produce, has assigned.

NEW YORK CITY.—The schedules of Albert Baumann, tobacco, show liabilities $4,657; nominal assets $4,633; actual assets $3,056.

NEW YORK CITY.—The schedules of Anselm Bruck, shoes, show liabilities $8,128; nominal assets $5,444; actual assets $4,197.

NEW YORK CITY.—James F. Pendergast, ship broker, assigned on the 19th inst. to Edward W. Humphreys, giving six preferences aggregating $2,557. The liabilities are stated to be about $75,000, and nominal assets in excess of that amount. Mr. Pendergast says the assignment was a precautionary measure, and was the result of losses at sea during the past two months. He lost the barks Elsinore and Thomas Fletcher and had met with other disasters. He began business in 1847, and, after the embarrassment of Pendergast Brothers & Co., succeeded to the business October 31, 1879.

NEW YORK CITY.—The schedules of Augustus Rice, chromos, show liabilities $30,642; nominal assets $26,735; actual assets $24,519.

NEW YORK CITY.—Schloss & Heilbronner, wholesale cloths, assigned on the 19th inst. to Meyer S. Schloss, giving preferences for $29,763, of which the following were the principal ones: H. A. Kohn, Chicago, $8,000; American Exchange National Bank $4,346; Henry Heilbronner $3,426; Adams, Bendix & Co. $3,248; H. Bacharach & Co. $2,945; A. Heilbronner $2,546. The firm has been in business about thirty-five years, and has gradually rusted out. They met with many losses by bad debts. The liabilities are nearly $50,000, and the assets are placed at about $20,000.

NEW YORK CITY.—Gustave A. Schwenk, liquors, assigned on the 22d inst. to Charles L. Roeder, giving three preferences for $1,413, of which $1,148 was to Gretchen Schwenk. He failed in March, 1881, and compromised at 30 cents.

NEW YORK CITY.—The schedules of S. W. Sheldon, grocers' sundries, show liabilities $19,747; nominal assets $18,950; actual assets $11,831.

NEW YORK CITY.—Roloff L. J. Spethman, importer of white goods, assigned on the 23d inst. to Frederick Winkhaus.

NEW YORK CITY.—The schedules of Edward F. Watson, bond broker, show liabilities $6,485; actual assets $1,600.

NEW YORK CITY.—Moritz Wetzlar, importer of leather and bookbinders' material, assigned on the 21st inst. to Fred. Lewis, giving thirteen preferences for $33,861, of which the largest were the following: Isaac Rau $5,357; Max L. Rau $2,103; Gustave J. Wetzlar $10,407; Marie Wetzlar $1,098; Simon Mack & Co. $5,060; Leonard W. Mack $4,031; Antonio Wetzlar $1,419. The failure is attributed to losses on importation of unsalable goods, dull trade and depreciation.

NEW YORK CITY.—At a meeting of the creditors of Wiley, Wickes & Wing, importers of fruits, on the 17th inst., the statement presented showed liabilities $528,203; good assets $407,209; deficiency $120,994. A committee was appointed to investigate and report consisting of H. K. Thurber, J. L. Jewett, John Hills and S. H. Stern.

NEW YORK CITY (Mott Haven).—Timothy Loughnan, dry goods, assigned on the 20th inst. to A. D. Williams, giving a preference for $1,692 to H. B. Claflin & Co.

PIKE.—Brownson & Co, general store, who recently assigned, owe $6,760; assets $2,751.

ROCHESTER.—Martin V. Beemer, gents' furnishing goods, has assigned to William Emerson, giving preferences for $3,748. He compromised last October at 40 cents.

RONDOUT.—Michael J. Leonard, grocer, has assigned to Orlando Haves, giving preferences for $600. The assets, it is thought, will not exceed $500.

SENECA FALLS.—George W. Metcalf, grocer, has assigned to Richard G. Miller.

STANLEY.—Barnes & Ripley, general store, have failed and sold out.

NORTH CAROLINA.

WINDSOR.—Gilliam & Gray, general store, have assigned.

OHIO.

CINCINNATI.—Prues & Brenens, merchant tailors, have assigned to J. William Luhn.

CLEVELAND.—O. Brooks & Son, crockery, have assigned to Arthur St. John Newberry.

CLEVELAND.—The liabilities of Forbes, Barstow & Co., wholesale lumber, are about $50,000; assets $25,000.

CRESTLINE.—Stauter & Son, clothing, have been sold out by the sheriff on liens for $3,065 in favor of Ackerman & Co., of New York.

DEFIANCE.—John Lehman & Son, coopers, have been attached, and it is not thought they will pay 50 cents. They have been running under an extension from creditors since last July.

GLENDALE.—W. P. Bruce & Co., grocers, have assigned to Charles W. McIntyre.

JEFFERSON.—E. T. Smith, notions, has failed.

MARENGO.—Myers & Son, general store, have assigned to T. A. Moorehouse. Liabilities $2,500; assets about $3,000.

MIDDLETOWN.—Charles H. Brock, grocer, is reported to have failed and gone out of business.

MILAN.—Gerling & Brown, millers, have assigned.

NORTH FAIRFIELD.—I. B. Rice, shoes, has assigned.

OTTAWA.—John Courtwright, grocer, is reported to have assigned to C. A. Fey.

SYRACUSE.—Judgments have been entered against E. M. Evans, grocer, for $363 and execution issued.

OREGON.

PENDLETON.—L. Kuykendall, saloon, has been attached.

PENNSYLVANIA.

ALLEGHENY CITY.—Execution for $750 has been entered against Robson Brothers, grocers.

ALTOONA.—A. Shoffner & Co., grocers, have sold out, and attachments are in the hands of the sheriff.

BEAVER FALLS.—M. Bowman, grocer, offers 50 cents.

BRADFORD.—Execution has been issued against Jacob Olshoffsky, clothing.

CLEARFIELD.—L. Guinzberg, clothing, offers to compromise at 25 cents. Liabilities about $5,500; assets $1,500.

GETTYSBURG.—W. H. Rupp, tanner, has assigned.

INTERCOURSE.—John L. Bair, live stock, is reported to have failed.

JONESTOWN.—Judgment for $2,000 has been entered against Meck & Co., millers, and execution issued.

LAKE RUN.—Edward Miller, lumber, has had judgment for $6,080 entered against him.

LYON VALLEY.—C. W. Haas, general store and hotel, has had execution for $1,164 entered against him.

MIFFLINSVILLE.—Jacob N. Peifer, general store, is in the hands of the sheriff.

MILTON.—Execution has been issued against W. S. O'Brien, carpenter and auctioneer, on judgments for $402.

MONTGOMERY SQUARE.—George W. Bartholomew, general store, has been closed by the sheriff.

NEW BRIGHTON.—R. E. & H. Hoopes, bankers, have assigned to J. K. Piersol. The failure is attributed to bad investments in real estate and the water works. The liabilities are reported at about $60,000 and assets $40,000.

PHILADELPHIA.—Thomas C. Fairman, lithographer and printer, has been sold out by the sheriff on judgments for $10,194 in favor of his father.

PHILADELPHIA.—Samuel Hecht, wholesale notions, has assigned to Abraham Kaufman.

PHILADELPHIA.—It is reported that the affairs of R. L. Knight, carpets, have been taken out of the hands of the assignee by E. C. Knight, a creditor, who promises to get 90 cents for the creditors out of the business.

PHILADELPHIA.—John Magie & Son, retail shoes, have suspended.

PHILADELPHIA.—Nichols & Geistweit, Keystone Printing House, have been closed by the sheriff.

PHILADELPHIA.—D. W. R. Read, iron ores, says that T. H. Brown has filed a bill in equity for a receiver to settle the late firm's affairs.

PHILADELPHIA.—John C. Staggers, manufacturer of toilet soap, has assigned.

READING.—The Lerch Hardware Company (Limited) has confessed judgment for $27,121 to trustees of the mortgage given several years ago to secure extension notes, and execution has been issued.

SHENANDOAH.—Judgments for $3,439 have been confessed by Thomas Slattery (agent), shoes.

WHITMIRE.—Whitmire & Erwine, general store, have been closed by the sheriff. Judgments for $8,000 have been entered against them.

WRIGHTSVILLE.—A. B. Sprenkle, flour mill, has been closed by the sheriff.

RHODE ISLAND.

PAWTUCKET.—John Boyle, Jr., confectioner, has assigned.

PROVIDENCE.—George A. Munyon, coal, has had a mortgage foreclosed.

SOUTH CAROLINA.

YORKVILLE.—J. J. Smith & Co., dry goods, have assigned. Liabilities $4,000; nominal assets $7,000.

TENNESSEE.

CHATTANOOGA.—W. D. Hill, grocer, has assigned to Otto Fischer.

DANVILLE.—Thomas L. Powell, steam saw mill, has suspended.

DANVILLE.—The Tennessee Lumber Company has suspended. It claimed a paid in capital of $60,000.

JONESBORO.—E. T. Russell, confectioner, has failed and gone out of business.

SHELBYVILLE.—E. Blakemore, grocer, has been attached

WATAUGA.—J. W. Morrill, general store, has assigned. Liabilities $4,000; assets $2,500.

TEXAS.

BELTON.—Peter Hammersmith, bootmaker, has not assigned, as previously reported.

BRIDGEPORT.—E. O. Lively, general store, has been closed by the sheriff.

CALVERT.—McCall & Hicks, grocers, have assigned to S. McLendon.

CAMERON.—T. W. Williams, grocer, is reported to have failed.

FORT WORTH.—J. W. Calloway, hardware, has been attached.

FORT WORTH.—R. E. Poyd, grocer, has been attached.

UTAH.

BRIGHAM CITY.—M. P. Rosenbaum & Son, general store, have assigned to A. B. Corey, and are being closed out.

PARK CITY.—F. A. Kiausch, drugs, has assigned to Jacob Stewart, giving preferences for $800. Liabilities about $2,000. It is thought he will pay 75 cents.

PARK CITY.—W. H. Roy, grocer, has assigned to Cruck & Dodge.

VIRGINIA.

BONSACK'S.—W. D. Sale, general store, has failed.

NORFOLK.—D. J. Heffron, grocer, has assigned.

PETERSBURG.—James B. Robertson, grocer, has assigned.

PORTSMOUTH.—R. C. Cowper & Brother, liquors, have assigned. The assets, it is said, are not sufficient to pay the preferred creditors.

WASHINGTON TERRITORY.

SEATTLE.—French & Co., liquors, has assigned.

WALLA WALLA.—J. W. Waggoner, agricultural implements, has been attached for $3,000 and has left town. Liabilities about $10,000; assets nominal.

WEST VIRGINIA.

THE ROCK.—A. P. Neal & Co., general store, have failed.

WISCONSIN.

FOND DU LAC.—Philip Erhart, tailor, has been attached for $360.

MARSHFIELD.—Mrs. N. O. Wanzer, restaurant and dollar store, has been attached.

WATERTOWN.—A. B. Barney, publisher of the Watertown *Democrat*, is in the hands of the sheriff.

WYOMING.

HILLIARD.—The Utah & Wyoming Improvement Company has become financially embarrassed and unable to meet obligations. It was incorporated in May, 1881, with a capital stock of $600,000, but only $1,000 was paid in cash at the time; $75,000 bonds were issued, and $59,861 deposited for payment of the property purchased of The Hilliard Flume & Lumbering Company. A realty mortgage was given to secure the bonds, which was followed by a chattel mortgage for $25,000.

MANITOBA.

EVERSON.—Creighton & Cattanach, general store, are reported to have assigned.

PORTAGE LA PRAIRIE.—R. P. Campbell, furniture, has been placed in the hands of a receiver.

WINNIPEG.—Lewis Arnett, wholesale dry goods, is asking an extension. He recently claimed assets, stock $158,819; book debts $10,386; cash $2,543; bills receivable $1,142; real estate $45,500; total $218,390; liabilities $108,505.

WINNIPEG.—Hamilton Douglas, shoes, has assigned.

NEW BRUNSWICK.

MONCTON.—M. B. Keith, broker, offers 25 cents.

NOVA SCOTIA.

HALIFAX.—Thomas Mowbray, auctioneer, has assigned.

PICTOU.—Malcolm Morrison, grocer, has assigned.

PROVINCE OF ONTARIO.

BELLEVILLE.—J. G. Robinson, vinegar manufacturer, has assigned.

BOWMANSVILLE.—McClung Brothers, dry goods, offer to compromise at 65 cents, spreading over eighteen months. Liabilities about $45,000.

BOWMANSVILLE.—The stock of J. W. Sanders, shoes, is to be sold out under a chattel mortgage.

CHATHAM.—John French, confectioner, has been sold out by the sheriff.

CHATHAM.—A. Mellish, auctioneer, is in the hands of the sheriff. Liabilities about $15,000; assets $10,000.

CHESTERVILLE.—Miss C. Coyne, general store, offers 50 cents. Liabilities $3,600.

POINT EDWARD.—C. Grundy, shoes, has sold out and offers 50 cents.

PORT SYDNEY.—William Jarvis, general store, has assigned.

TORONTO.—R. Carrie & Co., wholesale dry goods, are reported embarrassed. The liabilities are about $75,000, not including $55,000 indirect liabilities to bankers for customers' paper under discount. The assets are probably $86,000.

TORONTO.—Hurst & Spence, bookbinders and stationers, have been sold out under a chattel mortgage.

TORONTO.—Christopher Sheppard, harness ornaments, offers 25 cents.

TORONTO.—W. B. Thompson, grocer, is in the hands of the sheriff.

TORONTO.—Edwin Wallace, teas, called a meeting of creditors.

WHITBY.—J. B. Powell & Co., dry goods, have assigned.

PROVINCE OF QUEBEC.

BEAUHARNOIS.—Achille Marchand, general store, offers 45 cents.

MONTEBELLO.—J. L. Taillefer, general store, is reported asking an extension.

MONTREAL.—A. Ansell, cigars, offers 30 cents.

MONTREAL.—Henri Girard, dry goods, has assigned.

MONTREAL.—T. C. Hodgson, trading as A. Hodgson & Sons, produce exporters, was arrested on the 17th inst., at the instance of the Bank of Montreal, charged with obtaining advances of about $140,000, giving warehouse receipts and then disposing of the goods he had thus hypothecated. Other banks are also interested. He claims the receipts were simple trust receipts, and left to a large extent to his own discretion. In the meantime the firm will suspend payment.

MONTREAL.—R. H. Kelly, manufacturers' agent, is reported to have failed.

MONTREAL.—A. Lebean, baker, has compromised at 20 cents.

MONTREAL.—J. D. Morgan, millinery, is reported unable to meet his payments.

SHERBROOKE.—J. O. Perrault, grocer, has compromised at 40 cents.

SOREL.—A. Francoeur, grocer, offers 40 cents.

ST. ETIENNE DE BOLTON.—S. E. Bergeron, general store and physician, offers to compromise at 50 cents.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice-President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

MOSES KING, Publisher,
HARVARD SQUARE, CAMBRIDGE, MASS.

NOTICE.

GRAND RAPIDS, MICH., Feb. 24, 1883.

The FIRST NATIONAL BANK OF GRAND RAPIDS, located at Grand Rapids, in the State of Michigan, is closing up its affairs, its corporate existence having expired on February 24th, 1883. All note holders and other creditors of said association are therefore hereby notified to present the notes and other claims against the association for payment.

HARVEY J. HOLLISTER, *Cashier.*

The OLD NATIONAL BANK OF GRAND RAPIDS, Mich., succeeds to the business of the First National Bank of Grand Rapids, at same place of business, substantially same management and equal capital, which will be speedily doubled.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MARCH 31, 1883.

NOTES OF THE WEEK.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country reveal a continued although not altogether evenly distributed improvement in the condition of general trade. In this respect the situation does not differ materially from that noticed last week; local causes contributing to enhance activity in some lines, and in other directions exercising a retarding influence on trade movements. In the east there is a decidedly better feeling in general trade, and the outlook is favorable. In the middle states a moderately increased activity is noticeable, and the outlook is fairly good. In jobbing lines more orders are being received, though buyers, as a rule, are conservative, preferring the frequent duplication of orders to the accumulation of stocks in advance of need. In the west, although there has been a continued liberal distributive movement in staple merchandise, improvement has been somewhat retarded in particular sections by the bad weather. In the south the indications are fair, pointing to a further improvement in trade conditions. While in some districts the feeling is somewhat dull though healthy and confident, in others renewed activity is noticeable, jobbers and retailers showing a disposition to buy more freely. Cotton, on the whole, has been dull. In grain a slight improvement is reported. The grain movement of March at New Orleans was the largest of the season. This, however, was for the most part on old contracts. The advices from California are reassuring. General business there is reviving, and the fears entertained concerning the prospects of the wheat crop are happily removed, heavy rains insuring good crops throughout the Pacific coast.

Elsewhere in this issue the record of mercantile failures for the quarter ending today is given. The total number reported to BRADSTREET'S is 3,189. The following shows the distribution of these failures over the weeks from the beginning of January: For the week ending January 5, 257 failures; week ending January 12, 342; week ending January 19, 317; week ending January 26, 289; week ending February 2, 276; week ending February 9, 256; week ending February 16, 221; week ending February 23, 204; week ending March 2, 260; week ending March 9, 208; week ending March 17, 233; week ending March 24, 196; and for the week ending March 30, 170 failures. The total of these weekly reports is 3,229. As forty of the failures reported for the week ending January 5 belonged in the statistics of the last week of 1882, this number should be subtracted from the total above given, thus leaving 3,189, as the number of failures given in the summary for the quarter on the opposite page. This analysis is given by way of further directing attention to the fact that the accuracy of all our reports of mercantile failures in the United States is attested by the detail given in these pages from week to week.

Stock exchange operations have not been hampered this week by high rates for loans, nevertheless there has been little improvement, if any, in business. The week has been distinguished by a continuance of dullness, absence of interest on the part of the outside public, and manipulation by the professionals who are heavily loaded with stocks. The efforts of the cliques and the large individual operators seem directed to keeping the market steady through the present season; and with the advent of warm weather and some certainty as to what our winter wheat crop is likely to be, the time may be favorable for a bull movement. Trunk line railroad earnings are, and have been, very large. With easier rates for loans, foreign exchange has advanced and is now above the gold importing point.

The attention of the legislature of the state of New York is now largely occupied with questions peculiarly concerning the metropolis. The discussions upon these questions are very suggestive illustrations of the fact already pretty well understood, that it is extremely difficult to secure an efficient execution of public business upon purely business principles in the present condition of our politics. The question to be decided by the modern politician is not in what way can the work to be accomplished be best performed, but how shall the control of the patronage attending the execution of the work be most effectually secured for this or that political organization. This spirit was very naively manifested by the chairman of the Committee on Cities, who, in appealing to his fellow-partisans to support certain proposed amendments to the charter of New York city, said that the measure was one which would enable a democratic mayor to put democrats in office with the consent of a democratic board of aldermen. The amendments referred to authorize the mayor to appoint commissioners of certain municipal departments with the consent of the board of aldermen. Mr. Murphy, in urging the adoption of the amendments, said that they were intended to meet the generally expressed desire for single-headed commissions. The amendments were strenuously opposed by Mr. Roosevelt, who declared that the bill was substantially a bargain of the Democratic factions for a division of the spoils of the city, and that the right given to the board of aldermen to confirm or reject the mayor's nominations rendered him their puppet.

The developments at Albany above referred to are chiefly valuable by way of showing more clearly, if that were needed, the urgent necessity of a return of the seat of government from Albany. The population of New York city under manhood suffrage may or may not be capable of self-government, but it is certain that good government can never result from a continued division of responsibility between the local authorities and the legislature. As the character of the changes proposed by the charter-tinkerers does not give promise of resulting benefits, it is to be hoped that they and all similar proposals will be shelved, and that in their place may sooner or later be enacted such changes as will confer upon the city permanent home-rule. Here is New York waiting action at Albany before the work of increasing its water supply can be entered upon, while Philadelphia is at liberty to undertake such additions to its water-works as may be determined upon by the city councils, under the advice and direction of the chief engineer. The Albany legislature should have no more to do with such matters than has the legislature at Harrisburg.

The debate on the 19th on the new bankruptcy bill is characterized by the *Pall Mall Gazette* as "the best bankruptcy debate in Parliament for the last fifty years." There was a discussion of principle in a style that was not dreamed of in 1869. The leading objects of a bankruptcy law, as affirmed by the government in the debate, were two—the quick distribution of a bankrupt's assets among his creditors and the investigation of the bankrupt's conduct in the public interest, with a view to the punishment of those who have been guilty of misconduct, and generally to make bankruptcy disagreeable and painful for the debtor. One outcome of the debate was to put to rout all who argued, first, against the officialism which closer investigation into the conduct of bankrupts would necessitate; second, that bankruptcy is only an affair between debtor and creditor, and, third, that no bankruptcy law at all is necessary, debtors being sufficiently punished by being made permanently liable for debts. The gratifying outcome of the discussion in England during recent years of the principles which should obtain in bankruptcy legislation is the distinct advance in the direction of making bankruptcy less easy.

The London *Spectator*, in a recent issue, discusses the present phase of the vexatious Irish question in an article informed with the spirit of political wisdom, and which will lose little of its value when the occasion shall have disappeared which prompted its utterances. Referring to the policy of delay, which apparently dictates the present action of the government of Great Britain, the London journal says that "all politics in England are suffering under the influence of a political delusion." This delusion suggests to many otherwise liberal and intelligent men the fear that any further advance in Ireland in the liberal direction will be attended with danger, and, in particular, to use the *Spectator's* words, that if the franchise is lowered, if the seats are re-distributed, if county and municipal freedom are conceded in an honest way—that is, as fully as in England or Scotland—the disaffected masses will acquire all power, and will use it to make the continuance of the Union and the existence of the present social arrangements impossible. This hesitation, the *Spectator* says, rests on a fundamental mistake. The adoption of the liberal policy indicated would, perhaps, result in the more or less vigorous and persistent presentation of demands for further concessions. It would, at any rate, result in making known the points of danger, and herein would consist its great service to the government. It is chiefly with reference to this effect of the proposed policy that the journal referred to advocates its adoption. "It is not true," it says, "that formulated disaffection is more formidable to a civilized authority than formless disaffection; not true that a city in revolt is more dangerous than a mob in insurrection. It would be true if the government were one of the kind which can use wholesale massacre as an instrument, because it is safer to massacre a mob than an organized body; but on no other condition is it true."

MERCANTILE FAILURES FOR THE QUARTER.

The record of mercantile failures, herewith given, for the quarter ending March 31, is one day short. It has been thought best, however, to give out the report on this last day of the quarter, when the interest therein is the greatest. As revealed in our weekly reports since January 12, the record of trade disasters for the first quarter of 1883 is a formidable one. The number for the quarter as reported to BRADSTREET'S is 3,189, against 2,146 and 1,986 for the first quarters of 1882 and 1881 respectively. It thus appears that the increase in number over the record for the first quarter of 1881 is 1,203, or 60 per cent., and over the first quarter of 1882 the increase is 1,043, or 49 per cent. The liabilities for this quarter foot up $42,235,535, against total liabilities of $29,010,944 for the same quarter last year, an increase in the total of liabilities of 45 per cent. The total of assets for this quarter's record is $23,763,828, against $15,323,591 for the first quarter of last year, an increase of 55 per cent. It appears from this that the assets of failing traders for the first quarter of this year are 3 per cent. greater in proportion than for the corresponding quarter of 1882. It should be noted, however, that the percentage of assets is larger for this quarter from the fact that a few heavy failures present schedules of acknowledged assets equal to, and in one or two instances in excess of, liabilities. The average liabilities for each failure reported for the quarter are $13,243, against an average of $13,518 for the corresponding period of 1882. The average of assets to each failure for this quarter is $7,542, against an average of $7,141 for the first quarter of 1882. The ratio of total assets to total liabilities for the quarter ending to-day, on the basis of known facts and careful estimates, is 56.2 per cent., against a ratio of 52.8 per cent. for the first quarter of 1882, and of 49.6 per cent. in 1881. The average liabilities for the quarter of the 429 failing traders in New England were $9,055, the percentage of assets to liabilities being 43.7. The 732 failing traders of the middle states have average liabilities of $20,701, the percentage of assets to liabilities being 45.8. For the southern states the quarter's record shows 769 failures, with an average liability of $9,069, the percentage of assets to liabilities being 47.9. In the western states 975 failures for the quarter have an average liability of $15,156, the ratio of assets to liabilities being 76.3 per cent. The number of failures reported in the Pacific states for the quarter is 226, nearly double the return for the first quarter of last year, but 13 less than for the first quarter of 1881. The average liability of each failing trader in the Pacific states for the last quarter is $7,912, the percentage of assets to liabilities being 45.6. The number of failures reported in the territories during the quarter is 58, or 14 more than double the number for the same quarter in 1882. The average liabilities of each failing trader in the territories for this quarter is $11,861, the percentage of assets to liabilities being 67.9. Through the cause above pointed out, the percentage of assets to liabilities was especially distorted for the territories and western states. The number of failures for the first quarter of 1880, as reported to BRADSTREET'S, was 1,394; the liabilities thereof having been $13,630,726, and the assets $6,357,910, making the percentage of assets to liabilities 50.8. For the first quarter of 1879 the number of failures reported was 2,350, with total liabilities of $38,874,172, and assets amounting to $18,467,592, making the percentage of assets to liabilities 47.5. It is thus seen that the number of failures in the first quarters of the five years from 1879 inclusive, has fluctuated from 2,350 in 1879 to 1,394 in 1880, 1,986 in 1881, 2,146 in 1882, and 3,189 in the first quarter of 1883.

The quarter's record of mercantile disasters shows to how large an extent an adjustment of prices and enforced liquidation has been going on. Many unwise venturers of the preceding and prior years have been entered in the record of failures since January 1. As predicted early in January, the number reported has been decreasing during recent weeks. We shall next week enter more fully into the character and causes of the failures for the quarter.

THE UNITED STATES TREASURY AND THE LOAN MARKET.

The game of shuttlecock which has been played with the finances by the Treasury operations since January 1 finds its counterpart in the shifting of responsibility which is constantly being made in the administration of the Treasury itself. At the present moment it is not possible to state who, in fact, is clothed with the powers of the Secretary of the Treasury. To-day it is Judge Folger, to-morrow it is Assistant Secretary Judge French, and the next day decisions upon important matters are held in abeyance to await the slow methods of judicial consideration, or the restoration of a sick man to business activity. Meanwhile the daily processes of the Treasury are not interrupted, and the men who understand the condition of the finances of the country, and who do the thinking of the Treasury without being responsible for its acts, are still at their posts.

Inquiries have recently been made to ascertain what the condition of the Treasury is with respect to its ability to anticipate any of the $15,000,000 of bonds called for May 1, or to make any additional calls of bonds during the current fiscal year. To any one who is informed as to the actual condition of the Treasury there ought not to be any doubts upon that point. It is clear that the Treasury certainly has the resources to pay now the $15,000,000 of bonds which it is under obligations to pay on May 1, and it can make little difference, so far as the condition of the Treasury goes, whether that sum, or any portion of it, shall be expended now or at that date. Whether or not the May payment shall be anticipated was a question of expediency—if it is not one of speculation. The decision is that the call shall be anticipated in $5,000,000 payments. But, as to the broader question, whether the Treasury can continue to come to the relief of the money market for the three months which remain of the current fiscal year, it is clear that it cannot. The condition of the Treasury, so far as it can be stated from the best information obtainable, is accurately represented by the following statement of receipts and expenditures, actual and estimated, and of the obligations of the government:

RECEIPTS.	
Customs—To March 20, 1883	$159,000,000
To June 30, 1883, estimated	62,000,000
	$221,000,000
Internal Revenue—To March 20, 1883	103,500,000
To June 30, 1883, estimated	40,000,000
	$143,500,000
Miscellaneous—To March 20, 1883	27,250,000
To June 30, 1883, estimated	13,250,000
	$40,500,000
Total receipts, actual and estimated	$405,000,000
EXPENDITURES.	
Ordinary—To March 20, 1883	$104,000,000
To June 30, 1883, estimated	36,000,000
	$140,000,000
Pensions—To March 20, 1883	36,500 000
To June 30, 1883, estimated	35,500,000
	$72,000,000
Interest—To March 20, 1883	43,000,000
To June 30, 1883, estimated	15,000,000
	$58,000,000
Total, actual and estimated	$270,000,000
BOND REDEMPTIONS.	
Bonds redeemed to February 28, 1883	$112,000,000
One hundred and twentieth call, due May 1	15,000,000
Balance due on matured calls	10,000,000
	$137,000,000
Of which it is estimated that $10,000,000 will not be presented for redemption	10,000,000
Leaving an obligation of, to be provided from surplus reserve	$127,000,000

The expenditures for pensions may fall short about $5,000,000, increasing the surplus by that amount. Should these figures prove correct, there will be a balance of $13,000,000 left over after paying the 120th call. But it must be remembered that the "Reserve Fund" at the commencement of the year was $19,000,000, or $20,000,000 short of the 40 per cent. requirement. It is also to be observed that the $10,000,000 which, it is estimated, will not be presented for redemption, may be presented, and that the payments for pensions may largely exceed the $72,000,000 here estimated. The Commissioner himself is reported to believe that he can even expend the $100,000,000 which have been appropriated. From an examination of this financial exhibit the following points, it would seem, are fairly deducible:

1. The condition of the Treasury does not warrant further bond calls during this fiscal year.

2. It is more difficult to estimate the expenditures than the receipts, the capacity of the Pension office to expend being unknown. Estimates differ by $20,000,000. On the basis of an expenditure of but $72,000,000 it is not safe to estimate any considerable surplus at the end of the fiscal year over the demands of the government.

3. It is to be remembered that the reserve fund at the commencement of the year was about $20,000,000 short of the 40 per cent. requirement, and that it has only just reached that 40 per cent. requirement. If the Commissioner of Pensions should expend the $100,000,000 which he now promises, instead of the $72,000,000 which is estimated, the reserve of the Treasury would again be reduced $10,000,000 below the 40 per cent. limit. Or, in other words, on the basis of these figures maintaining the reserve, there would be an apparent deficit.

4. There has been an apparent accumulation of the money in the Treasury, but it is an accumulation which has only resulted in bringing up the reserve to the point at which Secretaries of the Treasury who

have preceded Judge Folger have maintained that it was always necessary to keep that fund, namely, 40 per cent. of the outstanding legal tender circulation. It never has been claimed by any conservative financiers that a smaller reserve would be prudent. It is one of the curious facts in our financial system that the amount of the reserve held for the redemption of the demand notes of the government, its legal tenders, is not a fixed sum; that the amount is prescribed only by usage, and that it may vary with the discretion of any Secretary of the Treasury, to be drawn upon by him at pleasure for any supposed necessities of the financial situation. The assumed contraction of the currency on the part of the Treasury is simply the replenishing of its own proper reserves. The stringency that is felt is a result of the past excessive bond calls of the Treasury, as the result of which the reserves were reduced nearly $20,000,000 below the minimum, and as a consequence of which the country really was banking upon what, in fact, was a circulation of $20,000,000 in excess of that which, under ordinary conditions, would have been outstanding. The effect of this, of course, was to increase speculation. It unquestionably is a fair criticism upon Judge Folger's management of the finances that, by reducing his reserve, he added to the plethora of the money market in the fall, and by restoring his reserve to the usual limit he has withdrawn some $20,000,000 at the present time from circulation, and, to a corresponding extent, added to the stringency which is customary in the spring months, due to the demands by New York banks for currency, by the movements of crops and on account of the annual settlements between the middle and New England states, which take place about April 1. The Treasury, unfortunately, is an important factor in the financial conditions of the country; its affairs have been administered so as to increase the volume of the circulation, and to make an "ease" in the money market at a time when such action was the least needed. Never, since resumption, and seldom prior to that time, since the war, when the finances were even in an approximately healthy condition, has the available balance of the Treasury been permitted to be reduced to so low a point as it was before the retirements from active circulation which have taken place within the last three months. Between January 1 and March 1, in the play of shuttlecock, more than $20,000,000 were retired from active circulation by the Treasury.

THE TEA TRADE.

The general advance in the prices of tea has imparted a cheerful feeling to the trade, the more so that the prospect is that even should present quotations not greatly advance they will be fully maintained. The rise in values is represented by an advance of 3 to 5 cents, according to grade, in Amoy Oolongs, Formosa kinds and Foochows, and 1 to 2 cents better outturn in fine to finest chops of Moyune and Teenki greens. Pingsueys of good make and liquor also show an improvement. Japans, although moving slowly, are steadily held, in the confidence that later on better prices will be secured. Congous show a firm market for good common to superior. The rise in value of Oolongs is mainly attributable to the decided falling off of the actual production this year, amounting to 5,000,000 pounds in all, and in a lesser degree to the future operative effect on the general tea market of the law enacted by Congress prohibiting the importation of adulterated and spurious teas. This law has already enhanced values of the present stock of low-priced goods, which has helped the general improvement. With the improvement in values that has taken place, the amount of business has been slightly checked by the stringency of the money market—rates at which purchasers for cash find a difficulty in financiering. In fact, people do not care to buy for cash when in sales on time they get a discount of 3 per cent. on four months' notes. The prevalent impression is that when money gets easy again prices along the whole line of teas will advance. The losses to importers on last year's shipments will probably lead to more cautious investments in the new season's teas, thus, with the withdrawment of adulterated goods, further restricting supplies. Those losses were mainly due to overstocking, resulting in the throwing on the market larger quantities than it had capacity healthily to absorb. When there are large supplies and little demand auction sales will always be resorted to; in the opposite case the chief transactions will be at private sales. Although the occasional necessities of importers lead at times to unreserved lots being offered at auction, the general course of the auction sales must be covered by supply and demand. Such differences as exist in the trade relative to modes of conducting business must be settled by general feeling. The question is not as to the securing of teas at auction, but as to ways of selling. At the New York auctions the biddings in greens are for individual lines, but in black teas bidders have their choice of entire offerings. Importing jobbers want greens sold as blacks and Japans. The lots consist of twenty half-chests each, and brackets generally of a hundred.

The law providing against the importation of spurious and adulterated teas after a given date grants six months to shippers for reëxportation of such teas, previous to confiscation. This provision, however, will afford little encouragement to their importation, as the law excluding worthless teas from Great Britain applies also to the British colonies, and Canada being closed, there remain only Mexican and South American ports, where there is little or no demand. The exclusion of the vile trash from this country will be a public boon and tend to increase the consumption of the pure leaf.

The bulk of teas for this market come by way of the Suez canal, only a small portion of the annual importation of San Francisco, amounting to about 5,000,000 pounds, reaching here, owing to high railway freights. What is not consumed on the Pacific coast is dispatched to western distributive centers. Only some three or four western houses of any size this side of the Rockies continue to be their own importers, and large buyers in the west do much more purchasing in New York than formerly. In San Francisco there are several importers. The tea arriving at that port is mostly Japans, specially put up for that market, and chiefly packed in half pound, one pound, and three, four and five pound papers, and not in lead, wood and matting. The tea steamers arriving in New York, and of which there are on the average throughout the year from two to three a month, have a capacity of 40,000 packages each. Ordinarily they come from China and Japan direct to New York, then load with produce and grain for London or Liverpool, and there take in freights of cotton goods and sundries for China. Last year three or four steamers sailed directly back from New York to the far east, with cargoes of kerosene for Yokohama and Chinese ports. Although there is not the same intense competition here that exists among the London tea merchants for the arrival of first season's teas, the securing first consignments is a matter of prime importance among our jobbers, as the prices reached are apt to be exceptionally good, the market being in a waiting attitude for supplies. The first teas to arrive here are Japans, usually between the 30th of May and the 10th of June; the Formosa and Amoy Oolongs come next, followed by Chinese greens in the latter part of July or commencement of August. Here we may remark that there has been a gradual deterioration in China teas the past ten years from less care being exercised in culture and curing. With an obstinate people like the Chinese, who are bent on following their own devices, there would appear to be no corrective to this evil.

The total annual consumption of teas in this country, a consumption slowly increasing, is variously estimated, but may be safely placed at about 70,000,000 pounds, of which 32,000,000 pounds are Chinese and 35,000,000 are Japans. A moderate quantity of Indian teas, somewhat over half a million pounds, was last year imported. These teas, as possessing fragrance and strength, are calculated to prove serviceable for mixing purposes. It would be a matter of interest at this time to ascertain the proportion of spurious and adulterated teas that has been annually imported, as throwing light upon the extra demand that will spring up for the pure leaf when such teas are excluded, but no data exist for such computation. Their exclusion should sweep away a host of small country dealers, who have confined their attention to so-called teas of nominal price, relying upon sales by tempting the public with premiums on their purchases, a vicious and unbusinesslike system. In years gone by a number of fancy teas, such as Orange Pekoe, etc., were on the market, all houses in China having mixtures of their own. Although fancy mixtures have disappeared, importing jobbers, for the benefit of retailers, have teas put up in China in paper packages or tin canisters, with handsome china facings, which carry their adopted symbols, such as a bell, teapot or flower, and which designs are sent out from here to be executed by Chinese artists. These, however, are not fancy teas, and sell strictly on their own merits. We even get no more Souchong. The English breakfast tea, of which so much is heard, is composed exclusively of Congou tea.

OUR FOREIGN TRADE IN JANUARY.

The Bureau of Statistics' report of exports and imports for the initial month of the year, with comparisons, is just at hand. It is a matter for some regret that the issuance of these valuable publications is so long delayed. Their comprehensiveness, however, may be considered as compensating in part for the delay. An abstract of the more important totals is given as follows:

IMPORTS OF MERCHANDISE IN JANUARY.

	1883.	1882.
Free of duty	$17,313,688	$15,374,392
Dutiable	39,625,711	41,581,832
Totals	$56,939,399	56,956,224

EXPORTS OF MERCHANDISE IN JANUARY.

	1883.	1882.
Domestic	$78,748,318	$63,546,254
Foreign	1,488,975	1,374,197
Totals	$80,237,293	$64,920,451

IMPORTS OF COIN AND BULLION IN JANUARY.

	1883.	1882.
Gold	$1,309,639	$1,134,040
Silver	894,802	534,340
Totals	$2,204,441	$1,168,380

EXPORTS OF COIN AND BULLION IN JANUARY.

	1883.	1882.
Domestic	$1,953,075	$1,739,028
Foreign	598,814	543,002
Totals	$2,551,889	$2,283,830

SUMMARY FOR JANUARY.

	1883.	1882.
Total imports of merchandise	$56,939,399	$56,956,224
Total imports of coin and bullion	2,204,441	1,168,380
Total imports	$59,143,840	$58,124,604
	1883.	1882.
Total exports of merchandise	$80,237,293	$64,920,451
Total exports of coin and bullion	2,551,889	2,283,830
Total exports	$82,789,182	$67,204,281

These figures show a net surplus of exports over imports of $23,645,342 during the opening month of the year. The excess in the value of exports over the imports (of merchandise only) was $23,297,894, and of coin and bullion, $347,448. The total foreign trade in January, 1883, amounted to $141,933,022, against $125,328,885 in the corresponding month in the preceding year, a gain in January last of $16,604,137.

The value of the exports of merchandise, both of domestic and foreign, exceeds that of like shipments in January, 1882, the surplus in the case of exports of domestic goods amounting to $15,202,064, and of foreign manufactured goods to $114,778, or together to $15,316,842. The imports of merchandise exhibited a curious feature in that those of free goods exceeded in value the imports in January, 1882 (by $1,939,296), while the receipts of dutiable merchandise fell $1,956,121 short of the value of the same recorded in the corresponding month in 1882, thus leaving the value of all merchandise imports in January last $16,825 less than the value of the same in January the year preceding.

The increase of nearly $2,000,000 in the receipts of free merchandise in January last, as against the value of that received in January, 1882, will be noted in the following extracts:

INCREASED VALUES OF LEADING FREE IMPORTS.

	January		Increases.
	1883.	1882.	1883.
Tea	$2,191,699	$877,261	$1,314,438
Raw silk	1,810,628	625,598	1,185,030
Indigo	472,888	74,729	398,159
Hides and skins	2,487,639	2,093,763	393,876
Tin in bars, etc	479,607	92,514	387,153
India-rubber, etc	1,650,826	1,307,192	343,634

DECREASED VALUES OF LEADING FREE IMPORTS.

	January		Decreases.
	1882.	1883.	1883.
Coffee	$3,732,298	$2,733,746	$998,552
Paper materials	504,930	358,086	146,844
Chemicals, etc	674,203	481,240	192,963
Medical barks, etc	204,752	165,519	159,233
Soda, nitrate	321,969	203,032	118,937
Guano	364,075	294,487	69,588
Oils, fish and vegetables	185,215	92,580	92,635
Sulphur	249,576	183,982	65,594

The aggregate of the increased values of the free imports noted amounts to $4,025,290, out of which tea and raw silk are responsible for more than one-half. Of the decreased values of leading free imports noted the aggregate is $1,900,346, one-half being due to the falling away in receipts of coffee alone, the next decline in receipts relatively being the imports of paper materials. Like exhibits with reference to dutiable imports in January last, as compared with shipments in January, 1882, is as follows, the excess of the same in January last being $1,956,121, as compared with the latter:

INCREASED VALUES OF LEADING DUTIABLE IMPORTS.

	January		Increases.
	1883.	1882.	1883.
Refined sugar	$5,247,786	$4,000,628	$1,247,158
Dry goods	2,096,052	1,692,598	405,454
Hemp and manufactures	576,768	314,052	262,656
Wool manufactures	522,060	323,227	198,833
Spices	284,221	154,776	129,445
Glass manufactures	566,762	413,763	92,999
Silk manufactures	1,656,419	1,569,408	87,011
Tobacco manufactures	862,043	831,713	30,326

Here are increased imports of dutiable merchandise showing an excess over corresponding receipts in January, 1882, of $2,453,882, and of which the values of refined sugar and dry goods constitute more than one-half. It will not be easy, however, to find among the above, the leading increased importations in January last, any startling proportion of luxuries. The gains in silk manufactures and tobacco together aggregate but $117,337.

Among the noticeable decreases in importations of dutiable articles were the following:

LEADING DECREASES OF DUTIABLE IMPORTS.

	January		Decreases.
	1882.	1883.	1883.
Wool-cloths and cassimeres	$4,640,335	$1,465,809	$3,174,526
Dress and piece goods, silks	2,149,121	1,683,731	465,390
Tin plates, etc	1,827,133	1,438,441	388,692
Steel ingots, etc	1,424,000	1,088,250	335,747
Flax manufactures	1,870,270	1,571,188	299,082
Unmanufactured wool	1,214,093	939,778	274,315
Bar iron	338,026	161,771	176,955
Seeds	247,680	86,793	160,887
Wine in bottles	400,153	280,554	119,599
Bar, hoop and scroll iron	113,087	...	113,087
Cotton manufactures	4,709,786	4,607,634	102,134
Machinery	242,369	150,229	86,137
Hardware	225,424	175,914	49,510

These thirteen classes of dutiable importations fell away in value in January last as against January, 1882, to the extent of $5,747,321, or, omitting the decline in receipts of woolen cloths and cassimeres, to the extent of $2,572,795.

On the other hand, the volume of exports of domestic merchandise which expanded $15,202,064 in value last January as against the total for January, 1882, contained the following increases and decreases in shipments:

DECREASED VALUES OF LEADING EXPORTS.

	January		Increases.
	1883.	1882.	1883.
Cotton and manufactures	$34,445,121	$22,511,813	$11,934,311
Wheat flour	5,350,535	2,972,729	2,385,606
Indian corn	2,862,751	1,[illegible]	1,619,942
Mineral oil	3,506,953	2,[illegible]	747,869
Leaf tobacco	1,291,669	7[illegible]	590,949
Horses	445,062	3[illegible]	137,284
Steam engines	217,748	6[illegible]	152,764
Spirits turpentine	287,399	17[illegible]	109,797
Rosin and turpentine	278,556	187,687	90,969
Firearms	122,202	57,265	64,937
Edge-tools	108,780	55,992	52,788
Hogs	101,502	73,520	27,982

The increases enumerated aggregate $17,945,205 on the twelve articles mentioned, or $16,717,625 on cotton, raw and manufactured, wheat flour, Indian corn and petroleum and petroleum products.

The decreases in January exports worthy of mention are as follows:

DECREASED VALUES OF LEADING EXPORTS.

	January		Decreases.
	1882.	1883.	1883.
Provisions, tallow, dairy products, etc	$13,200,379	$10,649,119	$2,551,260
Oil-cake	715,121	429,593	285,528
Leather	674,758	408,427	266,331
Miscellaneous iron manufac'es	454,017	365,529	89,488
Wheat	7,780,710	7,722,198	58,512

The sum total of the declines in exports mentioned above is $3,190,479, which, as against the aggregate of gains previously noted ($17,945,205) accounts for $14,754,726 of the net increase in value of domestic exports in January, out of the total excess, $15,202,064. In the list of domestic products which were shipped out of the country in increased quantity last January, the prominence of the natural products of the country is noteworthy. In the item of cotton and cotton manufactures, out of the totals of $34,145,124 for January last and $22,570,873 in January, 1882, the sums of $33,438,144 and $21,599,544 represent the value of Sea Island and other raw cotton exported, leaving but $1,006,972 and $911,269 respectively as the value of manufactured cotton goods exported in the opening months of 1883 and 1882. Classifying the increased exports in January under the heads of natural products and products of our manufacturing industries, we find the relative importance (among those which exhibited notable gains) to be as follows:

INCREASED VALUE OF JANUARY EXPORTS, 1883.

Cotton goods	$[illegible]
Steam engines	[illegible]
Firearms	[illegible]
Edge tools	[illegible]
Total increased value manufactures	$[illegible]

Or, adding wheat flour, $2,385,606, the total is increased to $2,751,798 excess value of exports of industrial products in January, 1883, over that in January, 1882, out of a total gain of $15,202,064. The present outlook is for a continuation of the favorable features of this report in the February bulletin from the Bureau of Statistics. The March exhibit will not show so uniform a growth of the foreign trade.

IMPORTATIONS OF BRITISH IRON IN FEBRUARY.

The various British iron trade journals which reached here last week contained in full the exports of iron and steel from the United Kingdom during February, with appropriate comparisons. It is a noteworthy fact that the aggregate shipments of iron and steel from Great Britain amounted to but 255,844 tons, as compared with 289,802 tons in the month preceding, and with 288,082 tons in December, 1882. The exports of iron and steel from the United Kingdom to the United States last month, with comparisons, were similarly affected, the total being 49,201 tons, against 55,308 tons in January, and 70,928 tons in December, 1882. The figures in detail as to quantities for the first two months of the year and the second month of 1882 are as follows:

RECENT IMPORTS OF BRITISH IRON.

	—February,—		Jan.,
	1883,	1882,	1883,
	tons.	*tons.*	*tons.*
Pig iron	18,907	26,914	21,226
Bar, angle and rod	1,197	3,261	1,316
Railroad, all	5,017	23,509	6,606
Hoops, sheets and plates	2,646	1,795	1,315
Tin plates	14,660	13,314	16,371
Cast or wrought	235	732	772
Old	2,190	13,157	5,345
Steel, unwrought	4,349	17,676	2,357
Special.			
Iron rails	1,059	5,404	131
Steel rails	3,037	17,774	5,962

The decline in receipts in February, as compared with January, was as follows: Pig iron, 2,319 tons; bar, angle, etc., 119 tons; all railroad iron, 1,589 tons; tin plates, 1,711 tons; cast or wrought iron, 437 tons; and old iron, 3,155 tons—or, in all, a decline of 9,330 tons. The increases were of hoops, sheets and plates 1,331 tons, and unwrought steel 1,992 tons, or, together, 3,323 tons, thus leaving a net decrease on the items enumerated of 6,007 tons in importations in February as against the month preceding.

The value of British hardware and cutlery sent to the United States last month is given at £28,024, as against £33,463 in February, 1882, and as compared with £45,287 in January last, thus showing a decline in value of that variety of exports from January to February, 1883, of £17,263, or about $86,315. The value of steam engines shipped to this country in February is placed at £3,840, as against £5,854 for January, and £6,969 for February, 1882. The decline in value of the same from January to February last was therefore £3,129, or nearly $15,645. "Other machinery," etc., was exported to this country from Great Britain in January to the value of £37,142, and last month to the value of £39,561, an increase of £2,419, or about $12,095. In February, 1882, the value of this class of shipments here was £37,691, or £130 in excess of last month. The receipts of British unwrought tin amounted to 513 cwts. last month, against 775 cwts. in January, and 949 cwts. in February, 1882.

PETROLEUM STATISTICS AGAIN.

A writer in a late number of the *Oil and Paint News* finds fault with that portion of a recent article in BRADSTREET'S which recommends state inspection of the oil in tank in the hands of the pipe-line companies. The burden of complaint appears to rest upon the statement made in these columns that "there is known reason for questioning the accuracy of the pipe-line company figures as to stocks of oil on hand." Perhaps it would have been more precise if we had written that testimony had been given that "there is reason for questioning," etc. It was not so much with a view to charging the pipe-line officials with returning incorrect reports that the change named was advocated as it was to urge the necessity of not giving them the opportunity to do so, even by accident. The larger pipe-line company is understood to comprise in its leading spirits the prime movers in that much-talked-about refining interest, the Standard Oil Company. This latter company does not claim, but is generally conceded, the distinction of ultimately handling the bulk of the crude oil which is refined. It constitutes, therefore, the market for the larger proportion of the raw product of which it is the custodian under a different corporate title. It might be well, therefore, in view of the known brilliancy as speculators in pipe-line certificates of various members or agents of members of both the Standard Oil and United Pipe Line companies, to permit them to saddle the commonwealth with the burden of keeping account of stocks. And this for the reason that so many thousands of personal interests are daily jeopardized by the alluring prospects presented in the opportunities to speculate in oil afforded by this same pipe-line interest. Whether the trade regard with favor the "movement at Harrisburg to provide state inspectors to gauge oil in tank," etc., or not, just such action at Harrisburg appears to us to be a justifiable and eminently proper instance for state interference. Perhaps if it were done a repetition of the recent instance wherein pipe-line statements were unexpectedly corrected, and which, unintentionally of course, though appreciably affected the market, might not be suffered to happen again. The cry of "demagoguery" in this movement for state interference has a familar sound. We have heard it before on numerous occasions where the public have sought aid or protection at the hands of the state as against an interest allied, in form at least, to a monopoly. The lately-appointed Railway Commission, when first proposed, was met by a similar cry. Possibly, however, we unnecessarily prolong a reply to a criticism which appears in the columns of a constant apologist for the only organization which could feel itself touched by the proposed changes.

OCCASIONAL NOTES.

The inhabitants of the South Pacific are apparently determined to render themselves not unworthy of the destiny suggested by the brilliant English essayist who pictured the New Zealander sketching among the ruins of British civilization. Heretofore it appears there have been neither sleeping nor parlor cars in Australia. Commissioners were recently sent to America to examine the various cars in use and to contract for the purchase of such as seemed most suitable. They succeeded in having built for them two combination sleeping and parlor cars which are novelties in their way, even judged by the standards of comfort and convenience which obtain among railroad men in America. Not content with securing the most modern luxuries in transportation, the enterprising colonists are beginning to consider the question of the introduction of a system of electric lighting. The *Victorian Review* for February opens with a popular view of the subject of electric lighting in which the writer gives an account of the recent progress of the electric light in Europe and America, together with some particulars regarding the cost of its production. The writer refuses to follow the fashion in speaking of the electric light as the light of the future. It is emphatically the light of the present, he says, and he urges the colonists not to delay in securing its introduction among them. Ideas do not take as long to travel to the antipodes as they once did.

It will evidently not be very long before the inconvenient and dangerous system of carrying telegraph and other wires on poles will be entirely abandoned. In instance after instance the old system has been subjected to severe condemnation, and the merits of the underground method have been set before the public. Everywhere it is beginning to be seen that there is very little ground for hesitating as to the choice to be made. The best opinion in relation to the matter is reflected in the authoritative recommendations of Lieutenant Greene, who has been investigating the question in some of our large cities, and of whose conclusions we gave a summary last week. We notice that in Philadelphia the lower chamber of councils has signified its faith in the underground system by passing ordinances giving permission to two companies to lay their conduit tubes and cables under certain streets. The manager of the Postal Telegraph Company has arrived at substantially the same conclusions reached by Lieutenant Greene, and says that he will advise that all the wires of that company be laid underground in cities. It will cost more at first, but it will be more economical and more convenient in the end.

The amended rules recently adopted by the United States Board of Supervising Inspectors for the government of all pilots of steam vessels navigating the lakes and rivers (except rivers emptying into the Gulf of Mexico) are seemingly well adapted for the prevention of collisions. They provide that when steamers are running in a fog or in thick weather it shall be the duty of the pilot to cause a long blast of the steam-whistle to be sounded at intervals not exceeding one minute, and that steamers when drifting, or at anchor in the fair way of other vessels in a fog or thick weather, shall ring their bells at intervals of not more than two minutes. The rules also provide for the case of pilots failing to understand the course or intention of others, either on account of erroneous signals or other causes, directing that in such circumstances the doubt shall be manifested by appropriate signals, and that in case vessels so situated shall have approached within half a mile of each other, their speed shall be slowed until the proper signals are given and answered, or until the vessels have passed each other. It would conduce greatly to the avoidance of accidents in navigation and the consequent loss of life and property if a uniform code of rules as particular and precise as those referred to were adopted for the regulation of navigation everywhere. If such a code had been adopted, some recent melancholy experiences would not need to be recounted.

A correspondent of the Manchester *Guardian* gives an interesting summary of the annual statement of the president of the Paris Tribunal of Commerce of the cases pronounced upon by the tribunal during the year 1882. It may be remarked that the tribunal performs the duties at once of an arbitration board and of a court of bankruptcy, and also acts as a registration office for partnership companies and trade-marks. The judges of the tribunal who examine commercial disputes are all business men, most of whom have undergone a preliminary training as members of the Chamber of Commerce. The liquidation of bankruptcy cases and the distribution of dividends is conducted by official syndics or liquidators, under the supervision and the responsibility of the president of the tribunal. In all, 77,248 commercial cases came before the Paris Tribunal in 1882. Of these 1,588 remained over from 1881, and 75,660 were introduced during last year. The majority of these cases, 39,448, went by default; 26,708 were judged on their merits; 4,584 were conciliated; 4,518 were withdrawn, and 1,990 remained over at the end of the year. Of the cases in which verdicts were given, 66,156 in all, the greater number were settled without possibility of appeal. The business of the tribunal seems to be decidedly on the increase, as may be seen from the fact that the figures for 1882 show an increase of 9,485 cases over 1881, this increase being greater than those of preceding years.

Some details in regard to the conduct of the cases before the tribunal may not be without interest. Although the verdicts are given by the tribunal officially, the merits of the cases are examined and settled, not by the tribunal itself, but by what are known as the junior judges. These junior judges arbitrate the case and endeavor by threats or persuasion to induce the interested parties to consent to a verdict before the case comes into court at all. Every case brought before the tribunal is sent before these officers, who summon the interested parties separately, listen to their explanations, and suggest a mode of settlement. If the differences between the claims is not very great, a verdict by consent is generally arrived at. The parties, as hinted above, do not feel entirely free to disregard the recommendations of the junior judges, for the reason, it is said, that the tribunal generally pronounces against whichever of the parties declines to meet the junior's suggestions. The large number of cases in which judgment is taken by default (over 50 per cent. of the whole number) are said to have their origin in a habit of procrastination, which appears to be as characteristic of Parisian as of Turkish debtors. To bring matters to an issue creditors are often forced to issue a summons. The debtor holds off to the last in the hope of a friendly settlement to avoid expense. If pursued resolutely he does not attempt to defend his case, and loses by default. In cases of a technical nature relating to special trades or estimates of value, arbitrators are always selected from the special trade or profession under discussion. It is to be noticed that appeals from the decisions of the tribunal are not numerous. Of the 66,175 cases which came before the court in 1881 (the latest year for which the figures are accessible), 566 decisions were confirmed on appeal, 162 were amended, and 301 were withdrawn, or a total of 1,029—a small proportion of the whole number of cases which came before the court.

In a paper recently read before the Society of Arts, in London, Mr. J. C. Bloomfield gave some very sensible and practical suggestions regarding the development of Irish industries. He proposed, in effect, to establish throughout Ireland centers of organization for the minor industries, which the country could in various localities successfully support. The adoption of his proposal would, he said, have the happiest results in abolishing the poverty and distress of the Irish population. As evidence that he did not speak unadvisedly, he gave an account of the successful establishment by him of a manufactory of pottery at Belleek, then one of the poorest hamlets in Ireland. In the course of some geological and mineralogical researches upon certain property of his which had suffered from the absenteeism of the previous owner, he found kaolin and felspar in the gneiss formation, and he determined to found a porcelain factory there. As a result Belleek had grown into a town, with some £60,000 to £70,000 expended on it and about it, and with artisans earning in some instances wages as high as £3 10s. per week. This was only an illustration of what might be done. It was also evidence of the adaptability of the Celt for becoming a manufacturing artisan. That the extension of the system proposed was sorely needed there was ample proof in the lamentable condition of the people. There could be as little doubt, he thought, that it would go a long way toward solving or accommodating the present difficulties. In the coming report of the Royal Commission on Technical Education the extension to Ireland of "home industries" as they exist on the continent would be recommended. England had been inundated with the results of these continental industries. In the cottage homes of Germany, Switzerland and other countries linen garments, mosaic work, straw plait, carved wood and many other salable articles were industriously manufactured, developing the resources of those countries to the minutest detail, training the people in the use of brain and hands, and enabling them to live in decency and comfort. These continental producers, however, are handicapped as against the Irish by their more costly living, and also by the cost of transit. It is interesting to notice that a proposition so desirable as that of Mr. Bloomfield's was supported by evidences of its practicability in the shape of manufactures of porcelain of various kinds which were exhibited before the society.

The *Times* of Chicago prints some statistics of interest concerning the lumber trade of that city. According to the figures given, the business of 1882 considerably exceeded that of former years. The receipts of lumber in 1882 were 2,116,341,000 feet, as against 1,906,639,000 in 1881, an increase of 209,702,000 feet. Of shingles there were received 954,549,000 M. in 1882, an increase of 88,474,000 M. over the previous year. The sales and shipments of lumber in 1882 amounted to 2,001,107,241, as against 1,835,476,831 in 1881, an increase of 165,630,410 feet. The sales and shipments of shingles in 1882 amounted to 905,931,144 M., an increase of 122,497,638 M. over the previous year. The increase of 1882 shows no remarkable features. The increase in the sales and shipments, as will be seen, was less in proportion than that of the receipts. A much heavier stock is now on hand than ever before. This is attributed to several causes. One of these was the light trade during the winter, owing to the cold and capricious weather, which rendered building impossible. The stock on hand, it is estimated, exceeds the largest hitherto held by from 30 to 60 per cent. According to the report of the secretary of the Lumber Exchange, the hardwood trade of the city bore its full share of the increased receipts of lumber during 1882. Of the total lumber receipts of the year fully 300,000,000 feet was of hardwood. The most notable features in the hardwood trade are the decreasing use of walnut for the manufacture of fashionable furniture and the growing popularity of gum, maple, basswood and cherry.

According to the published statements of the British navy estimates, the sum required to be voted on this account for the year 1883–84 is £10,757,000, a net apparent increase of £273,199 over the sum voted for the present financial year. The net actual increase is, however, only £129,567, part of the apparent increase being the result of certain interchanges of charge between the army and navy estimates and part being for expenditure connected with Egypt. The gross estimate of the actual expenditure for the year 1883–84 is £11,582,758, against £11,155,909 for 1882–83. For wages to seamen and marines the gross estimate is £2,751,700, and the amount required to be voted £2,633,300, an increase of £1,802 over the sum voted for the current financial year. For victuals and clothing the gross estimate is £1,225,000, and the sum required to be voted is £937,400, an increase of £58,961 over the vote for 1882–83. The naval force for 1883–84 is to consist of 57,250 men (including 12,400 marines), as against 57,500 men for the current year. As to ship-building, 15,172 tons are to be built during the year, of which 11,224 tons are to be armored. Besides these, private firms are to supply 1,982 tons armored and 2,270 tons unarmored. The aggregate construction for the year is thus to be 19,644 tons, against 20,142 tons in 1882–83.

From statistics based on the official returns of the foreign trade of Austria and Hungary, and which are printed in the London *Economist*, it appears that the imports slightly increased during the year 1882. The exports, on the other hand, exceed those of preceding years considerably. The total imports in 1882 amounted to 93,326,230 cwts., as against 92,307,506 in 1881. The total imports in 1882 were 174,449,426 cwts., as against 169,702,286 in 1881. The value of the imports in 1882 was 672,400,000 florins, as against 641,800,000 florins in 1881. The value of the exports rose from 1,373,300,000 florins in 1881 to 1,424,300,000 florins in

1882. The excess of the exports is chiefly due to the excellent harvest of last year, the main items of increase being found under the heads of corn, cereals, rice, flour, etc. The imports of corn alone were 54 per cent. higher in 1882 than in the previous year. There were 88 per cent. more sheep exported in 1882 than in 1881. The exports of chemicals, mineral ores, iron and iron articles, flax, silk, cotton, wool, wine and coal, among others, showed a decrease as compared with those of the previous year. During the first half of 1882 the imports of gold and silver coin and silver bullion were limited, while the exports of both gold and silver coin was very large. During the second half of the year the imports of gold coin were large and the exports slight, while silver coin and silver bullion were both imported and exported in large quantities. The returns of the Austrian and Hungarian railways for January show an increase in the receipts of 4.4 per cent. over those for the corresponding month of 1881.

The Italian trade returns for the year 1882 exhibit a decline as compared with those of the previous year. From a table published in the London *Statist*, and giving the amounts in pounds sterling, it appears that the total imports for 1882 were valued at £53,855,200, an increase of £574,760 over 1881. The exports, on the other hand, show a considerable decrease, being valued at £46,222,800 in 1882, as against £47,692,880 in 1881, a falling off of £1,470,080, or about 3 per cent. This decline in the value of exports is chiefly due to the falling off in the exports of silk, which were valued at £1,842,080 less in 1882 than in the preceding year. A considerable falling off is noticeable also in the items—wines (including oils) and minerals and metals (including manufactures). Decreases are also noted in the exports of colonial produce, tobacco and drugs, chemicals, hemp, jute, flax, etc., cotton and stone and earthenware. A very considerable increase is found in the exports of animals and animal products, which were valued at £8,128,240, as against £6,218,440 in 1881. Increases are also to be noted in exports of dye-stuffs, wool, horse and other hair, timber, paper and books, hides and cereals. Of the imports, the articles showing the largest increase are those embraced under minerals and metals (including manufactures), which in 1882 amounted to £10,955,000, as against £9,008,360 in 1881. Among other articles showing an increase are colonial produce, tobacco and drugs, dye-stuffs, cotton and cereals. The most considerable decreases among imports were those of wines and oils, wool, horse and other hair, animals and animal products, chemicals, stone and pottery ware, silk and timber. There was a decrease in the imports of gold, and a large increase in the imports of silver. The exports of both metals show a decrease as compared with 1881.

SPECIAL CORRESPONDENCE.

LONDON STOCK EXCHANGE AND MONEY MATTERS.

London, March 15.—Quite a sensation has been produced here within the past few days by the decision of the United States Supreme Court in respect to the Virginia bondholders' claims. As you know, there is a very large percentage of these bonds of 1871 held in this country, and there is a strong feeling against converting them under the Riddleberger act, or in any other way, and funds have been collected by the Council of Foreign Bondholders to fight the matter across the Atlantic. Everybody said that if only the case could be taken out of the jurisdiction of the state authorities and made a national question (and the supreme courts of the United States are supposed to be national), the undoubted rights of the bondholders would be secured, and to find that the "Coupon-Killer acts" have in the main been upheld by that supreme authority has caused something more than surprise in this country. People are talking as though it is in the power of any American state to be dishonest if so be it has a mind to, and that all prospect of redress from the higher courts is at an end. This is, of course, very much of an exaggeration, and it is surprising how soon the public here forget this kind of alarmist talk about American securities. That American railroad and state bonds would undoubtedly be much greater favorites in this country if British holders were placed in a position from which they could more readily control mismanagement and prevent dishonesty there can be no doubt whatever. But, still, it is very much to be doubted whether the Massachusetts bonds or the Illinois Central Railroad shares held here are in any way depreciated because Virginia tries to repudiate her obligations, or because a railroad like the Philadelphia & Reading tumbled suddenly, a few years ago, from 10 per cent. dividends into a condition of bankruptcy. It is, however, a matter for American legislators to consider whether defaulters should not be more effectually controlled than they appear to be at present, and a bankrupt state can hardly claim to be in a very different position from a bankrupt company or a bankrupt merchant. In this country repudiation by any local authorities, whether county or municipal, is entirely unknown, and the same may be said of every community over which the British government have control, and it is pointed out that in the United States alone, of all the English-speaking communities, neither the law nor the force of public opinion are sufficiently strong to prevent such instances of repudiation.

Another event of the past week has attracted a good deal of comment, and that has been the export of gold to New York, unusual at this season of the year. The Board of Trade returns prove to us that the balance of trade has moved of late very largely in the direction of the United States. Great Britain is sending them much smaller quantities of manufactured goods, while they are sending to this country enormous masses of cotton and grain, as well as more meat. But, though this is undoubtedly the case, it is well worthy of remark that these trade balances do not of themselves produce large remittances from one country to the other. It is when there is a pressure for money in New York that gold goes from London, and it is when there is a pressure for money in London that gold comes from New York here. At this time last year there were large remittances to London, because the Paris crisis had put up the value of money here to a high level when it was cheap in New York, while a contrary movement has now been observable because money has become cheap here and dear on the other side. The belief is very generally entertained in London that speculative operations here had a good deal to do with the recent rise in money in New York. Whether such is the case you will, of course, be better able to decide than we are; but with a government so constantly draining the market by means of excessive taxation there must be a very sufficient reason for stringency in New York on many occasions. In London in the present quarter, when such a large amount of taxation is collected, the British government obtain control of a large amount of money—nothing like what the United States government can command at all times—but still the balance accumulates to the extent of seven or eight millions sterling during the quarter. The exchequer does not sit upon this money, but at once transfers it to the Bank of England and the Bank of Ireland, and those two banks loan out the money in question as fast as the public have need of it. During the present quarter the Bank of England has obtained considerable control over the London money market, and had the Bank of England maintained a 4 per cent. level there can be but little doubt that by this time the open market would have worked up in a great measure to that rate. But when, owing to the collection of taxes, the Bank of England found itself sufficiently strong to do so, it was regarded in the light of official etiquette to allow the public to participate in the advantage thus obtained. There is little doubt that the last reduction in the bank rate was decided upon solely in the interests of the public, for it must be remembered the Bank of England directors are not bankers, but are elected from among the leading merchants and financial houses in the city of London. Your London correspondent may perhaps not have the same intimate acquaintance with the inner workings of American fiscal matters as you have in New York, but is there any insurmountable obstacle to the United States government loaning out its tax collections just as soon as they are received, in the same way as the British government does here? What is the necessity to go through the cumbrous process of buying bonds to relieve the market when the United States government could do so far more effectually, and may be with considerable profit to itself, by simply banking the money, or by itself becoming a banker. It does not matter how much taxation the United States government may levy upon the resources of the country (that is, looking at matters simply from a currency standpoint) so long as the taxes or duties collected are at once rendered available for circulation. In England the large collection of taxes early in the year is the main reason why money is cheaper in London during the first half of the year than it is in the second. The money is collected by the government, or often placed to the credit of the government by the Bank of England, even before the remittance from the provinces has reached headquarters. That money is available for loaning purposes immediately, and it would be quite within the range of possibilities that the same coin might be paid to the government half a dozen times over in payment of taxes during the course of a single month. It appears to be a very different thing in America, where, according to London notions at any rate, the Treasury is a sort of whirlpool, swallowing up everything that comes within reach, and disgorging only at occasional intervals. If the people of the United States feel disposed to pay to their government a larger amount of taxation than there is any need to pay, that is of course a matter upon which they have the best right to be consulted. But that any such proceeding should cause money to be dearer would not be understood in this country. Here it would be banked at once, and by strengthening the Bank of England would reduce the bank rate. All depends upon keeping the coin or notes, as it may be, in circulation.

Some little time ago I sent you a statement to the effect that the gold coin circulating in this country was estimated at £125,000,000 sterling. The estimate in question was not mine, but was based upon others which had appeared, emanating from various financial authorities. Since I gave that figure I see the *Bullionist* states the amount at £118,000,000, and Mr. Inglis Palgrave, in a paper recently read before the Institute of Bankers, has placed it at not more than £110,000,000. English coin is so largely exported that it is impossible to determine very nearly what the total may be, but should £110,000,000 be correct, the entire gold, silver and paper currency circulating in this country cannot much exceed £150,000,000.

EVANSVILLE AS A BUSINESS CENTER.

Evansville, Ind., March 26.—The floods, which a few weeks ago wrought such destruction from the headwaters of the Ohio to its mouth, permitted Evansville to escape with little or no damage. The position of the city is such that, although the water reached the highest point known, hardly a single manufacturing establishment was obliged to cease operations. Although one of the most active business centers, Evansville is not as well known abroad, nor are its advantages as a manufacturing and commercial center as fully understood as they deserve. At the present time a movement is on foot to bring to general notice the city's advantages, through the circulation of a mammoth edition of the *Courier*. As is customary, this will contain an account of the larger individual enterprises, the geographical, manufacturing and educational advantages, the transportation facilities, mineralogical and other wealth enjoyed by Evansville. The population of the city is about 45,000, and the commercial and manufacturing establishments are of first rank in all respects. The coal supplies contiguous to Evansville are worthy of mention. Great Britain possesses 11,859 square miles of coal, France 1,719, and Belgium 518 square miles, while the coal area of Indiana is over 6,500 square miles, and of Kentucky 16,000. Of this 22,500 square miles the greater portion practically lies at Evansville's door. There are more than a dozen coal mines in and about the city which mine millions of bushels annually, and which supply manufactories here at a cheap rate. The city is situated on the Ohio river, midway between Louisville and Cairo, and therefore possesses ample means of communication by river with over four hundred counties in the Ohio, Green, Cumberland, Tennessee and Mississippi river valleys. These rivers include thousands of miles of navigable territory, and reach fifteen states in the Union. This in addition to the adequate railroad facilities possessed. Real estate is reasonable in price, and rents are low. This makes Evansville a desirable point at which to locate. Evansville is in the very heart of the greatest grain and meat-growing district of the globe. Nearly all of the cereals of the United States grow in abundance, and fine hogs and cattle are seemingly "indigenous to the soil." Unlike most regions of the world located in the sandstone and coal formations, she possesses valuable farm-lands. The soil is not wholly of the disintegration of the local rocks and clay, but mixed with the "bowlder drift." Hence the anomaly of the fine timber of the forests, the fine corn, wheat, rye and grass farms, on a surface ten to fifty feet above the coal, the iron or a quarry of sandstone. As a hard-wood lumber market Evansville, for obvious reasons, ranks among the first in the country, as well as in all branches of this class of manufacture. All branches of manufactures here have progressed rapidly, which speaks highly for the advantages enjoyed in that direction. Residents of this city claim that Evansville is "the manufacturing center of the southwest."

REVIEWS.

*THE STATE AND TRADE.**

The English Citizen Series of handy volumes forms a typical outgrowth of one of the noticeable tendencies of the more practical forms of modern literature. It is not many years since, that the student of this and kindred topics would have found a long and tedious research necessary in order to arrive at the possession of a comprehensive view of the world's previous efforts in the direction investigated. Real progress therefore required a patient examination of the works of authors, authorities and commentators. Of late years there has been developed, a department of literature which comprehends or is comprehending the views expressed in earlier literary effort, whether of the exact sciences, philosophy, law or the arts, and which seeks primarily to sort out the seeds that have been dropped by the literary wayside. These, classified and arranged in the light of modern experience and reviewed with reference to immediate and prospective requirements, constitute some of the best results of the literary activity referred to.

Mr. Farrer's analysis of "The State in its Relation to Trade" derives special significance from the fact that he has long occupied the position of Secretary of the British Board of Trade, and has thus been brought into direct contact with the practical operations of the relations which he defines. He begins his subject at the beginning with definitions of the terms "the state" and "trade." To the latter, which he mentions first, he ascribes "all operations by which skill and labor and the products of skill and labor are exchanged," having said which he proceeds to a more concrete explanation. He adds that, "in one sense, everything which lies outside of this free dealing between two persons concerned may be called the state." This definition is, perhaps, the least lucid of any which he attempts. Branching into the subject, the action of the state, as effected through its legislature, its courts of law or its executive heads, is briefly outlined. The primary functions of the state in protecting property, settling disputes, promoting education and furnishing information are briefly touched upon, and the bearings of state enforcement, of interpretations of and additions to contracts are given. The leading points in mercantile law are explained, and the fact is pointed out that these statutes and laws came into existence as official embodiments of previous commercial practice. The questions arising from the limitations of contracts, involving personal disability, limited liability, frauds, bankruptcy and bills of sale, are clearly and briefly analyzed. In the chapter devoted to the settlement by the state of the terms of contracts, and the determination, stamping and issuance of a medium of exchange, there is much that will recommend itself to the student of public affairs in the United States to-day. The mono- and bi-metallic theories are now exciting wide discussion throughout the country, and one of the difficulties which writers upon these subjects have to contend with appears to be the want of a common understanding of the history of the development of the use of money, its functions, and adaptation to the wants of trade. Mr. Farrer has given a singularly clear and simple statement upon these points, made, of course, with reference to Great Britain, but which will also be found of practical application in the United States.

In discussing the relation referred to with respect to copyright laws, it is called to mind that the great publishers in the United States have until recently had the market in this country entirely in their own hands and have reprinted English books at their will, giving such remuneration therefor to foreign authors as they pleased, and arranging between themselves not to pirate from one another. It is added that other publishers have since grown up here who publish cheap, popular editions of English books with as little regard to the publishers above referred to as the latter had for the English author or publisher, and that as a consequence the American publishers have recently found their interest in promoting some form of international copyright law with some talk of a copyright treaty on that basis. This, of course, "came to nothing," inasmuch as it left out of account the great American reading public.

Following an extended consideration of government monopoly, or partial monopoly, of undertakings such as harbors, canals, docks, lighthouses, roads, bridges, ferries, railways, gas works, electric lighting and water supply, and contrasting them

* THE STATE IN ITS RELATION TO TRADE. (The English Citizen Series.) By T. H. Farrer. London: MacMillan & Co. 1883.

with the nature of the British governmental monopoly of the postal and telegraph business, Mr. Farrer concludes, with reference to the desirability of the monopoly of said and kindred enterprises by the government, as follows: "Where profit can be made sufficient to tempt private capital to embark in the business, and where competition can be relied on to prevent the evils of monopoly, it is as true as ever that the public is best served by keeping the trade in private hands; but where these conditions are not to be found, and where the matter is of such a kind that a public governing body can properly manage it, experience and analogy show that there is no *a priori* or absolute objection to the state, whether in the form of the central government or of a local authority, acting as a trader itself." The growth of the British postal department, including, as it does, the business of a general carrier, the transmission of telegraphic messages, and a department of banking and insurance, is described in a special chapter. But the wise conclusion is reached that, excellent as the service is, it has not avoided one peril which makes cautious statesmen unwilling to extend their industrial functions, viz: "the difficulty of dealing with a large class of servants." "No one," adds Mr. Farrer, "who has watched the pressure which the services can bring to bear on government through the medium of members of Parliament will undervalue this danger." This comment on a situation prevalent in a country where outside pressure of the kind referred to is productive of fewer immediate results than in the United States will recommend itself especially to that class here who see the only remedy for certain monopolistic tendencies of the day in the acquisition by the national government of the railways or the telegraph. Railway and merchant shipping regulations are treated *in extenso*. British railways, Mr. Farrer thinks, have proved doubly efficient owing to a wholesome competition between lines. This check would, of course, be of no importance where railways are a state monopoly, as the stimulus to an economic and satisfactory service would be wanting. M. Waddington, in a report on the French railway system, explains that French railways which are not exposed to competition give fewer public advantages than English railways. The advantage gained by the latter, "it is hoped, will not be sacrificed to any dreams of equalization of railway rates," dreams "which, when investigated, are generally found to originate in the very natural and common, but not less mischievous, desire for protection from trade competition." State interferences in the way of compulsory tests, requiring the branding of certain classes of goods after inspection, the granting of special trade-marks to encourage individual excellence and laws against deleterious adulterations are briefly described, as are the interferences of the state with special trades in order to secure health and safety.

The above detailed lists of interferences of the state with trades are not claimed to be exhaustive In fact, any list which is complete to-day would be incomplete to-morrow. The fact which an enumeration of them sufficiently indicates is that when a "strong enough case is made out" the state will and does interfere. Mr. Farrer interrogates himself as to the result of this interference, and confesses to an inability to answer satisfactorily. In many instances, doubtless, good has been effected, but perhaps the greatest reform has been accomplished through the mere passage of laws authorizing an interference, inasmuch as "to call public attention to an evil is in itself a remedy." On the whole the author believes that the danger at present appears to lie in the direction of too much restriction, not of too much freedom. Where the restrictive measure is intended to be placed in the hands of a department to be used at discretion the tendency is to grant absolute or arbitrary power. In proportion as the grant is given to others higher in authority, special knowledge of the cases in hand grows less and less. The other horn of the dilemma presents the option of transferring the responsibility from the control of the government to the local authorities. Recent legislation touching trade restrictions in England is said to have taken a strong turn in this direction, and generally with gratifying results. An objection to the transfer of power of this nature to local bodies is mentioned however. It is said that it may unduly restrict individual freedom. It is pointed out that already "our daily life is beginning to be hedged round by inspections, regulations and prohibitions, "the tendency of which is to make men and women incapable, through treating them as incapable, of thinking or acting for themselves." "The coming democracy," says Mr. Farrer, "has much of promise," but one of its failings is impatience, in that it cannot bear to see an evil slowly cure itself, but seeks to remedy it at once by the use of its own overwhelming force. In concluding this topic, the belief is expressed that "to preserve individual liberty in trade, as in other matters, from the impatient action of philanthropy, will probably be one of the great difficulties of the future." Discussions of the interference and non-interference of the state through customs duties, the levying of tribute upon trade for revenues with which to maintain order and contribute to the conditions essential to successful trading, and the relations of the state and the commercial community in times of war, form the concluding chapters.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The doctrine that a contract of fire insurance is a contract of indemnity only, and that any claim by which the insured would receive more than his actual loss cannot be supported, was recently affirmed by the English Court of Appeal in the case of Castellain vs. Preston. The defendant insured his house and land with the company of which the plaintiff was chairman, and then agreed to sell it for a stated sum. Pending the negotiations for the sale a fire occurred, for which the company paid £300 upon their policy. No knowledge of the contract of sale was communicated to them, and they did not hear of it until it was discovered that the defendant had received the agreed purchase money in full from his vendee. The company sued for the repayment of the £300 paid, with interest. In the court below it was held that as this was not a right of action it did not pass to the insurer under the doctrine of subrogation. The Court of Appeal reversed this decision of the court below, holding that the doctrine referred to had no such limitation as that suggested below, and that its effect was to place the insurer, after payment of the policy, in the shoes of the insured as regarded every right of the insured, whether in contract or in tort, and whether fulfilled or unfulfilled, provided that it would result in diminishing the loss insured against. From the application of this rule it followed that as the insurer had obtained from his vendee the whole of the purchase money as agreed for prior to the fire, he had no right to retain the policy money as well, and the plaintiff was therefore entitled to recover the money paid by the company.

The question what are sales "at retail by retail dealers" was passed upon by Judge Acheson, of the United States District Court, at Pittsburgh, Pa., on the 21st inst., in the case of the United States vs. Jenkinson. The defendant was arrested for the alleged violation of section 3,363 of the Revised Statutes, which provides that "No manufactured tobacco shall be sold or offered for sale unless put up in packages and stamped, except at retail by retail dealers from wooden packages stamped as provided." The defendant, it appeared, had sold a small quantity of tobacco, in violation, as the government alleged, of the provisions of this law; the government taking the ground that a sale of manufactured tobacco by one retail dealer to another to sell again was not retailing within the excepting clause of the statute. It was not shown that the defendant knew that it was the purchaser's intention to sell the tobacco again, nor that the purchaser had, in fact, sold the tobacco. Judge Acheson said that according to the common understanding the sale of four or five pounds from a bulk package was a sale at retail. It was none the less a sale at retail on the part of the vendor because the purchaser happened himself to be a dealer in tobacco. The retail dealer, he said, was under no obligation to inform himself as to the purposes of purchasers, and if they undertook to make an unlawful disposition of the goods they purchased they should be held to answer for their own acts. The court being of the opinion that the government had no case against the defendant, he was discharged.

The Albany *Law Journal* has a note of the case of The People vs. The Globe Mutual Life Insurance Company, decided by the New York Court of Appeals on January 23, in which it was held that a contract for personal service made with a corporation is determined by the dissolution of the corporation by the state. One M. was employed by an insurance company under a contract to act as its general agent for a specified term. During the term the company became insolvent and was dissolved; a receiver of its assets was appointed by the state authorities in accordance with the state law and the company and its agents were enjoined from further action. The court held that M. was not entitled to claim, against the fund in the hands of the receiver, compensation for a breach of the contract of employment. There was no breach of contract because the state, by the injunction order, operating alike upon the company and its agents, paralyzed the action of both contracting parties so that neither could perform or put the other in the wrong. Both parties contracted with reference to the law, and by that the corporation could live only by permission of the state. Again, the subject matter of the contract was skilled personal service. The contract of its own nature was dependent upon the continued life of both parties, and must end with the natural death of one or the corporate death of the other.

The same journal reports the case of Lyons vs. The Providence Washington Insurance Company, decided by the Rhode Island Supreme Court in February. In this case it appeared that the plaintiff procured from the defendant a policy of insurance against fire on certain articles of furniture and wearing apparel, described in the policy as "all contained in" a certain house; that at the time of the fire the articles had been removed from the first house and were in another house, where the fire occurred, and that the defendant had never been informed of the removal. On the trial the defendant requested the presiding judge to instruct the jury that the plaintiff could not recover for the reason that the removal of the goods insured without the knowledge and assent of the defendant terminated the contract of insurance. This instruction was refused, and a verdict was returned for the plaintiff. The case was thus brought before the Supreme Court on a bill of exceptions. That court decided in favor of the defendant in accordance with the general rule that all the material statements of the policy of insurance, including the statements as to the place in which the insured property is situate, are warranties, and that such warranties are true and must continue to be true during the whole life of the policy as the condition of any recovery thereunder. The court noticed an exception to the general rule to the effect that the temporary removal of property, whether occasional or habitual, in pursuance of a use which is a "certain necessary consequence," arising from the character of the property, without any change in the ordinary place of keeping, would be no defense to an action on the policy, but held that the case under consideration did not come within the reason of this exception. The court said that it must be evident to any one who at all considered the nature of the contract of insurance that the amount to be charged for premium must vary on consideration of the location of the property to be insured, and that the removal of the property to another place might be greatly to the disadvantage of the insurer, although such new place of deposit might not be in itself more exposed to damage from fire, since the result of such removals, if permitted to any considerable extent, might be to expose an undue proportion of his capital to the risks of a single conflagration.

BUSINESS NOTES.

The Delaware legislature has passed a bill to encourage the arrest of unlicensed traveling salesmen by imposing a fine of $5, to go to the person making the arrest. An amendment was added, providing for the fine and imprisonment of officials who, after arresting such salesmen, shall accept bribes to release them.

There were 274 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* for the week ended March 10, against 263 in the corresponding week of 1882, and 291 in the like week in 1881. In England and Wales there were 249 against 242 and 278, respectively, in the weeks referred to in the preceding years; in Scotland there were 19 as compared with 17 and 10, and in Ireland 6 as against 4 and 3.

According to the London *Labour News* of March 14 the English labor market continues prosperous, although the severe weather experienced prior to the date named had checked building operations somewhat. There was some agitation respecting the restricting of the output in the mining districts, and serious results were looked for. In all other lines named the report was quite favorable, both as to amount of work in hand and the prospects for the near future.

The following national banks have been organized: The Farmers' National Bank of Oxford, Pa.; capital $75,000; James Wood president; David M. Taylor cashier. The Killington National Bank of Rutland, Vt.; capital $100,000; Redfield Proctor president. The Roanoke (Va.) National Bank; capital $50,000; E. G. McClanahan president; P. J. Wright cashier. The People's National Bank of Barnesville, Ohio; capital $50,000; J. S. Ely president; A. E. Dent cashier. The Collin County National Bank of McKinney, Texas; capital $75,000; Girard A. Foote president; Wm. L. Boyd cashier. The Central National Bank of Boston has elected Moses W. Richardson president in place of S. Carr, Jr. The National Bank of Chambersburg, Pa., has elected W. L. Chambers president in place of E. Culbertson. The First National Bank of Brainerd, Minn., has elected H. J. Spencer president in place of W. Ferry.

Norwegians, it appears, have very little confidence in the American potato. The consul-general for that country and Sweden has informed the various foreign vice-consuls that the royal prohibition, existing since 1876, against the importation of potatoes into Norway has been raised as far as European ports are concerned, and that consequently potatoes may hereafter be brought into Norway from any port in Europe. On the other hand, the prohibition still remains in force as regards potatoes from America.

The total number of "mines and workings" in operation in Spain in 1880 was 2,492, an increase of 234 over the total in 1879. The age of these statistics illustrates the promptness with which Spanish statistical bureaus transact their business. The number of persons employed in these mines in 1880 was 52,495 men, 1,222 women, and 6,188 children. One-half of the Spanish output of coal is from the province of Oviedo. Vizcaya is the most important producer of iron, although nineteen others furnish iron. The bulk of quicksilver is found at Almaden, and Santander supplies 80 per cent. of the zinc.

Mr. John C. Welch, New York, has devised an ingenious "Commercial Calendar for 1882," giving the highest and lowest quotations for each of the months of the year named of leading railway stocks, cotton, grains, provisions, petroleum, and American and Scotch pig iron. There are also valuable data respecting domestic and foreign interest rates, excesses of exports and imports, foreign exchange, the price of silver, and ocean freight rates on grain. The plan adopted—that of grasping a circular sheet of card-board by means of a double sector of the same material—is a convenient one, the names of the subjects covered being on the latter, while the wheel revolves on the common center, thus bringing any desired reference into sight and position with one movement.

Evidence corroborative of the account of the Roumanian oil regions, as described by BRADSTREET'S Vienna correspondent some months since, has been furnished the London *Engineer* by a correspondent of that journal. He says English companies have tried to find oil in Roumania with poor success, and that some Pennsylvanians have explored Galicia (in Austria) with little encouragement, and adds: "Mr. Charles Ribighini, an Italian engineer, who has had many years' experience in the oil regions of Canada, has at length overcome all obstacles, and succeeded in striking, at a considerable depth, a flowing well of the finest petroleum. From this well 150 barrels are given out naturally each day, and when the pump is at work it is calculated that the production will be increased to 300 or 400 barrels a day. The petroleum has a specific gravity of 42°, and is found at Draganeasa, on a vast territory belonging to Prince Cantacuzene, who spares no money in developing the great industry for the benefit of his country."

Baltimoreans are enjoying the legitimate fruits of competition in the gas business, the price of that indispensable article having been reduced to $1 per 1,000 feet to all customers. About twelve years ago the People's Gas Light Company began business in Baltimore, and reduced the price of gas from $3.80 per 1,000 feet to $3. Next came the Consumers' Company with more competition, and rates tumbled to $2 per 1,000, or $1.90 net. Last of all came the Equitable Gas Light Company, and prices have been forced down to $1, at which figure both the Consolidated Gas Light Company and the Equitable are supplying customers. An official of the latter company estimates that the annual consumption of gas in Baltimore amounts to 700,000,000 cubic feet, and on that basis claims that the saving to consumers in the reduction from $1.90 to $1 amounts on the year's business to $630,000. It is added by the official referred to that gas cannot be furnished at $1 and pay a fair profit, considering wear and tear of plant and other items, but a little more than $1 will bring satisfactory revenues to his company. To-day, he said, with the modern appliances, gas at $1.50 or $1.60 will pay as well as $2.50 did a few years ago. This is not news, but it is refreshing to learn that a representative of a gas company will admit it.

On Thursday the Cincinnati *Price-Current* printed its thirty-fourth annual report on pork packing in the west. It states that the total number of hogs packed during the twelve months ended March 1 was 9,342,999, as against 10,551,449 in the preceding year, a decrease of 1,208,450 hogs. The prospect for the coming summer packing is reported to be a gain of about 2 per cent. over the corresponding season last year. This the authority named considers low, and 10 per cent. increase (possibly 25 per cent.) is named as being near the exact situation. Stocks of hog products in the west on March 1 are given as follows: An increase of 33,500 barrels of pork, 33,000,000 pounds of meat, and a decrease of 21,700 tierces of lard, as compared with the like date in 1882. The quantity of pork produced shows an increase of 111,000 barrels, but the yield of lard was 10.01 pounds less per hog. The western winter packing aggregated 6,132,212 hogs against 5,747,760 last year, a gain of 384,452. The average net weight was 213.62 pounds, a gain of 34.06 pounds.

It will be a matter of surprise to many to learn that the rate of increase of foreign population in the United States is excelled by the rate of gain of alien citizens in France. This fact is pointed out by that industrious economist, M. Paul Leroy-Beaulieu, of the Paris *Economiste Français*. In the first half of the present century there was no immigration into France, but in 1857 arrivals of foreigners who came to stay began to be noticed. In 1861 the population of the latter to the whole population was 1.33 per cent., and in 1881 it had grown to 3 per cent. The annual increase is placed at 40,000. It is calculated that at this rate by the close of the century one-quarter of the adult population of France will be foreigners. Germans constitute the bulk of the influx of new blood, strange as it may appear. The causes are said to be abundance of capital, high wages, and the fact that many of the trades are left unoccupied by French men and boys. Verily, this looks as if the victory at Sedan and the withdrawal of the German troops from Paris was a nominal rather than actual surrender of France to the French.

In a report concerning the operations in the Baku petroleum fields, on the Caspian sea, British Consul Lovett writes that the sinking of the wells is accomplished by means of steam engines, most of them of English make. "American experiences," he adds, "hold good throughout the sinking and subsequent operations." Sometimes the wells are "gushers," and pour forth their output in great volume, while others vomit stones, sand, oil, etc. Occasionally the oil and gases take fire, "just as they do in the United States." In one instance alluded to by the consul the flames shot up into the air five hundred feet, and served as a beacon light to ships far out on the waters of the Caspian. The pumping machinery is mostly American, and the largest firm in the business, Nobel & Co., have also adopted the Pennsylvanian pipe system. According to the consul, the American oil has a greater illuminating power in the proportion of five to three. He thinks, however, that the best form of burner for Russian oil has yet to be made, and recommends to the Birmingham lamp manufacturers that they devise a simple, strong and efficient lamp for the Oriental petroleum consumers, to take the place of "the trumpery German lamps," which are selling freely, and at a large profit, in Russia, Central Asia and the Levant. Perhaps American lamp manufacturers can take the hint as well.

The revision of the tariff duties on wines and liquors has called forth an exhaustive review of the wine industry of the country in the San Francisco *Chronicle*. The figures given respecting the imports of wine into the United States from all countries are not a little surprising. The following comprise an abstract of the table published in the journal named:

TOTAL IMPORTATIONS OF WINE.

	In wood.		In bottles.		Total
	Gallons.	Value.	Dozens.	Value.	Value.
1872	9,484,157	$3,290,439	430,691	$2,754,035	$6,044,474
1874	7,899,437	3,156,979	419,422	2,887,109	6,044,088
1875	6,731,593	2,842,622	411,819	2,708,652	5,551,275
1878	3,626,157	1,838,891	295,172	2,123,254	3,962,145
1881	4,370,917	2,744,669	457,257	3,928,087	6,671,756

From the exhibit of wine inported in cask and the values thereof it is evident that the average value of wine so brought into the country in 1872 was 34c. per gallon, and in 1881, 63c. per gallon. From this it is inferred that, while the quantity of foreign wines imported of late years has fallen away considerably, it has greatly improved in quality. This, the *Chronicle* thinks, is due in part to the superior California clarets, which it says have crowded many of the inferior foreign clarets out of the market. The average price of imported bottled wine per dozen in 1872, as indicated above, was $6.40, and in 1881 it had risen to $8.60. The $6,671,756 paid for less foreign wines in 1881 than $6,044,474 purchased in 1872 represents likewise an importation of a very much superior grade of wine. It is a matter of surprise to many, however, to learn that our use of imported wines has fallen away in quantity. In discussing California wines the *Chronicle* recounts with regret the methods by which the eastern dealer mixes it with inferior and cheaper imported wines, enriching the latter thereby, and then sells the compound at retail prices fetched by imported wines. This naturally injures the California wine trade. The extent to which California wines are adulterated and sold in this country may be inferred from the statement of a prominent wine-grower in that state, that during the past year the wine shipments from California were valued at about $3,000,000, of which a very small proportion only was sold in eastern markets in purity. The *Chronicle* further says that while California wines are not equal to the high grade European wines, they are unquestionably superior to the low grade European brands. In proof of this is mentioned (1) their great popular acceptance, (2) the reduction of imports of wine, (3) the gradual abandonment of trade by importers who buy the bulk of their stock in California and sell it as French wine, and (4) the presence in every restaurant in California (except, perhaps, three) of California claret, served and drank as French wine.

In these days of sanitary science and defective water supply to cities the question of reservoirs is an important one. An occasional London correspondent, drawing attention to this subject, says he was recently present at one of the special meetings of an English learned society, when Mr. W. Morris, a civil engineer, read an interesting paper on "Covered Service Reservoirs," in regard to which he emphasized several valuable points. The author alluded to the fact that covered reservoirs were used by the Romans and other ancient people for keeping water cool and pure for potable purposes, and showed that their use was by no means a recent refinement, although they had only lately been introduced in modern waterworks. Covered reservoirs were introduced into London in 1852 for the storage of filtered water. This was rendered the more necessary owing to the London smoke nuisance, which contaminated the water stored in open reservoirs. The objection to uncovered reservoirs was not, however, confined to that named above, but was further emphasized by the rapid growth of vegetable and animal life in service reservoirs, which tended to undo the advantage gained by filtration. It will be remembered that some time ago Mr. Frank Hatton, a young scientist, made some remarkable experiments in regard to the vitality of bacteria. His conclusions, backed by Dr. Frankland, were that spongy iron is the best of all methods of filtration. Some new waterworks are being constructed at Antwerp, Belgium, and the authorities, on the strength of these experiments, have decided to lay down an enormous filtration bed of this material.

THE PATENT LAWS OF FRANCE.

The London *Economist* of March 17 says: "Foreigners may obtain patents in France upon the same terms and in accordance with the same formalities as natives. If, however, the invention is already patented abroad it can only be patented in France by its author, and the French patent will expire with the foreign patent previously obtained. A French patent can only be invalid abroad by a judicial proceeding, there being no power vested in the administration to determine its existence, even for such cause as the non-payment of the annual tax. There are two sets of grounds upon which the tribunals, when properly invoked, may decree the invalidity of a patent: The non-fulfilment of conditions precedent, in which case the patent is "annulled," or the happening of conditions subsequent, in which case the patent is "forfeited." The main grounds of annulment are want of novelty, a subject matter which is non-patentable, or merely theoretic, or contrary to public policy, a fraudulent and misleading title, and an insufficient or unfair specification. Upon the question of novelty the French law differs from the English, and provides that "any invention to which, in France or abroad, before the date of the deposit of the petition, sufficient publicity has been given to enable the same to be worked, shall not be considered as new." The grounds of forfeiture are three: (1) Nonpayment of the annual tax, (2) failure to work the invention in France within two years of the date of the patent, or stoppage of working during two consecutive years, unless explained and justified; (3) the introduction into France by the patentee of objects manufactured abroad and similar to those protected by his patents. It should be observed, with reference to the second of these, that though the patentee is obliged to give some evidence that he has worked and is working the invention, there is nothing to compel him to grant licenses to others upon reasonable terms. The validity of a patent may be attacked either directly in an action for annulment or forfeiture, or indirectly by way of defense to an action for infringement, which is a quasi-criminal proceeding, instituted by the public prosecutor at the request of the injured party, and subjecting the defendant, if convicted, to a fine, and, upon a repetition of the offense, to imprisonment.

WHEAT PRICES FOR A QUARTER OF A CENTURY.

The *Mark Lane Express* extracts the following interesting statistics regarding the price of wheat from 1858 to 1882, inclusive, from a diagram published by Mr. Allnutt of London. The average price per quarter for the past twenty-five years was 50s. 1d. The greatest extreme or range of fluctuation was 25s. 2d. in 1868, and the smallest 6s. 3d. in 1864. The highest annual average in the past twenty-five years was 64s. 5d. in 1867, and the lowest 44s. 3d. in 1864. The highest weekly average was 74s. 7d. on May 9, 1868, and the lowest weekly average 37s. 7d. on February 22, 1879. That of December 24, 1864, was very close to the latter, being 37s. 10d.

YEARLY AVERAGE PRICE OF WHEAT DURING THE LAST TWENTY-FIVE YEARS.

Year.	s.	d.	Year.	s.	d.
1858	44	2	1871	56	8
1859	43	9	1872	57	0
1860	53	3	1873	58	8
1861	55	4	1874	55	9
1862	55	5	1875	45	2
1863	44	9	1876	46	2
1864	40	3	1877	56	9
1865	41	10	1878	46	5
1866	49	11	1879	43	10
1867	64	5	1880	44	4
1868	63	9	1881	45	4
1869	48	2	1882	45	1
1870	46	11			

During the past twenty-five years wheat has been at its highest price for six years—1864, '69, '70, '72, '75 and '82 in August; four years—1859, '68, '77 and '78 in May; and four years—1861, '65, '66 and '76 in December; three years—1858, '62 and '63 in January; and three years—1860, '73 and '81 in September. One year in each of the following five months: 1874 in February; 1880 in April; 1871 in June; 1867 in October, and 1879 in November; and wheat has not been at its highest price in March or July. During the past twenty-five years it has been lowest for six years—1860, '70, '76, '77, '79 and '81 in February; five years—1858, '62, '64, '68 and 69 in December; three years, each in three months in the years, viz.: 1859, '65 and '71 in January; 1866, '72 and '73 in April; and 1863, '78 and '82 in October; two years—1867 and '75 in March, and one year each in July, September and November, 1861, '80 and '74; and, lastly, wheat has not been at its lowest price in May, June or August.

THE NEW ENGLISH BANKRUPTCY BILL.

A memorandum showing the general effect of the changes in the law proposed by the new Bankruptcy bill has been issued by the British Board of Trade. The memorandum bears out the outline of the bill which has already been published. One of the features of the bill is that every debtor against whom a receiving order is made is to be publicly examined in court as to his conduct, dealings and property. The official receiver is to take such part in the examination as the Board of Trade direct; the creditors may also put questions, and the debtor is to be bound to answer all questions which may be properly put to him.

For the acceptance of a composition or arrangement there must be a preliminary resolution by a majority in number and three-fourths in value, and a subsequent confirming resolution by the same majority, which must not be passed until the debtor's public examination is concluded, nor until there has been circulated among the creditors a notice stating the terms of the proposal, and a report of the official receiver thereon.

The Board of Trade are to appoint such registrars of county courts not having bankruptcy jurisdiction, high bailiffs, or other persons, as they think fit to be official receivers of debtors' estates. These receivers are to be attached to each court of bankruptcy, and will be officers of the court, but will act under the general authority of the Board of Trade. The duties of an official receiver are generally:

(1) To protect the interests of the general public by inquiring into, exposing and providing for the punishment of fraudulent and reckless trading or culpable extravagance.

(2) To protect the interests of the creditors at an early stage of the proceedings by obtaining and giving them the information, without which they are helpless, and which experience shows they are unable to obtain for themselves.

(3) To act as interim receiver of the bankrupt's estate pending the appointment of a trustee, and as manager when no special manager is appointed.

Every trustee is to have his accounts audited not less than twice in each year by the Board of Trade.

AMERICAN WHEAT AND ENGLISH MILLING.

Of late the exports of American flour have increased to such an extent that anything calculated to unfold the causes thereof is of interest. The following is taken from a recent address of Mr. John Miller, before the Miller's Society of London: Granted that we have the wheats of every country in the world to choose from, we have not the first choice of the wheats of any country but our own. If there were no variation in quality this might be ground for our disparagement, but they are widely varied; and inasmuch as we have not the first choice we are placed at a great disadvantage. Neither have we the wheats of favored sections of any country to choose from. The major part of what we get from outward sources are those which have been rejected by native millers. For example, we don't get any of the famous hard spring wheats of Dakota, Montana, or Minnesota, vast cultivated territorial sections in the far north of the great American republic. Nor do we get any of that celebrated Scotch wheat grown in the rich alluvial soils in the Red river valleys of northern Minnesota, which alone can produce a surplus nearly equal to half our yearly requirements. No, we must not have these wheats. The 'cute Yankees know the importance of keeping them out of our hands, and have placed an insurmountable barrier between us and them. What do these mammoth edifices at Minneapolis mean? Is this not the great center of American milling enterprise, which says, thus far shall these wheats go, but no farther. It is the flour made from these wheats at Minneapolis and other river-side mills of less stature, but no less importance, which is being poured into our country, captivating the trade of our bakers and placing home manufacture at a discount—not because it is roller-made flour (not 10 per cent. of it is made by rollers), neither is it because it is more scientifically manufactured. It is simply because it is made from wheats possessing a stronger chemical constitution than any we can here obtain to form the basis of our flour. Again, if we investigate the resources of our other potent rival, viz., Hungary, in central Europe, and the mistress of the milling world—this our American cousins will not admit, but we repeat it; for we have it from authenticated sources that the best productions of America are not equal to No. 3 Hungarian. And are we to believe that it is from a pecuniary consideration that they don't produce a higher standard in quality? We don't believe it. The ambition, impetus, and enterprise of the American miller would not stop short of unfurling their banner on the highest pinnacle of Hungarian exquisiteness, were it possible for dollars and science to make the wheat produce the necessary quality. Hungary then is, and will continue to be, the mistress of the milling world, because she has the best wheat in the world.

RUSSIAN PRISONS.

The following is from the *Pall Mall Gazette*: The Russian government has at last somewhat tardily opened its eyes to the fact that it has outgrown its prisons. A very plain-spoken report, which has just been issued by the Administration of Prisons at St. Petersburg, declares that their present condition is deplorable, and announces that the sum of £100,000—a mere bagatelle—has been assigned this year for the extension and improvement of the state prisons. The report declares that the prisons, which afford accommodation for only 76,000 persons, are crowded with at least 100,000, and that five prisoners are crammed into cells designed for one, with results as to morality which can be imagined. The House of Correction at St. Petersburg is pronounced to be in a very unsatisfactory state, and the great "Lithuanian" jail is reported to be in a state of extreme disorganization. The supervision is lax, and as many as 1,352 prisoners escaped in 1881. A frank, outspoken report this, affording a welcome exception to the prevalent vice of official optimism. The enemies or the friends of Russia, however, will say that there is another way of explaining and obviating the difficulty. May it not be that the prisons are too small because their inmates are too many, and instead of enlarging the prisons it might be a better course to enlarge the prisoners?

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS

An easier loan market has come this week, but the benefit to the stock market has scarcely been perceptible. The movement of stocks, to all appearance, has been just about what it would have been had loan rates been as they were last week, and it is rather to be wondered at that the Treasury Department, at the last moment, yielded apparently to the ceaseless importunities of Wall street and ordered prepayment of the bonds embraced in the last call, which mature May 1. The refusal of the Treasury officers to do this was continued long enough to show that the speculative world of Wall street can take care of itself very well when confined to its own resources; nor could it be seen by the average observer that any interest outside of the Stock Exchange suffered by the refusal of the Treasury to come to the aid of the loan market. It may, however, be true that merchants had to pay 10 and 12 per cent. for their loans, the same as the brokers; and if this really could be shown, there is a reasonable excuse for the action finally taken by the Treasury. Prepayment of the bonds at the rate of $5,000,000 per week will begin next Wednesday; meantime, the announcement of the anticipation of the call has its usual moral effect on the street, and call loan rates have declined to as low as 5 per cent., though the average for the week has been about 8 or 9 per cent. This rate hurts no one in speculative circles to any appreciable extent, and we may look for a regular 6 per cent. rate next week. The domestic exchanges show that the flow of money from this center west and south has almost ceased. The movement of breadstuffs and provisions from the west to the seaboard has been very large, as the weekly record of shipments from Chicago indicates; and all the trunk lines have been and are crowded with business. Railroad men have been quite astonished at the magnitude of the movement. Four weeks ago they anticipated a falling off from the record of the previous weeks, because of the approaching opening of navigation, when great quantities of produce are stored at Chicago awaiting the opening of the water routes and their cheap rates of carriage. Instead of this there has been no falling off but an increase, and last week the trunk lines had a larger east-bound tonnage than in any week since that ending the 14th of February of last year, the amount being over 70,000 tons. After navigation opens, however, this will have a great drop; and the decline goes on till July, which is about the close of the crop year. After this, the railroads and boats begin to work on the stuff harvested this year, winter wheat being the first in order. Last year, while the tonnage in one week in February by the railroads rose to over 72,000 tons, in one week in July it sank to only a trifle over 13,000 tons. In consequence of the very large freight movement since the beginning of the year, no question is now made about the Vanderbilt roads having earned their quarter's dividends. It is obvious that they have, and much more as is necessary, seeing that this is their harvest season. The Lake Shore and the New York Central have declared their usual 2 per cent. for the quarter; Michigan Central did not. Hereafter it will be a semi-annual dividend payer. This is stated to be in consequence of its practical consolidation with Canada Southern. It is said that both roads will declare a semi-annual dividend in June next; and the expectation is that it will be at the rate of 6 per cent. per annum. It is argued that Michigan Central would not be selling where it is if it were earning and could pay 8 per cent. Besides, it is well known that the Vanderbilt boys are heavy holders of Canada Southern, and a dividend will have to be paid on that stock to help them out.

Despite the easier loan market and the good railroad earnings the public shows no sign of returning to Wall street. It is all professional work there. Mr. Sage is credited with saying that he thinks it unwise to engage in a bull movement before the grass grows, which means until we can form some idea of what sort of crops we are going to have. Meantime the horse starves; that is to say, the broker, for there is next to no business doing. If the market advances a little to-day it goes back to-morrow, and so it rubs along through the week, keeping wonderfully strong, but with no sign of buyers coming in from the outside. If stocks were not "blocked" in strong hands the market would surely have had a bad break this week from the extraordinary decline in Central Pacific, which on Tuesday fell to 74⅝.

The decline in this stock has been the mystery of the street. It pays 6 per cent. dividends regularly; no bear attack has been made upon it, so far as the average observer could discover; there has been no rumors of defalcations, floating debts or the like to account for the decline; in short, there was nothing said about the stock at all until it dropped to such low figures as to attract general attention, and set all Wall street to speculating on the cause. Obviously the decline was a consequence of extensive unloading of the stock by large holders, and these must have been the "insiders" in the company. President Huntington declared he had not sold a share, did not know of any one in the company who had, and professed indifference to what he called mere stock market fluctuations. Naturally, the street put little faith in this, since it was clear that some one or more tin boxes were being emptied of the stock. The question everybody was trying to find an answer for was, why are these people selling out? It was said at first that the drouth in California was so severe as to threaten destruction of the crops, which would make a most serious inroad on the earnings of the company. But just as this had been accepted as a good reason the telegraph brought news that the rains had come. Thereupon the stock fell lower than ever, as if the sellers had jumped at the opportunity to get out of some more stock. The explanation which the street has had to content itself with, for want of a better, is that the leading men in the Central Pacific Company have put all their resources into the building of the Southern Pacific, which connects San Francisco with New Orleans, and is not a government road, they having built it as their own private enterprise. They have now reached a stage in the building up of that property (the road has only been opened a short time) where it is imperatively necessary to raise a good round sum of money to get it into working order; and they are selling their holdings of Central Pacific to raise that money. It is said that all the business which can possibly be diverted from the Central Pacific will be turned over to the new line, which is practically owned by the Central Pacific magnates; and in due time the government may be permitted to step in and take the latter line for the price of its mortgages on it. This explanation is conceded to be unsatisfactory; but in the absence of a more satisfactory one the street accepts it. The decline in the stock has certainly been a most disagreeable surprise to the street, and will not tend to recommend to the favorable consideration of investors the Southern Pacific securities when they are brought forward in the market. Central Pacific was beginning to be looked upon with favor as an investment stock. This performance will not only do very much to discredit it, but will render both investors and speculators justly shy of having anything to do with other securities backed by the same people. What is generally feared in Wall street is that some disagreeable discovery is going to be made about Central Pacific which will make even 75 look like a high price for the stock. Chicago, Burlington & Quincy, which, it may be remembered, declined rather alarmingly under the pressure of the sale of a block of stock supposed to be from Mr. Vanderbilt, speedily recovered itself; and one day this week made a bound of 3 per cent. on very light transactions, showing that, after all, there can be very little of this stock afloat in the street.

As loan rates have moved downward this week, foreign exchange has gone up, there being less motive for borrowing money in London to use here. Before the rates had gone above the gold-importing point some more gold was withdrawn from the Bank of England for shipment here, but none has been withdrawn since Monday. Posted rates for exchange had risen on Thursday to $4.82 and $4.84½. Actual rates yesterday were about $4.81¼ and $4.84. The Bank of England reserve was again reduced about 2 per cent. during the week, and stands now at 38¼ per cent. of the liabilities. The shipments of gold here caused a lively discussion of future possibilities in that way in the London papers, and, though it is thought that there will be no serious drain of gold to this side, it is asserted that the bank will advance its discount rate—now 3 per cent.—on the first symptoms of such a drain setting in.

The government bond market presents no features calling for comment. The following were the closing quotations yerterday:

	March 22, bid.	—March 30,— bid.	asked.
U. S. 5s extended (3½ p. c.)	103	104	—
U. S. 4½s 1891, registered	112¾	113⅜	113⅝
U. S. coupon	112¾	113¾	113½
U. S. 4s 1907, registered	119⅛	119⅜	119⅝
U. S 4s 1907, coupon	120⅛	120⅜	120⅝

The bank statement of Saturday gave a gleam of encouragement in that it showed a stop had been put to the further depletion of the reserve, and a small gain made of $1,315,800, which decreased the deficit from the 25 per cent. line to $5,455,075, but with this the banks are still $8,793,175 worse off than they were the corresponding week last year. This week we may look for a further improvement, as the statement of last week was undoubtedly made on rising averages. The following are the comparative totals of the statements of March 17 and March 24:

	March 17.	March 24.	Differences.
Loans	$319,672,000	$312,879,100	Dec. $6,792,900
Specie	48,551,900	47,997,400	Dec. 554,500
Legal-tenders	17,081,100	17,025,400	Dec. 55,700
Deposits	289,615,500	281,911,500	Dec. 7,704,000
Circulation	16,607,900	16,356,200	Dec 251,700

The proportion of total reserve to liabilities is now 23.67 per cent. against 26.17 per cent. at the same date in 1882.

By telegraph from Baltimore, Md.: The stock market continues inactive. City stocks were neglected. Virginia consuls declined a fraction. The new 3s were firmer. Marietta and Cincinnati stock was firm, but prices remain unchanged.

By telegraph from Macon, Ga.: There is an active demand for good securities, railroad stock, bond, or real estate, showing extra supply of money ready for investment.

By telegraph from New Orleans, La.: Money easy; financial circles have been very much upset by the refusal of a mandamus to prevent assessment on city bonds. The suit will be carried to the Supreme Court. The action of the court generally considered very unfortunate just now, when every endeavor is being made to build up the city commercially. It is apprehended that much needed capital will be driven away; other values are depressed in sympathy. In response to New York, commercial sterling has advanced 2 per cent.

By telegraph from Halifax, N. S.: Sterling exchange steady, not much offering.

By telegraph from London: There is an active speculation proceeding in Atlantic and Great Western mortgages (now the New York, Pennsylvania and Ohio), in anticipation of the great bondholders' meeting next week, at which the fate of the proposed lease of the road to the Erie will be decided.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S this week from the leading trade centers of the country reveal a continued improvement in the general trade situation. The improvement is not altogether evenly distributed, the uncertainty of the weather and other causes operating to retard trade in particular lines. The cotton market has been dull. Wheat has remained almost unchanged in price during the past week, but exportation has been encouraged by lower ocean freights. Corn has been advanced slightly in the past week by speculation, but the legitimate influences on the market favor lower prices. Provisions have been firmer, in consequence of the manipulation of prominent speculators at Chicago, who are believed to have control of the markets for pork and lard. There are no new features of importance to note in the iron trade. Dullness is conspicuous by its continued presence. There is some little improvement in bar iron. No predictions are hazarded respecting the outlook. There has been considerable excitement on the petroleum exchanges. The Murphy, one of the new ones which has been causing the disturbance, has finally been determined as good for 500 barrels daily. The monthly report of operations in the regions shows a considerable gain in number of new wells completed in March as against February, as well as in new production in the aggregate and on the average per well. This, with the new well named, caused a decline in prices, although the market was sustained better than for a few days past. One broker was unable to meet his contracts, and had 35,000 barrels sold out under the rule. The anthracite coal trade is only fair, the new spring prices not having produced quite the activity expected. There is considerable cutting under the new schedule. Ocean freights rule in shippers' favor, but exports are not large. Wool has been very moderately dealt in by manufacturers, and the market is not so firm, although there is no quotable decline in prices. There were 170 failures in the United States reported during the past week, 26 less than the preceding week, 41 more than the corresponding week of 1882, and 58 more than the same week of 1881.

BREADSTUFFS.

The month of March, up to the 29th, had shown no great changes in the general situation in breadstuffs, either in prices or in the statistical position of supplies. Prices of wheat have declined 3 or 4 cents per bushel, and of corn 5 or 6 cents per bushel since the beginning of the month, in both the American and foreign markets; but this decline was made in the earlier part of the month, and though the foreign markets have been sluggish and rather weak during the past week, there has been no decided change in quotations. The decline earlier in the month was due largely to the fact stated in this article two and three weeks ago, viz.: to the accumulation of a larger surplus than usual of foreign wheat and flour in the United Kingdom, as the result of the unusually heavy imports during the several months previous to March. It was reasonable also to expect that at about this time there would be an increase in the movement of wheat from other foreign exporting countries. The Black Sea ports are now open. A few weeks ago, also, it was understood that the cost of rail transportation for wheat from the interior of India to the ports was to be reduced so as to encourage the export of the remaining surplus in that country. It is probably in some measure the expectation that this would be the case that led to the erroneous report that the amount of wheat on passage for the continent and the United Kingdom had been very largely increased this week. Upon investigation we find that the actual increase in the amount of wheat and flour afloat is only 25,000 quarters, or equal to 200,000 bushels of wheat over last week.

The general unfavorable prospect in the United Kingdom and western Europe for the next crop of wheat has not been materially improved. From the middle of February up to the middle of the current week the weather throughout Great Britain and northern Europe has been unfavorable for field work, and no improvement had been made either in the area planted or in the condition of the autumn-sown wheats. In France and Austro-Hungary there has been better weather and farm work has progressed with great activity. But, as far as can yet be foreseen, there is not sufficient warrant for expecting an average crop of wheat in western Europe, while in the United Kingdom there is no doubt that the deficiency in the crop will be as great as at any time heretofore estimated, and, notwithstanding the increased movement of grain from other exporting countries, there is reason to believe that the remaining supplies of American wheat from last year's crop will be taken at near present prices to an extent that will leave the United States with no unusual surplus to carry over into the next crop year.

The London *Miller* of the 19th, however, says that a recent short spell of spring weather was of much service to farmers, and that the northerly winds and frosts have dried up the fields just in time to sow barley, oats and peas, but that this will not make much difference in regard to wheat, as British farmers will now rather give their lands to other crops than risk the spring sowing of wheat.

Cables of the 28th and 29th from London say that the frost continues. The growing cereal crops on light uplands look well, but in the low-lying lands, which have been repeatedly under water, the wheat plant has perished and many fields will be plowed up.

As for the crop prospects in the United States, it is rather early yet to begin to form conclusions, but in general it may be said that the autumn-sown wheat in the usual winter wheat raising states has undoubtedly been damaged to a very considerable extent by the alternations of freezing and thawing. But on the other hand it is certain that the area to be planted in spring wheat in Minnesota, Dakota, and all that part of the northwest, will be greatly increased over last year. There was a larger immigration into that country last summer than ever before, and it is well known that the immigrants made unusual preparations by plowing last autumn to raise a crop of wheat in the coming summer, because wheat is the crop that gives the new settlers the quickest return in money.

AMERICAN WHEAT MARKETS.

During the past week the wheat markets have been largely influenced by reports of the condition of the coming American crop. Considerable injury has, undoubtedly, been done to the plant in Indiana, Tennessee and certain portions of Illinois by the unfavorable weather of the past month, but it will be some days yet before the extent of the injury can be definitely ascertained. In California, up to Monday last, very little rain had fallen since the sowing of the crop, and the situation in that state was deemed extremely critical; but heavy rains on Monday night and during the day on Tuesday have relieved the anxiety, and the prospect is now more favorable for an average crop in that state, particularly as the acreage has been considerably increased. With this uncertainty in regard to the crops, business to some extent has been held in abeyance, and the fluctuations have been frequent, though not large. The movement of wheat at the west has been decreasing, and farmers, having comparatively little old wheat in reserve, are generally holding until they can judge better what the coming crop is likely to be.

The aggregate receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis for the week ending March 23 were 700,763 bushels, against 950,601 bushels the previous week.

The export of wheat during the week ending March 24 shows an increase of flour and wheat amounting to about 310,000 bushels over the previous week. Lower ocean freights have encouraged exportation more than the state of the foreign markets, which have been inactive.

The course of the markets may be seen by the following closing prices for April wheat in the New York and Chicago markets at the dates mentioned. New York 2 p.m. March 24th, $1.19¼; 26th, $1.18⅝; 27th, $1.18⅝; 28th, $1.19¼; 29th, $1.19½; 30th, $1.19¾. Chicago March 24th at 1 p.m. April wheat $1.05⅝; 26th, $1.04⅞; 27th, $1.04¾; 28th, $1.05¼; 29th, $1.05⅜; 30th, $1.05⅞.

The visible supply of wheat in the United States and Canada (east of the Pacific slope) for the week ending March 24 shows an increase of 610,348 bushels, as compared with the previous week.

A subscriber at Minneapolis asks why we do not include Minneapolis in the weekly reports of receipts of wheat and flour at the principal western points, to which we would reply that the first reason is that the receipts at Minneapolis are not regularly reported each day to New York as they are from other points; and second, that if we should include the receipts at Minneapolis it would, to a very considerable extent, be duplicating the same grain and flour received at Chicago. We have, however, referred to the fact that a revolution is in progress in the manner of marketing the wheat crop of the northwest, and that the grain now goes more and more largely each year to Minneapolis to be manufactured into flour, in which form it goes at a diminished percentage of cost for freight to the seaboard.

CORN.

An unsettled feeling has pervaded the markets the past week, and prices have fluctuated considerably whenever large speculative orders to buy or to sell have been placed in the markets. The receipts at the principal western points have been larger than generally expected, and the demand for cash corn for home consumption and for export has decreased.

The total arrivals at Chicago, Milwaukee, St. Louis, Detroit, Toledo, Indianapolis and Peoria, for the week ending March 23, were 2,629,481 bushels, against 3,093,733 the previous week.

The official statement of the visible supply of corn on March 24 shows an increase of 1,671,562 bushels over the previous week, the bulk of which remains at St. Louis and Chicago.

The following serves to show the course of the New York and Chicago markets at the dates indicated: New York, March 24, 2 p.m., May corn, 66⅝c.; 26th, 66¼c.; 27th, 66¾c.; 28th, 67⅝c.; 29th, 67⅝c.; 30th, 67⅞c. Chicago, March 24, 1 p. m., May corn, 56⅛c.; 26th, 55⅝c.; 27th, 56¼c.; 28th, 57½c.; 29th, 56¾c.; 30th, 57¼c.

The movement of oats the past week show a considerable decrease from the past few weeks, and prices have been advanced about 2c. per bushel. They are largely in the hands of Peoria parties, who it is understood are backed by a strong New York house. Higher prices are anticipated, as the deal is likely to be manipulated.

PROVISIONS.

There has been only a moderate business transacted in provisions the past week, and the changes in prices are within a comparatively narrow range. There has been some demand for export but not as much as during the two or three previous weeks. The stocks of pork and lard seem to be concentrated in the hands of a few parties, who are anticipating higher prices in view of the present and prospective light receipts of hogs at Chicago and other western points. Hogs are selling relatively higher than the manufactured product, and it seems certain that hogs must decline or provisions advance before long. Armour is credited with being largely long on pork and meats, and McGeoch long on lard.

The aggregate receipts of hogs at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee, for the week ending March 29, amount to 102,918, as against 111,354 last week, and 191,361 for the corresponding week last year.

The thirty-fourth annual report of the pork packing in the west, by the Cincinnati *Price Current* of March 29, shows the western packing for the past winter to have been 6,132,212 hogs, against 5,747,760 last year, an increase of 384,452; average net weight, 213 62/100 pounds per hog. The yield of lard shows a decrease of 10 1/100 pounds per hog. The pork produced shows an increase of 111,000 barrels. The stock product in the west on March 1 showed an increase of 33,500 barrels of pork and 33,000,000 pounds of meat, and a decrease of 21,700 tierces of lard, as compared with the corresponding date last year. The total number of hogs packed in the west for twelve months is 9,342,999, against 10,551,449 in the preceding year. Concerning the prospect for the summer packing reports received indicate an average increase of 2 per cent., but the *Price Current* thinks it is an underestimate, and that 10 per cent. increase may be expected, and possibly 25 per cent.

The exports of provisions from the seven principal Atlantic ports for the week ending March 24 were as follows:

	Pork, barrels.	*Meats, pounds.*	*Lard, pounds.*
New York	3,621	4,790,481	2,174,608
Boston	607	1,187,406	39,352
Montreal	..	....	....
Philadelphia	..	1,000,100	32,800
New Orleans	25	1,450	330
Baltimore	160	54,500	127,395
Portland	234	454,000	17,160
Totals	4,647	8,287,837	2,391,585

The visible supply of grain in the United States and Canada, March 24, 1883, as compared with the periods indicated below, was as follows:

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*	*Barley, bushels.*	*Rye, bushels*
Mar. 24, 1883.	22,856,581	16,593,451	4,545,289	1,824,368	1,917,546
Mar. 17, 1883.	23,466,927	14,971,889	4,571,224	1,891,011	1,874,612
Mar. 25, 1883.	12,562,355	10,414,982	1,759,102	1,237,282	1,041,599
Mar. 26, 1881.	21,413,146	14,295,889	3,384,643	2,139,201	522,435

THE PROVISIONS MARKETS BY TELEGRAPH.

From Cincinnati, Ohio: In provisions buyers ask concessions, and holders are indifferent about selling. The stocks on hand appear light for the season.

From Chicago, Ill.: Pork and lard active and firm caused by demand from shorts, bears fearing squeeze from bull combination, which is credited with owning the stocks here. Small receipts hogs also help sustain prices, but market for all provisions shows little strength or merit.

From Louisville, Ky.: The live stock interests are flourishing, and offerings are selling readily at high prices. The provisions market is quiet and stationary.

From St. Louis, Mo.: Provisions are booming at last with sharp daily advances. Cattle values keep high with supples smaller than formerly. Hog market dull with light receipts, and prices breaking down.

From Kansas City, Mo.: Provisions still continue quiet; demand for packing house products only fair; prices steady; commission trade quiet. Hogs active and in good demand; prices firm.

From Des Moines, Iowa: The provisions market is quiet with no special features to note.

From Davenport, Iowa: The provisions market is steady.

From Lawrence, Kan.: There is but very little doing in the provisions market.

From Wilmington, N. C.: The provisions market is well stocked. A quiet, steady tone prevails.

From Atlanta, Ga.: There is a marked falling off in sales of provisions, accounted for by the stock already in the country.

From Macon, Ga.: The provisions market is dull, which is thought to be an indication that farmers were not in want of supplies.

From New Orleans, La.: Provisions tumbled two points Wednesday from previous sales. The market has recovered slightly since.

From Memphis, Tenn.: The meat market is unsettled and the supply liberal; stock dealers report receipts of cattle light; prices on all grades have advanced fully ½c.

From Nashville, Tenn.: Provisions are in good demand at firm prices. Cattle receipts for the week light, with a fair demand. Prices are lower.

THE NEW YORK DRY GOODS MARKET.

Business for the week is reported rather quiet, though a firm feeling prevails. The weather is backward for retailers, and this necessarily reacts on the jobbing and commission houses; with warm weather improved business is anticipated. Stocks in the hands of retailers and jobbers alike are lighter than usual at this season, and a brisk distribution is expected when the spring retail trade thoroughly opens.

The cloth trade was somewhat demoralized this week by the unexpected failure of a prominent jobbing firm, who enjoyed the highest confidence of the importing woolen houses. The cause is attributed to a complication of adverse circumstances—too much expense in selling goods, heavy rent, small profits, and strong competition.

A number of prominent importers are agitating the question of long open accounts and the growing evil of dating ahead. Several meetings have been held at the German Club, and various opinions were advanced as to the best method to stop or at least curb the pernicious practice; nothing definite has been arrived at, however.

Following is a summary of the importations and marketings of dry goods for the past week:

	No. of packages.	*Value*
Total imports of dry goods for past week	38,652	$2,775,285
Total amount of dry goods, duty paid, for past week	23,338	2,730,197

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, March 30.—There is no sign of improvement in the Manchester cotton trade. Prices are weak and business is small in both yarns and cloths.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: There has been a decided improvement in the dry goods market, with considerable animation and a better tone.

From Boston, Mass.: The dry goods trade shows an improved condition, and the New England trade shows some signs of life. In men's woolens the trade is quiet, but in staples, dress goods, silks, hosiery, etc., there is a steady demand. Collections are fair. There is a general complaint that the tendency is toward longer credits.

From Providence, R. I.: The print cloth market is quiet and steady, the amount of sales being light; 64s are quoted at 3⅝c., and 56x60s at 3 1/16c. There are about 125,000 pieces on hand. The cotton market is very dull, the amount of sales being small; middling uplands are worth 10½c. and middling gulfs 10¾c.; the stock on hand is light.

From Rochester, N. Y.: Jobbers in dry goods say trade is exceptionally brisk for the season, though collections are hardly up to the standard.

From Troy, N. Y.: The dry goods trade is said to be as good as usual.

From Philadelphia, Pa.: The order trade has been fairly active, but personal selections have been comparatively light. The near-by trade is retarded by the backward season. The market is steady for best productions in both cotton and woolen textures. There is not the least tendency to speculation in any branch of the trade.

From Pittsburgh, Pa. Dry goods are in moderate demand.

From Cincinnati, Ohio: There has been a little increase in the dry goods trade, principally from southern buyers.

From Cleveland, Ohio: The dry goods trade is about as previously reported throughout the month, and continues satisfactory for the season.

From Columbus, Ohio: The unsettled weather has depressed the dry goods markets considerably, and business is not up to last week and does not compare favorable with corresponding week of last year. The slowness will be only temporary, and spring trade will soon begin. Collections very fair.

From Dayton, Ohio: The dry goods trade is dull. Collections are extremely hard to make.

From Toledo, Ohio: Trade in dry goods shows more activity than was anticipated a short time ago.

From Indianapolis, Ind.: The dry goods trade is only fair, but with better weather an increased activity is anticipated.

From Chicago, Ill.: Merchants report collections better. Dry goods, millinery, furnishing and fancy goods unusually active. All sections are largely represented by buyers. Country retailers report good trade.

From Peoria, Ill.: In dry goods trade seems to be active, with good sales and fair collections.

From Detroit, Mich.: In dry goods a fair amount of business is being done, but the market is not as active as is looked for when the weather moderates.

From Louisville, Ky.: The dry goods market shows a well sustained jobbing order demand, and an excellent season's business is in progress.

From St. Louis, Mo.: The dry goods market shows more activity just now than any other jobbing line. Prices are firmly maintained but not advancing.

From Kansas City, Mo.: The dry goods trade is an exception to the general dullness. Sales reported quite heavy and trade well sustained.

From Davenport, Iowa: The dry goods trade is light, with but few buyers from country towns.

From Des Moines, Iowa: The retail dry goods trade is very dull, as a consequence of the cold, cloudy weather.

From Lawrence, Kan.: Dry goods merchants are buying very carefully for spring trade.

From Lincoln, Neb.: There is a good demand for dry goods among retail merchants, in anticipation of a good spring trade.

From San Francisco, Cal.: The dry goods trade is firm, with a better tone prevailing.

From Baltimore, Md.: In the dry goods market sales were larger than the previous week, and a good feeling prevails. Retailers expect a brisk spring trade in a few weeks and buy with more confidence. Prices remain steady.

From Richmond, Va.: No activity is felt in dry goods. There is no material change anticipated until spring weather sets in.

From Norfolk, Va.: Dry goods jobbers are doing only a moderate business.

From Wilmington, N. C.: The dry goods jobbing trade is more active, but the retail trade is dull.

From Atlanta, Ga.: Sales in dry goods 50 per cent. more for March than same month last year.

From Savannah, Ga.: Trade in dry goods has fallen off, and the retail merchants are not as brisk as usual. There are but few country merchants in town, and sales are made through drummers' orders.

From Macon, Ga.: The dry goods jobbing trade is somewhat active, while retailing shows a quickening pulse, owing to delayed but now fast approaching spring weather.

From Montgomery, Ala.: The demand is good for all classes of dry goods.

From Dallas, Tex.: Trade for the past week in dry goods has been fair.

From Galveston, Tex.: The condition of the dry goods trade has been only fair during the past week.

From Marshall, Tex.: The dry goods trade is reported brisk.

From Memphis, Tenn.: In dry goods sales during the past week increased over the amount of the previous week.

From Nashville, Tenn.: The wholesale dry goods market has been very steady.

From Halifax, N. S.: In dry goods the feeling of improvement is very noticeable, and collections have been reasonably fair for the season.

COTTON.

The New York cotton market has been lower, the prices having declined to 10 1/16c. for spot middling uplands. The sales for the week have been for export 487 bales, for consumption 2,698, and for speculation 50 bales. Included in the above are 250 bales to arrive. The deliveries on contract amount to 2,600 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7⅜c.	7 7-16c.	9 7-16c.
Strict ordinary	7 13-16	7⅞	10
Good ordinary	8⅝	8 11-16	10 13-16
Low middling	9 9-16	9⅝	11 11-16
Middling	10 1-16	10⅛	12⅛
Good middling	10½	10 9-16	12½
Middling fair	11¼	11 5-16	13¼
Fair	12	12 1-16	14

The market for spot cotton closed quiet.

The future market at New York has been lower, the price having declined an average of 12 points for near months, and 13 points for later months. The sales for the week foot up 542,000 bales.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
March	10.00	10.09c.	—
April	10.00	10.14	12.05
May	10.16	10.20	12.20
June	10.29	10.43	12.35
July	10.41	10.55	12.49
August	10.52	10.66	12 63
September	10.28	10.39	12 05
October	10.02	10.15	11.62

The future market at New York closed weak.

The southern markets during the week past have been dull and quiet. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	5,129	9¾	11⅞
New Orleans	29,750	9 9-16	12
Mobile	2,500	9½	11⅞
Savannah	4,650	9 9-16	11⅜
Charleston	3,000	10	12

The total receipts of cotton at the ports since September 1 are 5,319,755 bales, an increase of 1,067,966 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	738,035	302,929
New Orleans	1,489,822	1,118,482
Mobile	298,378	245,134
Savannah	758,797	660,129
Charleston	539 533	471,862
Wilmington	124,104	120,132
Norfolk	713,358	564,569
Baltimore	50,087	24,896
New York	137,988	151,625
Boston	147,991	188,717
Philadelphia	60,487	47,893

The receipts at the ports for the week were 86,877 bales, against 99,285 last week and 53,875 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 28,379 bales, against 33,215 bales last week and 15,126 bales for the corresponding week last year. The shipments for the week were 39,649 bales, against 46,125 bales last week and 33,773 bales for the corresponding week last year. The stocks for the week were 242,678 bales, against 255,798 last week and 212,470 for the same week last year.

At Liverpool the spot market is reported dull and easy, with lower quotations, the price for middling uplands having declined to 5 9-16d., and for middling Orleans to 5⅝d.

The sales for the week at Liverpool were 34,500 bales (of which 23,500 were American), against 63,000 (of which 42,000 were American) last year. The sales for export were 3,300 bales, against 7,900 bales last year. The sales for speculation were 1,530 bales, against 1,970 bales last year. The amount forwarded was 16,500 bales, against 13,500 bales last year. The stock in port is 955,000 bales (of which 685,000 are American), against 814,000 bales (of which 551,000 were American) last year. The total imports for the week were 74,000 bales (of which 53,000 were American), against 112,000 bales (of which 60,000 were American) last year, and the amount afloat 363,000 bales (of which 240,000 are American), against 413,000 bales (of which 201,000 were American) last year.

The Liverpool future market has been dull and barely steady, prices having ruled a trifle lower. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery, as compared with last week:

	To-day.	*Last week.*	*Last year.*
March	5 36-64d.	5 36-64d.	6 41-64d.
March—April	5 36-64	5 36-64	6 40-64
April—May	5 37-64	5 38-64	6 39-64
May—June	5 39-64	5 41-64	6 44-64
June—July	5 43-64	5 45-64	6 49-64
July—August	5 49-64	5 49-64	6 54-64
August—September	5 48-64	5 51-64	6 58-64

The Manchester market closed dull and tending down.

COTTON REPORTS BY TELEGRAPH.

From New Orleans, La.: Monday spots declined one-sixteenth on low middling to middling fair, but last two days became steady, with large sales at a falling off. Futures also dropped nine to sixteen points Monday, ruled lower Tuesday, and subsequently became steadier, closing steady and only five to eleven points lower than on Thursday. Movement of futures large first three days; to-day small. Bears still very bearish, and looking for lower prices, but taking spots freely, whether to remain bear or turn bull is the question mooted. Bulls encouraged by lessening port receipts and smaller stocks this year's large crop, compared with larger stocks last year's smaller crop, as well as improved spot business during past few days.

From Dallas, Tex.: Cotton dull; receipts light; middlings 9⅛c.

WOOL.

The seaboard wool markets have exhibited very little activity during the past week. Manufacturers' purchases have been mostly in small lots proportioned to the nearest wants of the looms, and there has been no tendency to speculation among dealers. The present condition of the goods market discourages free buying of raw material. There is general complaint that values are low and profit margins are small. The distribution in most lines is represented as backward. A good many of the worsted mills are sold ahead and production is well under the control of orders in a few popular makes of medium all-wool goods, but demand, as a rule, has not developed satisfactory proportions and there is a disposition on the part of manufacturers to move cautiously. The carpet yarn trade is much depressed, and this unfavorably affects the market for carpet wools. The supplies of wool are moderate, however, and while there is no denying the fact that liberal concessions would have to be made to influence large sales, dealers are generally holding with confidence in the belief that consumptive requirements will be sufficient to clean up the bulk of the remaining stocks of last year's clip before the yield of 1883 comes on the market.

IRON.

There is no improvement to mention as yet in the general condition of the iron market. Pig continues lifeless. It is reported that a number of furnaces are piling their output. The mills are bare of stock and buy only for immediate wants. Few, if any, members of the trade will venture to suggest an explanation of the unexpected continuance of stagnation. Prices for No. 1 and No. 2 foundry remain as last quoted, $24 and $22 respectively. Scotch pig here is very dull. Prices are practically unchanged. Where concessions are made it is generally to avoid the necessity of storing. The arrivals during the week will aggregate about 1,000 tons of various brands, part of which will be stored. The sales will probably not exceed 600 tons. There is some small improvement in the demand for refined bar iron in small lots. Inquiries for the same are also reported more numerous. Prices are as last mentioned. There is no special change to note in other lines. The reported starting up of the large steel-rail mill at Scranton, which is to employ 1,000 hands, does not bespeak serious depression in rails. From current advices it appears that the Pittsburgh furnacemen are enjoying more trade than those elsewhere. Of the outlook in iron no one cares to predict and nothing appears to suggest itself.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, March 30.—Shipments of northern pig iron have been reduced. Rails are dull, 95s. per ton being asked at the works. Advices from the continent are adverse.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Trade is quiet, but prices are generally steady. Demand does not develop as actively as expected, but consumers hold small stocks, and there is strong probability of improving trade in the near future. There is more activity in construction iron. Steel rails are steady. Nails are active. Finished iron rules dull. Old material is slow of sale.

From Pittsburgh, Pa.: The iron trade remains in about the same condition as was stated last week. There is a fair inquiry; prices are unsatisfactory. There is a moderately fair demand for nails.

From Cincinnati, Ohio: The iron market is without much life; there appears to be some demand in pig, however, for future delivery, and a fair demand only for manufactured.

From Cleveland, Ohio: The actual present condition of the iron market is practically unchanged. There is more inquiry for pig than during the early part of March, but prices are low and unchanged. Holders, however, who are not forced to realize are firm, and concessions from market rates are exceptional only, and the feeling regarding the future is more buoyant. The Republic Company having fixed its price at $8 indicates a better season for other ores than was predicted in the winter, and though the present market is dull, a fair season is hoped for.

From Chicago, Ill.: Hardware very active. Pig iron in fair request from mills and foundries; prices steady. Bar and angle iron more active. Nails moving freely. Steel rails are in fair request.

From Detroit, Mich.: In iron the outlook is brighter. The demand has increased somewhat and prices are firm.

From Louisville, Ky.: The demand for merchant bar and sheet iron has perceptibly increased, and the tone of the market is healthier. Mills are holding bar firm at former quotations. Light sheet iron has advanced $2 per ton. Nails weak and lower, but demand good. Stocks of iron and nails are very moderate. Boiler plate is more active than heretofore. Pig iron weak and dull. Hardware continues active, though prices are much demoralized. Foundries, machine shops and agricultural implement manufactories are doing a satisfactory business.

From St. Louis, Mo.: The iron trade is only fairly good, though increased inquiries denote an improved volume near at hand. In manufactured iron and American steel some reductions have occurred. The iron movement is slightly improved, but values are weak.

COAL.

The anthracite coal trade, while being generally characterized as fair, is undoubtedly less active than was expected after the announcement of the spring circular. The heavy purchases by dealers were unquestionably expected promptly on the publication of the schedule of prices, but, with few exceptions, have not been recorded. It is further commented on that the new circular rates are made merely a basis upon which to make prices, and the statement is made that sales thus far made have been at a discount of from 10 to 15 cents per ton from the schedule. There is considerable discussion respecting the number of days per month in which to stop work at the mines during the near-by months, but it is not learned that any final action has been taken in reference thereto. Under the influence of favorable rates, the eastern coal trade continues fairly active. The published output of anthracite coal from January 1 to the close of last week was 4,492,570 tons, a gain of 411,160 tons as compared with a like period in 1881. For that week the production was 450,823 tons, an increase of 58,948 tons in the like week of last year.

PETROLEUM.

The course of the speculative petroleum market during the week justified the calculation made respecting it in BRADSTREET'S on Saturday last. It was pointed out that the statistical position of the crude product favored the bulls on 'change, from which it was fair to presume that the bears would bestir themselves and find a way to put prices down. They did find a way and prices were lowered. The scene of exploitation has been moved to the vicinity of Balltown. Several new wells have been drilling in that locality, and although the region has been thoroughly drilled and for a time has been considered "dusty," the trade are sensitive to the confident efforts of new well owners, and evidently unprepared to sustain an effort to advance quotations. On Saturday the tight money market still exercised a depressing influence, through high carrying rates. On Monday a decline of 3⅛c. was recorded, owing to the bearish nature of the news

received from the new wells in the locality referred to. The market was active and, as was to be expected, owing to the varying intelligence received, prices fluctuated considerably. The market closed a shade higher on Tuesday, and the transactions were only fairly liberal. On Wednesday the closing price was only a trifle below that of the day preceding. The bull news that a well had come in dry and defined the western edge of the Reno belt was offset by the very bearish statements made respecting the Porcupine territory. On Thursday the dealers in certificates of crude were treated to a well-developed repetition of "manipulation" of oil-well news, the like of which has been repeatedly referred to in these columns. The market broke and recovered correspondingly; the day's trading was large and the brokers very much excited. In fact, telegraph advices from the various petroleum exchanges class Thursday as one "rarely equaled and never excelled" with respect to the exciting scenes taking place. The fluctuations in prices were wide and rapid. The excitement turned largely on news concerning the Murphy well. Prices closed at noon at Pittsburgh at 95¾c., with speculators in a waiting attitude. At 2 o'clock word was received that the well had made a "big showing." This depressed prices ultimately to 94¼c. About 3 P. M. the well was reported "dry," and with a rush the bulls carried prices up to $1. One account says 1,000,000 barrels of oil changed hands at this juncture. Shortly after, the dispatch was contradicted, and a desperate war of prices resulted in quotations being forced back to 97c. As if this whipsawing had not gone far enough, still another telegram was received which contradicted the previous one. This permitted a recovery, and a higher figure was again in order. On Friday the Murphy well was definitely reported to be flowing at the rate of about 500 barrels daily. The oil market opened at 96c., a noticeable falling away from the closing figure on Thursday. During the morning session there were several conspicuous fluctuations in prices. The March report of operations in the oil regions, as telegraphed yesterday, is as follows:

	End March.	*End Feb.*
Number wells completed	146	131
Number wells drilling	211	150
Number rigs up and building	203	153
New production daily, of number of wells reported completed, barrels	4,330	1,994
Average daily production per well, barrels	29 2-3	15 1-5

This, it will be observed, records a marked increase in exploitation during the past month. Prices of certificates of crude closed yesterday at 94½c., as against $1.02⅞ on Friday night of last week, a loss of 8⅜c.

The movement of prices of certificates of crude oil at New York, during the week ending last evening, was as follows:

PRICES OF CERTIFICATES OF CRUDE.

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	100	100	97⅛	98⅛
Monday	98¼	98¼	94⅜	95
Tuesday	95	95⅞	93⅜	95¼
Wednesday	95¼	97⅞	94½	95
Thursday	94¾	99¾	94¼	98⅜
Friday	96	97¾	94⅜	94½

The market for refined oil was dull on Saturday and Monday, foreign buyers not doing any business worth speaking of. On Tuesday the decline in prices created some demand and prices were advanced ⅛c. all round, Abel test 70° going to 8⅜c., and 110° to 8½c. The demand for crude has not been noticeable, and on Tuesday quotations dropped ⅛c. to 7⅛@7⅝c. The quotations on Friday, as compared with the same on Friday evening of last week, are as follows:

	March 22.	*March 30.*
Certificates of crude	102⅞c.	94½
Refined petroleum, 110°	8½	8¼
Refined petroleum, 70°	8⅜	8⅛
Crude, in barrels	7¼@ 7¾	7⅛@ 7⅜
Case oil, plain brands	11	11
Naphtha	6¾	6¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to March 24 was 119,030,449 gallons, against 113,731,215 gallons in a like period of 1882, an increased exportation in favor of 1883 of 5,299,234 gallons, against an increase of 6,540,349 gallons reported up to March 17. For the week ending March 24 the foreign shipments were 11,021,717 gallons, against 11,011,251 gallons in the preceding week. New York city's exports of petroleum from January 1 to March 24 amounted to 102,635,578 gallons (leaving but 16,394,871 gallons for all other ports), against 95,548,796 gallons in a like period in 1882.

OCEAN FREIGHTS.

The week in this line has been very dull. There has been only a moderate inquiry for charters for petroleum, and that mostly during the latter part of the week. Rates in this line, as well as in others, have leaned rather in shippers' favor. Some grain has gone abroad per steamer; but the demand from abroad has been generally restricted, owing to the intervention of the Easter holidays.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Groceries are quite active, and there is more vigor in all kinds of business. Machine shops are fully employed. Lumbering interests show a prosperous outlook, but streams are still low. A large fleet of fishermen are fitting out this season.

From Boston, Mass.: In boots and shoes it is "between seasons," and but little is doing, and the manufacturers, with the exception of a few, are preparing for the coming season. Shipments for the week to places outside of New England 54,443 cases, against 49,656 cases the thirteenth week in 1882. Total shipments since January 1, 686,053 cases, against 624,035 cases same time last year.

MIDDLE STATES.

From Rochester, N. Y.: In the clothing trade the fall season was not satisfactory, considerable quantities of goods being carried over. Generally light stocks were made up for the spring trade, which are now being disposed of satisfactorily. With the advent of warmer weather a sharp demand is anticipated. Jobbing grocers report trade and collections good. In some lines of trade we hear a general complaint of dull trade and slow collections.

From Albany, N. Y.: The continuance of cold weather and closed navigation has greatly retarded all kinds of business here. The volume of sales in all departments of trade is much behind corresponding date last year. The roads leading here from the surrounding country make it difficult to forward, and our merchants are awaiting the opening of the river and the return of spring weather for a resumption of activity.

From Troy, N. Y.: The outlook for all lines of trade is somewhat better than it was at the opening of the year. The dullness of the past three or four months is gradually becoming less noticeable, and dealers in general speak more encouragingly.

From Philadelphia, Pa.: There has been a little more activity in general trade circles during the past week. Jobbers as a rule are getting more orders, but buyers are conservative and rarely handle large lines, preferring the frequent duplication of orders to the accumulation of stocks in advance of need. There is no improvement in the textile manufacturing situation. A good many mills are idle or running on part time. The carpet-yarn trade is very quiet, and values rule low and unremunerative. The building trades are more active and look forward to a very busy season. The produce markets are generally moderately active. Southern vegetables are now coming forward freely, but sales are hardly satisfactory as yet, owing to the cold weather. The grain trade has been more active. Exporters have been buying corn with more freedom, and speculation has been unusually spirited, resulting in a recovery of 2@3c. per bushel from the recent decline. Shippers have had few orders for wheat, and option trading has been light and rather cautious pending a clearer discernment of the crop prospects. Flour has ruled dull and weak. Petroleum has been in fair export demand, but prices for refined have been irregular, in sympathy with crude. The market closes firm.

WESTERN STATES.

From Cincinnati, Ohio: Possibly owing to backwardness of the season and warmth of local politics, we have reached the close of the first month of spring without experiencing the usual volume of trade incident to this season of the year. Sluggishness and inactivity prevail in all lines of general trade. Whisky has declined to $1.12, and closes steady with fair sales at those prices. The wool market is exceedingly dull. The volume of tobacco trade is markedly less and prices lower. The inspection-bill still occupies the minds of the warehousemen, several of whom are at Columbus in attendance upon our legislators. There is but little increase in the demand for flour, and the market is regaining a healthy tone. Grain has advanced under light receipts and a fair consumptive demand. Receipts of wheat for the week are a little over half as much as for last week. The cotton market is unusually dull.

From Cleveland, Ohio: The volume of trade for March in most jobbing lines is behind last year, though throughout the week general business has been good. Staple groceries continue in good demand, and in hardware trade has been fairly brisk. An active building season is looked for, and lumber is in good present demand. Manufacturing concerns are generally busy, and the general outlook is regarded as a favorable one. Country collections are a little slow, and the money market is active.

From Toledo, Ohio: Trade in boots, shoes and hardware shows more activity than was anticipated a short time ago. Collections are slow, and money close.

From Indianapolis, Ind.: Trade during the past week has been rather dull in all lines, the weather being very unfavorable, cold and wet. Country roads are in a bad condition. Trade for March has been somewhat of a disappointment and quite unsatisfactory, but merchants live in hopes of better business the coming month. Collections are fair.

From Evansville, Ind.: The weather for the past week has been very rainy and bad. Trade has been light and collections close. Wheat is strong and but little on the market, none being shipped, as millers consume it all.

From Chicago, Ill.: Groceries jobbing freely. Sugars scarce. Linseed oils active and advancing; stocks moderate and rapidly diminishing. Wheat mainly governed by local influences, prices being mainly supported by cold weather and demand to cover shorts. Corn fluctuates with wheat, and the market is destitute of strength; statistical position weak; large percentage of stock No. 2. Clothing, hats, boots and shoes selling freely.

From Peoria, Ill.: The general tone of trade, exclusive of a few lines—agricultural implements, hardware, etc., is quiet, owing to unsettled weather.

From Louisville, Ky.: The weather through March has remained too cold to develop the wheat plant, which appears to lack vitality and is not promising. A small percentage of winter wheat fields are being plowed up, but the acreage is about a full average. Jobbers report a continued liberal distributive movement in staple merchandise, with fair values and tolerably satisfactory collections. Flour steady and in fair shipping inquiry. There is a heavy supply of potatoes and prices are lower. Hides weak. Wool steady and quiet. Grain dull—restricted to local trade in absence of demand from distillers and the south. Cotton dull; fair inquiry at easier rates; receipts continue good, but of poor grades. Leaf tobacco receipts continue very light, and market consequently firm and active; prices remain high on all grades; during the week there has been an advance of 1@2c. on best manufacturing grades, 2c. on medium grades and 1c. on common grades; character of offerings generally common; demand for good tobacco exceeds the supply. Whisky has a well-supported and increasing consumptive demand. The market for round lots is dull but steady; some speculative inquiry is developing, and there is a growing belief that lowest prices have been reached.

From St. Louis, Mo.: The general jobbing trade is fully as good as last week, but improvement has been retarded by bad weather. Wheat has been dull and weak, but is now more active and has a tendency upward, though the export demand has about stopped; much of the growing wheat in this region is looking badly now, and this has stimulated the market. Corn declined most of the week, but has now started up; receipts heavy, and export movement light.

From Kansas City, Mo.: The week developed but little activity in general trade; the situation is practically unchanged. The season is backward and sales in many lines are not up to expectations. Collections are generally improving. Country advices favorable, and with seasonable weather a decided increase of sales is expected.

From Detroit, Mich.: The general business for the week past has been more quiet than was anticipated, and there are numerous complaints regarding collections, which are not so good now as they were some weeks ago.

From Grand Rapids, Mich.: Local general trade has been very fair during the last week, although complaints are made in the country, where collections are reported slow and trade rather quiet.

From Davenport, Iowa: The general condition of trade is quiet, owing to the backward spring.

From Des Moines, Iowa: Trade dull. Clothing trade very dull. Cold, cloudy weather, generally assigned as the principal cause of the depressed condition of trade. Wholesale trade in all lines is active and strong, showing an increase in all lines over corresponding period last year.

From Milwaukee, Wis.: Among jobbers trade is decidedly dull and collections have not materially improved.

From Lawrence, Kan.: The condition of general trade has not changed from that of last week. The money market is easy. The outlook for the wheat crop is excellent. The outlook for the year is favorable.

From Lincoln, Neb.: The weather for the past week has been cool, cloudy, dry and favorable for trade. Business in retail lines has been fair. For reason of lower prices the corn market is dull, and the same can be said in general of produce.

CALIFORNIA

From San Francisco, Cal.: Heavy rains insure good crops throughout the Pacific coast. Cattle feed plentiful. Wheat and barley weaker. General business is reviving. Jobbers anticipate a very brisk trade during the next six weeks. Cable from New Zealand reports serious loss to wheat in stack from rain.

SOUTHERN STATES.

From Baltimore, Md.: The volume of business the past week was only fair. Indications, however, are for an improvement in the near future, as jobbers and retailers show a disposition to buy more freely. The grain market ruled steady, and all grades of wheat were in fair demand. Very little is doing in cotton, and the market is quoted dull and nominal. Speculation in petroleum has grown firmer, and the late decline has partially recovered. Some additional business is doing in raw sugars, and prices quote firmer. The demand for western highwines is fairly active, and the market is steady and firm. Receipts of wool are light, and prices remain firm. In the lumber market receipts of yellow pine have been quite large, and buyers are holding off.

From Norfolk, Va.: There has been very little change in the general outlook since last report. All departments of trade are only fairly active. Cotton receipts continue to fall off. Money is easy; collections only fair.

From Richmond, Va.: Business generally is quiet, owing to snow and unseasonable weather during the week in tributary sections.

From Wilmington, N. C.: The weather is pleasant. Cotton dull; receipts light. Grain and breadstuffs in full stock; market quiet and steady. Freights, foreign, firm; tonnage wanted; coastwise quiet. Timber steady; lumber dull; shingles firm. Spirits turpentine and rosin firm; tar and crude turpentine steady.

From Savannah, Ga.: Trade circles show less activity; sales are mostly made on orders. Sales are more slim than usual in naval stores. Spirits turpentine closed firm at 46c.; indications point to an increased demand at remunerative prices during spring and summer months. Rosins fairly active for lower and medium grades; pales in light demand.

From Atlanta, Ga.: Jobbers in clothing, boots, shoes and hardware report an active demand for all goods. There is a marked falling off in sales of groceries accounted for by the stock already in the country. Lumber dealers report an active market for lumber; prices steady; shipments fair. Business in all lines, with the fine weather of this week, has greatly improved; collections in all branches fair to good. Manufacturers and dealers in fertilizers report a good demand; some shippers are unable to get cars sufficient to supply the demand.

From Macon, Ga.: General trade is dull, but healthy and confident; credits are unimpaired; stocks are full and money is easy. There has been less corn sold this season than ever before.

From Montgomery, Ala.: General trade is in good condition. There is a good demand for all necessities. The increase over last year at the same time 35 to 40 per cent.

From Selma, Ala.: Trade in every department

except groceries continues good. The grocery trade is still dull, owing, doubtless, to the large yield of corn in this section last year.

From New Orleans, La.: Sugar gave way about 1/16c. yesterday, but became steadier to-day without recovering. Molasses continues very dull. Rice is quiet, though there is more demand from the north and west. Coffee is steady, with a fair demand. The reduced supply of flour steadied the market, notwithstanding the fluctuations west. The grain movement of March is the largest of the season, but mostly on old contracts; the high prices of grain and freights, the latter principally, it is believed will materially restrict future movements. Large supply cottonseed products, and moderate demand, weakened the market and rendered prices nominal.

From Galveston, Tex.: The weather has been cool during the past ten days. The general jobbing trade has been only fair to medium.

From Marshall, Tex.: General trade is fair. Weather favorable. Farmers busy planting, indicating a large crop. The business outlook is fair.

From San Antonio, Tex.: Business generally, both wholesale and retail, is excellent. There has been rain, and the prospects are good for large crops.

From Memphis, Tenn.: Trade during the past week has continued very fair, and a very cheerful feeling prevails in all lines. Flour is plentiful, and prices weak. Corn is bringing lower prices. Oats quiet.

From Nashville, Tenn.: General trade for the week has been fair. Flour dull, and demand light. Wheat firm; receipts light. Corn dull. Country produce steady; prices unchanged. Groceries steady; demand fair. Tobacco market active; week's sales 154 hogsheads.

NOVA SCOTIA.

From Halifax, N. S.: Business generally shows a slight improvement over last week. The weather is still softening. Fishing and trading outfits have been opened.

LATE MAILS.

Our Chicago correspondent writes as follows under date of March 28: The near approach to the first of the month is calling out an increased demand for money from operators in grain and provisions, who want funds with which to pay for property bought for April delivery. The demand from lumber dealers, manufacturers, and nearly all classes of small dealers is also good, and discount rates remain firm at 7 per cent. for choice paper. New York exchange is firm at par @ 25c. discount per $1,000. The demand for money from the country is limited, and orders generally from manufacturing points where the funds are wanted for pay-rolls. Jobbers and package dealers in dry goods and notions report a large trade, the sales so far the current week being larger than at any previous time this season, many of the largest houses being literally crowded with customers. And the millinery houses are equally busy, the general verdict being that trade in such goods was never better at this season. There is also a marked increase in the sales of furnishing goods, hats, ready-made clothing, boots and shoes. Leather shows a little more activity, but sales are in moderate-sized bills, and dealers say goods are sold on very close margins. Hardware is meeting a brisk demand from the interior, and the current week's sales promise a large increase over the one immediately preceding. Pig iron is in moderate supply, a fair trade is reported, and prices steady. Bar and all classes of structural iron, nails, and heavy iron goods are more active, and some houses say these sales will show a large gain over the corresponding week last year. Farming tools are active. A number of large sales of Bessemer iron ore are reported at $4 at the Northwestern mines. Drugs and chemicals are active; and a brisk interior demand is reported for staple and miscellaneous groceries. The lumber trade shows an increased volume of sales to the country. The wheat market shows few new features of interest. All classes of dealers are apparently disposed to wait for further advices regarding the outlook of the growing winter wheat and the prospects for spring seeding, the bears not being disposed to sell for future delivery while the thermometer marks the present low average; the bulls, also, are equally conservative, knowing that a few days of fine weather would have a depressing influence on values. Corn continues to accumulate, and stocks are now up to the maximum of any previous year, but the market to-day shows an upward tendency, the demand being largely from shorts who oversold during the previous few days; but there is very little confidence shown by strong operators, and it is generally predicted that to-day's advance will be lost when the shorts are filled, as there are not many buying orders. Oats are firm, in sympathy with wheat and corn. The decreased receipts also encourages the bulls, while the bears show more disposition to buy in. The provisions market shows more strength than last week, the improved feeling being attributed to small receipts of hogs, but the volume of trade is small, and transactions in pork and lard chiefly in the way of covering short sales. Meats meet a moderate shipping demand, but the market is destitute of snap, and trading rather slow. The following shows the grain in Chicago on the dates named:

Articl s.	*Mar.* 24, 1883.	*Mar.* 25, 1882.	*Mar.* 26, 1881.	*Mar.* 27, 1880.
Wheat, bushels	6,061,000	3,371,000	7,958,000	8,876,000
Corn, bushels	6,071,000	5,162,000	1,247,000	5,264,000
Oats, bushels	1,543,000	531,000	1,440,000	867,000
Rye, bushels	816,000	389,000	168,000	221,000
Barley, bushels	146,000	207,000	229,000	538,000

In addition to the above, all of which is in regular elevators, there is also 438,000 bushels wheat, 706,000 bushels corn, and 102,000 bushels oats afloat on vessels in the harbor; there is also 350,000 bushels corn in a private elevator, whose receipts are regular, on contracts, making 6,499,000 bushels wheat, 7,127,000 bushels corn, and 1,645,000 bushels oats all told.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.	*Exchange selling on New York.*
Boston, Mass	6 @	25c. premium per $1,000.
Chicago, Ill	@ 7	50@60c. disc't per $1,000
Cincinnati, Ohio	@ 8	Par.
Cleveland, Ohio	7 @ 8	1-10 premium.
Columbus, Ohio	@ 8	1-10 premium.
Dallas, Texas	@	⅛ premium.
Davenport, Iowa	8 @	1-10 premium.
Dayton, Ohio	6 @ 7	Par.
Des Moines, Iowa	8 @10	⅛ premium.
Galveston, Texas	@	Par.
Halifax, N. S	6 @ 7	¼@¾ premium.
Indianapolis, Ind	8 @	Slight premium.
Kansas City, Mo	10 @12	$1 premium.
Louisville, Ky	7 @ 8	Par@50c. premium.
Lincoln, Neb	10 @	1-10 premium.
Macon, Ga	8 @12	3-10 premium.
Marshall, Tex	12 @	½ premium.
Memphis, Tenn	6 @ 8	¾ premium.
Milwaukee, Wis	@	25@50c. discount.
Montghmery, Ala	12 @	½ premium.
Nashville, Tenn	8 @	$2 per $1,000
New Orleans, La	@ 7	$1.50 premium.
Norfolk, Va	6 @ 9	⅛@¼ premium.
Portland, Me	6 @ 7	1-10 premium.
Providence, R. I	6 @ 6½	Par.
Rochester, N. Y	@	¼ discount to par.
San Antonio, Tex	10 @12	¾ premium.
San Francisco, Cal	5 @ 6	25c. premium
Selma, Ala	8 @12	⅜ premium.
St. Louis, Mo	7 @ 8	25c. premium per $1,000.
Toledo, Ohio	7 @ 8	1-10 premium.
Troy, N. Y	6 @	
Wilmington, N. C	6 @ 8	Par.

TRADE EMBARRASSMENTS.

There were 170 failures in the United States reported to BRADSTREET'S during the past week, 26 less than the preceding week, 41 more than the corresponding week of 1882, and 58 more than the same week of 1881. The middle states had 44, a decrease of 4; New England states 25, a decrease of 3; southern states 28, a decrease of 9; western states 58, a decrease of 3; Pacific states and territories 15, a decrease of 7; Canada 40, an increase of 8. The important suspensions were E. G. Wiechmann & Co., wholesale cloths, New York; C. P. Markle & Sons, paper manufacturers, Pittsburgh; Harrington & Simonds, wool, Boston; and the lumber firms of Paige, Dixon & Co., Davenport, Iowa; S. B. & J. A. Paige, of Oshkosh, Wis., and the Paige & Sexsmith Lumber Company, of Superior City, Wis. In the principal trades they were as follows: General traders 27; grocers 24; liquors 12; manufacturers 9; shoes 8; dry goods 8; jewelry 5; lumber 5; drugs 5; tobacco and cigars 4; books and stationery 4; furniture 4; butchers 4; hotels and restaurants 3; clothing 3; bakers and confectioners 3; produce 2; hardware 2; commission 2.

ARKANSAS.

ROGERS.—F. O. Knight, drugs, has failed and gone out of business.

CALIFORNIA.

BLACKS.—R. D. Davidson, general store, has been attached.
LOS ANGELES.—W. B. Tullis, watchmaker, has failed.
LOS GATOS.—L. L. Majors, saloon, has been attached.
SACRAMENTO.—H. A. Weaver, printer, has been attached.
SAN FRANCISCO.—S. Povengo, saloon, has been attached.
SAN FRANCISCO.—Peter Stansberry, dairy, has filed a petition in insolvency.
SAN FRANCISCO.—W. Stehl, cigar maker, has been attached.
SAN FRANCISCO.—E. H. Thompson, machinist, has filed a petition in insolvency.
SAN LUIS OBISPO.—D. Pigot, hotel, has been attached.
SANTA BARBARA.—P. McPhail, furniture, has filed a petition in insolvency.

COLORADO.

DENVER.—Hugo A. Kloer, machinist, has been closed on a chattel mortgage.
DENVER.—M. J. Parsons, grocer, has failed and sold out.
LEADVILLE.—Kroeger Brothers, market, have confessed judgment for $129.

CONNECTICUT.

BRIDGEPORT.—L. F. Pelton, gents' furnishing goods, has been attached. Liabilities about $600; assets about $300.
GUILFORD.—Edward Griswold, general store, has assigned to Henry E. Norton.
HARTFORD.—Robert H. Smith, file manufacturer, has assigned.

DAKOTA.

GRAND FORKS.—Oscar E. Thomas, furniture, has assigned.
YANKTON.—L. D. Palmer, dry goods, has been closed by the sheriff.

GEORGIA.

ATLANTA.—William Calder, paints and oils, has applied for homestead and a receiver.
BELTON.—C. R. Faulkner, general store, has had a mortgage foreclosed.
PINE GROVE.—A. H. Van Bakelen & Co., general store, have not failed, as previously reported.
SAVANNAH.—The attachments of Babcock & Co. against D. H. Wilcox, of Wilcox, Gibbs & Co., in Savannah and New Haven, have been dismissed by the plaintiff, also a bill in equity filed in Savannah by the same parties. The subsidiary proceedings of George A. Wilcox in New Haven are dismissed. The matters between Babcock & Co. and this firm were of a litigated character, and have been adjusted and the litigation is canceled.
SOCIAL CIRCLE.—Abercrombie & Son, general store, have assigned to T. Spearman.

ILLINOIS.

BLOOMINGTON.—Peckman Brothers, general store, have been closed by the sheriff on claims for $1,376.
CHICAGO.—Julius Barchwitz, liquors, has been closed by the sheriff on a claim for $2,600.
CHICAGO.—J. Berr, trading as J. Berr & Co., liquors, confessed judgment for $4,728 and was closed by the sheriff. Subsequently he assigned to Victor Gowan. Liabilities $13,379; nominal assets about $9,000.
CHICAGO.—W. D. Crosby, proprietor of the Anglo-American Tea Company, has assigned. Liabilities $1,267; assets $1,300.
CHICAGO.—A. Goldsmith & Brother, cigar manufacturers, have compromised at 40 cents.
CHICAGO.—George Schori, liquors, has been closed by the sheriff on a judgment for $435.
CHICAGO.—Sherman, Ganson & Co., furniture, offer to compromise at 55 cents cash, or 60 cents in three, six and nine months.
CHICAGO.—The Coburn & Cook Publishing Company has been closed by the sheriff.
CHICAGO.—R. Williams & Co., shoes, have been closed by the sheriff. Liabilities about $800.
DANVILLE.—Albert S. Bixby, jeweler, has assigned. Liabilities about $3,000.
ROCKFORD.—Foote, Kimball & Co., publishers, have failed and been attached.
SPARTA.—James R. Wallace & Co., dry goods, are offering to compromise.
STONE FORT.—N. Pritchett, dry goods, has failed.
STONE FORT.—Thomas Slankard, grocer, has failed.

INDIANA.

HOPE.—Robert Spaugh & Son, meats, are reported to have failed. Liabilities about $3,000; assets $2,000.
JAMESTOWN.—John P. Smith, general store, has sold out, and it is thought will pay about 40 cents. Liabilities about $2,500.
LA PORTE.—Judgments have been rendered against Charles Greiwank, harness. Liabilities about $4,000.
LIGONIER.—W. L. Jackson, restaurant, has been closed by creditors.
WASHINGTON.—S. D. Baldwin & Co., drugs, have failed. Liabilities $5,000; assets about $4,000.

IOWA.

AMES.—E. J. Hawley, jeweler, has failed. Liabilities about $2,000; assets $1,500.
DAVENPORT.—The liabilities of Paige, Dixon & Co., lumber, are placed at $230,000, and it is estimated that if the business was closed out there would be a loss of from $30,000 to $50,000. S. B. Paige committed suicide on the 11th inst., and the firm gave a chattel mortgage for $80,000 on the 13th inst. An attachment for $40,000 is also reported.
CARROLL.—F. E. Dennett, agricultural implements, has been attached.
DENMARK.—George L. Epps, general store, has assigned. Liabilities $30,000; assets $10,000.
FORT MADISON.—C. Johns, liquors and tobacco, has been closed by the sheriff. Liabilities about $1,000.
FORT MADISON.—B. Schroeder, grocer, is reported to have failed. Liabilities about $1,000.
KELLOGG.—Saum & Stanley, general store, have failed. Mr. Saum is also of Saum & Braley, pump manufacturers.
LE MARS.—George E. Eva, harness, has failed. Liabilities $7,000; assets $3,200.
NEWTON.—W. H. Hough & Son, grocers, have assigned.
PERRY.—Boyle & Hoops, grocers, have been closed on attachments. Liabilities $2,587; actual assets about $400.
PLEASANTVILLE.—Haynes & McDaniel, hardware and implements, have failed. They gave a bill of sale for $1,000 chattel mortgages for $2,700, and realty mortgages for $3,600.

KANSAS.

WYANDOTTE.—Leser & Co., clothing, have had a mortgage foreclosed. They began last September in a poor season.

KENTUCKY.

BLANDVILLE.—Taylor & Hood, dry goods, are reported to have assigned to J. D. White. Liabilities about $7,000; nominal assets about $6,000.
LOUISVILLE.—Schaefer & Meyer, brewers, have compromised at 40 cents.
PADUCAH.—N. C. Vincent, grocer, has been attached, and is in the hands of the sheriff. Liabilities reported about $2,500.
ROCKY HILL STATION.—C. P. Spillman, general store, owes $6,500; assets $2,000.

LOUISIANA.

BARNES CITY.—Jackson Jarvis, general store, has assigned to J. B. Bolton.
BATON ROUGE.—Charles Wiech, saloon and icehouse, is reported to have sold out to his son and son-in-law, having become heavily involved.
NEW ORLEANS.—J. A. D'Hamecourt, dry goods, has assigned. Liabilities $27,400; assets $15,500.

MAINE.

DEXTER.—B. F. Osgood, grocer, has sold out.
FREEPORT.—E. P. Oxnard, general store, offered 25 cents, which the creditors refused, and they petitioned him into insolvency. Liabilities about $38,000, of which he claims $20,000 is due to relatives.
LEWISTON.—H. S. Garcelon, drugs, offers 25 cents. Liabilities $5,200; actual assets about $1,500. He has filed a petition in insolvency.
LINCOLN.—Charles F. Plumley, general store, has compromised at 75 cents.
NEWPORT.—Millard F. Field, general store, is in insolvency.
WISCASSET.—Benjamin S. Quinnam, sewing machines, has been attached for $700.

MARYLAND.

BALTIMORE.—W. F. Bokee & Co., crockery, have assigned. Liabilities about $25,000; actual assets about $8,000.
BALTIMORE.—Louis Vierecht, shoes, has assigned to M. S. Weil.
LAPIDUM.—E. M. Allen, coal and lumber, has assigned. Liabilities about $60,000; actual assets $25,000.

MASSACHUSETTS.

ADAMS.—Arthur B. Crandall, blacksmith, has been attached.
BARRE PLAIN.—Frank C. Stevens, general store, is reported offering to compromise at 40 cents.
BOSTON.—The liabilities of Adams & Co., printers, are $13,575; nominal assets $1,578.
BOSTON.—Alonzo Dinsmore, pianos, has failed and will settle in insolvency. It is thought the dividend will be small.
BOSTON.—Cary, Fulton & Co., counter supplies, who dissolved January 1, now find themselves insolvent, instead of being able to show a surplus of $16,000 as they had anticipated, and they have assigned to Horace Partridge. Liabilities about $21,000; nominal assets $20,000.
BOSTON.—F. W. Fillmore, provisions, has failed and gone out of business.
BOSTON.—Harrington & Simonds, wool, have failed, and settlement will be effected in insolvency, as the firm will not resume business. The liabilities are about $75,000. They have been in business about seven years.
BOSTON.—J. M. Leahy, baker, has failed, and the mortgagee has taken possession. No assets.
BOSTON.—Henry H. Lovett, insurance agent, has failed and will settle in insolvency; no assets.
BOSTON.—The estate of Fred. F. Siebert, shoe findings, has failed and offers 50 cents. Liabilities about $8,000; good assets $6,500. Creditors want 60 cents.
BOSTON.—L. N. Tucker, laces, offers 20 cents.
CHICOPEE FALLS.—W. H. Goldsmith, grocer, is said to offer 25 cents. Liabilities about $13,000.
HOLYOKE.—Fitzgerald & Co., stationers, owe about $2,600. Nominal assets $1,500.
HOLYOKE.—John H. Phillips, Holyoke Felting Works, owes $1,417; nominal assets $512.
LAWRENCE.—Mrs. M. S. Anderson, millinery, is advertised to be sold out by the sheriff.
MARLBORO.—Charles T. Berry, grocer, has settled at 30 cents. Liabilities about $1,400.
NEWTON.—The liabilities of George W. Rigby, builder, are about $2,800; assets $535.
NORTH DANA.—A. W. Goodman, Schofield & Co., manufacturers of blankets, offer 25 cents. Liabilities $35,000; nominal assets $12,000. They were attached in New York by M. S. Herrman for $2,500.
PEABODY.—John O'Shea & Brother, tanners, offer 10 cents.
PEMBROKE (Bryantsville). At a meeting of creditors of John Foster, lumber and groceries, he submitted a statement showing liabilities $35,000, of which $18,000 is secured by mortgage; nominal assets $50,000, principally in real estate. He claims he can pay in full if given time.
SALEM.—John A. Swasey, hotel, has failed, and is in insolvency. Liabilities about $2,500; assets small.
SHELBURNE.—The Gardner Manufacturing Company has compromised at 25 cents.
SPRINGFIELD.—W. J. Holland, publisher, owes $19,142; assets nominal.
SPRINGFIELD.—Nelson F. Twing, printer, has gone into insolvency. Liabilities $4,354.
TISBURY (Vineyard Haven).—William D. Harding, general store, who recently failed, is reported settling at 50 cents.

MICHIGAN.

FRUITPORT.—J. S. Garrgus, general store, who was recently burnt out, has sold out and left town. He is reported to owe about $6,000 for goods recently purchased.
GREENVILLE.—C. Hansen, grocer, has sold out, and is reported to have left town.
LESLIE.—Charles S. Reed & Sons, general store, have assigned to M. E. Rumsey.
NASHVILLE.—L. J. Wheeler, general store, has assigned. Liabilities $8,000; assets $5,000.

MINNESOTA.

GRACEVILLE.—James Melloney, saloon, has been closed on attachments.
GREEN ISLE.—William O'Meara, saloon, has failed.
MINNEAPOLIS.—L. Brice, dry goods, has assigned.
ST. PAUL.—At a meeting of the creditors of The T. S. White Stationery Company, recently held in New York, the statement showed liabilities $70,000; nominal assets, merchandise about $70,000; accounts receivable $34,000. It is thought an offer of $30,000 cash for the assets will be accepted. The interest of T. S. White has been discontinued.

MISSISSIPPI.

PASS CHRISTIAN.—Bailey & Rhodes, general store, have assigned. They made large purchases last fall, but the season proving a disastrous one they became overstocked, could not make collections, and their paper went to protest. They have branches at Wolf River and Scranton. They ask a respite of 12, 18 and 24 months, showing assets $61,933; liabilities $45,016. They claim to be solvent, but ask time.
VICKSBURG.—Manuel Gomez, Sr., furniture, has assigned to T. E. Crutcher. Liabilities about $3,000.

NEBRASKA.

ALBION.—George Reider & Co., general store, have failed and given a bill of sale.
ALMA.—Samuel Sadler, drugs, has been attached. Liabilities about $1,000.
BLUE HILL.—Mrs. N. Edwards, grocer, has assigned.
ELMWOOD.—S. E. Greenslate, drugs, has failed, and gave a bill of sale to secure a creditor for $2,100.
OAKDALE.—W. G. Wells, shoes, is reported to have failed. Liabilities about $600.

SCHUYLER.—James Lawrence, shoes and dry goods, has been attached.

SYDNEY.—R. B. Tyler, market, is reported to have left town.

NEVADA.

EUREKA.—W. H. Mitchell, grocer, has been attached.

NEW HAMPSHIRE.

GORHAM.—Frederick C. Stevens, general store, has settled at 50 cents.

KEENE.—G. M. Willard & Co., clothing, who recently sold out for $5,500 cash, owed $5,250, and claims to owe friends $2,000 for borrowed money. He paid the attaching creditors and has offered other creditors 40 cents.

TAMWORTH.—Hatch & Emery, general store, owe about $20,000; nominal assets $15,000.

NEW JERSEY.

DOVER.—Sammis & Buchanan, fruits and confectionery, are reported to have assigned to P. C. Buck.

ELIZABETH.—Edward S. Atwater has been appointed receiver of the Thompson Manufacturing Company, stoves. Liabilities about $4,000; actual assets estimated at $1,500.

NEW YORK.

ALBANY.—W. J. Thompson, cigars, has given a bill of sale for $850 and a realty mortgage for $500.

BROOKLYN.—J. Patton, Jr. & Co., steamfitters, assigned on the 29th inst. to Samuel Lyman, giving preferences for $20,000. They were recently burnt out, sustaining a loss of about $10,000. The business was established in 1860 by Jefferson Patton, Sr., who retired in 1880.

FRANKLINVILLE.—Chandler Brothers, general store, have assigned. They spread out too much, having branches at Aiken and Custer City, Pa.

GLOVERSVILLE.—Elias Apfelbaum, leather dresser, called a meeting of creditors to obtain an extension. He gave a chattel mortgage or bill of sale amounting to $70,000 to John McNab as security for indorsements. It is said he owes $20,000 to $30,000 to other creditors.

JOHNSTOWN.—Jay L. Lum, shoes, has assigned, giving preferences to his father-in-law for $2,700. Liabilities $3,500; assets about $2,500.

NEW YORK CITY.—Delia Barter, furniture, assigned on the 24th inst. to Robert O'Byrne.

NEW YORK CITY.—Henry F. Behrman, shoes, assigned on the 26th inst. to Louis Lochman, giving seventeen preferences for $7,108, the largest being to Caroline Bachman—$3,825. Liabilities $14,031; nominal assets $10,699; actual assets $5,976.

NEW YORK CITY.—Blossom, Hayne & Co., naval stores, have assigned to Josiah B. Blossom. They also dissolved, and Hayne Brothers continue.

NEW YORK CITY.—It is said that all the creditors, except a few whose claims aggregate about $11,000, of Chambers Brothers, fertilizers, have signed the agreement to turn the business into a stock company, which was incorporated last November under the style of Chambers Brothers Company, to work out the liabilities, which are about $250,000. Some of the smaller creditors obtained executions against Chambers Brothers recently, which were followed by some of the banks who favor the scheme entering executions also to protect their own interests. George T. Chambers died on the 28th inst.

NEW YORK CITY.—John Cunningham, manufacturer of cloaks, assigned on the 30th inst. to John B. Griffin, giving four preferences for $11,033, of which $8,425 was to H. B. Claflin & Co. He had been losing money for a year past.

NEW YORK CITY.—Patrick H. Fleming, poultry, assigned on the 27th inst. to Richard Wilson, giving preferences for $5,700, of which $4,700 was to Amelia M. West.

NEW YORK CITY.—The schedules of Paul Hahlweg, confectioner, show liabilities $6,257; nominal assets $3,278; actual assets $1,879.

NEW YORK CITY.—A. S. Jones, oil broker, was unable to meet his engagements on the 30th inst., and had 35,000 barrels of oil sold out under the rule by the president of the New York Petroleum Exchange.

NEW YORK CITY.—The schedules of McCauliff & Co., stationers, show liabilities $4,801; nominal assets $3,711; actual assets $1,270.

NEW YORK CITY.—The schedules of Schloss & Heilbronner, wholesale cloths, show liabilities $46,447; nominal assets $44,980; actual assets $19,645.

NEW YORK CITY.—E. G. Wiechmann & Co., wholesale woolens, assigned on the 27th inst. to Claus F. Hinck, giving preferences to August W. Muller $8,500; Mrs. M. Harms $3,800; C. Harms $4,400; Louis Helmke $5,000; salaries $1,000; total $22,700. The failure was a great surprise to the trade, as the firm stood well, and had met their obligations up to the day of the assignment. The firm attribute the failure to not obtaining expected capital, depreciation in woolens, and agitation of the tariff, which hurt their trade. The liabilities are about $275,000; no estimate has been given as to the assets, which consist of stock and accounts. The firm have about $50,000 paper out, which found a ready sale at 6 or 7 per cent. The business was established about thirty years ago as Harms & Wiechmann, and after the death of Mr. Harms, Mr. E. W. Gloeckner became a partner about twelve years ago.

NORTHVILLE.—Z. C. Ford, general store, has transferred all his stock and fixtures to his father, to whom he was indebted for indorsements about $1,000, and is now out of business. Creditors, it is thought, will not receive anything.

ORISKANY FALLS.—Frost & Co., millers, have failed and sold out.

OUAQUAGA.—Howard M. Badger, general store, has assigned.

SANFORD.—Theodore F. Henwood has assigned.

SENECA FALLS.—The liabilities of George W. Metcalf are $2,323; assets $1,535; preferences $825.

SYRACUSE.—Moses A. Shumway, stationer, has assigned, giving preferences for $3,120. Liabilities about $5,000; actual assets about $600.

NORTH CAROLINA.

CHARLOTTE.—J. R. Hayes, general store, is reported to have assigned to E. K. P. Osborne, giving preferences for $391.

FAYETTEVILLE.—D. H. Bell, general store, is reported to have failed. Liabilities about $6,000; actual assets $2,000.

WILLIAMSTON.—Mobley & Williams, groceries and liquors, have assigned to S. S. Goddard. Liabilities about $2,300. It is thought they will pay in full. Mr. Williams was also in the general store business, and he made an individual assignment.

OHIO.

CANAL DOVER.—J. L. Edwards & Co., rolling mill, have assigned to Charles Harger.

CINCINNATI.—H. K. Harker, stencils, has assigned to W. H. Jones. Liabilities estimated at $1,200.

DE GRAFF.—Charles A. Miller, jeweler, has assigned to George Kinsinger.

MASSILLON.—C. N. Oberlin, grocer, has assigned to Frank L. Baldwin.

PENNSYLVANIA.

ALLENTOWN.—Execution has been issued against Henry C. Snyder, grocer, on judgment for $2,200.

BARRE FORGE.—Mumper & Co., general store and furnace, have called a meeting of creditors at Huntington, and they hope to pay in full if an extension is granted. The liabilities are estimated at about $40,000.

BRADFORD.—E. Stolz, trading as E. Stolz & Co., cigars, has had executions issued against him for over $3,000.

COALPORT.—Z. T. McCracken, general store, has been closed by the sheriff.

EAST BERLIN.—H. B. Kline, saloon, has assigned.

FRANKFORD.—C. Edward Lunk, grocer, has been closed by the sheriff.

GETTYSBURG.—Executions have been issued against Penrose Myers, jeweler, on judgments for $2,344. Liabilities about $4,000; assets about $2,000.

LARIMER.—William Robb, grocer, has been closed by the sheriff.

McKEESPORT.—Execution has been issued against Sims Brothers, grocers, for $744.

NEW BRIGHTON.—J. Sargent Hoopes, printer, has assigned. Liabilities about $10,000.

NEW GALENA.—W. O. Crouthamel, general store, has assigned.

PHILADELPHIA.—C. H. Landenberger & Co., manufacturers of cotton goods, were closed by the sheriff. Judgments to the amount of $30,150 were recently entered against them. Liabilities reported at $114,000. The assets, it is said, will hardly cover the secured claims.

PHILADELPHIA.—John Landenberger, commission hosiery, who failed about the first of the year, and subsequently disappeared, is advertised to be sold out by the sheriff on April 3.

PHILADELPHIA.—John Magee & Son, shoes, who recently suspended, are said to probably owe about $2,000. It is thought they may obtain some compromise with creditors.

PHILADELPHIA.—Frederick W. Parrott, jeweler, offers 40 cents. Liabilities about $8,000; assets $4,000.

PHILADELPHIA.—The assets of the Philadelphia Coach Company have been sold, and have realized equal to a dividend of 67 per cent. Liabilities about $25,000; assets about $17,000.

PHILADELPHIA.—John Ruppmann, merchant tailor, has assigned to Daniel McCauley.

PHILADELPHIA.—James Smyth & Co., manufacturers of cotton and woolen goods, have obtained an extension. James Smyth now continues alone, the creditors having released William D'Olier from all liability for the debts of the firm.

PHILADELPHIA (Germantown).—Brooks & Spiegel, furniture, were sold out by the sheriff on the 26th inst. The amount realized will cover judgment ($1,514), upon which execution was issued, and perhaps satisfy another claim of $3,021.

PITTSBURGH.—Execution for $1,200 has been issued against H. W. Allison, grocer.

PITTSBURGH.—C. P. Markle & Sons, paper manufacturers, assigned on the 26th inst. to Jesse H. Lippincott. The assignment was brought about by the disappearance of C. C. Markle, the senior partner, who, it is said, took about $60,000, all the available cash funds of the firm, leaving no ready money to meet their obligations. Mr. Markle went to Chicago, and no definite reason is ascribed for his singular action. It is claimed that the firm is perfectly solvent, having assets estimated at from $600,000 to $1,000,000, and liabilities about $400,000. The business, which was very successful, was established in 1829 by S. B. & C. P. Markle, which subsequently became C. P. Markle & Sons. C. P. Markle died last October, leaving the business to his two sons. The firm own two mills at West Newton and Willow Grove, coal lands and coke works at Bessemer, and other real estate.

PITTSBURGH.—Execution has been issued against The Phoenix Facing Company, for $3,521.

WEST CHESTER.—Alfred Rupert, books and stationery, has assigned.

WILLIAMSTOWN.—G. W. Etter, general store, has been closed by the sheriff.

RHODE ISLAND.

PROVIDENCE.—Hiram Sweet (agent), grocer, is offering to compromise. Liabilities about $500; assets $200.

TENNESSEE.

DANDRIDGE.—E. H. & J. T. Bradley, general store, have failed.

SMITHVILLE.—J. S. Dunlap, groceries and drugs, has failed.

TEXAS.

ALVARADO.—J. Baker, tobacco and cigars, has been closed by the sheriff. Liabilities about $1,900; assets $1,200.

PLATONIA.—R. S. Graves & Co., dry goods, have failed and sold out.

HALLETTSVILLE.—W. Doose, shoemaker, is reported insolvent.

MINEOLA.—Erwin & Burress, hardware, have assigned. Liabilities $6,000; assets $4,000.

ORANGE.—M. Hoekwald, general store, has failed.

UTAH.

LOGAN.—P. A. Neilson, general store, has assigned.

VERMONT.

HIGHGATE SPRINGS.—George E. Moore, grocer, has been attached; assets small.

MONTPELIER.—Frank L. Newcomb, market, has been attached and is in the hands of a receiver.

VIRGINIA.

BERRYVILLE.—Hutchinson & Moore, bakers, have assigned. Liabilities $1,500; assets $800.

CHARLOTTESVILLE.—C. Hose, saloon, has been attached.

LYNCHBURG.—"Harker's," grocers, have assigned, giving preferences for $4,000. Liabilities $5,000; stock $4,000.

WEST VIRGINIA.

MILTON.—M. A. McLaughlin, general store, has failed.

PARKERSBURG.—C. M. McMillan, saddler, has assigned.

WHEELING.—George G. Roth, dry goods, has assigned to Benjamin M. List, giving preferences for $10,700.

WISCONSIN.

BIRNAMWOOD.—The Birnamwood Stave Company has been attached for $500.

EAU CLAIRE.—Hans Hendrickson, grocer, has been closed by the sheriff.

FAIRCHILD.—J. A. Gooder & Co., general store, have failed.

MILWAUKEE.—The creditors of F. J. Dixon, grocer, have refused to accept a compromise at 25 cents.

OSHKOSH.—An investigation of the affairs of the lumber firm of S. B. & J. A. Paige, The Paige & Sexsmith Lumber Company of Superior City, and Paige, Dixon & Co. of Davenport, Iowa, since the suicide of S. B. Paige, shows that the liabilities are very heavy. The liabilities of the Paige & Sexsmith Lumber Company are placed at $324,000; assets about $300,000. Liabilities of Paige, Dixon & Co. $230,000; actual assets about $200,000. An agreement has been made with the creditors for Daniel L. Libby and Leander Choate to act as assignees to settle the affairs of S. B. & J. A. Paige and The Paige & Sexsmith Lumber Company, and, it is said, means have been furnished to close up the logging and lumber business.

MANITOBA.

BRANDON.—F. Granville & Co., Brandon Club, have been closed up. Liabilities $35,000; nominal assets $18,600.

EMERSON.—Merlin & Latham, general store, have obtained an extension.

ST. LEON.—Lacosse & Warnecke, general store, have assigned.

NEW BRUNSWICK.

ST. JOHN.—Kane & Murray, victuallers, have assigned and are settling at 20 cents. Liabilities $4,000.

NOVA SCOTIA.

NEW GERMANY.—Bennett Morton, general store, is offering to compromise at 50 cents.

PROVINCE OF ONTARIO.

ANCASTER.—J. McElroy, cabinetmaker, is in the hands of the sheriff.

BRECHIN.—A. Gregg, general store, is reported in financial difficulties, and the sheriff is in possession.

BURGESSVILLE.—A. Dickson, general store, is advertised to be sold out by trustee.

COLPOY'S BAY.—W. D. Bell, general store, has assigned. Liabilities about $3,000.

CORNWALL.—C. L. Liddell, shoes, has compromised at 40 cents.

GRAVENHURST.—H. P. Cook, general store, has compromised at 60 cents.

GUELPH.—R. Rutherford, hats, &c., has assigned.

HAMILTON.—C. F. Bush, grocer, has been seized under three executions.

HAMILTON.—A. K. Renwick, grocer, has assigned.

INGERSOLL.—R. F. Hunter, dry goods, has compromised at 80 cents.

LONDON.—J. E. Platt, trading as Mitchell & Platt, drugs, has become embarrassed and unable to meet his engagements. Liabilities about $11,500; nominal assets $5,000.

McIVER.—John McIver, general store, has compromised at 50 cents.

OSGOOD STATION.—J. J. & W. F. Ritchie, general store, have assigned. Liabilities about $5,000; assets $2,500. They offer 50 cents.

PENETANGUISHENE.—J. Squire & Son, merchant tailors, have assigned.

PICTON.—J. Mattashed, hotel, has assigned.

SMITHVILLE.—R. N. Griffin, general store, has compromised at 80 cents.

ST. CATHARINES.—John Nay & Co., wholesale and retail groceries and liquors, offer 50 cents. Liabilities about $35,000; actual assets about $15,000.

ST. CATHARINES.—Charles Young, shoes, offers 50 cents.

TORONTO.—N. C. Brown, grocer, has assigned. Liabilities about $1,800.

TORONTO.—P. Sullivan & Co., undertakers, have failed and gone out of business.

PROVINCE OF QUEBEC.

BEAUHARNOIS.—N. Marleau, general store, has assigned and offers 50 cents. Liabilities $2,171; assets about $1,500.

BELLEVILLE.—T. L. Bayeur, shoes, has assigned.

JOLIETTE.—Joseph Dalphin, hardware, has failed and gone out of business. Liabilities about $3,000; assets $1,000.

LAKE WEEDON.—Joseph Beaupre, hotel, has called a meeting of creditors. Liabilities about $3,500; assets $1,000.

MASKINONGE.—N. E. Clement, cheese factory, has assigned.

MONTREAL.—L. Abrahams, manufacturer of cigars, has assigned. Liabilities about $8,000; assets $7,000.

MONTREAL.—Lord & Munn, shipping and commission, have assigned. A large part of their capital was locked up in real estate which they had to take in some of their operations. They did a large business in fish, oils and flour, and formerly in grain, but recently they were pressed for ready cash, and suit was commenced against them for overdue bills.

MONTREAL.—A. Seath & Co., wholesale leather, have assigned. Liabilities about $15,000.

MONTREAL.—C. C. Snowden & Co, wholesale hardware, have assigned. It is said the immediate cause was the refusal of some banks to grant the necessary aid to carry some large accounts in which the firm was interested, chiefly in Winnipeg.

MONTREAL.—H. J. Stafford, shoes, has assigned. Liabilities about $2,200; assets $500.

QUEBEC.—Gibb, Laird & Co., wholesale grocers, have suspended.

QUEBEC.—Ovide Grenier, grocer, has assigned.

SHERBROOKE.—Louis Nicol, grocer, has assigned. Liabilities $5,893; actual assets $1,800.

SOREL.—A. Laconture, hotel, has compromised at 50 cents.

ST. ANGELE.—Joseph Dubrie, general store, h assigned.

ST. REMI.—Therien & Brother, general store, have called a meeting of creditors.

No. 243 BROADWAY, NEW YORK.

THE GREAT

Northern Pacific Route

IS NOW OPEN

FROM ST. PAUL AND DULUTH TO LIVINGSTON, AT THE HEAD OF THE YELLOWSTONE VALLEY, AND FROM PORTLAND AND PUGET SOUND TO A POINT NEAR MISSOULA.

THE GAP IS NOW ONLY 240 MILES
and will be closed early in the working season of 1883.

The Northern Pacific Railroad

IS THE DIRECT LINE

To the famous Wheat Fields of Dakota.
To the beautiful Yellowstone Valley.
To the wonderful National Park.
To the great Montana Cattle Ranges.
To the new Gold and Silver Mines.
To the new Grain Belt of Washington.
To the Rich Valleys of Oregon.
To the magnificent Puget Sound Region.

It runs through the Growing Towns of the New Northwest.

IT PASSES THROUGH SCENERY OF UNSURPASSED BEAUTY.

IT IS THE BEST ROUTE

For Settlers, Travelers and Sportsmen.

Fast Trains and Pullman Cars.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, APRIL 7, 1883.

NOTES OF THE WEEK.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country indicate that the condition of general trade has changed but little during the week. A slight improvement over last week is reported, but it has only developed sufficiently to warrant an increased feeling of confidence in the future. At present trading in most lines is on a very conservative basis. In the east collections are somewhat easier. In some localities in the middle states an increased activity is noted, and an improvement in collections is reported. In other districts in this section the industrial situation is not altogether satisfactory. There is no change worthy of note in the business situation in the west save that there appears to be a stronger undercurrent of confidence. In some localities collections are good; in others they are reported slow. The backward spring has retarded the improvement of trade in some sections, and in others the bad condition of the roads has operated to clog traffic somewhat. On the whole the general feeling is healthful, and the tendency is toward a steady improvement. The reports concerning crops are, in the main, favorable, the late rains and warmer weather having strengthened confidence considerably. Reports from Kansas are to the effect that the excellent rains of the week have greatly improved the prospects of the wheat crop, which promises to be large. The San Francisco dispatch indicates that the prospects for a good crop in California are excellent. In the south business has been fairly satisfactory. Some improvement in retail trade is noticeable, and the general tendency is to steadiness. The jobbing trade is fairly active. The crop prospects are, for the most part, regarded as good, and the weather is generally propitious. Crop news from the sugar districts is favorable, but there is great apprehension about the river.

A further analysis of the mercantile failures for the quarter, as reported to BRADSTREET'S, will be found on another page. The main lesson taught by this analysis is the very large percentage of small traders making up the total for the quarter. This point again enforces the wisdom of narrowing credits in retail trade. Nearly one-half of the failures of average liabilities below $25,000 were of general retail stores and retail grocers. In looking after the causes of the more important failures, it is manifest that by far the greater part of the disasters are traceable to comparatively remote influences in the shape of bad management rather than to facts in the immediate financial situation.

The loan market passed its spring period of stringency last week, and with easy rates for money assured for the summer months, the large operators and cliques who are so loaded with stocks appear to have determined on making one more effort to lift prices. They have been steaming up prices for the past few days, beginning with a sudden advance in Northwest, and it now only remains to see whether this last bull combination will hold together any better than others which have been made since the opening of the year. It is conceded that there is no public buying in this market, and the object of the leaders of the bull movement is to induce it by keeping prices on the advance. The amount of advance which will be required to bring in the public is, of course, an unknown quantity. Rates of exchange have been on the rise, and are now far above the gold importing point.

In another column will be found a letter from Mr. Robert J. Creighton, agent of the New Zealand government. Mr. Creighton writes from San Francisco, but he is about to visit the eastern states and Washington, with a view of arranging for an improved mail service between New Zealand, Australia and the United States. Last year the exports to Australia from the Pacific coast amounted to $1,645,544; imports, $1,591,605, exclusive of gold. This trade is increasing steadily, but its continuance is very largely dependent upon the maintenance of an adequate direct mail service with the United States. It is to be hoped that Mr. Creighton will receive at Washington all the attention which the importance of his mission suggests. The trade of the United States with the more remote countries is constantly increasing. The manufacturers of the United States are finding themselves more and more in need of a world-wide market. For this and kindred reasons we need to look sharply to the extension of our postal facilities with foreign parts.

The current discussion in the daily press regarding the proposed amendments to the New York city charter well illustrates the method of the press in dealing with each particular move of the New York politicians, as though the future of the metropolis were dependent upon the immediate outcome of this or that new division of the spoils. The language used could not be more energetic were some far-reaching scheme of municipal reform under consideration. The proposed reference of the mayor's appointments to the Board of Aldermen is received with scorn for the reason that the composition of the present board is notoriously disgraceful. Quite all responsibility having been taken from the New York aldermen, it was to have been expected that whatever of responsibility there was left in them would speedily disappear. The truth is that the press of New York city undertakes to discuss the important questions bound up with the conduct of the city's business without patient inquiry in relation thereto. The subject calls for scientific exploration. Questions should be answered rather than asked. There should be less of scolding and more of instruction.

Mr. Childers' first report as Chancellor of the Exchequer was laid before the House of Commons on Thursday. The revenue for the fiscal year ending March 31, 1883, was £89,004,000, exceeding the estimate by £4,069,000. The expenditures were £88,906,000, showing a surplus of £98,000. A reduction of £5,000,000 was occasioned by the decrease in the consumption of spirits. The expenses of the war in Egypt, including the amount contributed to defray the cost of the Indian contingent, were £3,896,000. The present administration had inherited £7,850,000 war charges. There were no arrears to report on account of war expenditures incurred by the present government. The expenditure for the coming year is estimated at £85,789,000 and the revenue at £88,480,000. During the past year the national debt was reduced by about £7,100,000, and for the current year the reduction, it is expected, will amount to £8,000,000. In the next twenty years Mr. Childers expects to see the debt reduced by £172,000,000. Among the Chancellor's recommendations are proposals for the abolition of the tax on railway earnings where the fares are small in amount, for the reduction of the rate for telegrams to 6d. each, and for the removal of a portion of the income tax.

We give place elsewhere to a statement from the Chicago *Times* regarding the non-success of the minority representation or cumulative voting scheme in Illinois. It will be recalled by many that by the new constitution of Illinois, passed in 1870, the voter of that state was armed with the privilege of massing votes, which might be cast for a number of candidates or for a single candidate, to the end that the minority might secure one or more representatives. It now appears that in practice the scheme asks too much of the voters. The average political human nature is not sufficiently given to reflection and intelligent action to use effectively the privilege pointed out. This outcome of a political experiment will tend to chill the ardor of those who are given to relying upon this or that ingenious device in politics. Men still act too much in masses for the success of such a scheme as minority representation; and, so far as can now be seen, they promise to continue so to act.

The reports from Europe are not of a very reassuring character. England seems to be resting uneasily upon skilfully-laid trains of dynamite. Persons have been arrested having in their possession large quantities of this terrible explosive, or something resembling it. In one place, it is reported, a nitro-glycerine factory was discovered in full operation, and fitted with chemical apparatus for preparing the explosive. The amount of nitro-glycerine already seized in London is said to exceed half a ton. From other parts of Europe mysterious fires and explosions are reported. A number of Socialist members of the German Reichstag were arrested while on their way from a Socialist congress at Copenhagen, and their papers were seized, but they were subsequently released. Among other disquieting reports is that relating to the triple alliance against France. It is said that Italy and Austria have given their assent to a treaty by which each guarantees to the other complete integrity of territory. The treaty, it is also reported, contains a clause in which it is mentioned that the approval of Germany has been given. Some of the Italian journals have made the reports concerning the alliance the occasion for exceedingly bitter anti-French articles. One of these journals says that from the Baltic to the island of Sicily France has none but enemies who are ready to attack her if there is the slightest cause of war, and that Italy will not fail when the chief of the alliance gives the smallest sign to find such cause on a few minutes' notice. The outlook disclosed by these reports is, indeed, anything but a cheerful one.

FACTS FOR THE BRITISH INVESTOR.

The letter of our London correspondent, published last week, is peculiarly interesting, as displaying the need of enlightenment by the British investing classes about certain matters here in which they have large pecuniary interests. The recent decision of the United States Supreme Court, and the consequent fall in the price of Virginia state bonds, causes our correspondent to remark:

People are talking as though it is in the power of any American state to be dishonest if so be it has a mind to, and that all prospect of redress from the higher courts is at an end. This is, of course, very much of an exaggeration.

We will say, for the benefit of our London readers, that it is no exaggeration. It is simple fact; and it is very important to them to remember that it is, and since the eleventh amendment to the Constitution was adopted, in 1794, that it always has been a fact. Neither would it have made any difference if the decision of the Supreme Court had been the other way—not a particle—for the sufficient reason that no judgment could have been enforced against the state. Representations to the contrary are either made in error or from interested motives. If a state chooses to repudiate its bonds it can do so, and neither federal nor state courts can compel it to pay a farthing. We have learnt that here to our cost. The case of Tennessee is in point. Wall street was a terrible sufferer from the dishonesty of that state comparatively recently. The State Legislature had, after a long contest, passed a law to refund and pay the debt, or a portion of it. The bonds were selling in consequence at 75, and it was expected they would soon go to par. The repudiators appealed to the state courts, and the State Supreme Court had little difficulty in finding that the law had a constitutional flaw in it and was therefore void. On that decision the bonds fell at one fall to about 45, and at the last election in that state the party of repudiation had a complete triumph at the polls. The newly elected Legislature then took up the debt question again, and has recently passed a law which scales the principal down one-half and the interest to 3 per cent. This is for Wall street, if so be that the street can again be worked. But it is no use. The trick is played out. Wall street believes that the people of Tennessee will not pay a cent, and it is doubtless right in its belief. It will not now touch the bonds of any southern state which has a record of repudiation. A new bond could not be marketed at twenty cents on the dollar. The British investing public should learn this lesson. Give such bonds a wide berth; they are worthless if the people of a state choose to make them so. Above all, let the British investor stop throwing good money after bad by paying heavy lawyers' fees seeking redress from the courts. They can do nothing for him or for us.

Nevertheless our London correspondent is right in thinking that Massachusetts bonds are good, though Virginia and Tennessee repudiate. They are good as gold; sound as an English consol or United States government bond, and will be as long as the state of Massachusetts exists. He is right also in saying that Illinois Central stock is good, though Reading went from 10 per cent. dividends into sudden bankruptcy. The Illinois Central is one of our gilt-edged railroad securities. It is looked upon in Wall street as one of the finest railroad properties in the country. As to Reading, we here have a bone to pick with the English investor; for when President Gowen had mismanaged the property into bankruptcy, and had been driven from his hold on it, he went over to London, hired a hall, and talked the London stockholders into an enthusiastic support of his scheme to recover possession. People here thought the Londoners had gone crazy under his persuasive influence. The McCalmonts, who led the English opposition to him, were roundly abused in some of the leading London daily papers. They have no right in London to complain of Reading after this display of folly.

Our London correspondent, doubtless representing the views of the average British investor, wonders why the United States Treasury Department employs so cumbrous a machinery as bond calls to restore to circulation the large amounts of money it withdraws and locks up in its vaults. He points out that the English government deposits with the Bank of England, consequently keeps the money constantly in circulation; and he is surprised that our government does not do the like. Our London readers must look into our political history for the reason. If they read up on this they will discover that a bank of the United States, which should do for this government what the Bank of England does for the English government, was part of Alexander Hamilton's orginal fiscal scheme; and could the plan have been carried out as he framed it that bank would be in existence to-day. The scheme was objected to as unconstitutional, while yet the Constitution had barely come into existence; nevertheless the bank was established and ran its full chartered existence from 1791 to 1811. Political opposition denied it a renewal for the time, but in 1816 it was chartered again for twenty years, and as this period approached its expiration the administration of President Jackson was convulsed with the quarrel over bank or no bank, he having declared himself its uncompromising enemy. He carried the day, and the bank charter was not renewed. The contest, however, still raged, until in 1846 it was settled by the passage of a law called the Independent Treasury act, which enacted the present system. This worked well enough before the civil war, when the government receipts and expenditures were, as compared with what they are now, a mere trifle; but the machinery works hard in these times, and the method of periodically letting out the surplus money which accumulates by the way of bond calls has been resorted to. Summing up, it may be said that the question of how the Federal government should do its banking has been one of the most violently contested political issues in our civil history.

CODIFICATION.

The question whether the law is capable of being reduced to a code is but a barren one, as generally discussed. The objections usually advanced upon this head are in effect not so much arguments against the practicability of codification itself as criticisms of the imperfection of human language and institutions. The intelligent advocates of codification, it is believed, recognize the impossibility of framing a code which will embrace the entire field of human rights and duties and which will at the same time be informed with such prescience as to provide for the decision of future possible controversies. The most they expect to accomplish is to reduce to a positive, systematic code the general principles of the law, together with the exceptions and qualifications which in the course of time have been engrafted on them. These sources and materials of the law are now found scattered through many thousands of volumes. The books of the law to which resort is had for expressions of its principles are not of equal authority, the relative weight to be given to some of them, such as reports, being quite often a matter of nice judicial discrimination. In a code, it is reasonably argued, the law would be freed from many of the sources of error inherent in the multiplicity of materials; it would be stated in a much more reasonable compass, and the statement of it would be a finally authoritative one (saving always questions of interpretation and application), each part thereof weighing equally with every other. But argument is hardly needed to demonstrate the practicability of codification in the restricted sense set forth above. Useful and convenient codes have been known before this in civilized communities. Every comprehensive statute covering a particular title in the law is in essence a code, and of such statutes there have been many examples in English and American legislation.

A point of much interest is involved in the question whether the law has reached such a stage as renders a resort to codification necessary or expedient. Codification has not been and is not likely to be resorted to in relation to a given legal system while that system is unsettled or liable to extensive changes, or until the extant expressions of the law have grown to be so numerous or inconsistent as to become sources of confusion or, at least, of extreme inconvenience. The task of codifying the law is always a difficult and hazardous one, never undertaken save under the pressure of necessity; and the class by whom such a project must eventually be carried out—the lawyers—are slow to move by reason of the conservative habits of mind induced by their training. But, speaking comparatively, the law may now be said to be in a fairly settled condition, and it is certain that the sources of the law, such as statutes, reports and treatises, are accumulating at an overwhelming rate. The indications are numerous that the necessity or, at least, the expediency of codifying the law is being more generally recognized, and nowhere are these indications more significant than in the state of New York. The law of procedure in ordinary actions was first codified in that state in 1848. In 1877 a much more comprehensive code was substituted for the earlier one, and some three years later another branch of the law of procedure, that relating to special proceedings, was added. This was followed by codes of the procedure in criminal cases and of the body of the criminal law. The civil code proposed by Mr. Field has been the subject of much discussion and criticism of late, but has not yet been adopted, though its ultimate success is apparently only a question of time. In India the mass of customs, regulations and laws arising from a variety of sources under which justice has been with difficulty administered in the past, is being rapidly digested into something approaching a homogeneous system. In England itself propositions have been made from time to time for the codification of the commercial law, and it is not improbable that this task will be entered upon in the near future.

There still remains to be considered the method according to which codification should proceed. It has been made a question whether the entire body of the law should be codified, or only a part of it. The objection has been made to any partial codification that benefits claimed for the system belong only to a complete code which should embody the entire existing civil jurisprudence of the state and behind which the courts should never be obliged to go to borrow a rule from the existing common law or equity. This objection, however, seems to have reference to the degree of thoroughness with which the codification is conducted, and can hardly be said to obtain against the codification of a branch of the law where such codification is carried out thoroughly. As far as the question of method is concerned, experience seems to afford a sufficient answer. It is seldom, indeed, that so gigantic a work as the preparation of a code of the entire body of law in any country is undertaken. One of the chief objects to be subserved by a code being convenience, it would seem that the most appropriate part of the law upon which to begin would be that part called most into use in the ordinary business of litigation, namely, the law regulating procedure, including under this head the law of evidence. The law of crimes and of criminal procedure should, of course, receive early attention, as constituting a branch of deep and peculiar interest to the community. The different titles of commercial law should then be dealt with, and after that any particular order might be followed. By the adoption of this plan, or of one nearly resembling it, the work of codification could be gradually completed; the parts of the law most constantly used would be first reduced to a code, and there would be afforded an opportunity to observe the working of the code in particular directions before committing the state to an entire change of system.

THE FAILURES FOR THE QUARTER AGAIN.

In view of the large increase of failures reported to BRADSTREET'S for the quarter it has been thought worth while to show the distribution by states of the more important disasters. It appears that out of the total of 3,189 failures for the quarter, only 38 had liabilities amounting to $100,000 and upward. Of these, 13, or one-third, are furnished by New York state. The middle states furnish 21, New England 3, the southern states 6, the western states 7 and the territories 1 out of the 38. The total liabilities of these 38 failures are $11,648,000, and the assets, known and estimated, $9,232,000, the percentage of assets to liabilities being 79. This is a large percentage, but, as noted last week, it should be borne in mind that the exceptional assets of two or three large concerns do much to bring up the percentage. It does not appear that the percentage of assets to liabilities in respect to large concerns is usually greater than in the case of small traders. The distribution of the failing concerns having liabilities of $100,000 and over with respect to trades is as follows: Bankers 4; wholesale boots and shoes 1; leather and hides 7; paper dealers 3; iron and steel manufacturers 3; wholesale clothing 2; wholesale dry goods 2; hosiery manufacturers 1; importers of laces 1; wholesale grocers 1; commission produce 1; general commission 1; manufacturers of

furniture 1; general stores 1; wholesale jewelry 1; wholesale liquors 2; wholesale fruits 1; naval stores 1; hat manufacturers 1; builders 1; piano manufacturers 1; total 38. A further analysis reveals that of the failures remaining (after deducting the 38), 194 show liabilities ranging from $25,000 to $100,000. The liabilities of these 194 failures foot up $8,489,000, and the assets $4,019,000, the percentage of assets to liabilities being 47. Of the 194 failures 73 occurred in the middle states, 21 in New England, 32 in the southern states, 54 in the western, 10 on the Pacific coast and 4 in the territories. The following table shows the classification by trades of the 194 failures having liabilities varying from $25,000 to $100,000:

CLASSIFICATION BY TRADES OF FAILURES HAVING LIABILITIES FROM $25,000 TO $100,000.

Grocers	10	Furniture	3
General stores	19	Toys and notions	2
Books, paper, etc	9	Leather	6
Lumber	10	Boots and shoes	2
Tobacco and cigars	4	Hotels and restaurants	4
Dry goods and fancy goods	19	Hats and caps	4
Hardware, iron and steel	14	Brewers	2
House furnishing	1	Drugs	4
Crockery and glassware	4	Carpets	1
Oils	2	Music	1
Grain	7	Rubber goods	1
Clothing, cloths, etc	11	Cotton	4
Watches and jewelry	7	Wool	1
Pictures, etc	2	Coal	1
Fruit	3	Furnishing goods	4
Provisions	5	Builders	1
Wines, liquors and saloons	5	Fish, meat, etc	2
Machinery	3	Miscellaneous	12
Banks and bankers	4		
Total			194

The third table below gives the classification of the 2,957 failures having liabilities below $25,000. The liabilities of these failures foot up $22,214,835, and the assets $11,819,878, the percentage of assets to liabilities being 53. The average of liabilities to each of those 2,957 failures was only $7,512. The distribution by trades of these small failures was mainly as follows:

General stores 603; retail grocers 490; retail dry goods 170; retail clothing 146; retail boots and shoes 160; retail dealers in watches, jewelry, etc. 85; tobacco dealers 72; stationery, books, etc. 72; hardware dealers 92; furniture 54, and hotels and restaurants 75. The broad fact to be noted is that the general bulk of failing traders continue to be in retail lines.

ANALYSIS OF FAILURES FIRST QUARTER 1883, BY SECTIONS.

Divisions.	*Number of failures with liabilities not over $25,000*	*Number of failures having liabilities from $25,000 to $100,000 inclusive*	*Number of failures having liabilities of $100,000 and upward*	*Total, U. S.*
New England states	405	21	3	429
Middle states	638	73	21	732
Southern states	731	32	6	769
Western states	914	54	7	975
Pacific states	216	10	..	226
Territories	53	4	1	58
Totals	2,957	194	38	3,189

ANALYSIS OF FAILURES IN THE UNITED STATES FOR THE FIRST QUARTER OF 1883 HAVING LIABILITIES OF $100,000 AND UPWARDS.

New England states.	*No of failures.*	*Assets.*	*Liabilities.*
Massachusetts	3	$120,000	$346,000
Middle states.			
New York	13	$1,288,000	$4,000,000
New Jersey	2	325,000	531,000
Pennsylvania	6	502,000	1,040,000
Totals	21	$2,115,000	$5,571,000

CHANGE IN THE FOREIGN TRADE MOVEMENT.

The foreign commerce of the United States for February last exhibited a marked falling away, as compared with that of January. In the opening month of the year the value of the exports of merchandise was $80,375,453, and of the imports $56,939,399, the excess of the former amounting to $23,436,054. In February, however, the excess in value of exports over imports was cut into some $12,882,444, amounting to but $10,553,610. The value of the exports had dropped to $66,856,279, or $13,519,174 less than in January, and that of the imports to $56,302,669, or $636,730 less than in the month preceding. The value of the January exports was greater than those of any month in 1882, except in November and December, when the exports amounted, respectively, to $80,967,520 and $92,966,026. Notwithstanding the heavy decline in foreign shipments in February, the total ($66,856,279) also ranks above the value of the merchandise exports in any month in 1882 except November and December. The value of the January importations was less than that in any month in 1882 except November, when they were valued at but $55,183,682. The continued decline in February, in all $636,730, marks a conservative spirit in the matter of foreign purchases, and one which, thus far, continues.

There were but four months in 1882 in which the value of exports exceeded that of the imports. They were as follows:

January	$7,964,827
October	10,109,191
November	25,785,838
December	33,465,677
Total excess	$77,325,533

The remaining months of 1882, those in which the value of importations exceeded that of the exports, were as follows:

February	$2,220,393	July	$11,187,337
March	5,989,929	August	3,004,140
April	8,408,791	September	593,760
May	19,171,061		
June	11,601,683	Total	$62,187,094

This furnishes a net excess in the value of exports as compared with the value of imports during the calendar year of $15,138,529. This applies, of course, to the value of merchandise shipped abroad and received only. The recent record respecting foreign trade reads, therefore, as follows: For the month ended January, 1883, the excess in the value of exports was $23,436,054; for the two months ended February 28 last it was $33,989,664; for the eight months ended on the date named the balance of trade "favoring this country" was $88,565,133, and for the year ended February 28 the excess in exports of merchandise amounted to $43,383,669.

The total value of the imports of foreign merchandise for the twelve months ended February 28 last was $750,302,425, against $692,948,247 in the preceding twelve months, thus showing an excess during the past year of $57,354,178, all of which gain was due to the movement within the preceding calendar year. The value of the total shipments of merchandise from the United States during the twelve months ended February 28 last was $793,686,094, against $813,263,942 in the preceding year, a loss of $19,577,848, all of which decline is due to the movement of merchandise abroad in the six months from March to August, 1882, inclusive.

Out of the total importation of merchandise in February last (valued at $56,302,669) New York city received goods to the value of $40,479,727, or about 72 per cent. of the whole; Boston and Charlestown, Mass., $5,846,383, or about 10 per cent.; San Francisco, $3,087,658, or 5 per cent.; Philadelphia, $2,208,381, or nearly 4 per cent.; Baltimore, $1,088,759, or nearly 2 per cent., and New Orleans, $1,013,431, or a trifle less, of the total importation during the month. The six cities named, therefore, received about 94 per cent. of the total imports in February.

INDIA AND THE EUROPEAN WHEAT MARKET.

Englishmen are beginning to discuss anew the reasons why British India is not able to compete with the United States in furnishing wheat to Great Britain and the continent. Bombay newspapers are confident of "India's ability to compete" with the United States in the European wheat trade, and point out that existing Indian railway freight tariffs constitute the only obstacle. This is very clearly shown by the following figures: During the period 1870 to 1876 the price of wheat at Chicago (960 miles from the seaboard) ranged from 23.72s. to 52.80s. per quarter. At Cawnpore (684 miles inland from Calcutta) the price of wheat during the same period fluctuated from 16.01s. to 25.93s. per quarter; at a point 837 miles from Kurrachee from 15.38s. to 24.98s., and at Jubbulpore (616 miles from Bombay) it ranged from 14.97s. to 26.79s. per quarter. In January last the prices of wheat per quarter at the three Indian wheat centers referred to were, respectively, 22.32s., 15.45s., and 22.32s., against 32.91s. at Chicago. In round numbers, then, wheat in India, at the important interior towns from 500 to 1,000 miles from the coast, was quoted in January, 1882, at from about $2.50 to over $4 per quarter less than a like quantity at Chicago, 960 miles west of New York. The ocean-freight rates from San Francisco to Liverpool are said by the Manchester *Guardian* to "average considerably higher than those from Indian ports," in spite of which about one-third of the British importations of American wheat come from the Pacific coast. Compared even with ocean freights on wheat from New York, those from the leading Indian ports do not prejudice shipments from the latter to a marked degree. With the rates of freight from Calcutta, Bombay and Kurrachee as high as 45s., 30s., and 35s. per ton respectively, the advantage in freights from New York is reported to amount to but 5s., 2s. 3d., and 3s. 6d. per quarter as compared with each of the Indian ports named. These excesses in ocean-freight charges from Indian ports as compared with like outlays in conveying wheat from New York to Liverpool, it will be noted, do not begin to offset the advantage possessed by interior Indian towns in the first cost of wheat as compared with like quotations at Chicago. As the writer of a recent pamphlet on the "Influence on English Trade and American Protection of the Development of India" well says: "Clearly, therefore, it is in the charges between the up-country farms and the ports that India is worsted."

This conclusion naturally calls for some consideration of the development of Indian railways with suggestions as to the best means of rendering them more efficient factors in extending India's export trade. The following figures are given to show the number of miles of railway possessed by India and the United States:

	—Miles railway open— *In U. S.*	*In India.*
1850	9,021	..
1860	30,635	836
1870	53,399	4,833
1880	93,671	9,875

In connection with these figures, it is pointed out that in 1880 India possessed but 4.16 miles of railway to every 100,000 inhabitants, while in this country there were 186.6 miles. It is also regarded as a conspicuous instance of the reluctance of capital to invest in railway building in India, where the lines to be built will run through a region containing thousands of inhabitants, and capable of producing large surpluses of agricultural products, while in the United States the railways have generally gone ahead into the wilderness, or through a prairie country, dragging population after them. Again, India holds the advantage of the cheapest of cheap labor, which is not the case in the United States.

An elaborate examination of the Indian railway rates from the principal interior wheat centers to the seaboard reveals the fact that not only is the average cost of carrying wheat to tide-water there something like 3s. per quarter in excess of similar freight charges in this country, but it is hampered by petty regulations and restrictions as to minimum and maximum loads, weights per bag, special bagging, etc.

This outline of the disadvantages under which the Indian wheat farmer labors as against his North American competitor in European grain markets tells the whole story. A heavy wheat crop in America can be disposed of at some price, but a bountiful yield in India frequently places the ryot in the unfortunate attitude of having to allow it to rot in the fields owing to cost of transportation exceeding quoted market price.

The remedy for all this is declared by those who have given the subject considerable attention to lie in the extension of the leading lines of Indian railways and in the construction of taps and feeder lines. The difficulty in the way of this is declared to be the indifference of private capital to investments of this nature. It is said to be hopeless to secure the general movement of capital toward railway building in India that has recently been observed in this country. The writer referred to above ridicules as inadequate the construction of 400 or 500 miles of railway a year by the colonial government, and recommends that useless officers and offices in the Indian government establishment be dropped, and £2,000,000 per annum saved with which to pay the interest at 4 per cent. on £50,000,000 capital. This sum, he proposes, should be raised and applied to a reorganization and completion of the Indian railway system. The plan is a bold one—for the moderately vitalized residents of India. That constitutes a merit, however, and it or some kindred scheme will be required before Indian agriculture will advance, and before India can take much more iron or fabrics from Great Britain. It is easy to see that the latter point is what interests John Bull in the plan proposed by the wide-awake Calcutta writer.

OCCASIONAL NOTES.

It is somewhat curious to observe the difference between English and American journals respecting the discussion of a measure so important to the mercantile community as a bankruptcy law. In American newspapers, as a rule, very little space and still less thought is given to the treatment of this very important matter—a circumstance which is somewhat singular, since the conditions here present seem peculiarly to demand the enactment of a uniform system of insolvency law. Some of those conditions are the existence of varying legal systems in the different states, and especially the differences in the exemption laws of the several states, which render the collection of debts owing between citizens of different states a matter of such difficulty. In England, speaking generally, those differences do not exist. The same necessity for a bankrupt law looked at from the point of view indicated would not seem to be present, and yet the most influential and authoritative journals there, even those not specially devoted to commercial topics, have devoted considerable space and ingenuity to the discussion of the principles upon which sound bankruptcy legislation should be based, as well as of the particular measure now before the English Parliament. To what this difference may be owing it is not our intention at present to inquire. It is sufficient to note its existence and to call attention to the fact that the subject is regarded as of capital importance—to the commercial world at least—in so highly-developed a trading community as England.

The New York State Anti-Monopoly League are industriously circulating copies of a petition, signed by a large number of persons, urging the passage of a bill to prohibit free passes on railroads. Railroads, say the petitioners, are public carriers, existing by virtue of public franchises, and hence should treat all persons equally for equal service. It is urged, as an additional reason, that free passes have become an agency for the demoralization of the press and public officials. The League, however, protests strenuously against the passage of the amendments to the original bill proposed by the railroad committee of the Assembly, for the reasons, among others, that the bill as reported from the committee, while prohibiting the granting of passes to members of the legislature, yet allows other persons supposed to be influential, such as editors, clergymen and lawyers, to receive such passes, and practically permits a railroad company to give one shipper a pass and withhold it from another. While there can be little doubt that the free pass system has been abused, and that the efforts of the League in endeavoring to secure its abolition are worthy of support, it is doubtful whether such a measure as that proposed will be effective in remedying the evil, especially under the relations which railroads at present bear to the public. A large and promising field for the exertions of the Anti-Monopoly League is to be found in the corporate abuses in the matter of earnings, reports, etc., upon which we have remarked before. For these evils, the influence of which is widely felt, the true remedy is in the enforcement of increased publicity in regard to the financial operations and management of corporations. Under the light which such a system would throw upon the dealings of corporate bodies, the free-pass system and other cognate evils would be corrected, a result which it is somewhat premature to hope for under present conditions.

The emigration statistics for Ireland in 1882, compiled by the registrar-general for Ireland, have been issued as a parliamentary paper. They show that 89,566 individuals emigrated from Ireland last year, an increase of 10,847 over 1881. The number of males was 47,246, or 6,929 more than in 1881, and the number of females 42,320, or 3,918 more than in the year before. Of the whole number but 430 persons were of other than Irish nationality. The whole number leaving Ireland in 1882 constituted 17.2 per 1,000 of the population of Ireland in 1881. The total number of Irish emigrants who have left Irish ports since May 1, 1851 (when the record of emigration began) is 2,804,740—1,493,560 males and 1,311,180 females. The smallest number registered in any year was in 1876, when the whole number leaving Ireland amounted to 37,587. In 1877 it rose to 38,503, in 1878 to 41,124, in 1879 to 47,065, and in 1880 it advanced to 95,517. In the decade from 1866 to 1875 the average annual number was 74,667, and in the preceding decade it was 88,272. In the four years 1851–54 it was 148,985 annually. The highest and lowest Irish exodus was 190,322 in 1852 and 37,587 in 1876. The United States in 1882 absorbed 65,962, or 74 per cent of the entire number of emigrants, compared with an average of 43,544 or 66.4 per cent. in the four preceding years. The numbers to New Zealand, which had increased from 2,524 in 1878 to 3,166 in 1879, decreased to 492 in 1881, and fell to 380 in 1882. Emigration to Canada showed a very large increase in 1882 compared with 1881, the numbers being 7,268 in 1882 and 2,916 in 1881. The emigrants to Australia in 1882 numbered 4,614, against 2,795 in 1881, 2,576 in 1880, 3,052 in 1879, and 4,251 in 1878. In 1831 the proportion of laborers to the entire male emigration was 68.4, and in 1880 73.1 per cent. The instances among males in which no occupation was specified only numbered 6,800, which includes 4,983 children under ten years of age. Of the 42,320 females who emigrated in 1882, 24,633 were returned as servants, 2,534 as housekeepers, 2,088 as seamstresses, 582 as dressmakers and milliners, and 230 as millworkers. The "unspecified," including wives and children, number 11,945.

Among the most recent discussions upon the question of a bankruptcy law in England, an article in the London *Times*, and one in the *Spectator*, are worthy of notice. The *Times* takes a very despondent view of the prospects of bankruptcy legislation in general, saying that the subject is not a very hopeful one, and has been the sport and despair of legislation for more than fifty years. In fact it finds the chief recommendation of the present law to consist in the fact that it is the universal conviction that the law of bankruptcy, as it at present stands, is as bad as it could possibly be. The lugubrious sketch drawn by the *Times* of the history of bankruptcy legislation in England during this century is almost amusing. "There have, in fact," says the *Times*, "been three distinct periods of such legislation in the present century—the period of primeval chaos which lasted till 1831, during which creditors had full control of the administration of bankrupt estates; the period of comparatively but gradually degenerating order from 1831 to 1869, during which a system of official administration under assignees was tried and found in the end to be unsatisfactory, and lastly, the period from 1869 to the present day, during which we have returned to a voluntary system of administration, and again been landed in chaos." After so long and so disheartening experience, it continues, it is difficult to feel much confidence in any system. In regard to the ground principle of Mr. Chamberlain's bill, that of treating bankruptcy as a public concern, the London journal expresses some doubt whether it may not be carried too far, but says that granting the principle, the machinery provided by the bill would seem to follow by natural sequence. The *Times* lays stress upon the abstract presumption against extending the functions of government, but recognizes that the logical issue of this principle would be the abolition of all special bankruptcy legislation of any kind. In default of such a conclusion, the *Times* adds, it may fairly be argued that the bill proposed is at least an honest attempt to correct previous failures, and to profit by former experience, and this is a recommendation in its favor which will weigh with practical men.

The *Spectator*, on the other hand, gives Mr. Chamberlain's bill its hearty support. The principle underlying the proposed measure it believes to be entirely sound. The right of managing an insolvent's estate, says the *Spectator*, belongs primarily to his creditors, whose property, in the fullest moral sense, the estate has become, and should only be taken away on grounds of convenience, or on suspicion that they are cheating one another; but the right and duty of adjudicating on the bankrupt's conduct belongs to the state, and cannot honorably be transferred to the creditors, who are never impartial and seldom competent. It is true, as the *Spectator* says, that bankruptcy is not of necessity a crime, but it is also true that it may be; and, as the London journal suggests, if a high standard of commercial honor is to be kept up, the state should inquire in each case whether there has been direct criminality or criminal negligence or recklessness or not. The *Spectator* speaks not at all too strongly when it says that a fraudulent bankruptcy is a theft on a huge scale, and should be treated like one. Far more and more widely extended mischief and even distress is occasioned by offenses of this nature than by the more violent sorts of crimes which yet do not fail to awaken an energetic public indignation. Modern tendencies, too, operate to render this class of offenses more hurtful, and precisely in the degree in which the complications grow in which modern trade relations are involved. The effort made by Mr. Chamberlain to deal with this evil the *Spectator* regards as the important feature of the bill. A rigid system of inquiry by the state it regards, in fact, as the first necessity of a wise bankrupt law, in presence of which all other questions are mere matters of detail. It is amusing to notice that one ground of opposition to the bill is founded upon the American "spoils system," whose unsavory reputation has gone abroad. It is feared in some quarters that the English civil service will be "Americanized" by the appointment of sixty official receivers, and it is asked with alarm whether the House will approve of "that enormous amount of patronage being given to any government department."

From a recent article in the *Journal des Economistes*, it is gathered that the Prussian people have not been advancing in prosperity during the past few years. This is inferred from the fact that the incomes of that people have diminished, on the whole, as shown by official income tax returns. The total number of "citizens" in Prussia in 1877 was 8,648,749, of which 3,387,428 were exempt from income tax, and 5,261,321 contributed thereto. In 1881, the whole number of "citizens" had increased to 9,155,885, a gain of 507,136; the exempts had increased to 3,931,231, a gain of 543,803, while the total of those paying income taxes had declined to 5,224,654, a loss of 36,667. The fact that the increased number of individuals who are exempt from the Prussian income tax more than equals the gain in "citizens" altogether, appears to be strong evidence that the masses of population referred to have not been augmenting their wealth. The aggregate incomes—as reported by the government—of the Prussian "citizens" increased from 7,397,000,000 marks in 1877 to 7,631,000,000 marks in 1881, a little over 3¼ per cent. The population, however, gained over 6 per cent. in that time, which sufficiently indicates that the average income per capita has declined. The increase in the exempt incomes of Prussian citizens from 1877 to 1881 was over 16 per cent.; on those from 420 to 660 marks per annum, the gain was 3.6 per cent.; from 660 to 1,500 marks the decline was 6.7 per cent.; from 1,500 to 3,000 marks the decline was 6.8 per cent.; from 3,000 to 9,600 marks the gain was 9.5 per cent.; from 9,600 to 36,000 marks the gain was 9.18 per cent. in the five years, and incomes from 36,000 marks and over gained 0.33 per cent. only. The average Prussian income therefore, per capita, is very small, being but about $70 per annum, as against about $150 in the United Kingdom—as remarked by the London *Statist*. It is suggested by the journal last named that the conclusions reached from the official figures given may be subject to partial reversal, owing to possible changes in the law, classifications or estimates of incomes, etc., but of which no evidence appears in the published returns.

The *Japan Gazette* says that for years past the Japanese people have endeavored to force upon the attention of their government the desire of the better classes for some form of representation in public affairs. The demand, it says, has never been definitely formulated, but it is probable that the aspirations embodied in the numerous memorials laid before the government, and in the frequent articles in the native papers, will before long be responded to. As evidence of this, the imperial rescript is cited consenting to governmental reform based on modified representation, to come into operation in 1890. The journal referred to encourages the agitators for political reform to continue their efforts, and to await with confidence the issue of the coming constitutional struggles. In regard to the external relations of the country the *Gazette* says that Japan should realize without delay that for the purposes of foreign war she is among the weakest of nations She has a standing army, and perhaps a dozen effective fighting vessels, but her coasts are exposed and absolutely defenceless, and not one of her cities approachable by sea is secure from bombardment. She has few transports, and when they are employed in unproductive service domestic trade is interrupted. She has no vessels to convey an invading force without withdrawing the scanty fleet from its cruise of defense. Of money, which is a necessity in order to supply the wants hinted at, the treasury is comparatively bare, not holding sufficient even to maintain an effective national defense. There is no breach of existing friendly relations probable, except with China, and a war with that country would be a war of delay, which would soon exhaust the resources of Japan, while China would suffer comparatively little. In short, the *Gazette* concludes that Japan's best defense lies in the recognition of her own weakness, and in the adoption of a policy which, while encouraging domestic reform and the development of the resources of the country, would aim to secure and retain the good opinion of foreign powers, who would be likely to intervene to prevent the oppression of a weak by a strong nation.

SPECIAL CORRESPONDENCE.

THE NEW GOLD CERTIFICATES.

Washington, April 2. — The Secretary of the Treasury has been called upon to decide a novel question with respect to the new gold certificate law, and it is said that the temporary opinion, which has been given by the Acting Secretary of the Treasury, is not necessarily the final one. The question arises upon a request from the Chicago banks that a distinctive series of gold certificates be issued for the sub-treasury at that city. This request is based upon the fact that, although the Chicago bankers had taken out a very considerable amount of gold certificates of the larger denomination, when, owing to the scarcity of small bills, they desired to obtain $20 pieces, and presented their large certificates in exchange, the Chicago Sub-Treasurer informed them that he had redeemed gold certificates presented by other parties to the amount of the deposits which had been made with him, and that the Chicago banks would have to go to New York for their gold. This fact has created some excitement in banking circles in Chicago, and, in consequence, banks have requested this distinctive issue of gold certificates. They desire to deposit their gold as a special deposit, and to always be certain that it will be there upon the presentation of their certificates, and they not be compelled to incur the expense and be put to the delay of transporting gold from New York. This request was refused by Acting Secretary French, but it is claimed that Judge Folger, upon a return to his duties, may decide to issue the distinctive certificates, and that at all events the question is to be considered as in abeyance.

From a consideration of the gold certificate law it would appear that the law does not prohibit the issuance of distinctive certificates. Whether they shall be issued is a question of expediency. That portion of the bank recharter law which relates to this subject is contained in the following language of section 12: "That the Secretary of the Treasury is authorized and directed to receive deposits of gold coin with the Treasurer or assistant treasurers of the United States, in sums not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each, corresponding with the denominations of United States notes. The coin deposited for or representing the certificates of deposit shall be retained in the Treasury for the payment of the same on demand." The only designation as to the place where the coin shall be kept is that it "shall be retained in the Treasury for the payment of the same on demand." The construction of the word "Treasury" in similar acts has not necessarily meant the Sub-Treasury at New York city, although the Treasury Department, in issuing these gold certificates, has caused the following inscription to be placed upon their face: "——— dollars of gold coin have been deposited in the Treasury of the United States. That sum is redeemable in gold coin on demand, on presentation hereof at the office of the United States Assistant Treasurer at New York city." The designation of New York city is for the convenience of the Treasury. New York is the redemption city for legal tenders, but the Sub-Treasury at New York is no more the "Treasury of the United States" than is the Sub-Treasury at Chicago or at Boston. And, under the language of the act, the Secretary of the Treasury could, with equal authority, state that the gold certificates might be redeemed at any sub-treasury. It is a question whether it was not the spirit of the law that these certificates should be redeemable at any, or at all, of the sub-treasuries. A careful review of the debate in connection with this branch of the bank recharter bill would lead to the conclusion that the object of these gold certificates was, that the gold might be deposited in any sub-treasury city, and that it might, in consequence of such deposit, be redeemable in that city. The practical operations of the law show that there is no certainty that gold certificates issued at any sub-treasury can be redeemed anywhere except at New York city. The sub-treasurers, upon the principle of "first come, first served," will pay out an amount of gold equal to the amount they have received in exchange for gold certificates, no matter who may be the holder of such certificates. To this extent the spirit of the new certificate law is violated when a certificate is presented at the sub-treasury from which it has been issued, and payment is refused upon it, and the holder informed that he can only get his money by paying the express charges upon the gold from New York.

That there is nothing in the law which would prevent the issue of distinctive certificates seems clear. If the law does forbid this, the Secretary of the

Treasury has already violated it, for two distinct issues of these gold certificates are already in circulation. There is the New York Sub-Treasury issue, which was the first, and was intended to be the only issue, and there is what is called the "Treasury series," issued at Washington. Sub-Treasurer Acton had the ambition to have his name upon all the gold certificates, but he found that there were physical difficulties which could not be surmounted in connection with the signature, and as a consequence, after considerable delay and much reluctance, Secretary Folger directed the issue of an additional series from Washington. This latter series contain the written signature of no officer. It is prepared exactly as all bonds, notes and government securities are prepared at the Bureau of Engraving and Printing. The point that but one series of certificates could be issued seems to have been waived when the Treasury series was determined upon.

The arguments made in favor of the distinctive issue are quite plausible. The Chicago bankers, for instance, urge that not to redeem the certificates is to discredit the government currency; that by means of distinctive issues alone can the government always locate its gold balance; that it is a serious embarrassment to any business community to discover that it cannot exchange certificates for the gold which it has deposited at its own local money center, and that such a practice makes it possible for combinations to accumulate all the gold at distant points, and make it difficult for the government to protect is own redemptions.

But, while it may be true that the law authorizes, or, at least, does not forbid, a distinctive issue of gold certificates for the nine sub-treasuries, the reason assigned by the Treasury why it is inexpedient to issue such separate series seem to be valid ones. These reasons may be thus summarized:

1. The law is certainly not mandatory, and the discretion may wisely be left to the Secretary of the Treasury.

2. The issue of separate series of certificates to the nine sub-treasuries would require the keeping of nine separate sets of books. This is an undertaking for which the Treasury at present is not equipped.

3. It might involve making distinct plates, or, if not entirely separate plates, there must be such distinctive marks engraved as would make the certificates clearly separate. This would involve very considerable expense.

To these merely mechanical and economical objections should be added the fact that—

4. If separate certificates should be issued the certificates of any city may be discredited at another city, and the evils of the old "stump-tail" currency, which lost its value at state lines, be revived. The holder of a Chicago certificate at New Orleans, for instance, at a time when gold was scarce at the latter city, would be embarrassed. Petty complications of this kind would constantly arise, and would cause more trouble than the temporary embarrassment which resulted at Chicago from the fact that the banks took out only large certificates. Such a practice would injure the value of the gold certificates as a circulating medium. If each sub-treasury from which certificates may be issued does not happen in every case to have gold for redemption, the certificates have the same value as a medium of circulation, and as a means for effecting exchanges through clearing-houses. The gold certificates are gold demand notes of the government, but there is no reason why they should be given a quality which the legal-tender note does not possess. The latter are redeemable upon presentation at the Sub-Treasury at New York city, the chief redemption city of the government. An issue of distinctive certificates for each sub-treasury city would give these certificates a geographical character.

There is no reason why the United States gold certificates issued under the new law should not be the world's currency, as the Bank of England note is, and there is no reason why an American traveling abroad could not carry these gold certificates instead of letters of credit. But these certificates could be put to no such use if, instead of being gold certificates for the entire country, they should in fact become local gold currency, redeemable in ten distinct cities. If the Chicago bankers had taken out small denominations, which could have been used for moving the crops, instead of the large denominations, it is possible that this interesting question would not have arisen. A similar demand has not been made from any other sub-treasury city.

NORTHWESTERN TRADE PROSPECTS.

St. Paul, Minn., March 28.—Trade prospects for the country represented by the twin cities, St. Paul and Minneapolis, are fair; in fact, encouraging. Last season merchants here and in Chicago were induced to "boom" trade, almost forcing sales of merchandise by their readiness in granting credits, instigated in part by the predictions of the immensity of the then growing crops. Country storekeepers laid in stocks freely in anticipation of large demands at good-paying profits for them. Trade was backward throughout the winter, and currency scarce among farmers, as crops were deficient in quantity, and in some places weather-stained in quality. Wheat prices, early, were not satisfactory to farmers able to hold for a rise, and some grain was held back. Even now there are in Dakota three times as many stacks of wheat in the fields as ever before known at this time of the year. In other portions of the Red River valley there are many stacks not yet disturbed. Storms and winter-blockaded roads have prevented movements of grains, or held them in railroad elevator towns. Currency showed but limited circulation, and storekeepers, in many instances well secured by chattel mortgages, had to carry their farmer customers, and in turn were obliged to get extensions from city merchants. As the country traders did not see the "boom" they had expected, they gradually worked off their winter stocks of goods, replenishing only sparingly while liquidating their city indebtedness. Nearly all of the city merchandise houses carried several of their customers, thereby saving many failures, and are now reaping the reward, for many buyers are in condition to again take hold and pay their debts, beside purchasing anew. Country stocks are now well depleted, which will necessitate liberal purchases hereafter. General trade is retarded now by the weather, which has been lately cold and mild by turns, and not settled. In sections tributary, in the Red River valley and in the west, country roads are bad for hauling, by reason either of well cut up snow-drifts or by mud from melted snow. Traveling-men are out obtaining orders, but wagon-hauling is difficult, so that the movement of goods is within moderate limits. All this means just so much more trade when snow shall have melted and roads hardened under warm suns and drying winds. Spring sowing is now waiting for the weather. After that is finished the demand for goods will increase. The general opinion among merchants here is that by April 15 trade will assume healthy proportions, and thenceforward increase in daily volume. The cash basis for the future prosperity of the trade of the northwest is found in two facts: wheat yet to be marketed, and immigration. The statements regarding the former are widely diverse. Railroad men say that in Dakota alone 6,000,000 bushels of wheat are still unmarketed, while wheat dealers assert stoutly that only 20 per cent. of the wheat crop is now on hand, either in Minnesota or Dakota; but it is a fact, as heretofore specified, that there is a large quantity of wheat in stack, unspoiled, on the lines of the Northern Pacific and the St. Paul, Minneapolis & Manitoba railroads. But much or little, it is undeniable that there is enough wheat to come to set in motion considerable currency to the full extent of the amounts that for two months past have been shipped westward by the city banks on direct orders. But the prime element for the immediate future is in immigration. This has already commenced. During the fall and winter months the agents of the two great lines, the Northern Pacific and the Manitoba, have been actively at work in the eastern states of this country and in Europe. They have sought not only for people to occupy their lands, but have devoted their energies to secure families with means. All reports, official and otherwise, are that they have been successful in this. Northern Dakota alone, on the line of the Northern Pacific Railroad, will receive between 50,000 and 75,000 new settlers. The entire territory will, from all indications, obtain 100,000 people during the season to the fall months of 1883. Many are now arriving and settling at points west of the Missouri river, that are trade tributaries to Bismarck and Mandan, which means trade for St. Paul and Minneapolis and other western centers. In southern Dakota there is a rush of immigrants, and customers are being sought there by our merchants. Montana is ready for the swarm to come, and western merchants have their arrangements made to capture the trade. Immigrants are going into the Red River valley and to southwestern Minnesota. The average numbers of persons to the family are three and four, and at the very lowest estimate their average capital per head of family will be $500. The American emigrants, now coming and to come, from Michigan, Illinois, Pennsylvania, Ohio, western New York and the New England states, will many of them bring $3,000 and $5,000 for each family. Quite a number have already come with $10,000. These must be fed, and put out their money for various articles needed for engaging in their new employment. Last year, in the three best months, the St. Paul, Minneapolis & Manitoba averaged 1,000 passengers per day. It is true many of them went through to Winnipeg, Manitoba, but this year, from reliable data, it can be affirmed that the passenger traffic will average 2,000 head per day, 90 per cent. to remain this side of the Canadian line. In the Turtle mountain, Devil's lake and Moose river country, in the north, over 9,000,000 acres of land have been thrown open for settlement. In this tract large areas of solid timber attract immigrants. All this means additional trade for the northwest. The future of crops is a matter of weather; the opinion here is that they will be good, however. But if they should fail in some portions, the ready capital brought by immigrants can pay for the necessities of life, thus creating a demand for goods that will keep merchants busy and make them financially strong. Money is close, but there are signs of improvement. The facts justifying prognostications as to future prosperity in the northwest, are: Light stocks in country stores requiring replenishing; wheat yet to be marketed; immigration with capital. It is too early to give definite figures as to new railroad mileage for the coming season, but all present indications are that it will be much less than last year. The policy of the companies, aside from the completion of the Northern Pacific and the progressive work of the Canadian Pacific, seems to be to conserve what has already been accomplished, and to build no more extensions beyond the actual requirements of business or absolutely demanded by settlements. They will spend money, however, and that freely, in improvements of tracks, enlargement of equipments and the general perfection of their systems, so that they, too, will be the agents of currency circulation and incidentally promoters of trade.

LETTERS TO THE EDITOR.

NEW ZEALAND AFFAIRS.

To the Editor of BRADSTREET'S.

SIR—In your issue of the 17th inst. there appeared a very interesting review of Australian and New Zealand agriculture. With your permission I shall supplement it by a few additional figures relating to New Zealand, with which I am more especially identified.

The area in wheat this season was about 400,000 acres, and the estimated yield 11,900,000 bushels, being an average of 28 bushels per acre. This is higher than the previous year's average, but advices by the last mail report a heavy crop. Estimating the average price in New Zealand at 3s. 6d. per bushel, which is moderate, the wheat crop is worth £1,980,000. The oat crop is estimated at 35 bushels an acre, with a total of 8,750,000 bushels, which is worth £875,000 at 2s. per bushel; and barley 700,000 bushels, worth £122,500. The money value of these three crops, therefore, is £2,977,500, or $14,887,500, not a bad harvest for a sparsely settled country, numbering half a million of people, exclusive of 45,000 Maoris, who add little to productive industries in excess of their own requirements. Immigration to New Zealand has been actively resumed.

Last year New Zealand exported agricultural products worth £1,140,000; wool and other animal products £3,601,727. Over 400,000 acres are laid down in artificial grasses for permanent pasture, and about 270,000 acres are in rape and turnip crops for sheep and cattle feed. The year's return from this cultivated area is estimated at £2,000,000, as represented by butchers' meat, milk, butter and cheese; potatoes, hay and grass seed £200,000, and wool, manufactured in the colony, £250,000. In other words, averaging last season's farming operations in New Zealand by the prices obtained in former years, it is worth £9,177,500, or $45,887,500, of which about $26,275,000 will be exported. This does not include fruit, corn, garden truck, etc., of which considerable quantities are marketed. Neither does it include lumber, coal, gold, etc.

The wool export in 1882 was 65,322,807 pounds, worth £3,118,554; gold dust and bullion, £956,823, being a decrease from former years, and of rabbit-skins about 9,000,000. Rabbits destroy the pastures in New Zealand and Australia, and vigorous measures are being adopted for their extermination. Ferrets are now bred in New Zealand to wage war against these enemies of the pastoral interest; meanwhile canned rabbit and pelts are shipped to England in quantity from several of the colonies. The total exports of New Zealand for 1882 were £6,654,341; imports, £8,634,076, making a total foreign trade last year of £15,288,417, or $126,442,085.

One of the heads of export upon which great stress is laid in the colony is "frozen meat"—in other words, sheep carcasses—preserved by the Bell-Coleman process. Nearly every steamship on the direct trade with Australia is provided with refrigerating machinery, and shipments have been sold in London, Manchester and Glasgow at remunerative rates. A cargo of mutton from Sydney and another from New Zealand were recently placed on the Smithfield market, London, almost simultaneously. The New South Wales mutton fetched 6d. and the New Zealand mutton 7½d. per pound, showing the special advantage which farmers in the latter country have over those in Australia. Two or more cargoes of frozen mutton are now afloat from New Zealand, and the New Zealand Shipping Company's pioneer steamship of a direct line between London and New Zealand is due at date at Wellington. This is the British King, a steel vessel, having on board 150 immigrants. The service is to be a monthly one, and the following new steel boats are to follow in the order named: British Queen, Fenotanton, Ionic and Doric. Messrs. Elder & Co., Glasgow, are building three steel steamships for the New Zealand trade, which will be ready by the close of 1883.

I mention this point particularly because it has a direct bearing upon the export trade in wheat between the United States and England. The colonial trade in fresh meat is in its infancy, but the colonists anticipate great development. The Bell-Coleman process is a guarantee against over-production as long as Europe does not produce enough to feed its population. Cattle are increasing in the colony at the rate of 40,000 yearly, horses about 8,000, while pigs are decreasing. California and British salmon and trout, eastern trout, white fish, deer and flying game, including pheasants, grouse, California quail and prairie chickens, have been successfully acclimated. Wooden shipbuilding is a prominent industry, while a new steel sea-going steamship is reported in course of construction at a Dunedin shipyard. Fruit farming is becoming popular, and small outputs of canned fruit and fish are noted.

The ordinary and territorial revenue for 1881-82 was £3,488,170; expenditure, £3,278,820. The public debt of New Zealand was £29,165,511, subject to a deduction of £2,266,418 accrued sinking fund. Total annual charge for interest and sinking fund, including interest on advances, £1,510,527. The expenditures included appropriations for immigration, railroad construction, wagon roads, land purchase, water works on gold fields, telegraph extension, public buildings, harbor works and lighthouses and defense.

On March 31, 1881, New Zealand had 1,333 miles, 40 chains of railroad in operation, costing £9,443,000; net income on the year £3 18s. 2d. per cent. on cost. One hundred and eighty-eight miles were in course of construction. Three thousand eight hundred and twenty-four miles of telegraph were in operation, yielding a handsome net return on cost. Total expenditure of the colony in promoting immigration from Europe, £1,892,608. The fact that New Zealand negotiated a loan for £1,000,000 in London a few weeks ago, after the total failure of Victoria to float a £4,000,000 loan, although much more heavily burdened with debt than the latter country, shows the estimate of its credit in the money center of the world. New Zealand securities are inscribed at the Bank of England, and are therefore in demand by small investors and trustees. It further demonstrates that a large public debt is not a national evil. Excluding Maoris, the per capita value of the foreign trade of New Zealand in 1881 was £27 7s. 10½d. of the mean of population. Last year the average was higher. The inward tonnage in 1881 was 420,134 tons; outward, 413,478 tons. The vessels on the New Zealand register aggregated 72,387 tons, of which 15,636 tons were steam vessels.

Accumulation is shown by the bank returns and other financial institutions. Average liabilities of commercial banks doing business in New Zealand in 1881, £10,083,188; average assets, £14,836,645; paid up capital, £5,450,000; dividends on the year, £365,500; total reserve fund accumulated from profits, £2,681,259. The deposits in 190 post office savings banks in 1881 aggregated £1,189,012; withdrawals, £902,195. Other savings banks returned £251,220 deposits for the year, making a total to the credit of savings bank depositors of £1,232,787 at the close of 1881. Last year was more prosperous than 1881, and commercial and savings banks report an increase, but I have not the figures for the year available for quotation. The mortgages registered during 1881 represented £9,544,220; releases, £4,778,189. This disparity was caused,

doubtless, by speculation in land. The total private mortgages in New Zealand cannot fall far short of £30,000,000, interest thereon being promptly paid. Its land transfer system is inexpensive and simple, as well as secure.

Without going into tedious details I may state that New Zealand has a very perfect system of secular instruction, ranging from the primary school to the university, which has a royal charter. Its public institutions are well conducted, and no expense is spared to perfect its penal, reformatory and charitable establishments. It has an admirable police organization; its towns and cities are well lighted and paved; its harbors possess graving docks and wharves; its public parks, museums, etc., are creditable to so young a country; and last, but not least, its desire for intimate commercial relations with the United States is evidenced by the fact that, in conjunction with New South Wales, it has for more than ten years maintained direct steam communication with San Francisco, sending and receiving its English mail by that route. To sustain this line heavy payments have been made by the contracting colonies without any substantial recognition of its value to this country by the government of the United States. I hope that a different policy will in future be adopted. The Australian and New Zealand trade is worth £90,000,000 ($450,000,000) a year to England, according to a statement in a letter from the Prince of Wales to Sir Michael Hicks Beach, then Secretary of State for the Colonies, in which he reviewed the Colonial exhibits at the last Paris Exhibition. The United States might get a considerable share of this trade if it only cultivated it; but to get any part of it at all worth mention it will be absolutely necessary that direct mail communication with Auckland and Sydney be kept up; and this can only be done by the United States contributing towards its expense.

I am, &c.,
ROBERT J. CREIGHTON,
Agent New Zealand Government.
San Francisco, Cal., March 27.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

In the case of Wright vs. The Board of Trade, decided by the Illinois Supreme Court on the 29th ult., the status of boards of trade and their right to discipline their members was much discussed. The suit arose out of the July "corner" in wheat. Several defaulting firms, with heavy contracts on their hands, complained that a corner had been run, and that the price of spring wheat was fictitious, inasmuch as No. 2 winter wheat sold on August 1 for $1 a bushel, while the price of No. 2 spring wheat had been pushed by the corner to $1.35 per bushel. A tender of winter wheat in fulfillment of existing contracts was made, but was refused. The Arbitration Committee of the Board of Trade decided that the price of wheat for July delivery was $1.35 per bushel. The defaulting firms, recognizing that the decision of the Arbitration Committee rendered them liable to discipline at the hands of the Board of Directors, appealed to the courts to prevent the directors from enforcing the rules of the Board of Trade. A temporary injunction was granted by the Superior Court of Cook county, but was afterward dissolved. This judgment was affirmed in the Appellate Court, and the record was finally brought to the Supreme Court, which has just affirmed the decision of the courts below. The opinion of the Supreme Court, reciting the incorporation of the Board of Trade, said that that body was empowered to make rules, regulations and by-laws such as it might think proper and necessary for its government, not contrary to the laws of the land, to admit or expel such persons as it might see fit in the manner to be precribed by the rules, regulations and by-laws of the corporation, and to constitute and appoint committees of reference and arbitration and committees of appeal, who should be governed by such rules and regulations as might be prescribed for the settlement of such matters of difference as might be voluntarily submitted for arbitration by members of the organization and other persons not members. The court said that the charter undeniably conferred the power which the appellants feared would be exercised, and which they agreed might be exercised when they became members of the board. The purpose of the Board of Trade was to regulate and control its members in the buying and selling commodities on 'change, and to compel them to submit to the rules of the board prescribed to regulate their business transactions with each other. The body had in its preamble to its rules and by-laws defined its purposes: "To promote uniformity in the customs and usages of merchants; to inculcate principles of justice and equity in trade; to facilitate the speedy adjustment of business disputes; to acquire and to disseminate valuable commercial and economical information, and generally to secure to its members the benefits of coöperation in the furtherance of legitimate pursuits." "Thus to become a member is to enjoy these privileges and advantages on the condition of submission to the government, rules and regulations prescribed by the body. A member cannot enjoy and demand the privileges and deny the power of the company to govern and control his acts under the charter and rules and regulations it may prescribe. The company have adopted its rules, and appellants have violated them, and now seek to enjoin the association from enforcing its rules. They have received the benefits of the privileges and demand like privileges and benefits in the future, and yet seek to be exempted from the power of the organization to control and discipline them as it may all of its other members. If they may do this, why may not any other person resort to a court of law to compel his admission and retention as a member without the slightest conformity to its rules or liability to have them enforced against him? But appellants charge that members of the board 'cornered' the market and did other iniquitous acts, and by implication that the officers were parties to these unjust and illegal proceedings. If the officers and members of the organization have committed crime in violating the criminal laws of the state, let them be criminally prosecuted and be punished; or, if the corporation is being used for criminal, iniquitous and fraudulent purposes, it has forfeited its charter, and in a proceeding for the purpose, on the fact being found, it would be ousted of its franchises." In regard to the strong statements regarding the members of the Board of Trade, charged with engineering the "corner," the court remarked, not without a touch of humor, that it was a matter of surprise that honest, fair and upright business men should regard it so high a privilege to associate with men of the character ascribed by appellants to the members of the board.

A very interesting discussion of the law of trademarks was had in the Kentucky Court of Appeals on the 27th ult., in the case of Avery et al. vs. Meikle et al. The suit was brought by plaintiffs and appellants to restrain the infringement of their trade-mark by the appellees. From the statement of facts made by Chief Justice Hargis, who wrote the decision, it appears that the appellants were manufacturers of plows in the city of Louisville, and that they were accustomed to brand upon their steel and cast plows, in addition to their trade-mark, certain letters and numerals, together with certain cautionary words. The appellees, who were also engaged in the manufacture of plows in the city of Louisville, dismantled plows of appellants' steel and cast series, and with great accuracy copied every important and ordinarily noticeable part of them. They then manufactured two series of plows, one steel and the other cast, similar to those of appellants, and imitated closely the interchangeable parts of appellants' plows. They also imitated closely the style and arrangement of the letters, numerals and words of caution (which were of the same size and character of type, and were placed in the same position on their plows as on appellants), abandoning for this purpose the brands and numerals which they had been using and substituting appellants' brands in their stead. The trade-marks on the plows, however, were substantially different. The court held that the letters and numerals formed no part of the trade-mark of either appellants or appellees, and proceeded to discuss the question of deceit. In relation to this point the court said that one could not, under pretense of exercising a common right and by reason of the fact that the means used represented the quality and size of the goods, so use them, that while they perform the simple purpose apparently of representing quality and size, caution and description, they are made to represent his goods as those of another. The appellees had the right to use the letters and numerals for the purpose of representing quality, size and description, but they used them not alone for this, which was a rightful purpose, but for another and an ulterior design. The use of the same letters and the same numerals, with the same size of type, and putting in the same colors and in the same places on their plows as on appellants' plows was evidence of an intention to take away appellants' trade built upon their reputation. The appellees had not used a single letter, figure or word forming a part of appellants' trade-mark proper; yet, by the exact simulation of the plows in every perceivable point exposed to an ordinary observer and purchaser, and the use of the same coloring and staining, the same relative position of the letters and figures, they at the same time caused their plows to be taken for and purchased as those of appellants, and sought to escape responsibility in doing so. The court reversed the judgment below, holding that an injunction should have been granted and an accounting for profits ordered.

In the case of The State of Minnesota ex rel. Wheeler vs. The County Auditor of Washington County, decided March 30, the Supreme Court of Minnesota laid down the doctrine that a purchase at a tax sale is in effect a contract between the state and the purchaser, the terms of which are embodied in the law in force when the sale is made. The court held that one who purchased while a statute was in force which provided for the refunding of the purchase price and subsequent taxes paid, with interest at the rate of 7 per cent. per annum, in the event of the sale being discovered to be invalid, acquired thereby a right as by contract, so long as the state should continue to assess taxes upon the land, and to enforce their payment against the land to pay such taxes, and to have reimbursements in accordance with the terms of the statute in the event of the sale being found to be invalid. Such a right, it was said, could not be impaired by subsequent legislation, and a repeal of such an act, with the proviso that the repeal should not affect any accrued rights, was not operative as far as the rights of the purchaser to pay subsequent taxes and to have reimbursement was concerned.

A contract of renting was made on or about March 1, 1881, under which possession of the land for the purpose of preparing and seeding was to be had about July 15, 1881, and full possession was to be given on March 1, 1882, the renting to be for the year 1882. The Superior Court of Kentucky, in the case of Taylor vs. Kinkead, decided March 28, held the contract to be within the statute of frauds, upon the ground that if the term was not to begin until March 1, 1882, the contract was not to be performed within one year from the making of it, and if it was to begin in July, 1881, the contract was for a lease exceeding one year.

A writing was signed by W. reciting that he had let C. have a certain bond (describing it) for which C. had given him his two notes with security, and providing that "if he returns this bond and coupon within four months I will return him the above notes, he paying interest for the time." The Superior Court of Kentucky, in the case of Wintersmith vs. White, decided on the 28th ult., held that the writing referred to evidenced a loan of the bond and not a sale, and that an attachment of the bond as the property of C. before the expiration of the four months was improper.

BUSINESS NOTES.

The Iron and Metal Exchange Co., Limited, at No. 69 Wall street, and the New York Iron and Metal Exchange, whose rooms are at Burling slip and Pearl street, have decided to consolidate. A committee has been named from each body to take the necessary action. Neither Exchange has fully met the anticipations of its projectors.

The total number of failures in the United Kingdom reported to *Kemp's Mercantile Gazette* (London) for the week ended March 17 was 248, against 297 and 291 respectively in corresponding weeks in 1882 and 1881. England and Wales had 222, against 266 and 269 in the like weeks in the preceding years. Scotland had 25, against 28 and 15, and Ireland had 1, against 3 and 7.

According to the current number of the Chicago *Railway Age*, the construction of railways in the United States during the first quarter of 1883 has fallen away about 36 per cent., as compared with that recorded in a like portion of 1882, the total of main track completed in the past three months being 766, as compared with 1,200 miles in 1882. The *Age* estimates the construction for the year at 8,000 miles.

The *Journal des Debats* (Paris) is authority for the statement that the umbrella industry in France has made a long stride in the last half century. It is related that in 1830 the number of umbrella-makers in Paris was 115, and that the value of their products did not exceed $900,000 per annum, or, of the total French umbrella trade, not over $1,400,000 a year. In 1847 the total number of Parisian umbrella and parasol makers was 303, and they made $2,000,000 worth of umbrellas. There were 408 manufacturers in Paris in 1882 with 1,508 employés, and the annual product was valued at $6,000,000. Of this quantity, these to the value of $600,000, or one-tenth of the whole, were exported.

A writer in St. Petersburg states, in the columns of an English contemporary, that the system of bounties and the result of the protective duties in Russia are curiously illustrated in the balance sheet of the Russian Mechanical and Mining Works, of the city named. They have 150 locomotives on hand, on which the goverment has advanced full value. The directors have proposed to go on turning out 100 locomotives per annum, but the shareholders object unless the orders therefor are forthcoming. If new orders are not in sight by June 1 next the outlook is for the discharge of 1,000 out of the 1,500 men employed.

The silk association of America reports that the total value of the imports of silk goods at New York in March was $3,020,149, against $4,253,948 in March, 1882; $3,863,579 in March, 1881; $4,844,995 in March, 1880, and $3,475,050 in March, 1879. Of the total received last month, the value of silk piece goods was $1,730,606; silk and cotton goods, $435,694; laces, $220,875; ribbons, $151,186; velvets, $145,531; braids and bindings, $99,466; crapes, $52,608; hose, $47,041; plushes, 29,229; threads and yarns, $17,521; satins, $12,208; silk and worsted, $8,562; pongees, $6,111; cravats, $3,754; handkerchiefs, $1,690, and shawls, $1,024. The value of that portion entered for consumption was $1,956,031; that warehoused was $1,064,118; that withdrawn from warehouse was $866,611, and the value of that placed on the market was $2,822,642.

The demand for labor, says the London *Labour News* of March 21, keeps increasing, but the inclement weather prevents the expected activity in the building trades. In the mining districts the output was still restricted, and the situation was very unsettled in consequence. At Cardiff the shipwrights have struck for 6d. a day increase in wages and been refused. In textile trades there is some agitation, and at Reddish, at several mills, there is a strike. Spinners at Bradford are only working to keep up stocks. There is a strike among the weavers at Huddersfield. At Leeds there is a good deal of machinery idle through loss of the continental trade. Emigration was steadily increasing on the date named, and the Charity Organization Society have promoted its extension. The colonial government agents in London were also working hard to increase and maintain the large exodus of the unemployed in England.

The following national banks have been organized: The Atlantic National Bank of Providence, R. I.; capital $225,000; Caleb G. Barrows president, Henry S. Mansfield cashier. The Commercial National Bank of Waterloo, Iowa; capital $50,000; John D. Platt president, Frank L. Gilbert cashier. The First National Bank of Washington, Kan.; capital $50,000; J. G. Lowe president, F. H. Head cashier. The First National Bank of Chamberlin, Dak.; capital $50,000; David H. Henry president, Patrick Henry cashier. The West Waterville (Me.) National Bank has changed its location to Oakland, Me. The Bank of Glencoe, Minn., has been incorporated with a capital of $50,000. The following changes have been made in national banks: First National Bank of Birmingham, Pa.; H. S. McKee president in place of A. B. Stevenson. First National Bank of Belleville, Ill.; Joseph Fuess president in place of Joseph Fuess, Jr. Union National Bank of Streator, Ill.; A. B. Moore president in place of S. Plumb. Central National Bank of Worcester, Mass.; Joseph Mason president in place of J. C. Mason. German National Bank of Cincinnati; John Hauck president. First National Bank of Xenia, Ohio, in liquidation; J. C. McMillan president in place of A. H. Baughman.

In *Science* (Boston), of March 23, Mr. N. S. Shaler writes of the improvement of the native pasture lands of the far west. He mentions that the greater part of the United States lying west of the meridian of Omaha is unfit for tillage, and that the wide expanse of grassy plains is particularly adapted, as has been demonstrated, to pasturing cattle. He contends, however, that the fifteen to twenty acres to one head of cattle on the best grazing lands, and from that to one hundred acres, required to provide one beast with food, is too low a degree of nourishment. The improvement then is to come, so Mr. Shaler thinks, through experimenting with the transplanting of forage grasses to the plains of the "great American desert." These grasses (to be determined), it is remarked, should be sought out in northern Asia, Patagonia, the valley of the La Plata, southern Africa, Australia and Algiers. It is added that the "experiment is naturally one for the Federal government to undertake, but it need not be costly." Three experimental stations—one in Texas, one in Arizona, and one in Nebraska—are suggested, to be carried on at an annual cost of

$10,000 each, in addition to "the expenses of a traveling student of wild forage plants—perhaps another $5,000." If the result should be to increase by only one-tenth the beast-maintaining power of our wild lands, the effort, so the writer mentioned says, "will be worth many millions per annum to the nation."

The usual amount of statistical and other useful information is included in the fourth annual report of the Louisville (Ky.) Board of Trade, which has just been issued, and whose excellencies are credited to Major J. M. Wright, the superintendent of the board. As illustrative of the growth of Louisville's eastward shipments it may be noted that the total number of pounds of bacon and beef so forwarded was 2,186,403, against 1,668,067 pounds in 1881, and 1,693,597 pounds in 1880. During the past three years the eastern movement of cotton, via Louisville, ranged from 9,775 bales in 1880, and 13,431 bales in 1881, to 19,691 bales last year. The increase in shipments of carloads of grain was from 144 in 1880 to 98 the following year, and to 868 in 1882. There were 25,616 barrels of flour sent east in the first year named, 10,494 the succeeding year, and 43,955 barrels in 1882. The gain in movement this way of packages of whisky was from 11,530 packages in 1880 to 11,240 in 1881, and to 18,180 packages last year. There was a decline in the eastern movement of wool last year as against 1881, although a gain over that of 1880, when the total was but 898,551 pounds. In 1881 it was 1,309,505 pounds, and last year it was 1,019,421 pounds. Major Wright points out that as to a commercial statistical exhibit Louisville is behind many cities of its size and importance in having no record beyond three years back. So far as the means at his disposal rendered it possible, however, he has built up a series of the earlier commercial and financial data of Louisville that will hereafter be valuable for purposes of comparison.

The London *Ironmonger* of March 17 prints an interesting extract from a letter received by a Birmingham house from their correspondent at Melbourne, Australia. He calls the attention of the firm to the "enormous increase in the number of articles now being purchased from America" (the United States) in Australia. A few years ago, he adds, some half dozen articles were all that were ordered of American make, but now they are to be counted by the hundreds. This increase is not only maintained, but is growing. The correspondent further states that "your English manufacturers will do well to take a lesson from their American rivals, as the American goods exactly suit the requirements of the market." Admitting that the timber they have will command a certain trade, it is asked "why they should excel English makers of shovels, axes, picks and all classes of edge-tools? It is annoying to those of us who have English sympathy to see so much trade go away from the old country." The general characteristics of the American goods, as contrasted with the British-made in the Australian markets, are said to be a more reliable quality, better finish, not an ounce of unnecessary material, better packing, and the articles are thoroughly adapted to the use to which they are to be put. The writer adds: "Some of the things they make have been found unsuitable, and once ordered have never been repeated. Their cutlery will not bear comparison with the English make, and the same may be said of their plated-ware. In wirework, as well as cast and wrought-iron hollow-ware, England carries all before it. In all the cheaper kinds of cutlery Germany is becoming a very strong competitor, and also in steel toys and many other lines. Your English makers must bestir themselves, or they will certainly lose the larger part of their Australian and New Zealand trade."

In a review of the foreign trade of Japan for the past three years, the *Japan Gazette* finds grave cause for apprehension for the future. The foreign commerce, reckoned in dollars, is valued as follows:

	Imports.		Exports.	
	Merchandise.	*Specie.*	*Merchandise.*	*Specie.*
1880.....	$36,187,079	$3,639,230	$27,413,035	$13,746,871
1881.....	30,797,469	1,856,147	30,219,444	7,904,001
1882.....	29,172,317	6,154,724	37,236,583	4,630,961
Totals...	$96,157,765	$11,650,101	$94,869,062	$26,281,833

The total imports of merchandise and specie were, therefore, during the three years, $107,807,866, against $121,150,895 worth of exports, or an excess of exports of Japanese merchandise, coin and bullion, amounting to $13,343,029. It is noted that the value of the receipts in 1880 was excessive, but that the value of the exports in that year was but slightly heavier than that of each of the preceding two years. The imports in 1882 were 25 per cent. less than in 1880, and the exports 36 per cent. greater. It is shown that, as a result of the past two years' foreign trading, the government has "given away" 12,000,000 yen (nominally a like number of dollars), or 7,500,000 yen worth of commodities and 4,500,000 yen in treasure, more than has been received. This is the exhibit in addition to the constant additions to the volume of paper currency in the country, owing to the necessity of the government to buy and export gold. The *Gazette* concludes its review with the following: "How long can this state of affairs last? The government have disbursed $20,000,000 in specie during the past two years. That sum has been provided by an export of $12,500,000 in treasure and $7,500,000 in commodities. How has this been done? In the absence of any trustworthy information, the only inference permissible is that this wealth has been taken from the country, and its place supplied with paper. How long this method of furnishing the treasury with real money for its external needs can continue is the question of the moment; and the government has no cause to be surprised at the grave apprehensions for the future which weigh upon all men."

The outlook in the domestic labor market is not of the brightest. On Wednesday a meeting of iron manufacturers, representing all the mills west of the Alleghanies, was held at Pittsburgh, with closed doors. The existing rate of wages paid by them expires by limitation June 1. It is customary for the manufacturers to hear in the spring what their employés have to propose respecting the rate of wages for the ensuing year, after which an agreement is aimed at. This year, it appears, the manufacturers have departed from their custom, and met in advance of the workingmen, and in secret, to formulate a tariff of wages, to go into force next June. Reports at hand say that the scale of wages decided on is not definitely known, but that it is generally understood to constitute a reduction of from 10 to 20 per cent. from the rates now paid, including, as it does, the whole list of mill workmen, puddlers and finishers. The reports made at the meeting on the state of trade in mill iron were unsatisfactory. This, together with the reductions in the tariff, is declared to render a lower rate of wages necessary. As might be expected, this action has created a sensation in the Amalgamated Association, which organization has taken in hand the interests of the iron-mill men. It is added that the Association will meet to-day to decide on the rate of wages desired during the year beginning with June. Conflicting views are of course presented as to the probability of a strike in the event of the manufacturers holding out for the reduction. In any event, no strike is looked for until June. But the spirit of unrest and dissatisfaction among the laboring classes is not confined to the iron-makers. Chicago and New Haven bricklayers have recently demanded and received increased wages. The former now get $4 and $4.50 per day, and the latter $3.75. Twelve hundred Philadelphia house-painters have struck for an advance of from $2.50 to $3.00 per day, and their brethren in New York have but delayed two weeks a strike to secure $3.50 instead of $3 per day, as now received. The Lynchburgh (Va.) tobacco-makers' strike has resulted disastrously. They have offered to return to work, but their services have been declined. They number 1,200, and are receiving outside help. Pittsburgh cigarmakers will strike May 1. Eight hundred Philadelphia shoemakers have struck against a 10 per cent. reduction in wages, and 200 puddlers have taken like action, owing to a reduction of from $4.25 to $3.75 per ton. There has also been difficulty in keeping some forty Paterson silk weavers in line, owing to union regulations. These are but some of the labor disturbances of the moment. A like list has been available at any time since the conclusion of the big iron strike last fall. In view of this and the outlook for a possible repetition of the iron labor troubles, the outlook is, to say the least, not encouraging.

THE CUMULATIVE VOTE EXPERIMENT IN ILLINOIS.

In discussing the results of the proportional representation plan, or cumulative voting, in Illinois, the Chicago *Times* says: Experience in Illinois has proven, however, that the benefits which have been claimed by the advocates of proportional representation for the independent or "cumulative" mode of election depend on the electors rather than on the method. The method undoubtedly puts into the hands of the electors a weapon by which they may generally defeat the corrupt machinations of cliques, cabals and party bosses, without making a choice between evils, provided that they employ it actively and understandingly. There are sections of Chicago, for example, where a majority of the electors, commanded by the managers of two rival election machines, would prefer a scalawag to a reputable man for alderman; but where a minority of the electors, who also generally obey the commands of those ringmasters, would prefer a reputable man to a scalawag. The number of the latter, probably, would exceed one-fourth of the electorate, and, that being the case, the cumulative vote would give them the power to elect one reputable alderman, and so to prevent the regiments of the scalawags from returning three disreputables. But to accomplish what the free vote gives them the power to accomplish they must employ it deliberately, willingly and understandingly. They must act in concert, agree upon their man, and "plump" their votes for him. Wheresoever this has been done in the election of representatives it has proven the efficacy of the system as a means of breaking the power of bosses, defeating the sinister machinations of rings, and electing independent representatives of independent and upright citizens against all the powers corruption and venality could exert. But it has not often been done. Mere force of habit among the electors has generally been stronger than the desire to get rid of bossism or to defeat the most flagitious programme of corruption. With a weapon in their hands by the use of which the bosses and their corrupt coadjutors could be surely unhorsed, even the better sort of electors have abstained from using it, and gone to the polls armed with voting papers prepared by the bosses, obeying the word of command delivered from the mouth of corruption "as loyally as did the vassals of the old feudal nobles." Consequently, the introduction of the proportional system in Illinois has made very little, if any, improvement in the character of the Illinois assembly. The meaning of this is not that the system has failed, but that the electors, as a general rule, have failed to apply it to promote the good ends it gives them the means to attain.

FOREIGN ADULTERATION OF AMERICAN PRODUCTS.

The subject of German and Austrian adulteration of American products is discussed by Consul George C. Tanner, of Liege, in the February number of State Department Consular Reports. He praises the skill shown in these countries in adulterating imports, and speculates on the good that would be accomplished were they to turn the same amount of effort to a more legitimate account. They take, writes he, one gallon of American refined oil and make one and one-half gallons of it. German dealers in American refined oil sell three grades of it, while but one is sent there. Dilution is carried into everything that is liquid, and adulteration into solids. The consul adds that their wines, liquors, medicines and mineral waters are in this way rendered dangerous to life and health. Sausages, he says, are a "*melange* of doubtful ingredients." Their woolen goods are adulterated with wool made from rags, and these are always exported to the United States. It is added that "it is well known and abundantly proven" that cloth made from such wool retains all the germs of disease with which it may have been charged, and that "a German dying of smallpox, his clothing becomes useless for other purposes than old rags." American flour found in Germany and Austria is treated in such a manner as to defy recognition. An examination will show many adulterations that could not possibly have taken place in the United States, because these ingredients would be more costly with us than the genuine article of the same grade. A few of these ingredients are plaster of paris, baryta and potato flour. Bread made from this flour is also adulterated. Our lard is also doctored in many ways, tallow and horse fat being the most conspicuous. If evil consequences follow from such wholesale adulterations (as often happens), there is always a means of escape, and the German loses no time in availing himself of it; he sings out lustily that it is in consequence of American adulterations. Consul Tanner continues: "The charge that our flour, lard and other products that we export to those countries are adulterated is palpably false and absurd. Is it probable that we would use adulterations that would cost us more than the genuine article, or would betray itself at first glance? Is it not reasonable to suppose that where those adulterations are found, in a country in which the adulterating article is cheaper than the genuine article (to say nothing of a common practice), that the adulteration took place in that country? We export many times the quantity of necessaries of life into England that we do to Germany. Belgium and other countries remain steady consumers of our pork and flour, and never a word was uttered against either until Germany commenced it.

"If a choice was left with the German, he would naturally prefer buying an article that he could get at the lowest price, and a government that would try to force a dearer article on him would meet with opposition and be unpopular. In order to do away with this, and to carry out a made-up programme of prohibition, a prejudice must be created against the cheaper article, and hence the song of adulteration, poison and a copy of other falsehoods are raised. It has been proven by experience that protection is not popular in Germany, nor would prohibition be unless the public mind had been worked up to a state to receive it. The first act in this programme has been shrewdly executed, and our pork has been driven in disgrace out of Germany by an order of His Majesty the Emperor. Emboldened by his success, the German now turns his attention to the next thing in order, our flour, and its fate is not hard to predict. The same methods have been resorted to, the same prelude executed, and the same results will follow with this article as with the pork.

"These things, when allowed to go without protest, injure us more than would at first glance appear. These sensational stories of deaths by the wholesale, caused by American adulterations, go from one country to the other with astonishing rapidity, and are accepted as facts, to the great detriment of our commerce, besides creating an impression abroad that there is nothing so monstrous as an American. Our government, with commendable energy, met the charge brought against our pork, and, at no little trouble and expense, instituted an investigation that resulted in a complete vindication of our hog; but this did not have the effect it was intended it should have, because the edict of prohibition was issued some time subsequent to its publication."

This report by Consul Tanner is explained in part by the following, which he candidly admits: "It seems to me that if Germany can prohibit the importation of our products, on a trumped-up and foundationless charge, that we could return the compliment on their woolen goods and other articles, on reasons that can be proven against them by any fair investigation, and in that way bring them to see and repair the injustice they are doing us. If some means are not devised to check this unjust and shameful war on our industries, one after another of our productions will fall as did our pork.

"If the effects of this war were felt in but one country we might allow these things to pass; but this is not the case. Any one who will look at statistics will see that the German war against our pork has injured its importation into all other European states. Apart from a commercial view and other considerations mentioned, no one can be so amiable in disposition as not to smart under a *system* of injustice so doggedly followed up, to say nothing of the methods used."

THE PIRACY OF JAPAN PUBLISHERS.

The Japan *Gazette* has the following: "The practice in Japan of pirating patents, stamps and labels, the rightful property of persons in other countries, in order to palm off on a not over perspicacious public spurious imitations for the genuine articles, has been carried on for years past, and the evil is increasing and extending in every direction. There is no law to prevent it, and the moral education of the native merchant or manufacturer is not of so high a standard as to cause him to hesitate in pursuing such a practice from conscientious motives. After all, however, the greatest injury is inflicted, not on the patentees, but on the public who are deceived into purchasing spurious articles, and it is with regret we observe that a new departure has been taken in the field of literature. In Tokio is established a company styled the 'Tokio Bookselling Company,' whose business seems to be to reproduce foreign books for schools. We have before us several works issued by this company, including 'Quackenbos's First Book in Grammar,' 'Willson's Third Reader,' 'Todhunter's Algebra for Beginners,' and the essay 'On Liberty,' by John Stuart Mill. These are published as much like the originals in size, covers, etc., as possible, evidently with the intention of deceiving. The company affixes its imprint to the title pages, but offers no explanation or apology, and, indeed, has no hesitation in reprinting the foreign publishers' notices, such as 'Entered according to act of Congress, in the year 1860, by Harper Brothers, in the Clerk's Office of the District Court of the Southern District of New York.' A casual glance through these reproductions indicates clearly that they are at least but careless imitations. Letters upside down, wrong-fount letters, letters misplaced and words improperly spelt, testify to the slovenly way in which these books have been printed."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS

A new movement has been started in the stock market this week, and the experiment is again to be tried whether the cliques and large operators in whose hands the stocks have accumulated can put up prices without selling out on each other before the public has had time to gather courage to buy. Every previous move in the same direction so far made this year has been a failure. Sometimes it was because the combination which started it was not strong enough to withstand the opposition of operators outside of it; and again it was because the members of the combination would not keep faith with each other, but secretly sold while pretending to buy and assist in stiffening the market. For some weeks past the cliques have contented themselves with merely holding the market steady. They saw that while the loan market was likely to give trouble from the customary spring movement of money from this center to the interior, it was no time to try to bull stocks. If they could prevent a decline during the period of the money stringency it would be as much as ought to be attempted; and this they did. They averted a break in the market in the period of stringency when the difficulties of holding it were immensely increased by the extraordinary decline in Central Pacific. The feeling of alarm spread through the street by the drop in this stock was well calculated to have caused a serious depreciation in the price of most other speculative properties, and the fact that it did not has been accepted as pretty good proof that stocks are concentrated in the hands of men well able to hold them. The bull cliques are held to have demonstrated their strength, and it now remains for them to prove that they can hang together for a time against the temptation to cut and run at the first favorable opportunity.

The question naturally arises how long must they hold together before the public will come in and buy? The answer is plain—no man can tell. Any prediction on this point would have about the same solid basis and value as one of Wiggins's storm predictions. The leading operators of the street, the men who have made their millions in scientific stock speculation, would say frankly that the temper of the public is a thing which can only be guessed at. The last great upward movement of the stock market which brought in an enthusiastic public support occurred in July last, just when it was known that our crop of winter wheat would be one of the largest ever known. It was this fact which induced certain large operators who had long been on the bear side of the market to enter into a combination with those whose position as large holders of stocks had forced them to stand on the bull side. Yet we speak from knowledge in saying that in doing this they expected merely to make a successful turn of 3 or 4 per cent., and the popular rush for stocks which set in soon after the market was started on the upward movement took them completely by surprise. But when they came to sell out they found that the severe losses which the public had suffered by reason of the short crops of the year before and the collapse of speculative values, had severely restricted the number of possible buyers; in other words, there were far less customers in the market than there had been before. Therefore, when these operators had disposed of their holdings, by which time the season had advanced far enough to show us that our corn crop was to be short again, they refused to attempt any more bull movements for the remainder of the year; and, indeed, it cannot be said that there has been any general union of operators from August last until this time on the bull side of the market. How sincere their union is now, is merely a matter of conjecture. It may go all to pieces inside of ten days. If the public be found in a responsive mood, the bull movement may be carried on through the spring months.

There must, of course, be something to talk about as reasons for putting prices up. Some sort of argument must be put forth for public use. We cannot talk about crops yet, since the snow is hardly off the ground; indeed the report recently made on the appearance of the winter wheat is that it has been so damaged by alternate thawing and freezing that it will be 20 per cent. below the crop of last year; but this was the largest ever known. The condition of general trade certainly furnishes no bull argument, as the list of failures shows. There is a very light foreign demand for our principal articles of export. Bull arguments, therefore, are not found here. We are driven to other things. First and foremost, it is argued that prices of stocks are so low that there is a large margin for a rise anyway; that there is a large amount of capital waiting investment which only needs the warming effects of a little public confidence to bring into the investment market; that the earnings of the trunk lines in the past two months have been enormous, and indeed they have been unexpectedly large; that all the other systems of roads are showing up extremely well, the Gould southwesterns particularly; that the reduction in the price of iron and steel has greatly reduced the working expenses of the roads by the comparative cheapness at which repairs and renewals can be made; that from now on we are entering on a period of recovery from past depression, and the large immigration of last year will be felt beneficially this year; and, lastly, that stocks are in such strong hands that they can be put up anyhow so long as the bear market is easy.

These are the arguments one hears on the street now, and as nearly all the roads now are showing large increases in their weekly reports of gross earnings, the street is ready to believe what it wishes to believe. The first move of the market was made on Tuesday, when Northwest common and preferred were suddenly advanced about 3 per cent. This startled the street out of the lethargy in which a long period of dullness had sunk it, and all sorts of reports were soon in circulation about some large operator being caught short; and that the extra dividend, on which Wall street has so often been fooled, was coming. Wednesday there was a strong stimulus given to some other stocks; Thursday all the Vanderbilt stocks were strongly advanced, and by this time the whole market was awake, the street was thoroughly aroused, and the transactions of the day were 400,000 shares, or more than double what they had been for a long time past. Yesterday the market was worked up at high pressure, but the bears made a combined attack and caused it to sag for a time. The main result, however, was in favor of the bulls.

It was remarked here last week that the loan market would doubtless work into such a condition of ease this week that a 6 per cent. rate for call loans would rule. It has not been quite this, for a squeeze was manipulated on Monday and Tuesday, and at one time the rate was jumped to 25 per cent. But on Wednesday, and after, the rate averaged about 7 per cent., and it is perhaps safe to strike an average of 8 per cent. for the week. Time loans were offered below 6 per cent. on Thursday, and on the same day commercial paper rates were marked down. After about the 10th of the month the banks will fill up rapidly. The $5,000,000 of bonds the Treasury offered to redeem on Wednesday brought in only about $600,000 in addition to the $2,000,000 which came from the Treasury Department of this state. Little interest was felt in the matter in Wall street, as it was felt that the time had passed when aid was needed from the Treasury; and as the government disbursements for the remainder of the fiscal year will equal its receipts, and possibly exceed them, no disturbance of the loan market need be apprehended from the Treasury operations.

It is to be remarked that foreign exchange continues to rise. Some gold has arrived during the week, on drafts made when exchange rates were below the gold-importing point, and these have been additional aids to the loan market. But the posted rates of exchange on Thursday had risen to $4.83 and $4.85½, and yesterday they rose again to $4.83½ and $4.86, while actual rates were $4.82½ @ $4.82¾ and $4.85 @ $4.85¼. This may be taken as evidence of the lightness of exports at this time. The Bank of England lost gold during the week, and reduced its reserve to 34¾ per cent., but no change was made in the discount rate of 3 per cent.

Government bonds are steady. The following were the closing quotations yesterday:

	March 30, *bid.*	—*April* 6,— *bid.*	*asked.*
U. S. 5s extended (3½ p. c.)	104	102½	—
U. S. 4½s 1891, registered	113¾	113⅞	113⅞
U. S. coupon	113¼	113⅜	113⅞
U. S. 4s 1907, registered	119⅜	119½	119¾
U. S. 4s 1907, coupon	120⅝	119½	119⅞

The bank statement of Saturday was slightly disappointing, for a better showing had been anticipated. The reserve was increased only $1,357,325, reducing the deficit from the 25 per cent. line to $4,097,450. The following are the comparative totals of the statements of March 24 and March 31:

	March 24.	*March* 31.	*Differences.*
Loans	$312,879,100	$310,130,100	Dec. $2,479,000
Specie	47,997,400	49,086,800	Inc. 1,089,400
Legal-tenders	17,025,400	16,801,800	Dec. 223,600
Deposits	281,911,500	279,944,200	Dec. 1,967,300
Circulation	16,356,200	16,574,800	Inc. 218,600

The proportion of total reserve to liabilities is now 23.54 per cent. against 25.61 per cent. for the corresponding week last year.

By telegraph from Baltimore, Md.: The money market appears a little easier. Business in stocks has been fair, and prices generally ruled stronger than last week. New 3s advanced to 53⅜ late in the week, and were firm at that figure. City stocks were quiet and steady. There was considerable trading in railroad bonds.

By telegraph from New Orleans, La.: Money is in good demand but easy. Principal feature of the week was payment of interest by city on her extended 10 per cent. gold bonds. This is the first time in eight years that the city has paid on her own volition any interest, except for premium bond scheme. This is the first fruit of the funding act of the last legislature. Louisiana 7s have dropped over 2 per cent., attributed to their own weight. Premiums are unchanged. Sterling has advanced ½ per cent.

By cable from London, Eng.: American securities in this market have been mainly influenced by the operations in the New York market, which, in each case, have given the initiative move. Speculation has continued most active in New York, Pennsylvania & Ohio mortgages, owing to the great interest attaching to the meeting of the bondholders today to act on the proposed Erie case.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S from the principal centers of the country this week tell of an uniformly quiet feeling in trade circles. The reports from the wheat-growing regions are on the whole encouraging. Cotton has declined, under large receipts, to 10c. for middling uplands. Wheat has declined during the last week between 2 and 3c. per bushel, as the result of better weather on both sides of the Atlantic and of the improvement in the prospect of the winter wheat crop in the United States. Corn has declined slightly, owing to the continued large arrivals at western points, and the increase of the stocks in store there. Provisions have been held up by a few prominent speculators at the west, but the announcement that Germany will prohibit the importation of American pork is likely to have some depressing effect. The iron market in general continues quite as dull and unsatisfactory as heretofore reported. There is no improvement reported in any line except in pig at several of the western centers. Pittsburgh steel rail mills are said to be filled with orders until after August. This is the best that can be reported. Bar iron makers prefer storing to making concessions. At New York, pig iron, both American and Scotch, is dull at unchanged prices. The supply of the latter is about equal to the demand, which prevents prices from declining. Petroleum is lower under the combined influence of the bearish March report and the new wells waiting to come in on tracts, which, if furnishing gushers, will point to a more fruitful territory in the vicinity of the Cooper tract than had been expected. The anthracite coal market is not perceptibly better. The demand has not gone ahead since the announcement of the spring circular, as was expected. It has been arranged to cease mining six days in April, May, June and July. The three days ending to-day and the like days next week will complete April's quota. The excess production to March 24 is over 600,000 tons, as compared with last year. Bituminous coal is still dull. Ocean freights are nominal, and the market is lifeless. The supply of tonnage is far in excess of the demand at the present moment. This is expected to stimulate an export movement at an early day. The shipments abroad now are very light. The wool trade has been very inactive, and buyers have secured occasional price concessions. There were 190 failures in the United States reported during the past week, 20 more than the preceding week, 71 more than the corresponding week of 1882, and 77 more than the same week of 1881.

BREADSTUFFS.

The foreign markets for breadstuffs have been tending downward during the past week, partly owing to the fact that more favorable rates of ocean freights have induced increased exports of wheat and flour from the United States in the past two weeks, and partly also owing to the fact, heretofore several times referred to, that there is an accumulation of wheat and flour in the United Kingdom much beyond the surplus held there at corresponding periods of previous years.

Some recent developments, however, are beginning to show that the statistics which have heretofore been regarded as authoritative in regard to the consumption of wheat and flour in the United Kingdom, and also in regard to the estimated surplus held there now, are very largely erroneous. *Beerbohm's London Corn-Trade List* of the 22d ult. refers to the fact that the prices of potatoes are now from 60 to 100 per cent. higher than at the corresponding date last year, and that this fact has undoubtedly carried a larger consumption of wheat and flour than had been calculated some months ago as the result of the loss of the potato crop, and consequently that the estimates of consumption of bread have been too small. It will be remembered that there are no statistics of the stocks of wheat and flour in the United Kingdom that approximate correctness like those in the United States, and that the published figures have always been only estimates made by first taking the aggregate of the imports and adding them to the weekly deliveries in the 150 towns of England, and then deducting from them an arbitrary amount equal to 4½ bushels per capita of the population each week. This method, it is now admitted, proves to be very erroneous, because it is known now that the consumption this year has been larger than 4½ bushels *per capita*. The New York Produce Exchange has, therefore, this week dropped from its weekly published statistics the table in which these estimates of the weekly supply, consumption and surplus were stated, and made the enormous reduction in its estimate of the probable stock of wheat and flour in the United Kingdom from 30,000,000 bushels of wheat (including flour reduced to wheat) to a little over 20,000,000. A month or two ago reference was several times made in BRADSTREET'S to the probability that the low prices of wheat and the high prices of potatoes must necessarily induce an unusual consumption of wheat in Europe this year, and the present facts are proving the correctness of that view. *Beerbohm's Corn-Trade List*, however, also states that the deliveries of home-grown wheat in the 187 towns of England are falling below the estimates made in November of the probable output of the crop of 1882.

Special advices up to the 22d say that the weather in the United Kingdom had remained cold, with heavy snows in many parts of the country, making field-work very difficult. But on Thursday, the 5th, the cables reported a general depression of the British breadstuffs markets as the result partly of spring-like weather, not only in the United Kingdom but on this side of the Atlantic, and partly also in consequence of the increased exports from the United States.

As there have been some discrepancies in the reports of the amounts of breadstuffs in store at Liverpool, we give the following, which we learn are correct, viz.:

	April 2, 1883.	*April* 1, 1882.
Wheat (centals)	3,000,000	1,681,767
Corn "	290,000	282,763
Flour (sacks)	260,000	77,981
Flour (barrels)	8,750	1,860

In France, the final expectation is that the area planted will be 10 per cent. below that of ordinary years.

AMERICAN WHEAT MARKETS.

The movement of prices in the American wheat markets has been downward during the week. All through the earlier part of the week the tendency was in that direction; but on Thursday there came a decided break, which extended not only to all American markets, but to the foreign. Advices from the principal winter-wheat states give a more encouraging account of the condition of the autumn-sown grain. Many fields that, a week ago, were reported as hopelessly winter killed, are now making a fair show for a crop, and if the weather from this time out proves reasonably favorable will yield an average crop. In many parts of Michigan, Wisconsin and Minnesota snow still covers the ground, but in the more southern portions of the spring-wheat belt seeding is in satisfactory progress, and, for the reasons mentioned last week, there is no doubt that the average of spring wheat in the entire northwest will be largely increased over last year.

The receipts of wheat at Chicago, St. Louis, Milwaukee, Detroit, Toledo, Indianapolis and Peoria, for the week to March 30, were 734,972, against 700,763 in the preceding week, and 950,601 two weeks before. These arrivals are less than had been looked for by the majority of the trade, and suggest the probability that the amount of wheat back in the country to come forward yet has been overestimated. But the stocks at the west are large, being 6,618,000 bushels at Chicago, of which 5,079,000 is No. 2.

CORN.

Corn has been weak, partly in sympathy with wheat, but more from the continuance of heavy arrivals at the west. The total for the week to March 30 in the principal western points above mentioned being 2,711,586 bushels, against 2,629,481 in the preceding week, and 3,093,773 two weeks before. There has also been an accumulation at the principal western points that weighs heavily on the market, the total at Chicago alone, in store and in vessels, now being 7,998,000 bushels, with the prospect that this large stock, which we believe has never been exceeded but once before, will be further increased.

OATS.

Oats show but little change in price from last week, but receipts at the west are rapidly decreasing, being only 721,065 at the seven principal western points, against 1,237,434 in the week to March 16. Farmers in the principal oat-growing districts are now too busy to market them. It is well understood that prices have been maintained for several weeks past by a clique which has its headquarters in Peoria, and with the help of diminishing receipts they may be able to hold the market, or even advance prices, but the legitimate tendency would otherwise be downward.

PROVISIONS.

Prices have shown but little change in the last week. Pork and lard are entirely in the control of a few prominent speculators at the west, who will manipulate the market for the purpose of inducing a short interest. In the latter part of the week prices have been held up strongly, but there is not much demand for pork except to cover shorts. The shipping demand at the west is small. The total receipts of hogs at Chicago, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis, Cleveland and Milwaukee, for the week to April 6, were 114,016, against 111,354 last week, and 166,305 for the corresponding week of last year.

A Berlin cablegram of Friday, April 6, says that, notwithstanding the repeated protests from America against the injustice of prohibiting importations of American pork into Germany, the German government seems determined to make such importations unlawful. The reasons given are said to be sanitary measures against trichinæ, but by some parties it is said to originate in the political purpose to make capital with the agricultural classes in Germany who raise hogs, and is therefore in the nature of a protective prohibitive tariff.

THE PROVISIONS MARKETS BY TELEGRAPH.

From Buffalo, N. Y.: Provisions are quiet, but firm. Receipts of hogs and good butchers' stock are light.

From Chicago, Ill.: Pork firmer; shows signs of recovery from yesterday's decline; demand purely speculative. Lard firmer, under manipulation of clique; shipping demand small. Meats steady; fair consumptive demand. Hogs firm; active demand above supply.

From St. Louis, Mo.: Provisions weak, with slow sales. Hogs in light supply and quality poor, with value still firm. The receipts of cattle are large, but the movement is dull, with prices tending downward.

From Kansas City, Mo.: The provisions market is slow and weaker, with a slight jobbing demand. Cattle declined 10 to 15c. Hogs dull; prices reduced 15 to 20c.

From Des Moines, Iowa: The provisions market is unchanged.

From Leavenworth, Kan.: The provisions market is dull, and without any special features.

From Lawrence, Kan.: The provisions trade is moderate, owing to good crops of last year.

From Omaha, Neb.: Prices in the provisions market are quiet, and sales dull.

From Lincoln, Neb.: The provisions market is depressed by an over-supply.

From Wilmington, N. C.: The provisions market is somewhat easier, and without special feature.

From New Orleans, La.: The stock of provisions is moderate, with a fair demand and an easy market.

From Memphis, Tenn.: The meat market is easier. Receipts of live stock are small, and prices remain firm and unchanged.

From Nashville, Tenn.: Cattle receipts have been light, with a good demand. Prices are unchanged. The provisions market is firm, and the demand good.

THE NEW YORK DRY GOODS MARKET.

The week opened rather quiet, but the mild weather prevailing during the latter half did much to improve the tone of the market, and this was especially noticeable in the jobbing trade.

The opening of the canals and Hudson river has also improved the near-by trade, and jobbers have no reason to complain of how the week closes. With the continuance of warm weather, steady and improved business ought to prevail.

The request at the hands of agents is not so decided as with the jobbers, and a number of them are of the opinion that interior jobbers are fairly well stocked for the time being. Though western trade has always been preferred to southern, still the latter this year is believed to be in better shape on account of the increased cotton crop, and trade at some points is reported quite active.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, April 6.—There is a very limited demand from the east for Manchester cotton goods. Yarns have declined ⅛d. Prices are in buyers' favor.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: There is a marked improvement in the dry goods trade. Sales are more liberal.

From Boston, Mass.: The dry goods trade has been fair. There is a marked improvement with the retailers, though it is still too early to say that business is good. Commission houses and jobbers, while not claiming a large volume of business at present, speak confidently of the future, and so far as the general tone of the market is concerned its improved condition of a week ago may be said to have been fully maintained. There is nothing new to be said of woolens or small wares. Collections are fair.

From Providence, R. I.: The print cloth market is steady, and sales are reported moderate; 64s are quoted at 3⅝c., less ½ of 1 per cent., and 56x60s at 3 1/16c. There are about 125,000 pieces on hand. The cotton market is quiet, the amount of sales being small. Middling uplands are worth 10⅜c., and middling gulfs 10⅝c. The stock on hand is small.

From Buffalo, N. Y.: The dry goods trade shows more activity than last week in the wholesale departments, but the retail trade is still comparatively dull, owing to the coldness of the season. On the whole an improvement is noticed since our last report, and with seasonable weather the demand will be greatly enhanced.

From Buffalo, N. Y.: The dry goods trade, as compared with the corresponding week of last year, shows an increase in sales of about 12 per cent. A generally satisfactory feeling exists in the trade and values are well sustained. The retail trade is still quiet, but improving.

From Philadelphia, Pa.: Trade has been moderate with package houses, but more active with jobbers. The mild weather has influenced a better demand from country retailers. The market is steady for popular lines of cotton and woolen goods, but weak and unsettled for low grades and shoddy-mixed fabrics.

From Pittsburgh, Pa.: The dry goods business has been quite active this week, showing a marked improvement over last week, and dealers are encouraged in the belief that a good spring trade is in prospect.

From Cincinnati, Ohio: There have been some drives offered in dry goods, and with slightly shaded prices the volume of business has been maintained.

From Cleveland, Ohio: The dry goods trade for the week has been good, and promises well for the balance of the spring season.

From Columbus, Ohio: There has been a slight improvement in the dry goods trade over last week, and prospects are good.

From Dayton, Ohio: The dry goods market is very quiet.

From Toledo, Ohio: The dry goods trade is fair for the season.

From Indianapolis, Ind.: The dry goods trade has been fair, and has shown considerable activity, but collections are only moderate.

From Chicago, Ill.: The dry goods trade is unusually active for the west. The north and southwest are buying beyond precedent. Millinery sales exceed any corresponding week on record. Clothing, hats and furnishing goods are very active. Collections good.

From Peoria, Ill.: The weather is still unsettled, which affects sales in dry goods. However, dealers do not complain, and are satisfied with trade.

From Detroit, Mich.: The dry goods business is quite active, and sales are much larger than the previous week. There is a good demand for seasonable fabrics.

From Louisville, Ky.: The jobbing dry goods trade at this place is believed to be 25 to 40 per cent. larger this spring than the same season last year. Sales are strictly in accordance with retailers' legitimate wants. Prices rule steady and uniform and trade seems to be exceedingly healthy and satisfactory. Southern custom is quoted as as paying up well, and the comfortable position of

the agricultural districts furnish a most substantial basis for the largely increased volume of dry goods sales.

From St. Louis, Mo.: The dry goods trade is excellent, and is growing better. Values are very steady.

From Kansas City, Mo.: The dry goods trade is still active, and the heavy increase in sales heretofore reported is being well sustained. The market is reported in excellent condition, and prospects are good.

From Burlington, Iowa: The dry goods trade is steady and noticeably increasing. Orders run full, and are satisfactory.

From Lawrence, Kan.: The dry goods trade is in fair condition.

From St. Paul, Minn.: The dry goods trade is decidedly improved, though still sensitive to the cold weather. All classes of goods are selling well. Dress and gingham goods in good demand from personal buyers. There is a liberal demand in orders. A week of sunshine would make a boom.

From Omaha, Neb.: Dry goods sales are fair but not brisk.

From Lincoln, Neb.: The dry goods trade still continues fairly active.

From San Francisco, Cal.: Dry goods jobbers are satisfied with the amount of business doing, although orders are principally on California accounts.

From Baltimore, Md.: The dry goods trade the past week was more active. Jobbers report a good out-of-town order trade and a fair demand from retail dealers. Commission men have no complaints to make, and the general outlook is now more promising. Prices rule steady.

From Norfolk, Va.: Dry goods jobbers are doing a fair business. As the season advances more activity is expected. Collections rather slow.

From Richmond, Va.: The dry goods trade is active and increasing.

From Wilmington, N. C.: The dry goods jobbing trade is moderate, with a fair retail trade.

From Savannah, Ga.: The dry goods market is more firm, with a better demand for sheetings and prints; fair demand for yarns. Collections slightly better.

From Macon, Ga.: The dry goods trade is dull, but shows some signs of increasing activity. Prospects are good for a heavy trade.

From Selma, Ala.: The dry goods trade continues fair, and there has been an increased demand for the better class of goods in all departments.

From Memphis, Tenn.: Jobbers in dry goods report business as still brisk and sales as not having fallen off any during the past week.

From Nashville, Tenn.: The dry goods trade is fair. Cotton mills are several days behind with orders.

From Halifax, N. S.: The wholesale dry goods trade is fairly active, but with retailers trade is very dull and slow. Collections fair for the season.

COTTON.

The New York cotton market has been lower for spot middling uplands, the price having declined to 10c. The sales for the week have been for export 762 bales, for consumption 1,882, and for speculation 54 bales. Included in the above are 700 bales to arrive. The deliveries on contract amount to 5,100 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 1-16c.	7 3/8c.	9 3/8c.
Strict ordinary	7 1/2	7 13-16	9 15-16
Good ordinary	8 15-16	8 5/8	10 3/4
Low middling	9 1/2	9 9-16	11 3/8
Middling	10	10 1-16	12 1-16
Good middling	10 3/8	10 1/2	12 7-16
Middling fair	11 3/8	11 1/4	13 3-16
Fair	11 7/8	12	13 15-16

The market for spot cotton closed quiet.

The future market at New York has been lower, the price having declined an average of 11 points for near months and 8 points for later months. The sales for the week foot up 609,200 bales, against 414,000 bales for the corresponding week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
April	9.90c.	10.00c.	12.06c.
May	10.04	10 16	12.13
June	10.18	10.29	12.29
July	10.29	10.41	12.43
August	10.39	10.52	12.56
September	10.18	10.28	12 18
October	9.94	10.02	11.45
November	9.83	—	11.35

The future market at New York closed steady.

The southern markets during the week past have been dull and quiet. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	5,125	9 5/8	11 7/8
New Orleans	30,500	9 3/8	12
Mobile	2,150	9 3/8	—
Savannah	6,550	9 1/2	11 5/8
Charleston	3,700	9 7/8	11 7/8

The total receipts of cotton at the ports since September 1 are 5,396,808 bales, an increase of 1,100,537 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	749,339	397,499
New Orleans	1,515,812	1,127,015
Mobile	299,840	246,708
Savannah	765,804	695,642
Charleston	544,006	474,676
Wilmington	125,002	130,019
Norfolk	723,078	569,309
Baltimore	51,435	27,230
New York	143,131	157,238
Boston	152,416	191,608
Philadelphia	62,586	51,402

The receipts at the ports for the week were 77,053 bales, against 86,877 last week and 45,363 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 26,145 bales, against 29,344 bales last week and 11,313 bales for the corresponding week last year. The shipments for the week were 38,305 bales, against 39,885 bales last week and 27,284 bales for the corresponding week last year. The stocks for the week were 236,276 bales, against 248,037 last week and 197,216 for the same week last year.

At Liverpool the spot market is reported easier at unchanged quotations, the price for middling uplands having remained at 5 9-16d., and for middling Orleans at 5 5/8d.

The sales for the week at Liverpool were 50,000 bales (of which 36,000 were American), against 50,000 (of which 35,000 were American) last year. The sales for export were 3,800 bales, against 7,000 bales last year. The sales for speculation were 1,320 bales, against 2,900 bales last year. The amount forwarded was 29,000 bales, against 15,500 bales last year. The stock in port is 1,012,500 bales (of which 748,000 are American), against 835,000 bales (of which 560,000 were American) last year. The total imports for the week were 140,000 bales (of which 117,000 were American), against 78,000 bales (of which 48,000 were American) last year, and the amount afloat 302,000 bales (of which 170,000 are American), against 422,000 bales (of which 191,000 were American) last year.

The Liverpool future market has been dull and barely steady, prices having ruled a trifle lower. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery, as compared with last week:

	To-day.	*Last week.*	*Last year.*
April	....	5 37-64d.	6 38-64d.
April-May	5 37-64	5 39-64	6 38-64
May-June	5 39-64	5 43-64	6 42-64
June-July	5 42-64	5 46-64	6 47-64
July-August	5 45-64	5 48-64	0 51-64
August-September	5 47-64	....	6 55-64
September-October	...	....	6 46-64

The Manchester market closed dull.

COTTON REPORTS BY TELEGRAPH.

From Louisville, Ky.: Cotton dull. A fair amount has changed hands, but at lower prices. Receipts fair, but chiefly of poor grades.

From New Orleans, La.: Though a slight reaction set in in futures to-day, it was attributed to bears realizing profits. The recovery was only slight, compared with last Thursday, as futures are 15 points off on Aprils, 12 on the summer months, and 6 on the fall months. The week's business was liberal, and the market closes steady. Spots have declined 1/16c. on good ordinary, and 1/8c. on low middling to middling fair inclusive. Bulls believe in further reaction, though weight of cotton is regarded generally very heavy. The cotton week has been without any sharp feature.

From Norfolk, Va.: Cotton coming in as usual for his season of the year.

WOOL.

General dullness has characterized the wool trade during the past week, and there has been a growing tendency to weakness in prices in consequence of the slack demand. The light stocks in first hands have prevented any serious decline, but occasional concessions have been made to influence sales, and it is generally admitted that lower prices would have to be accepted in order to induce buyers to take hold in advance of actual need. Manufacturers are very indifferent. Their products, as a rule, are selling low, and profit margins are very small. A good many of the mills were stocked up by liberal purchases during the excitement in the wool markets late in February, and, as the course of the goods trade since that time has not been as satisfactory as expected, and no advance has been obtained to offset the increased cost of the raw staple, there is not much in the present condition of the markets, either for wool or woolens, to encourage free buying. Consumers, therefore, are pursuing a very conservative policy in the hope that there will be a gradual weakening of values before the balance of the old clip is marketed, and are doubtless influenced also by the near approach of shearing time, when it is believed a general effort will be made to depress prices in the country to offset the reduction in the tariff schedule that will then go into effect. There is general complaint of depression in all branches of the yarn trade, except worsteds, which have thus far been kept well sold up. The carpet mills are getting few orders. A good deal of foreign wool has been received, and it is expected that additional orders will be filled at the approaching sales of Australian wools in London. The auctions will open early in May, and the offerings are expected to aggregate 350,000 bales.

IRON.

No improvement has yet been recorded in the iron market. Pig is dull. Buyers are reluctant to purchase, and dealers in some instances have made slight concessions, though thus far without material gain in sales. The arrivals of Scotch pig have been about 600 tons, and the sales about 500 tons. Prices have not changed, as they have not also with respect to American pig iron. Manufactured is dull. There is some little improvement in bar in some quarters, but at mill prices are firm, mill owners preferring to stock to making concessions. There have been some inquiries for Bessemer pig. Steel rails are dull at former quotations. Ordinary weights are held out for $38 for future delivery at mill. Near-by delivery for different weights command from $39 to $40. The continued dullness of trade has been made, with the tariff changes, the basis of an arrangement between the western mill iron owners for a reduced scale of wages for mill employees, to take effect June 1. The latter will meet to-day to arrange their own views as to what wages should be paid. There is talk of a strike from the date named in case the mill owners do not reconsider their reported decision, inasmuch as the employés in the iron mills are firm in the belief that the present scale of wages is low enough.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, April 6.—Glasgow and Cleveland pig iron is a trifle weaker. Finished iron is quiet but steady. There is a fair amount of colonial orders, but few from America. South Wales coal is cheaper.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Pig has been selling more freely in larger lots at bottom prices. Bessemer is dull. Merchant bar is in better demand, but prices rule very low. Structural iron orders for larger lots have been placed for spring and summer delivery. Plate and tank are dull, and makers are offering concessions on large orders. Steel rail orders have been booked at $38@$40, the latter for small lots. Nails are active. Old material is dull.

From Pittsburgh, Pa.: The iron market is steady, and without change as to prices, which continue unsatisfactory. There is an increased inquiry for pig iron, and leading authorities in the trade regard the outlook as more favorable than at any period in March. There has been considerable improvement in the demand for manufactured iron since last week, and the outlook is more encouraging. The question of reducing wages to a two-cent card basis is being discussed, but no definite action has been taken by the manufacturers. The present demand for nails is reported beyond the capacity of the mills.

From Cincinnati, Ohio: There is no improvement in pig iron and very little movement in the trade. The question of reducing prices paid to laborers in the manufacture of this article occupies the attention of makers, but has, as yet, produced little effect, beyond making the market steady.

From Detroit, Mich.: In iron the outlook is brighter. There has been no change in prices of any moment, but the demand is more brisk, and all indications are more favorable.

From Chicago, Ill.: Hardware is very active. Pig iron is in fair demand at unchanged prices. Refined iron and nails are moderately active and steady. There is more doing in steel rails.

From Louisville, Ky.: The demand for manufactured iron continues good, but prices have weakened some without any perceptible cause. Nails are in good request; stocks light; but the tendency of prices is still downward. The situation is a rarely peculiar and contradictory one. Mills are busy, stocks light and the demand good, but there is a painful lack of confidence in the stability of prices. There is a fair trade in manufactured goods, namely, nuts, bolts, etc. Despite the demoralization of prices jobbers of iron and hardware are having a good trade, but profits may be set down in the unit column.

From St. Louis, Mo.: The tone of the pig iron market has improved, and prices are firmer, with fair sales. Manufactured iron is in larger demand, with stronger values.

From St. Paul, Minn.: Shelf hardware active. Sales of bar iron have improved. Nails lower and active.

COAL.

Another week has not brought the improvement hoped for in the anthracite coal trade. There has been no accumulation of stocks, which is taken to indicate a fair business. Buyers have been taking for immediate wants only. Producers however intimate that the extra requirements from the west during the coming year will relieve them from any anxiety as to a full consumption in eastern markets. The western coal dealers have made no change in rate as yet. It is announced that mining will be suspended six days in April, May, June and July. To this agreement all the parties to the anthracite pool have agreed except the Delaware & Lackawanna. It is not understood, however, that the latter company will interfere with the programme. With to-day is concluded the first three consecutive days' cessation of mining for April. Half-time is arranged for the latter half of the coming week also, which will complete the April quota. The total production of anthracite for the week ending March 24 was 683,717 tons, against 403,655 tons in the like week in 1882, an increase in the week of the present year of 280,062 tons. The total output of anthracite for 1883, to March 24, was 5,626,287 tons, against 4,935,065 tons in a like portion of 1882, a gain during the present year of 691,222 tons. Bituminous continues about as reported for a month past.

PETROLEUM.

The market has not found much opportunity to recover itself during the past week. Operations in the regions have been carried on briskly, and with such a rapid fire of telegrams to the exchanges announcing all the known and anticipated developments that the low level reached a week ago has not been improved on to any material extent. The bullish character of the March report of operations in the regions now appears likely to be supplemented by one containing like evidence of activity in April. On Saturday last quiet reigned on the petroleum exchanges. No news was good news, and quotations for certificates of crude advanced 1c. Monday developed no new features, with a slight decline in prices, which record was offset by a gain of 1 1/4c. on Tuesday. The Welsh well, situated between the Grandin and Porcupine wells, and the Anchor Oil Company's new well, just north of the Cooper tract, began to excite special attention during the middle of the week, and the customary contradictory dispatches began to be received. As a result, while Wednesday's trading developed no real news of value, a feeling of weakness set in late in the day, and prices fell off 1c. Thursday witnessed some animation. The Welsh well was reported in nine feet of sand, and flowing at intervals. This was contradicted and reaffirmed with the expected effects. The Anchor Oil Company's new well came in with a reported flood of 900 barrels. Prices naturally sank back.

The market on Friday opened weak at 91c., and fluctuated fractionally until noon. The news received was to the effect that the Welsh well was flowing heavily for about eight minutes every hour and a half. The Anchor well was said to be flowing about eighteen barrels per hour. This news, as a whole, being quite bearish, prices did not advance materially. The closing figure for the day was 91c. bid, against 94 1/2c. last Friday evening, a loss of 3 1/2c. on the week. The market closed weak.

The movement of prices of certificates of crude oil at New York, during the week ending last evening, was as follows:

PRICES OF CERTIFICATES OF CRUDE.

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	94 1/4	96	94 1/4	95 1/2
Monday	95 1/2	96 1/8	93 3/4	94
Tuesday	94 1/8	95 3/8	93 3/8	95 1/4
Wednesday	95 1/2	96 1/2	94 1/4	94 1/4
Thursday	93 1/4	93 3/4	91 1/2	91 7/8
Friday	91	92 3/8	90 7/8	91

On Saturday last there was no demand for refined oil for export worth mentioning, although there was a moderate business in crude and naphtha at previous quotations. The same condition of the market was reported throughout the week, foreign buyers of refined preferring not to purchase at existing prices, in view of heavy foreign stocks.

The quotations for certificates of crude petroleum and of petroleum products last evening as against that of Friday evening, March 30, and March 22, are as follows:

	March 22.	*March 30.*	*April 6.*
Certificates of crude.....	102⅞c.	94½	91
Refined petroleum, 110°.....	8⅛	8⅛	8⅛
Refined petroleum, 70°.....	8⅛	8⅜	8⅜
Crude, in barrels	7¼@7¾	7⅛@7⅜	7⅛@7⅜
Case oil, plain brands.....	11	11	11
Naphtha.....	6¾	6¾	6¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to March 31 was 123,982,925 gallons, against 128,454,362 gallons in a like period of 1882, a decreased exportation of 4,471,437 gallons, against an increase of 5,299,231 gallons reported up to March 24. For the week ending March 31 the foreign shipments were 4,952,476 gallons, against 11,021,717 gallons in the preceding week, whence it is easy to see the occasion of the decline in foreign shipments as compared with a like period in 1882. New York city's exports of petroleum from January 1 to March 31 amounted to 107,131,894 gallons (leaving but 16,851,031 gallons for all other ports), against 109,604,101 gallons in a like period in 1882.

OCEAN FREIGHTS.

The week has been dull and uneventful. There was some little demand for charters for petroleum on Saturday last, but it soon died out. Foreign buyers of oil have been out of the market. Stocks of refined abroad are heavy, prices here are thought to be relatively high, and exporters prefer to wait. The grain charter movement is likewise very slack. The port was well supplied with tonnage prior to Thursday, but on that date the heavy arrivals of tonnage depressed chartering rates still further. Petroleum vessels were offered at purely nominal figures, and grain accommodations were likewise very low. This excess of tonnage over the immediate demand cannot fail to have an influence on exportations in the near future. Baltimore leads in grain shipments at present. The berth movement is far from being animated, as are the coast and West India trades.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Groceries active; demand steadily improving as coastwise trade opens up. Collections easier, and everything more auspicious.

From Boston, Mass.: The boot and shoe trade shows but little change. Shipments for the week to places outside of New England 51,827 cases, against 43,898 cases the fourteenth week in 1882. Total shipments since January 1, 737,880 cases, against 667,933 cases same time last year.

MIDDLE STATES.

From Albany, N. Y.: The opening of navigation this week has given more activity to business. Considerable lumber is changing hands at firm prices, with good stock of pine in market.

From Troy, N. Y.: Navigation was resumed on Wednesday, and immense quantities of freight are now being received from New York. Freight shipments to the metropolis are heavy as usual. Manufacturing concerns reported in healthy condition, but the margin of profit on some goods has been reduced. For a week past there has been noticeable improvement in country collections.

From Buffalo, N. Y.: General trade shows a very moderate improvement over last week, but has not yet developed sufficiently to warrant more than an increased feeling of confidence that warmer weather will produce more satisfactory results. Groceries and other staples are in fair consumptive demand on near-by orders. Lumber shows somewhat more activity, but is still quiet for the season. State and near-by collections are very fair, but western ones slow.

From Philadelphia, Pa.: Business has been moderately active, but trading in most lines has continued on a very conservative basis. The industrial situation is not very satisfactory. The competition in low grades of textiles has reduced prices so much that manufacturers have been compelled in some cases to cheapen the cost of production by lower wages, and this has led to several strikes among the local mills. The yarn trade is dull except for worsteds, which are selling fairly at steady prices. Cotton and woolen and shoddy filling yarns are very weak and unsettled. The proposed reduction in the pay of mill labor in the iron trade has caused a strike at one well-known establishment, and several strikes for advanced pay have occurred in the building trades, which are entering upon a season that promises to be one of unusual activity if work is not interrupted by labor troubles. The painters and marble-cutters have led the movement for higher wages. The cigarmakers also demand an increase after May. The grain trade has been fairly active on speculative account, but quiet for export. Prices have sharply declined on both wheat and corn, owing to the fine crop weather for the former and increasing stocks of the latter. Flour has also weakened slightly, and closes dull and unsettled. Cotton has declined ⅛c. for spot sales, and is very quiet owing to the depression in yarns. Southern farm products are selling more freely in consequence of the favorable change in the weather. There is not much stir in dairy produce. Provisions are jobbing fairly. Sugars are quiet. Molasses boilers have generally commenced work for the season. Petroleum is dull.

WESTERN STATES.

From Cincinnati, Ohio: There is nothing to mark a change in the business situation save, perhaps, a stronger undercurrent of confidence. There has been no movement of importance, and while there is stringency in money matters, there is no evidence that sales have been retarded in consequence. Flour has advanced during the week, but under liberal receipts has declined and closed heavy. Grain has advanced under larger receipts, and closed active with a marked advance. Cotton has dragged heavily through the week, with a little demand from spinners and possibly lower prices. Kentucky hemp is dull, with light receipts. Whisky is in good demand at $1.13. Wool in steady demand from consumers, but stocks light. Woolen goods move slowly. Offerings of tobacco were about double that of last week; new tobacco offered justifies belief that the stock is large, of good body and color.

From Cleveland, Ohio: The week has been a fair one for general wholesale business, without special complaint concerning collections, and merchants generally anticipate a satisfactory trade throughout the month.

From Dayton, Ohio: General trade is dull. Collections are very hard to make.

From Toledo, Ohio: The demand for boots, shoes, hats, caps and hardware increased during the week. The grocery trade is better than at the same time last year. Money close and collections slow.

From Yellow Springs, Ohio: For the past week the weather has been freezing at night and thawing during the day, so that the growing wheat gets weaker, and less of it, each day. If we have ten days more continued freezing and thawing we cannot have over one-half crop. One-third of the growing crop is now worthless.

From Indianapolis, Ind.: Trade during the past week has shown more activity, but it still lacks tone, being less in volume than was anticipated. Merchants do not appear anxious to buy, but are very conservative.

From Evansville, Ind.: We have had a few fine days during the past week, but to-day it is raining. Trade has been on the increase. Collections are only moderate.

From Chicago, Ill.: Leather steady. Wool dull, stocks small. Groceries active, stocks moderate. Drugs and chemicals active. Linseed oil firm. Wheat weak and feverish, influenced by growing weather, better crop reports and adverse foreign markets; demand mainly to cover short sales. Corn depressed by excessive stocks and weakness in wheat. Oats strong, due to manipulations.

From Peoria, Ill.: Trade is still reported dull in spring goods, barring a few lines. The weather is still unsettled. Dealers do not complain, and are satisfied with their trade.

From Detroit, Mich.: There has been considerable improvement in business generally during the past week. Collections much better.

From Grand Rapids, Mich.: General trade for the past week has not shown any particular activity over last week. In lumber and shingles trade is quite brisk. Collections reported slow.

From Louisville, Ky.: The jobbing trade has been generally animated this week, there being a full volume of sales both on orders and from personal selections. The weather has been mild and stimulating to vegetation. The majority of experts represent the wheat fields in poor condition, but there has not yet been sufficient growth to develop the extent of damage. Preparations are making for a large acreage of tobacco. Flour quiet. Drugs active. Produce in liberal supply and brisk movement. Kentucky whiskies quiet, steady and unchanged. The internal revenue collections in this district for the past month and quarter were more than double previous averages. Leaf tobacco receipts big and sales brisk; there are large offerings of medium grade burleys and a light supply of dark and heavy grades; prices somewhat irregular, but tone of the market remains strong; manufactured tobacco is in active demand for May delivery.

From St. Louis, Mo.: There is more activity among general jobbing houses than last week. The weather is seasonable and a good feeling prevails. Cash sales are more frequent than usual, and collections are satisfactory. Cotton is lower than ever; the big stocks here are unlocked at last, and heavy sales are being made for export. Heavily decreased receipts of all grains, and markets are depressed and unsettled all around. Prospects of growing wheat improving. Horses and mules in large supply and active, with strong values.

From Kansas City, Mo.: Some little improvement is noticeable in general trade, but quiet is still the rule. The weather continues unfavorable, and until it changes not much improvement is expected. Collections reported good, however, and indications are generally healthy.

From Burlington, Iowa: Business has been steady and satisfactory during the week. Jobbers all report an improvement, with a very healthy demand for almost all lines of goods. Collections are fair to good.

From Davenport, Iowa: There has been no change in the condition of general trade. The roads are still in bad condition.

From Des Moines, Iowa: Retail trade of all kinds is duller, if possible, than last week. Wholesale trade in all lines is brisk. The weather is cold, and the spring is still backward.

From St. Paul, Minn.: General merchandise sales are increasing. Values greater than a week ago, exceeding last year's season. Drugs, groceries, clothing, hats and caps and boots and shoes quiet. Lumber and implements meet with steady sales. Country traders are disposed to make only small bills, and buy oftener. Roads are more muddy from melted snow. There has been no rain. Currency receipts small from the west; shipments mostly to lumber regions, with none to wheat sections.

From Omaha, Neb.: Spring weather is backward, and trade in general remains much the same as a week ago. The money market is fairly easy, with a slight improvement in collections.

From Lincoln, Neb.: The general trade for the past week has been lighter than for the week before, the depression in the price of corn affecting all branches. Trade for the past month has been much better than for January and February, and the tendency is toward a steady improvement. The late rains and warmer weather have strengthened confidence in good crops the coming season.

From Leavenworth, Kan.: The general rain of last night will greatly help late-sowed wheat over the state. Corn and wheat are coming in slowly. Collections fair. General trade is good. Large orders are received on our manufactures.

From Lawrence, Kan.: General trade is quiet. The clothing trade is good, and 25 per cent. better than last year. The grocery trade is moderate, owing to good crops of last year. Collections easy, and money fairly abundant. The excellent rains of this week have greatly improved the prospects of the wheat crop, which now promises to be large.

CALIFORNIA.

From San Francisco, Cal.: Prospects for a beautiful crop were never better. Wheat 20c. per cental lower, with a downward tendency. Barley proportionately lower. Business greatly improved. Country buyers making free purchases.

SOUTHERN STATES.

From Baltimore, Md.: General business during the past week was fairly satisfactory. Manufacturers are not as busy as they might be, but are sanguine of some improvement in the near future. The weather is more propitious to the spring trade, and most retail dealers are doing well. Offerings of wheat have been rather liberal, and prices had a tendency to lower; the market was fairly active. The demand for southern corn is constant, and the market quotes steady, with a better supply. A good feeling prevails in the coffee market, and prices are firm. Speculation looks more favorable in the cotton market, but holders continue indifferent. The real estate market is gradually becoming more active, and many estimates for building are being made. Freights continue dull, and the outlook for the near future is not very favorable. The leather market is reported active; middle-weight sole and middle and overweight rough, also good chestnut oak light weights, have been meeting with ready sale, and southern yellow grades are wanted.

From Richmond, Va.: General business has improved, and is quite brisk this week.

From Norfolk, Va.: Trade generally for the past week has been only moderately active.

From Wilmington, N. C.: Cotton firm; receipts fair and weather changeable. Grain and breadstuffs are easier. Freights quiet. Timber and lumber steady. Shingles firm. Naval stores advancing; statistics of the year just closed prove this to be still the leading market of this trade.

From Savannah, Ga.: Trade has been more steady, with an increase principally in groceries. Fertilizers averaged fair for the year; stock carried over in the following May will be less than previous seasons. Tobacco markets of the city leads. Georgia trade good, and sales for wholesalers last year amounted to $1,500,000. Wool of last year's clip is all marketed; no receipts of new crop.

From Macon, Ga.: General trade is dull, though there is an active demand for agricultural implements, agricultural hardware and builders' supplies. Bricks dull, but showing some signs of returning life. Prospects good for heavy trade in all lines.

From Selma, Ala.: There has been a slight improvement in the grocery trade during the past week, but it is still dull.

From New Orleans, La.: A better tone has prevailed in sugar, and a full ⅛c. advance has been established in open kettles. This is attributed to the realization of the slight reductions of the sugar tariff, and to the belief that the polariscope will probably kill revenue frauds, and consequently restrict importations. Crop news from the sugar districts is very favorable, but there is great apprehension about the river. The tone of the rice market is better; good to fair 5⅜@6c. Coffee strong and active; fair 9½c. Arrivals and supply of flour are fair; prices easy at previous figures. Grain is moving off freely on old contracts; little doing on new.

From Dallas, Tex.: Wholesale trade continues in a satisfactory condition. There has been a slight improvement in the retail trade. The demand for cotton is moderate and freely supplied.

From Galveston, Tex.: The general jobbing trade is reported good. Weather warm and pleasant. Crop prospects good.

From Nashville, Tenn.: General trade for the week has been quiet. Wheat steady; transactions light. Corn dull and prices unchanged; southern demand light. Flour quiet and prices steady.

From Memphis, Tenn.: There is no decrease in the volume of general trade this week. Flour and cornmeal quiet. Corn weak. Oats firm.

NOVA SCOTIA.

From Halifax, N. S.: There has been no perceptible change in business during the week.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.		*Exchange selling on New York.*
Boston, Mass.....	6	@ 6½	Par.
Chicago, Ill.....		@ 7	75c. premium.
Cincinnati, Ohio.....		@ 8	50c. premium.
Cleveland, Ohio.....	7	@ 8	1-10 premium.
Columbus, Ohio		@ 8	1-10 premium.
Dallas, Texas.....		@	⅛ premium.
Davenport, Iowa.....	8	@	1-10 premium.
Dayton, Ohio.....	6	@ 7	Par.
Des Moines, Iowa..	8	@10	⅛ premium.
Detroit, Mich.....	6	@ 7	
Galveston, Texas.....		@	Par.
Halifax, N. S.....	6	@ 7	½@¾ premium.
Indianapolis, Ind.....	8	@	Slight premium.
Kansas City, Mo.....	10	@12	$1 premium.
Louisville, Ky.....	7	@ 8	80c. premium.
Lincoln, Neb	10	@	1-10 premium.
Macon, Ga.....	8	@12	3-10 premium.
Marshall, Tex	12	@	½ premium.
Memphis, Tenn.....	6	@ 8	¼ premium.
Milwaukee, Wis.....		@	25@50c. discount.
Montghmery, Ala.....	12	@	½ premium.

Providence, R. I.....	6	@ 6½	Par.
Rochester, N. Y.....		@	¼ discount to par.
San Antonio, Tex.....	10	@12	¼ premium.
San Francisco, Cal.....	5	@ 6	22½c. premium
Selma, Ala.....	8	@12	⅜ premium.
St. Louis, Mo.....	7	@ 8	Par
Toledo, Ohio.....	7	@ 8	1-10 premium.
Troy, N. Y.....	6	@	
Wilmington, N. C.....	6	@ 8	Par.

THE PRICE OF GOLD.

Regarding the alleged rise in the value of gold and the supposed consequent necessity for some sort of legislation, the London *Daily News* says: There has seldom been a period of low prices like the present without an outcry against the state of the currency. It is not in human nature that, after a long time of depressed markets, those concerned should object to schemes for raising prices artificially. To wait for the slow, natural cure of low prices is an irksome business. Accordingly we are continually hearing of schemes for raising prices by making money more plentiful. Bimetallists, as everybody knows, wish to correct this depression by bringing up silver in support of the scarce supply of gold. Some bankers of experience, especially those of Scotch experience, suggest the introduction of £1 notes, and even 10s. notes, in order to eke out the supply of gold. There could be no sound objection to the issue of such notes if the public wished for them and a good reserve were kept available for their conversion. In Scotland £1 notes are far more readily taken than gold, and half-sovereigns are not a coin which has sunk deep into the affections of the people of this country. We must nevertheless own, in face of all this, a predilection in favor of letting things take their natural course without legislation based upon any such unsound principle as that which would regard it as the business of the state to interfere with prices. To improve the currency is one thing, and a proper thing for the state to attend to; to attempt to influence the course of commercial markets quite a different matter. Out of the necessities of business sprang such voluntary expedients for doing without money as the passing of notes, bills and checks. Their creation had the effect of augmenting the supply of money. Had they not been used either the gold would now have had a far higher exchangeable value than it has or business would have been cramped and stunted. But while the use of checks, etc., has had a greatly beneficial effect upon trade, it never was and never could properly be the function of a government to keep down the value of gold. The natural value of gold, as of other things, is far better left to the natural conflict of forces in a free market. Whenever a government attempts to step in with the laudable desire of setting some particular thing right in trade it is very apt to set a great many other things wrong. It is true enough that gold, unless supplemented by fresh instruments or methods of credit, may by degrees grow insufficient for the work assigned to it. In other words, it is quite possible that, like a tightly-fitting garment, which by degrees contracts the form inclosed, it may produce a further fall in prices. Even though that were so—and, as nobody can attempt to forecast the future, we will not say that it may not prove to be so—there would still be no reason to go to the state with prayers for such an alteration of the currency as would allow prices to recover. The currency is a thing to be attended to for itself, and not on account of the fancied effect it may have upon prices in the commercial market. If supplies of produce are excessive and profitless to those in trade, the sooner natural forces reduce the supply the better. As is observed at the opening, the low prices have lasted so long and have reached such an extremity that the natural forces of recovery may perhaps be relied upon to show their effect before long.

A BRITISH VIEW OF THE AMERICAN TARIFF SITUATION.

The following is from the London *Statist:* Another reason why protection is weaker than it was, is also to be found in the actual fact of the great development of manufacturing in the United States. The people there are beginning to find out that it is not manufacturing in general which is protected by the tariff, but only a very few manufactures out of the great mass of the manufacturing industry of the country. How large this mass of manufacturing industry must be is indicated by the fact that the town population in the United States is over thirteen millions, or rather more than a fourth of the total population of the country. The town population everywhere must be essentially engaged in manufacturing industry of some kind—not factory industry, which is often identified in people's minds with manufacturing industry, but still industry of a totally different kind from agriculture, and in which raw materials, or partly manufactured articles, are manipulated for final consumption. It may be considered, in fact, that with this thirteen millions of town population, the United States at this moment, instead of being a new country with few manufactures, is one of the very largest manufacturing countries in the world, second only to the United Kingdom in that respect. It has thus outgrown protection, even according to the view of those who say that protection is necessary for a new country. The bulk of these manufactures it is impossible to protect, and the fact that so many manufacturers now wish to develop their trade by means of exporting to foreign countries, is only another sign of manufacturing having got to the stage at which protection in any view is absolutely impossible.

For all these reasons we anticipate that before very long the United States tariff will become something very different from what it has been during the last fifteen years. Judging by the character of the United States people we should also anticipate that the reaction in favor of free trade, when it does come, will be extreme. The United States people are not fond of doing things by halves, and if they make up their minds that they can do without protection they are just as likely to sweep away the tariff completely as to make remissions of duties here and there and gradually undermine protection. How long it will be till the change comes it is impossible to say, but we have no sort of doubt that a change is very speedily approaching.

TRADE EMBARRASSMENTS.

There were 190 failures in the United States reported to BRADSTREET'S during the past week, 20 more than the preceding week, 71 more than the corresponding week of 1882, and 77 more than the same week of 1881. The middle states had 44, a decrease of 3; New England states 22, a decrease of 3; southern states 37, an increase of 9; western states 59, an increase of 1; Pacific states and territories 31, an increase of 16; Canada and the Provinces 24, a decrease of 16. The important failures included R. & C. Degener, shipping and commission, B. Lawrence & Co., stationers, David Forcheimer & Co, wholesale hats, Joseph W. Frazier, guns, and Isaac Sippili, dry goods agent, New York city; The Boston Machine Company, and Hathaway & Co., ship-brokers, Boston; C. H. Coy & Co., bankers, Toledo, Ohio; R. C. M. Lovell, coal, Covington, Ky. In the principal trades they were as follows: General traders 46; grocers 26; liquors 14; dry goods 12; clothing 9; manufacturers 9; books and stationery 9; fancy goods 5; hardware 5; hotels and restaurants 5; bankers and brokers 4; drugs 4; millinery 4; shoes 4; jewelry 3; produce 3; lumber 3; commission 3; tobacco and cigars 2; hats 1.

ALABAMA.

EPES STATION.—J. J. Hillman, general store, etc., has failed.

GREENBRIER.—J. W. Wingo & Co., general store, have failed.

MONTGOMERY.—A. H. Pickett, grocer, has assigned.

OZARK.—J. C. Holman, Sr., general store, has been closed by the sheriff.

ARKANSAS.

CENTRE HILL.—G. A. Donnelly, general store, has assigned to Hill, Fontaine & Co.

FRENCHMAN'S BAYOU.—S. G. McBride, groceries and saloon, has assigned. He was attached for $700.

CALIFORNIA.

COLUSA.—John Dunlap, grocer, has assigned.

EMMATON.—J. M. Upham, general store, has filed a petition in insolvency.

FRESNO.—J. G. Moody, clothing, has been attached and compromised.

HANFORD.—West & Furman, dry goods, have been attached.

HOLLISTER.—Farish & Chappell, general store, have failed.

MERCED.—J. O'Toole, grocer, has failed.

MODESTO.—George Gross, varieties, has been attached.

OAKLAND.—A. J. Hoeninghaus, saloon, has filed a petition in insolvency.

PETALUMA.—J. H. Crane, drugs, is reported to have failed.

RIO VISTA.—Wilcox & Dozier, general store, have failed.

SAN FRANCISCO.—Bacon & Decker, grocers, have filed a petition in insolvency.

SAN FRANCISCO.—C. J. Becker, restaurant, has compromised at 25 cents cash.

SAN FRANCISCO.—F. Chester, trading as F. Chester & Co., dry goods, has assigned. Liabilities $37,000. He bought mainly in New York.

SAN FRANCISCO.—J. S. Ferndall, broker, has filed a petition in insolvency.

SAN FRANCISCO.—C. A. Hamilton, painter, has filed a petition in insolvency.

SAN FRANCISCO.—Peter Hansberry, dairy, has filed a petition in insolvency.

SAN FRANCISCO.—John Mason, brewer, has been attached for $633.

SAN FRANCISCO.—J. C. Nielson, restaurant, has filed a petition in insolvency.

SAN FRANCISCO.—William Noelting, brewer, has compromised liabilities of $32,000 at 25 cents cash.

SAN FRANCISCO.—William Stepp, cigar manufacturer, offered to compromise at 15 cents, but it was refused. Liabilities $2,500; assets $700.

SAN FRANCISCO.—G. Werner, butcher, has assigned.

SAN FRANCISCO.—H. Young, lace goods, has been attached and offers to compromise.

SAN JOSE.—E. Bacquire, notions, has failed.

SAN JOSE.—G. W. Denne, trading as G. W. Denne & Co., stationers, has assigned.

SONORA.—H. Oppenheimer, varieties, has assigned.

COLORADO.

DENVER.—A. Rasmussen, shoes, is settling at 50 cents, 30 cents cash and 20 cents on time.

DENVER.—M. S. Withers, millinery, has been attached for $1,152.

LOVELAND.—Joseph Henkaufer, jeweler, has been closed on attachment. He previously gave a bill of sale on stock and fixtures about $800.

CONNECTICUT.

NEW BRITAIN.—G. W. Dart, hotel, assigned on the 30th ult., but subsequently withdrew it and is trying to sell out.

NEW HAVEN.—Evan Evans, stoves, has assigned.

NEW HAVEN.—James H. Kenney, grocer, has assigned.

NEW HAVEN.—L. C. Lindley, saloon, has assigned.

NEW HAVEN.—William M. Miller & Co., dry goods, have assigned to J. D. Sprague. The Savings Bank it is said foreclosed a mortgage of $45,000 on Mr. Miller's building on Main street, and took possession. Mr. Miller failed about four years ago, compromising at 40 cents.

DAKOTA.

ELK POINT.—Vasser & Son, general store, have failed.

DELAWARE.

LEIPSIC.—Martin L. Williams, general store, has been closed by the sheriff.

FLORIDA.

HATCH'S BEND.—J. H. Townsend, general store, has assigned. He was recently burnt out.

GEORGIA.

BALL GROUND.—Franklin & Co., gin and saw mill, are reported to have left town.

CHIPLEY.—Storey & Traylor, general store, have assigned. Liabilities $12,000; nominal assets $9,000; preferences $7,000.

CONYERS.—J. W. Almond, general store, has been closed by the sheriff. Liabilities $1,500; assets $800.

FORSYTH.—James D. Proctor, general store, offers to compromise.

MACON.—Tarver & Co., grocers, have been closed by the sheriff.

MARIETTA.—Joseph Elsas, general store, was closed on a chattel mortgage of $400.

NORCROSS.—Hunt & Brown, general store, have been closed by the sheriff.

SMYRNA.—W. N. Pace, general store, offers 50 cents.

ILLINOIS.

CHICAGO.—Alexander Shields, boiler maker, has been closed by the sheriff.

OCONEE.—James Slater, grocer, has failed.

PEARL DEPOT.—C. C. Lammy, general store, has assigned.

SCIOTA.—M. O. Jacobs & Co., grocers, have failed and been closed by the sheriff. Warren & Co., of Peoria, had a bill of sale and execution and claimed everything. Liabilities estimated at $40,000; assets $10,000.

ST. ROSE.—Feldivert & Henry, general store and saloon, have assigned. Liabilities $5,300; assets $1,500.

INDIANA.

COLUMBUS.—Roger Williams, music, has been closed on judgments for $500.

LAFAYETTE.—Hanks & Wolf, shoes, have assigned. Liabilities about $2,500; assets small.

LAFAYETTE.—Morgan & Chappell, dry goods, were sued for $2,448 by J. V. Farwell & Co., and were closed by attachment.

IOWA.

BARNES CITY.—Jackson Sarvis, general store, has assigned

BRAYTON.—Jacob Zimmerman, hardware, is reported to have transferred everything to I. P. Hallock.

COON RAPIDS.—B. M. Smith, hotel, has failed.

FORD.—B. Freil, dry goods and groceries, has assigned to Walter Whitmore.

HENDERSON.—John Barr, grocer, has failed.

HOPKINTON.—J. H. Campbell, general store, has confessed judgment for $5,000.

MARSHALLTOWN.—J. S. Jones, clothing, has assigned.

PATON.—Swayne & Smith, general store, have been attached at Angus, where they had a branch store. They attribute their embarrassment to overstocking and trying to unload by starting the branch store.

SIDNEY.—G. E. Skaggs, grocer, has failed.

KANSAS.

LOUISVILLE.—T. J. Roosa, general store, has assigned.

MEDICINE LODGE.—L. F. Pearson, dry goods and clothing, has assigned.

WINFIELD.—Ira L. McCommar, drugs, has assigned.

KENTUCKY.

COVINGTON.—R. C. M. Lovell, coal, has assigned. Liabilities $100,000. He has been in business many years, has a lease of over 600 acres of coal land in Kanawha county, W. Va., which he operates under the style of the Pioneer Coal Company, and claimed to have $150,000 invested in the lands, barges, etc. The recent floods delayed business, causing his paper to go to protest.

PROVIDENCE.—W. L. Wallace, dry goods, etc., has compromised, it is said, at 50 cents. Liabilities $1,300; assets $500.

STAMPING GROUND.—Alvin Duvall, dry goods, has assigned.

LOUISIANA.

BIG CANE.—M. S. Duke, general store, asked for a respite of three years, which was refused, and he then assigned to A. Perrodin.

NEW ORLEANS.—B. M. Bastian, restaurant, has assigned. Liabilities $2,873; assets $2,000.

MAINE.

AUBURN.—A. B. Crafts, grocer, has been attached.

CARIBOU.—Henry K. Small, hotel, has gone into insolvency.

CASCO.—John C. Bangs, general store, offers 40 cents.

CLINTON.—Manley Morrison, general store, who was recently burnt out, is trying to compromise.

FARMINGTON.—F. E. Laughton, general store, has failed and offers 10 cents.

FREEPORT.—P. C. Pinkham, general store, is reported to have failed.

PORTLAND.—A. L. Dresser & Co., books, have sold out and offer to compromise. Liabilities about $20,000.

PORTLAND.—Joseph Levy, tailor, is in insolvency.

MASSACHUSETTS.

BOSTON.—Hatheway & Co., commission and ship brokers, have suspended. The liabilities, with the exception of about $2,000, are said to be secured by stock in the Hatheway Steamship Co., of which the firm were the active managers.

BOSTON.—William P. Hawkins, provisions, has failed and will settle in insolvency.

BOSTON.—Bernard A. Marks, liquors, has failed and will settle in insolvency. Liabilities about $3,200, of which $400 is secured. There are no assets for the unsecured creditors.

BOSTON.—W. A. Nickerson, paper stock, has failed and assigned to Levi Timson. Liabilities $2,500; assets $200.

BOSTON.—The Boston Machine Company has suspended. Liabilities $150,000; nominal assets show a surplus. A committee of creditors has been appointed to make an examination and report. The company has sustained intimate relations with the South Boston Iron Company. Previous to 1873 the company did a large business, but after that date up to 1879 did very little, and at one time the directors thought of closing up the concern. It was incorporated with a capital stock of $247,000.

BOSTON.—C. M. Willman, formerly of M. Reinhardt & Co., liquors, has failed and gone into insolvency. Liabilities $1,403; assets nominal.

CAMBRIDGEPORT.—George Chaplin, carpenter, has filed a petition in insolvency. Liabilities $2,138; no assets.

LOWELL.—The Parr Manufacturing Company, knit goods, has been attached for $800.

NEWTON.—The liabilities of George L. Wadsworth, grocer, are about $6,125.

TAUNTON.—Creditors of W. L. Gifford & Co., grocers, have filed a petition in insolvency against them.

MICHIGAN.

ALLEGAN.—Herman Harris, clothing, is reported to have closed out his stock and left town.

BATH.—B. T. Whitney, grocer, has assigned.

CASNOVIA.—L. Putney, grocer, has been closed up under chattel mortgage. Liabilities about $1,200; assets $800.

CHAMPION.—At a meeting of the creditors of Beatty & Leopold, general store, the statement showed liabilities $27,000; assets $16,868. An offer of 40 cents was made, but the creditors wanted 45 cents. The failure is attributed to the shutting down of the Michigan iron mines.

DECATUR.—M. A. Roberts, grocer, has been attached.

DETROIT.—W. W. Collier & Co., manufacturers' agents in iron, have suspended. Liabilities $20,000; assets about $7,000.

MECOSTA.—L. Fraser, logger, is reported to have failed.

SAND LAKE.—Jonathan Berridge, grocer, has assigned. Liabilities $1,585; assets $943.

MINNESOTA.

DULUTH.—C. Hang, jeweler, has assigned.

LAKE PARK.—C. Kittlesby, general store, has assigned.

OWATONNA.—Gossler & Co., brewers, have assigned. Liabilities $3,300; assets $3,500.

WINONA.—J. Kasimer, tailor, has assigned. Liabilities $2,800; assets $2,000.

MISSISSIPPI.

COLUMBUS.—Lacy & Brother, grocers, who recently failed, owe about $5,500; assets $2,300; preferences $2,700. The assets did not realize enough to pay preferences.

MISSOURI.

KANSAS CITY.—Burns & Ridler, grocers, have assigned. Liabilities $2,000; assets $1,000.

KANSAS CITY.—The Mordyke Mill Works have been attached.

MACON CITY.—A. J. Stowe, saloon, has been closed by attachment.

ST. LOUIS.—The L. W. Hemp Tinware Company offers to compromise at 40 cents cash, or 60 cents in three, six and twelve months. Its statement of February 1 gave assets $40,816; liabilities $18,386.

WARSAW.—Joseph Thomas, saloon, has been attached.

NEBRASKA.

FAIRMOUNT.—J. E. Porter & Son, general store, have assigned.

NEW HAMPSHIRE.

BERLIN FALLS.—John Collins, grocer, has been attached and sold out by his creditors.

NEW JERSEY.

NEWARK.—Frederick Keer, artists' materials, has been sold out by the sheriff.

NEWARK.—G. & W. H. Starbird, grocers, have failed. Liabilities $1,000; assets about $250.

NEW MEXICO.

LAS VEGAS.—W. S. Brumlee, drugs, has assigned. Liabilities about $4,000; assets about the same.

SANTA FE.—A. O. Robbins, furniture, who failed last January, has assigned.

NEW YORK.

ALBANY.—Morris Harris, manufacturer of cigars, has failed and confessed judgment to his brother.

ALBANY.—The schedules of Friend Humphrey's Sons, leather, show liabilities $445,697; nominal assets $172,193; actual assets $120,422.

BATAVIA.—The schedules of A. H. Chase, lumber and coal, show liabilities $87,585; nominal assets $93,511.

CLIFTON SPRINGS.—W. W. Gillis, banker and publisher, left town on the 29th ult., taking all the available funds, $1,500. It is also reported that he forged paper for $500 and negotiated forged paper for $25,000. His stock has been attached.

JAMESTOWN.—S. N. Ayers, jewelry, has had judgments for $248 entered against him, and chattel mortgages are reported for $5,000. He is advertised to close out.

MARION.—A. B. Short, banker, has assigned.

MARION.—H. N. & A. B. Short, general store, have assigned to William W. Burbank. Liabilities about $20,000; nominal assets $31,000, consisting of book accounts $10,000; stock $12,000; real estate $9,000.

NEW YORK CITY.—The schedules of Delia Barter, furniture, show liabilities $964; nominal assets $603; actual assets $380.

NEW YORK CITY.—James G. Beach, drugs, assigned on the 3d inst. to Thomas F. Mayland.

NEW YORK CITY.—The receiver's report of the Co-operative Dress Association shows that he received $113,366, paid a dividend of 60 per cent., and has $35,135 on hand. The claims presented aggregate $127,366.

NEW YORK CITY.—Duke & Cole, variety store, offer to compromise at 50 cents, but this has been refused by some and suit was brought in one instance. Liabilities about $4,000. They assigned on the 5th inst. to Richard H. Duryee, giving preferences for $1,011.

NEW YORK CITY.—R. & C. Degener, shipping and commission, suspended on the 31st ult. Their business was principally with South America, and the firm say the immediate cause of the suspension was the revolution in Ecuador. They had accepted drafts for a considerable amount upon goods consigned to them from Ecuador, and had made advances upon goods shipped here. It was impossible to get goods in or out of that country on account of the embargo, or to get remittances. Mr. R. Degener had gone to Ecuador to try to make collections and

straighten out affairs. The firm have been large importers of rubber, and have suffered to some extent from the deadlock in the rubber trade on account of the corner. They have had to borrow largely on the merchandise they received, and the stringency of the money market affected them, as they had to pay full rates, besides which their capital was limited for the amount of business they were doing. The liabilities are reported by the firm to be about $500,000, and nominal assets $625,000. The business was started in 1866 as Woods & Degener; they failed from cotton contracts in 1871, compromising with their creditors, and the present firm was formed July 25, 1871, claiming at the start $30,000 capital.

NEW YORK CITY.—David Forcheimer & Co., wholesale hats, assigned on the 4th inst. to Jacob F. Cullman, giving preferences to Dr. Frederick Forcheimer $5,000; Sigmund Leerburger $2,500; total $7,500. The failure is attributed to the continued illness of Mr. Forcheimer, the capitalist of the firm, during the past two years, inability to make collections, particularly in the west, on account of the floods, and the depression in trade. The liabilities are reported at about $100,000. Mr. Forcheimer has been in business many years, and was of Hackes & Forcheimer who failed in 1873.

NEW YORK CITY.—Joseph W. Frazier, guns, assigned on the 2d inst. to Theodore Shotwell, giving the following preferences: Joseph R. Frazier $14,090; R. M. Rouband $3,300; Danbury National Bank $6,350; Edward T. Bell $3,750; Lucas P. Hoyt $6,000; L. S. Lawrence & Co. $12,456; Peters, Calhoun & Co. $7,501; North River Bank $8,250; Edgar, Farmer & Co. $8,195; U. S. Cartridge Company $2,000; Edward F. Quimby $455; Thomas G. Greene $2,000; Davenport Arms Company $1,750; total $77,098. The assignment is said to be only temporary, and resulted from advances of $70,000 to the Lee Arms Company, of which he was the agent and largest individual stockholder, which cramped him, together with the dull trade consequent upon the general peace of the world. He says his assets are worth upwards of $200,000 at a low valuation, and total liabilities $100,000.

NEW YORK CITY.—The schedules of Joseph A. Hatry & Son, wholesale drugs, show liabilities $93,391; nominal assets $73,547; actual assets $60,690.

NEW YORK CITY.—C. C. Houghton & Sons, cabinet wood and veneers, assigned on the 6th inst. to Louis Adler, without preference. The business was established in 1826.

NEW YORK CITY.—B. Lawrence & Co., wholesale stationers, assigned on the 6th inst. to Ellis S. Yates, giving 95 preferences aggregating about $97,000, which includes all their borrowed money and most of their merchandise creditors. The preferences for borrowed money aggregate about $63,000. The principal preferences are as follows: Berlin & Jones $5,690; Mrs. Louisa Lawrence, London, $14,681; Francis & Loutrel $2,670; H. G. Stetson $17,000; Eagle Pencil Company $5,262; John M. Launce, London, $15,572; R. & J. Arnold, London, $5,768; J. & W. Seligman & Co. $12,718. Mr. Yates, the assignee, says the assignment was on account of the uncertainty regarding the affairs of Thaddeus Davids & Co., whose store has been closed on account of the suicide of George W. Davids. Lawrence & Co. had indorsed notes for Davids & Co. for a large amount. One of these notes for $3,647 went to protest on Monday, the holder sued Lawrence & Co., and to protect all creditors the assignment was made.

NEW YORK CITY.—William W. Meeteer, butter, assigned on the 5th inst. to Leander A. Thorn.

NEW YORK CITY.—John O'Neil, dry goods, assigned on the 2d inst. to Samuel Middleton, giving preferences to Robert Morrison $237; Mary O'Neil $300; Mary Ryan $425; total $1,012. Liabilities $1,920; nominal assets $2,270; actual assets $1,379.

NEW YORK CITY.—Adolph Schiebel, manufacturer of neckwear, assigned on the 3d inst. to Adolph M. Petshaw, giving preferences to A. M. Petshaw $100; Marcus Silberstein $2,075; Israel Gruhn $750; M. Starck & Co. $403; Mary Havemeyer $200; total $3,528. The liabilities are about $8,300; nominal assets $6,500; actual assets $4,000.

NEW YORK CITY.—The schedules of Gustav A. Schwenk, liquors, show liabilities $7,036; nominal assets $3,817; actual assets $1,978.

NEW YORK CITY.—The schedules of Frederick C. Shotwell, brass fittings, show liabilities $31,631; nominal assets $4,480; actual assets $2,379.

NEW YORK CITY.—Isaac Sippili, dry goods agent, assigned on the 2d inst. to David Kalberman, giving preferences to Lewinson & Co. $2,500; Raphael Kahn $2,000; Morris Weil $3,000; Rice, Stiefel & Co. $2,000; S. Earnest $500; J. Stettheimer, Jr. & Co. $2,000; H. Bleichroeder $2,000; total, $14,000 He has been in the business many years, and was one of the largest buyers for out of town houses. His liabilities are reported at about $100,000, nearly all for borrowed money. Previous to the assignment on the 2d inst. he mortgaged his house for $35,000 to his son-in-law, Abraham Stein, payable May 1, with interest, and on the 30 inst. gave a deed conveying the same house to two southern creditors to secure four promissory notes for $25,000, and the latter assigned the deed and notes to the Merchants' Exchange National Bank of this city.

NEW YORK CITY.—The schedules of John Wales, ladies' cloaks and suits, show liabilities $24,749; nominal assets $19,443; actual assets $8,052.

NEW YORK CITY.—Whitson & Conklin, wholesale butter and eggs, assigned on the 3d inst. to Benjamin A. Trowbridge.

NEW YORK CITY.—The creditors' committee report the liabilities of E. G. Wiechmann & Co., wholesale cloths, are $302,000; actual assets, stock $95,000; good accounts $90,000; total $185,000. The firm offer 50 cents in their own notes, unsecured, at three, six and nine months, the business to be continued under the supervision of a committee of three creditors until the notes are paid, one of the committee to have a power of attorney to sign checks and receive all money.

NEW YORK CITY.—Mrs. Henrietta Wolff, clothing, assigned on the 6th inst. to Israel Lesser, giving preferences for $4,496, of which the largest were to F. Jacobs $1,627; S. W. Jacobs $1,060. She has two stores, one at No. 525 Sixth avenue and the other at No. 544 Manhattan avenue, Brooklyn, E. D.

NEW YORK CITY.—Adolf Zeltmacher, manufacturer of fancy leather goods, assigned on the 6th inst. to Gustav Bernheim, giving fourteen small preferences for $1,214. Liabilities about $6,000. He had been in business about 25 years.

POUGHKEEPSIE.—Barnard Brothers, gas fixtures, etc., are reported to have assigned to Henry W. Gilbert. Liabilities about $3,500; nominal assets $3,000.

ROCHESTER.—Edward L. Rockafellow, carriage trimmer, has assigned to Alfred J. Collins, giving a preference for $625 to his wife.

SPRINGVILLE.—Mrs. F. E. Wilcox, millinery, is reported in the hands of the sheriff.

TARRYTOWN.—Edward D. Morgan, grocer, is reported to have assigned to his father, John S. Morgan. Liabilities about $7,000.

WATERFORD.—W. H. Woodward, fancy goods, has assigned to E. M. Powell. Liabilities $2,999; assets, $889.

NORTH CAROLINA.

LITTLETON.—J. W. Irby, general store, has failed. He had branches at Brinkleyville and Kittrell.

PACTOLAS.—Perkins & Rollins, general store, have failed. They have been cramped for ready money for some time past.

SIGMONBURG.—Bowden, Smith & Co., lumber, have assigned to E. M. Ward. Liabilities $3,500.

SIGMONBURG.—J. N. Yelton, general store, has failed.

WILMINGTON.—Julius Hahn, dry goods, has assigned to J. J. Macks, giving preferences to the First National Bank $2,500; Henry Sampson of Nyack, N. Y., $2,500; Morris Bear & Brother $1,300; W. Goodman $900; D. Newman & Son $950; total $8,150. Liabilities about $20,000.

OHIO.

BARNESVILLE.—Mrs. J. E. Richey, milllinery, has assigned.

BELLEVUE.—Meyers, Tschumy & Co., furniture, have assigned to J. B. Miller. They were previously succeeded by Tschumy & Buechler, who sold enough stock to three creditors to satisfy their claims.

BELMONT.—J. I. Orrison, general store, has assigned.

BETTSVILLE.—C. O. Snyder, general store, has failed, and sold out to his mother.

CANTON.—W. B. Perkins & Co., books, etc., have assigned to L. L. Mills.

CELINA.—A. D. Buchen, clothing, has assigned.

CINCINNATI.—F. W. Helmick, music, has assigned to Albert Bettinger. This is his second failure, having compromised in 1878 at 50 cents.

CINCINNATI.—Thomas Murphy, tailor, has assigned to C. W. Baker.

CLEVELAND.—Conrad Kortz, marble, has assigned to J. W. Tyler.

EAST LIVERPOOL.—Burgess Brothers, grocers, have assigned. J. H. Burgess, the senior partner, was mayor of the city. The depression in business affected them.

EAST LIVERPOOL.—Burgess Brothers & Moore, manufacturers of stilts and pins for potters' use, have assigned.

GREENVILLE.—Joseph Turner, liquors, has assigned.

JOHNSONVILLE.—E. H. Viets, general store, has assigned to A. A. Thayer. Assets about $2,000.

MANSFIELD.—Geberich Brothers, musical instruments, were closed by the sheriff on the 31st ult. and assigned to I. S. Dunnell.

SPRINGFIELD.—J. H. Setff, millinery, has assigned to J. L. Zimmerman.

TOLEDO.—C. H. Coy, trading as C. H. Coy & Co., bankers, has assigned to L. K. Parke. The failure is said to have been caused by the inability to float the bonds of the Toledo & Indianapolis Railway Company, of which Mr. Coy was treasurer, the banks refusing to loan any more money to the house, and dishonoring the drafts. Mr. Coy was formerly president and proprietor of the Commercial National Bank, but surrendered the charter last July. His liabilities are reported at $100,000.

YOUNGSTOWN.—The receiver of Brown, Bonnell & Co., iron manufacturers, has submitted a statement showing liabilities $1,390,715; nominal assets $1,917,108.

OREGON.

MARSHFIELD.—A. Lemeran, drugs, has failed.

PORTLAND.—H. T. Irvin has assigned.

YONCALLA.—J. O. Booth, general store, has failed.

PENNSYLVANIA.

ALTOONA.—George W. Cole, grocer, has been closed by the sheriff.

BRUSH VALLEY.—William Truby, general store, has been closed by the sheriff. Liabilities $15,000; assets $10,000.

CHAMBERSBURG.—J. G. Elder & Son, general store, have been closed by the sheriff. James G. Elder died recently.

FAIRCHILD.—The personal property of F. F. Coudriet, lumber, is advertised to be sold out by the sheriff. He has been in business over forty years.

FREELAND.—Iles & Bell, general store, have been closed by the sheriff. The stock is valued at about $600.

HARRISBURG.—John Miller, brick manufacturer, is advertised to be sold out by the sheriff on the 19th inst. Liabilities about $8,000; preferred claims $1,500; nominal assets $1,500; actual assets about $700.

MEADVILLE.—George P. Clark, books and stationery, has been closed by the sheriff. Liabilities $2,000; assets $800; preferences $900.

MONTOURSVILLE.—Henry C. Freck, lumber, has had execution issued against him for $4,500.

PHILADELPHIA.—Felten & Aspell, leather manufacturers, are advertised to be sold out by the sheriff on the 10th inst. Judgment for $472 was recently entered against them.

PHILADELPHIA.—Mrs. Margaret Gloeckler (wife of Charles Gloeckler), boots and shoes, has been closed by the sheriff on judgment execution for $1,776, in favor of Gunniss, Barrett & Co. Other liabilities said to be about $400.

PHILADELPHIA.—McCauley & Butler, books and stationery, have suspended. Liabilities about $17,000, of which $10,000 is for borrowed money. The firm have dissolved partnership, James McCauley continuing alone. It is said nearly all the debts were contracted before Butler became associated with McCauley, and it is thought creditors will not hold the former responsible.

PHILADELPHIA.—Thomas Peace, wool waste, etc., is advertised to be sold out by the sheriff on the 10th inst.

PHILADELPHIA.—Rhodes & Moss, saloon, are advertised to be sold out by the sheriff on the 11th inst.

PHILADELPHIA.—John Waterhouse, marble, is advertised to be sold out by the sheriff on the 7th inst.

PHILADELPHIA.—John B. Wood, dry goods and notions, has been closed by the sheriff. Recently a judgment for $5,245 was entered against him in favor of J. Langfeld, of Langfeld, Turner & Andrews. He is said to owe about $10,000, and his stock is estimated worth about $7,500. He was formerly of Price & Wood, who failed November 16, 1880, and dissolved April 1, 1881.

PHILLIPSBURG.—Fleck & Miller, general store, are reported to have failed, with liabilities of about $7,000.

PHOENIXVILLE.—P. W. Beerbower, brick manufacturer, has been sold out by the sheriff.

SHAMOKIN.—Buttner & Co., clothing, have been sold out by the sheriff.

STEELTON.—J. A. Work, publisher, was closed by the sheriff on judgment for $392.

STROUDSBURG.—S. Heller & Brother, Valley Glass Works, who recently assigned to Milton Heller, owe about $20,000; assets about the same; preferences $15,000.

UNION CITY.—The Union City Iron Works is reported in the hands of the sheriff at the suit of L. J. Treat, and caused by the failure of the First National Bank, which it is said holds $7,000 worth of paper and undertook to collect it, and the execution was issued for protection.

WEST CHESTER.—Joseph S. Jones, restaurant, is reported to have failed.

RHODE ISLAND.

PROVIDENCE.—Isaac H. Sisson, pattern maker, has assigned to Clark Thurston.

TEXAS.

BRIDGEPORT.—E. O. Lively, general store, owes $2,000; preferences $1,500. He has been sold out.

DALLAS.—Isaac Loeb, grocer, is reported to have been attached for $12,000.

HOUSTON.—John Rossler, saloon, is reported attached.

WACO.—John Carson, saloon, has assigned. Liabilities $2,000; assets $1,000.

WILLS POINT.—Reynolds & Co., general store, have dissolved, and J. H. Reynolds, who succeeded, has been attached.

UTAH.

BINGHAM CANYON.—Hidel & McEvoy, general store, have assigned to A. Greenwald.

SALT LAKE CITY.—James Payne, shoes, is in the hands of a receiver.

VERMONT.

BURLINGTON.—E. H. Payn, machinist, has transferred his property in trust to L. F. Williams, after giving a new mortgage for what he was then owing.

EAST RICHFORD.—L. R. Parker, general store, has failed and gone into insolvency.

POWNALL.—Everett A. Perry is in insolvency.

VIRGINIA.

NORFOLK.—G. W. Rowland, trading as Rowland Brothers, wholesale groceries, has assigned, giving preferences for $4,450.

WASHINGTON TERRITORY.

WALLA WALLA.—Jasper Howe, bookbinder, has left town with his affairs unsettled.

WEST VIRGINIA.

PARKERSBURG.—W. A. Burgess, tinner, has assigned.

MALDEN.—The Logan Coal & Salt Company has assigned.

VOLCANO.—E. W. Staples has assigned.

WISCONSIN.

HOUGHTON.—J. O. Rosendale, shoes, has been attached for $315.

PRAIRIE DU SAC.—Charles Bartsch, general store, has assigned.

MANITOBA.

BRANDON.—James McNicol, shoes, is reported to have assigned.

EMERSON.—Robinson Brothers, hotel, have been sold out by the sheriff.

BRANDON.—The estate of P. Waram, general store, is advertised to be sold out by trustee.

EMERSON.—C. S. Douglass, printer and publisher, is advertised to be sold out by the sheriff.

PORTAGE LA PRAIRIE.—Peter Lovett, hotel, is reported in the hands of the sheriff.

SELKIRK.—John Christianson, general store, is reported offering to compromise at 25 cents.

WINNIPEG.—Blair & Larmour, dry goods, have assigned.

WINNIPEG.—J. & P. Lyons, contractors, have assigned.

WINNIPEG.—Nagle & Co., liquors, are advertised to be sold out by the sheriff.

WINNIPEG.—James J. Radford, jeweler, has assigned.

NEW BRUNSWICK.

FREDERICTON.—T. W. Smith & Son, tailors, offer 33 1-3 cents in three, six, nine and twelve months, secured.

KINGSTON.—Frank McInerney, jeweler, is reported offering to compromise at 30 cents.

MONCTON.—Thomas McSweeney, dry goods, has assigned. Liabilities about $25,000; assets $12,500.

ST. JOHN.—Anthony Cain, grocer, is reported to have left town, having sold out most of everything. A. McMullin, butcher, is said to have indorsed for him to the extent of $10,000.

NOVA SCOTIA.

HALIFAX.—Wood Brothers, dry goods, who recently assigned to Allison Smith, owe over $40,000.

LIVERPOOL.—Drew & Moren, general store and fish, are reported to have failed.

PROVINCE OF ONTARIO.

EMBRUN.—Patenaude & Collin, general store, have assigned.

HAMILTON.—Ernest Kraft, harness, has assigned.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice-President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

MOSES KING, Publisher,
HARVARD SQUARE, CAMBRIDGE, MASS.

NOTICE.

GRAND RAPIDS, MICH., Feb. 24, 1883.

The FIRST NATIONAL BANK OF GRAND RAPIDS, located at Grand Rapids, in the State of Michigan, is closing up its affairs, its corporate existence having expired on February 24th, 1883. All note holders and other creditors of said association are therefore hereby notified to present the notes and other claims against the association for payment.

HARVEY J. HOLLISTER, *Cashier.*

The OLD NATIONAL BANK OF GRAND RAPIDS, Mich., succeeds to the business of the First National Bank of Grand Rapids, at same place of business, substantially same management and equal capital, which will be speedily doubled.

HARVEY J. HOLLISTER, *Cashier.*

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, APRIL 14, 1883.

NOTES OF THE WEEK.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country indicate that there has been but little change in the condition of general trade during the week. There are signs of continued improvement, and the general outlook is favorable; but an uneasy feeling is apparent in the industrial situation in some sections, and in others the backward season, and consequent difficulties in transportation, have operated to restrict trade somewhat. In the east general trade is reported good, though retarded somewhat on account of the bad state of the roads. A similar complaint comes from portions of the middle states. While trade there is in general fairly satisfactory, there is no decided activity. In the west a gradual improvement is noted, and the prospects for the future are good. Collections are in general satisfactory. The approach of seasonable weather has had a reviving influence upon trade, and the crop news is, on the whole, encouraging. The reports from Kansas and California indicate probable large crops. In the south business in general lines has been fairly active, though the situation there presents no features calling for special mention.

The Western Iron Mill-owners' Association have declared that for the year succeeding June 1 next the wages of puddlers and finishers must be arranged on a lower basis than the 2½c. rate. Iron has not sold for 2½c., except for a short time, for nearly a year, and the wages paid, being agreed upon on the supposition that iron fetches that price, must conform to existing circumstances. It is further alleged that eastern mill wages are lower than those at the west. The Amalgamated Association of Iron-workers have held one meeting, but the outcome has not been made public. Another is announced for to-day at Pittsburgh, at which a conference between the association and the mill-owners will take place. The employés stoutly protest that any reduction will lead to another prolonged strike. Meanwhile the strike at the Springfield (Ill.) rolling mill has become serious. The owners have introduced non-union men, and the former employés have protested by waylaying, shooting, and otherwise injuring them. The organization of the iron mill owners has of late been perfected and strengthened, but the fight inaugurated by the puddlers and finishers last summer showed the latter to be as stubborn and enduring as their masters. It is to be hoped that when the mill owners and their men meet to discuss the wages question they will find a way to agree.

The stock market during the past week has gone on in the upward way it was started last week, and the rise has been conducted by the leading operators with a caution which is supposed to indicate their intention to make it reasonably permanent. The commission houses report that some public buying is being done, and that it is increasing. As yet, however, outsiders are trading very timidly. Should the market continue to advance slowly and steadily bolder operations may follow. There is no trouble with the loan market, loanable funds being easily obtainable at 6 per cent. or under, and the bond redemptions by the Treasury have been comparatively small and almost unnoticed. Foreign exchange rules high, which is partly accounted for by the slowness of the London stock market in following the rise on this side, thus giving an opportunity for profit in buying stocks there and selling them here.

The recent debates in the Assembly of the state of New York upon the proposed charter for New York city do not throw much light upon the difficult problem of municipal administration, consisting as they do for the most part of special pleas for this, that or the other arrangement for the dispensation of patronage. The chief bones of contention now are the offices of heads of departments, etc., which are to be filled by appointment by the mayor. Part of the members are anxious that the mayor should have unrestricted power of choice, thinking that the independent position which he would occupy in consequence would enable him to act without hindrance for the best interests of the city. But this might deprive a hungry horde of office-seekers of a particular stripe of a chance of feeding at the public bin, and hence the efforts made to secure the control of the mayor's appointments by the Board of Aldermen. The municipal council, as an institution of local government, is rather injured than served by the adhesion of this class of statesmen.

The New York legislature seems to have been very little moved by the arguments in favor of prohibition which the advocates of that policy have urged upon the attention of legislators throughout the country. Such is the conclusion to which one is led by an examination of the bill passed on Wednesday, and which now awaits the action of the Governor. This measure empowers the boards of commissioners of excise in the cities of the state having a population of over three hundred thousand inhabitants to grant licenses to sell spirituous liquors to any person or persons keeping or proposing to keep an inn or tavern. Another provision of the bill exempts cities of the class referred to from the operation of a law passed in 1857 and intended "to suppress intemperance and to regulate the sale of intoxicating liquors." Still another section of the act provides that persons holding a license thereunder, or their employés, shall not be arrested "for any alleged violation of any provision of any excise law," unless upon a warrant duly issued and based upon an affidavit, except in case of violations of the excise law occurring on Sunday. The proposed act, as will be seen, commits the whole question to the discretion of the local authorities.

The civil-service reformers, whose efforts met with such unexpected success at the last session of Congress, are apparently not at all disposed to repose upon the laurels thus gained. In the legislature of the state of New York two bills, embodying reform principles, have been introduced, one relating to the civil service of the state, the other, identical in character, being specially applicable to the city of New York. It is to be hoped that these bills, more particularly the last mentioned one, will pass. No one familiar with the history of the government of New York city needs to be reminded of the importance of applying true business principles to the administration of municipal affairs. The spoils system is, without doubt, responsible for much of the scandal and disgrace which is bound up with the story of the city's government.

In another column will be found a very interesting letter from Mr. David H. Mason, of Chicago, in which he calls attention to the procedure followed in the passage of the recent tariff act, and essays to demonstrate its unconstitutionality. Mr. Mason's argument is that in such an important matter as the raising of revenue the provisions of the Constitution should be followed with strictness; that the express declarations of that instrument in regard to the origination of revenue legislation have been violated by the action of the House and Senate, and that a proper regard for the integrity of the Constitution demands that the action of Congress be rebuked, and that the tariff act, the recent outcome thereof, be declared void. The point is not free from difficulty. It seems clear that, speaking strictly, Congress has not obeyed the behests of the Constitution, but it seems equally clear that grave political questions might arise out of a decision such as that suggested by Mr. Mason. It is likely, indeed, that the Supreme Court would give the matter a very careful consideration before arriving at the conclusion to which our correspondent believes that it should come. But whatever may be the disposition of the point urged by Mr. Mason, he certainly does well to direct attention to the extraordinary proceedings which attended the passage of the tariff bill. It is well that public opinion should concern itself to some extent with the practices condemned by Mr. Mason, to the end that there may be evoked a wholesome public opinion, which would probably be the safest and best corrective of abuses such as that referred to.

The triple alliance against France has not yet broken the peace of Europe, but it continues to form a fruitful topic of discussion in the countries principally interested. An article in the *République Française*, which has been attributed to M. Challemal Lacour, the French Minister of Foreign Affairs, declares that the republic will attack no one, but will make itself respected by all. The writer strikes a bold chord when he says that, "republic or monarchy, France in the presence of the foreigner is France," and that to recommend the republic to the kind feeling of Europe as the sole safeguard against the supposed bellicose feelings of Frenchmen is an insult to the nation which every Frenchman, whether monarchist or republican, will resent. In the Italian Senate the Minister of Foreign Affairs, said that the sole object of the accord between Italy, Austria and Germany was the preservation of peace. He denied emphatically that the agreement between the countries named was characterized by any spirit of hostility to France. He gave no light upon the manner or form of the agreement, and said that the Senate must be content to know that Italy had withdrawn from her former position of isolation. The agreement, he added, allowed perfect reciprocity of rights and gave a free initiative to each. A radical member of the Italian Chamber of Deputies suggests in a published letter that it is perhaps the fact that the alliance was inspired by the fear that republican ideas would obtain deeper root and spread throughout Europe.

PROPOSED RETALIATORY LEGISLATION.

The edict of the German government against American pork has caused much more excitement in this country than is apparent. Foreign governments will be surprised next winter at the very vigorous efforts which will be made to secure retaliatory legislation. This will be specially true as to western congressmen. The President will probably recommend such legislation in his message. The State Department is said even now to be considering whether it will be possible to do anything in the way of reprisals without legislation. The rumor is probably, however, not well founded, for it unquestionably is not in the power of the executive departments to act in the absence of legislation. Bills were pending in the last Congress, the object of which was to secure legislation which should be a counter-irritant to the action which was then only contemplated by the German government. That government had then only threatened to place an embargo upon American pork, and doubts were entertained whether such a threat would be executed. At all events, the producers and shippers had not become so excited about the subject as they now are. The proposed retaliatory legislation will doubtless be directed toward German wines, hosiery and woolen goods, and against French wines and brandies. Bills relating to these subjects were introduced in the closing weeks of the session by German-American representatives and others. German-Americans will not be alone in supporting such bills in the next Congress. The movement against these articles cannot be said to be based upon a desire for retaliation alone. Those who advocate such legislation insist that the adulteration in the wines and liquors and the poisonous coloring matter used in certain grades of German hosiery are sufficient reasons to warrant stringent legislation against the importation of these products, in the absence of any desire for revenge against the French and German governments. The reports made by our consuls for the last few months certainly tend to confirm the argument as to adulteration. The latest reports received from our consuls in Germany and France, if they are based upon facts, as they ought to be, show a commercial demoralization which should be rebuked by the legislation of some government.

In connection with the general subject of retaliatory legislation, the matter of discriminating duties will also, doubtless, be considered. The State Department has not made any careful summary of the countries which in effect discriminate against us by export duties, but evidence enough is at hand in the recent series of consular reports to show that such practical discrimination exists. Before the opening of the next Congress the State Department will have information ready to be presented. The export duties imposed by some of these countries, of course, are not aimed entirely at the United States, but, as a practical fact, the export duties which are imposed in Cuba and the West Indies generally are a discrimination against the United States alone. A hasty review of the export duties levied in foreign countries shows that many of the most important commercial nations levy export taxes of various kinds. Among the countries which do this are Austria, France, Italy, Spain, Russia, Turkey, Norway, Mexico, Japan, Morocco, the Argentine Republic, Peru, Guatemala and Hayti. The British and Dutch colonies also have export taxes. Our consuls have been instructed to make a careful study of these discriminations at the commercial centers, and to transmit accurate schedules of all export duties imposed by foreign governments. These schedules will, doubtless, be ready for publication next December.

The following are illustrations of some of the export duties levied by different countries: Russia levies an export duty upon bones, leeches, eggs of the silkworm, rags and paper material, zinc and iron-ore; France imposes an export duty on thoroughbred dogs and books infringing on copyright; Italy, on boracic-acid, sea-salt, dye goods, silk, rags and various ores and sulphur; Austria, on rags and manufactures for paper and some other articles; Spain, on cork, rags, sulphurets of lead and silver ores; Norway, on salted fish and wood for lumber; the Argentine Republic, on oils, fish, skins and a large proportion of the products of that country, the average percentage of export duty being 6 per cent. on the official value. Even Mexico, with which treaty is now sought, imposes export duties on certain articles. The export of Mexican antiquities, indeed, is prohibited. Precious woods and orchilla are required to pay export tax. Gold bullion has hitherto paid exportation of ½ per cent. on its value as export duty, and silver bullion a single duty of 5 per cent. on its value, but by the new tariff law of 1882, after the first of November, silver and gold coin in bullion were made free of duty for export. This change will afford great relief to the financial transactions in all parts of the republic, as the export duty on gold and silver bullion has been the most annoying law in the whole tariff, but the repeal of this export duty is accompanied by an augmentation of the regular import duties of 2 per cent. It is expected that this change will yield additional revenue. There is, however, a doubt as to the construction of this new tariff, for there is a clause in it which declares that a duty of ½ per cent. on silver and ¼ per cent. on gold will be collected, and that the time and manner of carrying it into effect will be determined by the executive. Thus far it is assumed that the clause relates to tax on productions, and nearly all of the South American countries impose export duties upon some of their principal products. Hayti has a duty of $3 per 1,000 feet on mahogany, and of $1.50 per 1,000 pounds on logwood, and of $2 per 1,000 pounds on coffee. The reduction of our tax on coffee, some years ago, was immediately nullified, so far as the cost price to American consumers was concerned, by the fact that Brazil immediately imposed a larger export duty on that article.

MATERIAL DEVELOPMENT IN MEXICO.

Recent railway maps of Mexico, printed in bright colors, with projected railways, and the portions thereof which have been constructed marked in broad stripes, leave no doubt that, with one-half the energy and expenditure of money in the future which has been utilized in the past, Mexico is soon to have excellent transportation facilities. Considerable progress has been made in the building of the Mexican National and Mexican Central lines since their operations were last discussed by BRADSTREET'S, although the rush to finish the work will not compare with the rates of railway construction reported along the line of the Northern Pacific and elsewhere in the United States when the desire to complete a certain amount of track-laying has been great. The track-layers of the Mexican National line are now at Garcia, a small town about twenty miles south of Monterey, or 190 miles south of Laredo, on the Rio Grande. Garcia is about twenty-four miles north of the town or city of Saltillo, which is to form one of the important points on this road. At the southern end of the line there has also been considerable work done, track being now down from the capital southwest to Toluca, and thence northwest to Acambaro, a distance of 172 miles. Acambaro is to form an important junction, for it is there that the main line is to continue due north via San Luis Potosi to Saltillo. This has been graded about forty miles to the northward of Acambaro to Celaya, and the grade is in the hands of hundreds of workmen from the latter point on to San Luis Potosi. Officers of the Mexican National Construction Company in New York state that the road will reach Saltillo by July 1, 214 miles from Laredo and 377 miles from Corpus Christi, in Texas, where the Mexican National line begins. Leaving the main line at Acambaro, the junction mentioned above, the company will extend southwest to Morelia, sixty miles, northwest to Zamora, and after passing to the north completely around Lake Chapala, will come south again and touch Colima, 555 miles (by the circuitous route employed) due west from the City of Mexico. From Colima is sixty miles further west to Manzanillo, on the Pacific coast. This company have also a branch projected northeast from Monterey to Matamoras at the mouth of the Rio Grande. A portion of this is graded, and some twenty-five miles of track have been laid from Matamoras west. From Zacatecas, about 150 miles northwest of San Luis Potosi, several miles of track have been put down, which will immediately be carried east about 100 miles, and form a branch of the main line. Two regular Mexican National trains are run daily from Laredo, on the Rio Grande, to Monterey; there being but one daily from Corpus Christi to Laredo. The International Line, one of the Gould southwestern system, reaches Laredo, and it is over it that most of the freight or passengers for the Mexican Central line reaches it. From the end of the line, going south, say at Garcia or thereabouts, stages are run daily. They drive rapidly across the central Mexican plain, and generally connect with the advance post of the Mexican Central Railroad on its way northward a short distance south of Agua Calientes, nearer by 120 miles than the track-laying on the Mexican National at Acambaro. In this way the traveler now reaches the Mexican capital, if entering the country at Laredo. Mexican Central trains, connecting with the Atchison, Topeka & Santa Fé road at El Paso, on the Rio Grande, run to Chihuahua. North from the City of Mexico trains are running to Lagos.

The third annual report of the Mexican Central Railway Company (Limited) states that work on the line from the City of Mexico northward has not progressed as rapidly as was expected, owing to the delays in receiving materials, timber and iron, via the Mexican Railway, from Vera Cruz. About 284 kilometers (170 miles) of track were laid on the southern division in 1882, or from San Juan del Rio to Lagos. On February 22 last it was reported that the southern division had been completed northward from the capital 306 miles, besides which Guanajuato, fourteen miles northeast of Silao, on the main line, had been connected by rail. During 1882, on the Chihuahua (or northern) division of the road 201 miles of track were laid, and grading was finished for sixty-six miles. From El Paso, on the Rio Grande, the Mexican Central tracks had been extended south, March 24 last, 300 miles. Rapid construction is more readily undertaken over this portion of the road, for where ties, timber, etc., cannot be obtained in Mexico, they can be quickly forwarded from the United States. From Agua Calientes, on its main line (southern division), the Mexican Central has projected an extension directly east of the port of Tampico, on the Gulf of Mexico. The superintendent in charge of this portion of the company's lines reports that up to December 31 last 450 miles of preliminary lines on the Tampico division have been surveyed; that 185 miles of line had been located; that ninety-six miles of right of way had been cleared, that forty miles of grading had been finished, that forty-two miles of track had been laid, and that about seventy miles of telegraph had been completed. This work has been carried on from Tampico westward. On March 7th, last, twelve more miles of track had been laid, making the total from Tampico to the west about fifty-four miles. At San Blas, on the Pacific coast, the work of grading was begun in February last on the Pacific division of the Mexican Central, which will eventually form a link in a Pacific coast belt line of railways if the plans now projected are carried out. The line for eighteen miles southeast of San Blas has been approved by the government, and the work of grading is now being vigorously extended. Up to March 1, 1883, the Mexican government has accepted 350 kilometers of road on the Chihuahua division and 450 on the southern division, in all 800 kilometers of road (about 480 miles), on which the total amount of subsidy ordered paid to the Mexican Central Railway Company is $6,744,000. Mexican treasury certificates amounting to $1,661,250 had been delivered to the company by March 1, on which $1,134,856.38 had been paid. The Central's statement of earnings and expenses in 1882 is summarized as follows:

EARNINGS OF THE MEXICAN CENTRAL.

Southern division:		
Total commercial earnings	$1,063,485.15	
Company's material	286,398.13	
Total earnings Southern division		$1,355,833.28
Chihuahua division:		
Total commercial earnings	$109,414 02	
Company's material	258,683.25	
Total earnings Chihuahua division		368,097.27
Total gross earnings 1882		$1,723,980.55

OPERATING EXPENSES.

Southern division	$758,728.13	
Chihuahua division	265,348.35	
Total operating expenses		1,024,076.48
Net earnings		$699,904.07

It should not be omitted, however, that out of this total of $699,904.07 net earnings in 1882 $545,081.38 must be credited to the Mexican Central itself for transporting "company's material." This indicates $154,822.69 only as net earnings from patrons of the road other than itself. The revenues of the company for the year 1882 by its own showing were:

From net earnings	$699,904.07
From cash collected on subsidy	909,142.83
Total (Mexican currency)	$1,669,046.90
Or, total (United States currency)	1,455,526.05

This, it is added, was sufficient to pay all the coupon interest of the year, including those due January 1, 1883, amounting to

$866,565, and leaves a net surplus for the year of $588,961.05 in United States currency. The equipment of the Mexican Central comprises 77 locomotives, 63 passenger coaches, 16 combined mail and express cars, 1,576 freight cars (including box, flat, stock and caboose) and 250 construction or road cars.

The Gould-Degress "Oriental" Railway, which starts at Laredo, as does the Mexican National, has been extended southeast along the Rio Grande for about forty or fifty miles. The projected route will carry the line almost due south from Mier to Victoria and the City of Mexico, and form a possible competitor for through freight with the Mexican National, which it will parallel if completed.

The entrance of the Atchison, Topeka & Santa Fé Railway into Mexico is not confined to a connection with the Mexican Central at El Paso. A branch of the former road unites with the Southern Pacific in Arizona, whence a through line to the port of Guaymas, on the gulf of Lower California, is obtained. The railway from Guaymas to the Southern Pacific line, known as the Sonora Extension of the Atchison, Topeka & Santa Fé, has been running trains over its whole length for a number of months. It will be observed that the trend of the main line of most Mexican railways, built or building, is north and south. The line of the projected Sinaloa & Durango Railroad, on the other hand, proposes to furnish a short-line eastern outlet into the United States for the city of Culiacan, the port of which is Altata, thirty-eight miles further west, on the Pacific. The road is already constructed from Altata to Culiacan. Work was begun a year ago last February, and surveying parties are now at work locating the line of way. The Mexican government concession grants this road $9,000 per kilometer (about three-fifths of a mile). The road contemplates two coast-line feeders, one reaching the city of Culiacan from the city of Altamos, 250 miles north and about forty miles from the coast, and the other tapping Mazatlan, a prominent Mexican port, some 200 miles south of Altata, by a line which is expected to connect with the main line about fifty miles east of Culiacan. The main line is expected to run a little north of east, crossing the Mexican Central Railway, until a point is reached about 100 miles due west from Monterey, on the Mexican National. Here the route laid down will be north to Eagle Pass, on the Rio Grande. Branches, each of about 100 miles in length, will be built to the cities of Durango and Saltillo, which are located respectively on the two north and south lines of railway last mentioned. To complete what may be considered almost a west side belt line for Mexico, the Mexican Central contemplate rail connection from the City of Mexico, considerably west of north of the main line to Mazatlan, touching at San Blas on the way. The different west side railways in Mexico, completed and projected, if worked as at present thought probable, will prove quite as efficient a connection between the mineral regions of Mexico and the Pacific coast country in the United States as the Mexican National itself can furnish between the capital city and St. Louis. The Mexican Central will carry one west from the City of Mexico to San Blas on the Pacific. The projected southern branch of the Sinaloa & Durango will carry him to Culiacan or Altata, whence by the northern extension he may proceed to Alamos, to which an extension south of the Sonora road is contemplated. If it is built the journey may be continued north into Arizona, whence the option is offered of rushing northwest across California or east to the Atlantic coast. The prospective prominence of the port of Altata renders some facts respecting it of interest. It has been for thirty years the principal Pacific port in Mexico for the shipment of logwood. This goes to California and to the old country, and is used for dyeing. Claret wines have been known to secrete logwood about them. There is fifteen to seventeen feet of water on the bar at Altata at low tide. The bay inside the bar is forty miles long. The steamer Mexico, from San Francisco for Guaymas, touches at Altata, as does the Sonora, from Manzanillo for Guaymas, and the Altata, which plies between Mazatlan and Agiacampo. The latter town is the port for the city of Alamos, which has been mentioned as some forty miles from the coast and the prospective junction of the projected southern extension of the Sonora road from Guaymas and the northern coast feeder from Culiacan, on the Sinaloa & Durango. Alamos derives added importance from its being the warehouse of the products of the Batopilas and other silver mines. When the work of track-laying is again begun the officers of the company state that the first point made will be to connect Mazatlan with the harbor of Altata, after which the road will be pushed over the Sierra Madre mountains into the rich agricultural country lying between the two Sierra Madre ranges (which branch V-shaped from the Isthmus of Tehuantepec northward) up either Mexican coast.

In his message to Congress the Mexican President recently called attention to the increase in the foreign trade of that country. It is so noticeable that it constitutes quite as marked a material advance as any record of progress by the railways now building there. The totals show that the revenues from duties alone during the first half of the last fiscal year more than equal the total external and internal revenues received annually four years ago. At the time last mentioned the total Mexican revenue amounted to about $17,000,000. For the fiscal year ended June 30, 1882, the total Mexican treasury receipts amounted to $27,500,000, a gain of $10,500,000 in four years, or over $2,500,000 per annum. From June 30, 1882, to January 1, 1883, the aggregate treasury receipts were $19,000,000. The months in which the treasury receipts are heaviest are said to be May and June, and the Mexican officials estimate that the total treasury receipts during the fiscal year ending June 30 next will amount to about $40,000,000. The gain that has been made in duties on importations of railway material cannot be attributed to the receipt there of foreign materials for use in the construction of railways, for they are exempt from taxation under special arrangement with the Mexican government. The principal gain in treasury receipts must be largely due to the workings of the new internal revenue law, for the President's message states that the duties on imports have of late been falling away. He explains this by saying: "When the Central and National railroads began the construction of their roads they drew all their money from abroad. Since they have completed long sections of their lines the traffic receipts, with government subventions, have diminished their need for foreign money." With this the rates of interest and discount have risen after being forced to a very low point by the plethora of money caused as described. The excess of funds stimulated importations, owing to the favorable rates of exchange, and this, for the reasons explained, has fallen away correspondingly. The President adds that the development of all national industries has been considerable and promises to continue. The deep interest taken by citizens of the United States in Mexico and Mexican development is conspicuously illustrated at the present time by the attention which is being paid to ex-President Diaz of that republic. It is significant also that a paper has just been started in Mexico to advocate his reëlection to the presidency of our neighboring republic. It is but five years ago since the spade of the Yankee tampered with the indolent soil of Mexico, and his money and enterprise has already succeeded in sending the scream of the locomotive, with all the enterprise that its presence implies, across the hills and valleys of the Spanish-American Rip Van Winkle among nations.

THE SILK TRADE.

The sale of spring season goods is not what had been hoped for by manufacturers in the matter of prices; but their cheapness has secured a full run among the general public. At no time have there been more extensive varieties of goods offered, and these of the choicest character. At present there is nothing definite as to the course of fashion. Manufacturers, in purveying goods for the present spring season, felt their way as best they could. The unsettling of fashion has materially contributed to low prices, but a more potent cause is to be traced to the heavy stocks accumulated in Europe, which led to large and somewhat excessive consignments to this country before importation orders were moved off. The disastrous western floods had also an influence in this direction, preventing, as they did, western jobbers from buying on their accustomed scale.

Now that the silk manufacture has attained such a development, the establishment of a silk-conditioning house, similar to that of Lyons, would no doubt prove of advantage to the trade. In a conditioning house the weight of each bale of raw or thrown silk is verified, the amount of dampness is ascertained, to get net absolute weight, and the exact percentage of extraneous matters, such as gum, grease, etc., given, in addition to the determination of the tenacity and elasticity of the thread.

The agitation of the tariff question exercised, while it lasted, an injurious influence on the silk manufacture and trade. Manufacturers emerge from it to find the duties on silk piece goods reduced from 60 to 50 per cent. ad valorem, a reduction of insufficient importance to lead in itself to any enlargement of importations. Manufacturers will be fully satisfied if customs officers see to it that invoices of goods do not show undervaluations.

We may add that silks, being essentially an article of luxury, they are particularly sensitive to the general condition of trade. Let the iron industry, with its dependent branches, be depressed, and the result is apparent in curtailed transactions in the silk line corresponding to the weakened purchasing power of the country.

The current demand for silk styles can be sketched in a few lines. Plain gros grain silks in color, low and medium grades, are in active demand; at the same time brocades, low to medium, are selling well. Ottoman and armor grounds, with flower effects and set figures, are being disposed of to a moderate extent, as well as plain grenadines. Plain and checked surahs sell freely. Imported printed foulards and pongees are very popular to meet summer demand. In certain classes of ribbons a good business is being done, the demand running on satin gros grains, narrow width. A good business has been done by jobbers in fine patterns of silk handkerchiefs, in which new designs are being constantly turned out, in all the new shades of the season, from light up to dark, prominent among these being ox-blood, crushed strawberry, and orange and yellows.

The plain styles of dress in vogue for some time have impeded the sales of the richer classes of trimmings and the various charming silk complementaries of dress, in which there are constant departures. The silk fringe manufacture has shown a slackened demand for the past few seasons, but there is a general impression and feeling that fringes will take again in the fall. That fashion has wholly deserted a customary channel is no evidence that it will not for a time return to it. At present silk is taken by manufacturers only to satisfy present wants. The stock of Japanese is somewhat limited. The better grades of filatures are selling more freely at reduced rates. European silk continues cheap, with a full stock.

The success of our silk manufacturers has been such that foreign makes no longer determine the preference of buyers. It is the style in which goods are made up and their adaptability to current wants that influence their sale. Apart from design, the purity of our silks is in their favor. Manufacturers are steadily extending the lines of production. Thus the last few years have witnessed the placing on the market of American figured silks and silk hosiery. The manufacture of spun-silk was commenced in this country some years since, and nine months since two additional mills were set up, the product of these mills being fully equal to the spun-silk imported. This country no longer depends on European supplies of machine-twists, buttonhole-twists, sewing silks and skein silks, of all of which there is an immense consumption. There are dozens of mills engaged solely on machine-twists, and some of these have obtained an enviable reputation by the extraordinary rapidity with which they execute orders. American manufacturers are not without their special advantages. The greatest speculative element in the silk trade, next to the amount of the next season's silk crops in different hemispheres, is as to the estimated course of fashion. Let fashion veer, and they are at hand to spread their sails to the favoring gale, and can supply the goods demanded long before any foreign consignments can reach importers. A difference to be noted in the manufacture of silk goods here as compared with Europe is in the few handlooms relatively employed. In Lyons and other continental centers of silk manufacture whole streets are filled with artisans working in their own homes, although the factory system was long since inaugurated; here productive power is concentrated and power-looms predominate.

The fall season, in which heavier goods are worn, is invariably the best for manufacturers, jobbers and retail dealers. In purveying for it our manufacturers are well informed in advance of the styles projected by the Parisian dictators of modes, and while not following implicitly these inspirations—inspirations which have the effect of commands in Europe—serve as a guide to the class and style of articles to be produced, such as will secure general acceptance. Sudden changes or freaks of fashion, frequently involving departures in design from a set class of goods, ordinarily require modifications of machinery, itself a costly matter, and the length of time a style will last is an important element of consideration, altogether conjectural as to the amount to be turned out. The fluctuations in sales made by retailers, and even their opinions, are scanned with the same interest that stock operators look to quotations on 'change. The silk-fringe manufacture has shown a slackened demand for the past few seasons, but there is a general impression that fringes will take in the fall.

The large proportion of the raw silks used in this country come from China and Japan. Of European silks we use more Italian than French. The Japanese merchants account for low prices for their filatures on the ground that the prices at which the inferior grades of Chinese are offered compel them to make concessions; still the best Japanese silk, with its long fiber and careful reeling and comparative freedom from gum and knots, secures higher rates. Japanese silk is somewhat scarce in this market, but sufficient for the demand. The raw silk undergoes various processes, finally being wound into tram, organzine, machine twists, fringed silks, etc. The manufacturers receive it in bales made up into "books." At present raw silk is being taken by manufacturers only to supply present wants. European silk continues cheap, with a full stock. The imports of raw silk last year amounted to 21,889 bales, of which 18,000 bales were supplied about equally by Japan and China. From Asia, via Europe, we took but 324 bales, and from France and Italy together 21,889 bales.

COST OF COLLECTING THE NATIONAL TAXES.

There has long been a rivalry between the customs and internal revenue branches of the public service as to the relative cost of collecting these two classes of duties. Now that Congress contemplates a very considerable reduction of the internal revenue force, the chiefs of these two branches of the service

have been putting their houses in order with a view of making the best possible showing. The administration now has under consideration the advisability of making considerable reductions in the internal revenue force, but it is deemed prudent not to do this until after the new tax law shall have gone into operation, as all the present force will be needed to set the machine in motion. Meanwhile the relative cost of collecting customs and internal revenue taxes is an interesting subject. The government is not in possession of accurate statistics relating to customs prior to the year 1858. Before that time the figures either were not accurately kept or were not carefully preserved. The internal revenue system practically begins with the war, but no complete data were obtainable until the year 1863. From that date until the present time accurate statistics have been compiled and are preserved. The cost of collecting customs duties has generally been considerably more than the cost of collecting internal revenue. Customs authorities maintain that their expenses are necessarily larger, as they are compelled to provide a large preventive force, and to protect the entire frontier against smugglers—an item of expense which does not appear in the internal revenue service. But there is one element of expenditure to which the customs authorities do not refer. That is, the unnecessary number of petty custom houses on many portions of the Atlantic coast. The argument that these are necessary as a part of the preventive system is not a sufficient answer to this extravagance. As an illustration of the extent of what, perhaps, is an abuse in the customs service, the collections and receipts at some of the minor ports in 1882 will serve:

Place.	*Receipts.*	*Expenditures for salaries.*
Aroostook	$51,295	$8,454
Castine	872	5,570
Wiscasset	48	4,331
Walcoborough	4,077	8,724
Gloucester	10,376	12,070
Stonington	1,002	1,978
Newport	884	4,401
Dunkirk	358	3,243
Sag Harbor	35	908
Alexandria	845	2,800
Petersburg, Va	57	3,504
Georgetown, S. C	37	1,935
St. Mary	502	1,818
Teche, La	17	7,556
Evansville	988	1,376
Burlington	178	523
Alaska	1,046	10,414

The following table shows the amounts collected from internal revenue and customs and the relative expenses of collecting for the period named:

Year ended June 30.	*—Internal revenue.— Revenue.*	*Expenses of collecting, per cent.*	*—Customs revenue.— Revenue.*	*Expenses of collecting, per cent.*
1868		....	$41,789,620	6.94
1869		....	49,565,824	6 85
1869		....	53,187,511	6.27
1861		....	39,582,125	7.18
1862		....	49,056,397	6.67
1863	$37,640,787	0.29	69,059,042	4.60
1894	109,741,134	0.23	102,316,152	4.09
1865	209,464,215	0.18	84,928,260	6.39
1866	309,226,813	1.87	179,046,651	2.98
1867	266,027,537	2.77	176,417,810	3.26
1868	191,087,589	4.55	164,464,599	4.65
1869	158,356,460	4.59	180,048,426	2.99
1870	184,899,756	3.92	194,538,374	3.20
1871	143,098,153	5.30	206,270,408	3.18
1872	130,642,177	4 36	216,370,286	3.21
1873	113,729,314	4.69	188,089,522	3.76
1874	102,409,784	4.40	163,103,833	4.19
1875	110,007,493	3.89	157,167,722	4.47
1876	116,700,732	3.38	148,071,984	4 53
1877	118,030,407	2.99	130,956,493	4.96
1878	110,581,624	2.96	130,170,680	4.47
1879	113,561,610	3.16	137,250,647	3.99
1880	124,009,373	2.95	186,522,064	3.23
1881	135,264,385	3.20	198,159,676	3.22
1882	146,497,595	2.80	220,410,730	2.95

THE MASSACHUSETTS CENSUS SUPPLEMENT.

This volume, which has been prepared under the direction of Mr. Carroll D. Wright, Chief of the Bureau of Statistics of Labor of that state, consists of an abstract of the leading features of the social and industrial statistics of Massachusetts as shown by the United States tenth census. The work involved in its preparation occupied a year, and furnishes an invaluable addition to the statistical knowledge of the state, dealing as it does with totals respecting nativity, occupations, illiteracy and other important data by towns instead of by counties only, as in the case of the United States census of the various states. Mr. Wright and his assistants were enabled to prepare the tabular statements with which the book is crowded by kind permission of the Superintendent of the Census, who furnished them with originals or copies of all the original tally-sheets referring to Massachusetts. The tables presented are naturally prepared so as to facilitate comparisons with the state census, and omit data referring to mortality, crime, pauperism, insanity, wealth, taxation, railroads, etc., which are covered by the independent enumeration of the commonwealth.

There are many interesting facts brought to light by this supplementary census of the Bay State. It appears that the population of Massachusetts in 1880 was 1,783,085, against 1,457,351 ten years before—a gain of 235,734, or over 22 per cent. The gain from 1860 to 1870 was but 226,285, or over 18 per cent. This increase in the ratio of gain in population in the past decade is not exceeded elsewhere in New England, except in Rhode Island. The population of Massachusetts in 1880 amounted to 44 per cent. of the aggregate for the eastern states. One-sixth of the total population of New England in 1880 lived within twelve miles of the statehouse at Boston, which also constituted 36 per cent. of the aggregate inhabitants of Massachusetts. The total population last reported consisted of 858,440 males and 924,645 females, an excess of the latter of 66,205 in 1880 against a like excess of 49,793 in 1870. This gain in surplus of women is more apparent than real. In 1870 they constituted 51.7 per cent. of the whole number of inhabitants, and in 1880 but 51.8 per cent., a gain only of 1/10 of 1 per cent. That the growth of the surplusage of women in Massachusetts is slow is sufficiently shown by the statement that they constituted 52.48 per cent. of the population in 1865 and 50.52 per cent. in 1840. They have gained in numbers over the males, therefore, but 1.28 per cent. of the whole number in 40 years. The tables of occupations by sexes reveal that the number of women and girls engaged in earning their livings constitutes 24 1/10 per cent. of the total number of both sexes so employed, and 31 8/10 per cent. of the number of men and boys so engaged.

CENSUS REPORT OF OCCUPATIONS.

	Male.	*Female.*	*Total.*
Government and professional	21,889	11,330	33,219
Domestic and personal	16,284	58,070	74,354
Trade and transportation	111,751	6,634	118,385
Agriculture	68,568	230	68,798
Fisheries	6,101	2	6,103
Manufacturers and mechanics	247,564	97,122	344,686
Apprentices, laborers, etc	74,434	795	75,229
Totals	546,591	174,183	720,774

The total number of women in excess of the number of men amounts to 38 per cent. of number of women and girls employed, as shown in the table above. Massachusetts, therefore, shows herself more than able to provide work for all the excess feminine heads and hands she may have.

While 267,730 natives of Massachusetts have gone forth into other states or to the territories, 251,029 natives of other portions of the Union have migrated to Massachusetts to find a residence. Out of the 251,029 named, 187,089 are from other portions of New England. The heaviest draft on the native blood of the Bay State has been made by New York, which takes 42,501 citizens of that state; after New York comes Rhode Island with 23,320, Connecticut with 22,643, New Hampshire with 20,561, Illinois with 20,481, and then California with 19,145. No other state is credited with over 11,000 inhabitants born in Massachusetts, and but three with 10,000. The figures as to illiteracy are of passing interest. It appears that there were in 1880 76,646 persons over ten years of age (5.3 per cent. of all over that age) not able to read. The number not able to write was 93,065, or 6.5 per cent. Ten years previously the total not able to read was 74,935 and unable to write 97,742. The totals of those over ten years of age in 1870 are not given. The data is therefore not at hand to enable one to reckon the percentage of illiteracy at that time or note the change in ten years.

FROM THE FEBRUARY CONSULAR REPORTS.

Consul-General Andrews, at Rio de Janeiro, writes that the present remarkable cheapness of Brazilian coffee makes it of interest to consider the economical situation of the trade. The price, including freight to New York, of "good first" coffee is now about 8½c. per pound; of "good second," 6½c. per pound. It has not been so low since 1857. In 1864 it rose to 17c. per pound for "good first," and remained at about 11c. for several years. In 1871–72 it rose to 17c. again, and to 23c. in 1873–74, when the crop was light. This year's crop is said to be about 800,000,000 pounds, and the outlook is for as large a crop next year. The low price is doubtless due to the heavy crop, to the large stocks left over and to the absence of any noticeable quantity of "prime good first." Planters have made but little money of late, and are letting the coffee-bean go into market just about as it will grow, many having refused to hire sufficient hands to cultivate it properly. Considerable coffee is colored. This is done to gain the extra 10 per cent. in price which the altered berry commands. The policy of the United States in admitting coffee free of duty is different from most other nations. Brazil has, on the other hand, been increasing her duties on imports from all countries.

Consul-General Mattsen, of Calcutta, whose attention has evidently been attracted to the pamphlet published at the city where he is located, discussing Indian wheat as a competitor with that from America in European markets, sends an extensive report thereon to the State Department. In addition to what is there called to mind on the general subject of the possible competition of Indian wheat with American, Consul-General Mattsen notes that the annual production of wheat in British India has increased of late years, until it now amounts to 240,000,000 bushels, according to official reports and best available estimates. The quantity exported during the past five years has been as follows: In 1877–78, 12,175,853 bushels; in 1878–79, 2,170,631 bushels; in 1879–80, 4,312,418 bushels; in 1880–81, 14,012,291 bushels, and in 1881–82, 37,185,481 bushels. The total area in British India, planted to wheat, is said to be now a little over 20,000,000 acres, of which 7,000,000 acres are in the province of Punjab, 6,500,000 acres are in the northwestern provinces and Oudh, 3,000,000 in the central, 1,500,000 acres in Bombay, 1,000,000 in Bengal, and the remainder divided between Berar, Sindh, Madras, Ajmere, Mysore and British Burmah, in the order named. The best average yield is obtained in Punjab, where it is estimated at 13½ bushels to the acre, and in the northwestern provinces at 11⅔ bushels. The general average yield is 12 bushels per acre, though by high cultivation, and irrigation and manure, the yield has been raised as high as 25 and even 30 bushels per acre. The consul-general concludes that not only does India supply Europe with 40,000,000 bushels of wheat annually, but that she possesses "facilities for increasing the supply to an almost unlimited extent, owing to the great elasticity of the home consumption and the vast amount of land awaiting cultivation. And, finally, that with a fair average crop throughout the world the American farmer will have to prepare himself to reduce the cost of production to the lowest minimum, and be content with small profits, or else wheat-growing in India will be stimulated to such an extent that subsequent competition may become extremely formidable."

OCCASIONAL NOTES.

The passage of the Pendleton civil service bill does not seem to have settled the ideas of some gentlemen upon the great question of reform. Some time since the Commissioner of Internal Revenue requested the resignation of the internal revenue collector at Detroit. There was a time when such a request would have been regarded as equivalent to a command, and when the office-holder to whom such a request was preferred would, without hesitation, have surrendered such portion of the spoils of victory as had fallen to his lot. But the internal revenue collector at Detroit, misled by the passage of the bill referred to, and vainly imagining that a mere legislative enactment was potent enough to work a change in the relations between officials and their superiors, took upon himself to embarrass the commissioner by refusing to resign his office. The grounds upon which he bases his refusal are sufficiently amusing. He asserts, in substance, that his administration of the office has been praised by his superiors, that no fault is found with him by people doing business there, that people in the city have generously manifested a desire to have him keep the place, that he has served the government faithfully, and knows of no stain or doubt upon either his private or official character, and that he does not wish to becloud his fair name by making a forced resignation. As any person will see, the reasons advanced by Mr. Trowbridge for his refusal to resign are of a purely negative nature, and certainly can have no weight with a judicious politician. Mr. Trowbridge tacitly assumes that his office was intended to be useful to the government and to the people, and that one of the main objects of its institution was to secure the convenient and honest transaction of public business. How far, how very far, wide of the mark the obstinate collector is must be plain to every person who will take pains to consider the question dispassionately. It has long been known that offices are intended principally as rewards for faithful political service—not to that abstraction, the state—but to one or another of the individuals who, in these happy times, direct the state's concerns. We repeat, that so glaring an instance of wrongheadedness and obstinacy can only make the judicious grieve.

In an article referring to the proposal for the establishment of a railway commission in Canada, the Toronto *Globe* has some remarks upon the present state of opinion in that country in relation to the railway question, and presents some views as to the probable future management of railways which may not be without interest here. It says that no one conversant with the state of public sentiment can doubt that, however ill-defined it is, there is a strong feeling among the people that the railway power ought to be subject to some control in addition to that which now exists. The opposition to a commission comes not merely from railway managers, but also in part from independent business men who are apprehensive of the possible effects of a change, and in part from those who are afraid of a job and who see nothing in the establishment of a railway commission save the creation of fat offices to be enjoyed by favorites of the government of the day. Objections of this nature, however, the journal referred to adds, are altogether insufficient as grounds upon which to base a refusal to grant a reform which the country wants. The *Globe* declares its belief that the country does really need an efficient railway commission, and that the institution of such a commission would be beneficial to the proprietors of railway stocks, and that even railway managers would soon come to regard as a blessing a government commission to which they could resort for speedy settlement of railway disputes. Regarding the evidence upon which to base legislative action looking to the establishment of a new regulatory authority, the Toronto journal admits that such evidence is very conflicting. While it is a matter of common talk that one merchant gets better rates than his neighbor, there has been a complete absence of proof that unjust discriminations have been wilfully made. Until this central fact has been established by competent evidence, the *Globe* says that the government should hasten slowly. It suggests, however, that a committee, holding sittings at the several centers of commerce, would discover a mass of facts which would prove beyond the possibility of doubt whether a railway commission is a necessity or not. As to the probable future management of railways, the *Globe* thinks that things are tending to monopoly everywhere, and that from a system under which the railway system in a country is under one management to state control there is but a single step. In view of the existence of this tendency, it seeks to discover a plan under which all the advantages of state control without its disadvantages would be realized. It suggests as one, though not the best possible method, a system under which the government could own the railways, and any individual or corporation could run its cars thereon, subject to supervision and the payment of tolls. Most people will regard the realization of this idea as a task of considerable difficulty.

In the report of the Illinois Department of Agriculture, dated December 31 last, it is remarked that the aggregate annual value of the crops and animal products in that state "is not nearly approached by any other state." It is added that there are nearly 2,000,000 persons represented in the families of the farmers of Illinois, "a large portion of whose subsistence does not enter the channels of commerce, and therefore is not represented in the exhibit." The value placed on the total agricultural products, live stock, seeds, etc., in 1882 was $317,195,230, against $256,096,512 in 1881, and $253,588,737 in 1880. The gain in 1881 over 1880 was, therefore, $2,507,775, and in 1882 over 1881 it was $61,098,718. According to the statistics contained in this report, it further appears that out of 1,624,917,300 bushels of Indian corn grown in the United States in 1882, Illinois produced 179,471,729 bushels, or 11 per cent. of the whole; out of 502,789,300 bushels of wheat, Illinois produced 52,323,261 bushels, or 10 per cent. of the whole, and out of a total of 475,655,700 bushels of oats, Illinois yielded 99,275,380 bushels, or 20 per cent. The most valuable of Illinois' farm products in 1882 appears to have been her Indian corn crop, which was valued at $76,528,755; after that wheat, $46,714,376; oats, $41,062,611, and hay, $34,006,164. Her fat hogs were valued at $43,832,117, and fat cattle at $23,135,715.

Mr. Fawcett, the English Postmaster-General, recently stated in the House of Commons that, according to his estimate, the immediate loss of revenue to the government if a scale of one-half penny per word for telegrams was adopted and addresses charged for would be about £177,000, and that it would take four years to bring back the receipts under the new scale to those now current under the existing system. The present rate, he said, was not satisfactory, proof of that fact being found in the circumstance that the receipts for telegrams have decidedly fallen off. In 1880–1 the receipts amounted to £440,000, in 1882 they fell off to £353,000, and in the present year, with an additional capital expenditure of £200,000, they amounted to only £363,000. On the whole the result was that the telegraph service was at present only paying its way. Mr. Fawcett said that the government originally paid for the telegraphs 50 per cent. more than they were worth when they were taken over, and that the interest on the sum of £3,500,000, representing the excess paid, would have saved an annual amount equal to 2⅔ per

cent. in the profits of the service. The *Pall Mall Gazette* says that the sixpenny telegram will be very generally used by business men, who now, more than ever before, regard brevity, conciseness and rapidity of communication as absolutely necessary. It thinks that, while the new scale for telegrams may not lead to a very marked increase in the employment of that class of message in the large cities where the use of the telephone is extending greatly, yet that the cheap opportunity for permitting country business men to communicate with central markets will be largely used. In this way, the *Gazette* adds, it is probable that increased business will be brought to the London and leading provincial stock exchanges from speculative operators and investors to whom the saving involved, perhaps twice or thrice a day, in their instructions will sometimes govern their judgment in deciding whether to take advantage of market fluctuations or not.

The London *Economist* takes a somewhat gloomy view of the social troubles in Paris. Every French government, it says, and especially every French government professing republican opinions, stands face to face with a problem to which nothing to be encountered in England bears any close resemblance. Paris, being the center of European pleasure, is a very irritating place of residence to the poor. It is, besides, a great manufacturing city in which hundreds of thousands of clever artisans prone to socialist and communist doctrines live, and in which the rates of wages, except in a few trades, are not high. Competition is active, and the breaks in work are frequent. The number of men who come or are brought there increases, and almost all are reluctant to leave. For various reasons a great proportion of Parisian artisans fail to save, and live, in a sense, from hand to mouth. When any trade of importance stops for a time large numbers of workmen are adrift without resources. Here are materials for trouble, for in Paris political consequences are almost certain to follow pecuniary distress among a large class. Again, under the circumstances indicated, the workmen do not leave the city, but become a restless and dangerous throng within it. They are not merely hungry individuals, but men a majority of whom have been in the army, and who have the instinct of acting in concert and under improvised leaders. The population, even, apart from the workmen, is of an inflammable disposition, and an insignificant conflict between discontented workmen and the authorities may be followed by a riot, perhaps by a revolution. Under the circumstances, says the *Economist*, the situation of the government is a difficult one. They have no such resource as a poor law to help them, and they dread any approach to the principle of such a law as involving an official sanction to socialism. The method generally adopted to avoid a crisis is the finding artificial work. In such an arrangement, says the London journal, there is nothing permanent, and no arrangement can be permanent except some variety of poor law "under which the whole population shall be compelled to insure itself while the state assists by granting special interest upon the accumulated funds." To any plan of that kind, the *Economist* adds, French property holders are incurably averse, and among the innumerable projects brought forward by French ministers, there is never seen one looking to the creation for Paris of an industrial reserve fund.

From information recently communicated by M. Tisseraud, the French Director of Agriculture, to the committee appointed by the Minister of Agriculture to report upon the condition of the French vineyards, it appears that nearly two million acres of vines have been destroyed, and that 1,500,000 acres more have been attacked and are more or less affected in their yield. Within the last year or two about 50,000 acres have been replanted and the young vines dosed with sulphate of carbon, while 30,000 acres newly planted have been protected by submersion. About 40,000 acres more have been planted with American vines. Within the last year or so there has been a slight increase in the area of newly planted vineyards, but the total is very trifling compared with what has been destroyed. Associations containing a large number of members, however, have been formed for the purpose of conducting experiments as to the best mode of combating the phylloxera, and these societies are already in receipt of subsidies from the government. The committee appointed by the minister has decided that no remedy has yet been discovered entitling the inventor to the reward offered by the government some years ago. It recommends, however, the use of sulpho-carbonates and the submersion of the vines as palliatives of the disease. It is interestiug to notice that the cultivation of the American vine has been authorized in twenty-three arondissements. It is intended to secure the passage of legislative measures having in view the preservation of the vines in certain districts from invasion by the phylloxera.

A French statistician recently made a computation as to the cost of living of the working-classes in Alsace. The results arrived at it is said represent a fair average for the whole of France, although the items of expenditure might vary slightly from those in other districts. The estimates were based upon an investigation into the expenses of sixteen families chosen from among different classes of workmen, and their expenditure varied from 1,100 francs to 3,000 francs, or from $220 to $600 per annum. Of the total expenditure, 15 per cent. was taken up by cost of house accommodation, 16 per cent. by clothing, and 61 per cent. for food, and 8 per cent. was reserved for miscellaneous purposes. The highest percentage of expenditure registered for food was 72 per cent., of which 33 per cent. was for bread. The highest percentage of expenditure for bread was 48 per cent. The average expenditure of the sixteen families upon bread was a little more than one-fifth of their total living expenses. It appears from this that the bread bill does not form the chief item of a working-class family's expenditure in France.

The situation of affairs in Egypt, which ceased to engage the attention of the world shortly after the trial of Arabi, is again beginning to attract some share of public concern. A correspondent of the London *Times* recently said that the Nile valley had been inundated with European enterprise and European influence in such a rapid and reckless fashion as could not fail to produce a certain amount of economic dislocation, and that even now Egypt is threatened with serious economic difficulties and dangers. The writer referred to says that the first to throw open the floodgates for the introduction of European capital and European enterprise was the ex-Khedive Ismail, who formed the design of revolutionizing the economic condition of Egypt, and who succeeded to the throne at a time when the public of western Europe were eager to invest their savings at a high rate of interest in questionable foreign securities, and when the American war had driven the price of cotton up Egypt was regarded as a tempting field for the expenditure of capital in public works, and the Khedive expended large sums of borrowed money on productive and unproductive works, and made modifications in the system of agriculture to suit the change in the markets. Hundreds of thousands of acres were rapidly transformed into cotton plantations, and in the towns and larger villages ginning factories for extracting the cotton seeds and making up the bales rapidly sprang up. The fall in the price of cotton at the close of the American war was a severe blow to the new prosperity, but its effect did not long continue. The decline in the price of cotton was counterbalanced to some extent by widening the area of cultivation, and the cultivation of sugar cane was introduced into Upper Egypt. Large numbers of the peasant landholders were removed to make room for sugar plantations, and these were furnished with agricultural machinery of approved pattern. The total agricultural produce of the country was steadily increased by these means, and the exports rose in value from £4,500,000 in 1862 to £14,800,000 in 1874, since which year there has been a falling off. Among the elements of which the statistics take no account, and which must be kept in view in endeavoring to arrive at a proper conception of the present situation, are the enormous national debt contracted during the years of feverish prosperity referred to; the dispossession of the peasantry to make room for the plantations; the errors committed both in the direction of the public works and in the cultivation of the land, and the oppressive indebtedness into which the peasantry have sunk and from which they can scarcely hope to extricate themselves without selling their land. The *Times* correspondent, however, is of opinion that the economic crisis looming in the distance may yet be averted by the employment of proper means. Among the first things to be done, says the writer, is to insure a more efficient and equitable distribution of the water for irrigation and to correct the scandalous abuses in the use of forced labor for cleaning the canals. By the adoption of these simple reforms the production would be considerably increased, because the crops would be watered at the proper time, and the labor wasted in the present system of corvee might be employed in tilling the fields. The permanent works of the irrigation system might then be improved, and a large number of reforms might be introduced into the traditional system of agriculture. At the same time it appears that there are great practical difficulties in the way of the realization of these reforms, and that there is little hope of their being adopted by the great mass of the cultivators so long as the majority of the land-holding peasants, being deeply indebted, are obliged to live from hand to mouth. The question, says the writer in the *Times*, is one with which the government will be obliged to deal sooner or later.

In his recent notable report to Lord Granville on the re-organization of Egypt, Lord Dufferin says that much of what the British are about to inaugurate will be of necessity tentative and experimental, and that this is especially true as regards the indigenous courts of justice and the new political institutions, both of which will have to be worked by persons the majority of whom will be without experience or instruction. The outlook, he says, would have been different had he been commissioned to place affairs in Egypt on the footing of an Indian subject state. The material wealth and well-being of the country would have been greatly increased by the extension of its cultivated area, the expansion of its revenue, the establishment of justice and other reforms. But the Egyptians would have considered these things dearly purchased at the expense of their domestic independence, and besides the public opinion of England had pronounced against such an alternative. He remarks further that although it is the fixed determination of the government not to assume the responsibility of permanently administering the country, whether directly or indirectly, yet it is absolutely necessary to prevent the fabric raised by England from tumbling to the ground the moment her sustaining hand is withdrawn. Such a catastrophe would be the signal for the return of confusion to Egypt and renewed discord in Europe. The desideratum of every one, he continues, is an Egypt peaceful, prosperous and contented, able to pay its debts, and to maintain order along the canal, and offering no excuse in the troubled condition of its affairs for interference from outside. The task before England is by no means an easy one. The situation of the country is critical, and the problems immediately pressing on the attention of its rulers are vital. The actual condition of the fellah has been rendered extremely precarious by various circumstances. His relations with his European creditors are becoming dangerously strained. The agriculture of the country is rapidly deteriorating, the soil having become exhausted by over-cropping and other causes. With such an accumulation of difficulties, native statesmanship, even though supplemented by the new-born institutions, will hardly be able to cope unless assisted for a time by British sympathy and guidance. Under the circumstances Lord Dufferin submits that the work of reorganization can hardly be considered complete, or the responsibilities imposed upon the British nation by circumstances adequately discharged, until Egypt has shaken herself free of the initial embarrassments enumerated. "Even then," he significantly adds, "the stability of our handiwork will not be assured, unless it is clearly understood by all concerned that no subversive influence will intervene between England and the Egypt she has re-created."

LETTERS TO THE EDITOR.

THE NEW TARIFF ACT UNCONSTITUTIONAL.

To the Editor of BRADSTREET'S.

SIR—So vast are the interests affected injuriously by the provisions of the new tariff act; so damaging, if not fatal, must its operation be to certain great branches of domestic industry; so clearly is the mode of its passage a direct and palpable violation of the Constitution of the Union, and so dangerous in tendency is the legislative precedent set up by the House of Representatives, that an appeal should be made without delay to the Supreme Court of the United States to declare the act null and void on the ground of its unconstitutionality. Let me reinforce my views by a brief outline of the principles and facts of the case.

The Constitution enumerates and defines the powers granted to the several departments of the government which it created. Each department was intended to be distinct and separate from the others; with clearly marked boundaries; with exclusive privileges, duties and rights; with peculiar and independent functions. Extreme care was used in vesting a prerogative in a particular branch or division of the government, to prevent every other branch or division from exercising the same prerogative, and from interposing with its own opinions directions or instructions to arrest or to modify the legitimate exercise. To permit one part of our political organism to encroach upon the province assigned to any other part would be to produce that inequality and that discord to which the Constitution, in all its provisions and designs, is adverse, and by so much would disturb and alter the original purposes of that instrument. Every argument for any constitutional separation whatever of departments is an argument for the punctilious observance of the actual separation made by the Constitution. When the government acts at all it must act precisely as the Constitution directs, through such departments or through such union of departments as the Constitution specifies, else it violates the fundamental law. These are facts and reasons to be kept steadily in mind while examining the question of the unconstitutionality of the new tariff act, for upon these considerations hinges the issue I have presented.

The Constitution provides (Art. I, sec. 8), that "the Congress shall have power to levy and collect taxes, duties, imposts and excises." Further, the Constitution provides (Art. I, sec. 7), that "all bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments as on other bills." By the first provision all taxing power is granted exclusively to Congress, and by the second provision the initiative in exercising this power is granted exclusively to the House of Representatives —the body which most nearly affiliates with the great principle championed by our revolutionary forefathers, that taxation and representation should go together. With reference to "all bills for raising revenue," the division of power between the Senate and the House is clear, definite, positive, mandatory and permanent. Each of the bodies has its peculiar functions to exercise, its separate obligations to perform. To the House belongs origination, to the Senate only amendment. The Senate must wait, without authority to act, until the House has acted, and the prerogative of the House must be, in all respects, all intended by the Constitution. Whatever makes it less, in the smallest degree, whatever circumscribes, abridges, hinders or circumvents its exercise, no matter how little, must be unconstitutional. The House would be less than the Constitution designed it to be if the Senate should invade or subvert the former's sole authority to originate "all bills for raising revenue."

When this partition of power between the Senate and the House was conferred the framers of the Constitution must have had in their minds some standard—not one derived from practice under the new government, because that had not yet gone into operation, nor one derived from practice under the "Articles of Confederation," because the Congress had always been a single body, but, as is generally acknowledged, from practice under the British Constitution, with which the statesmen of those days were familiar. The British practice was to permit to the House of Lords only concurrence with, or negative of, such revenue provisions as had passed the House of Commons. Our forefathers enlarged this practice by permitting the Senate "to propose or concur with amendments as on other bills." If, therefore, the new tariff act was not, in any common or parliamentary acceptation of the word, *amendment in the Senate*, but was, on the contrary, *a bill originated in the Senate*, there is no logical escape from the conclusion that the act is unconstitutional.

Now, what is the record of the case? At the first session of the 47th Congress the House passed a short bill entitled "an act to reduce internal taxation." In the Senate the whole subject-matter originated in the House was stricken out, leaving merely the title and the enacting clause to represent the constitutional initiative of the House. To this decapitated head of a bill the Senate then attached a body of internal revenue provisions of its own origination, and, after adding "for other purposes" to the title, passed five sections of its own origination relating to the subject of internal taxation. This bill, consequently, was a *substitute for* the House bill, not an *amendment to* it. Between substitute and amendment the difference is as marked and distinct and radical as between the words foreign and native. A clear departure from the constitutionally provided method was set on foot when substitution took the place of amendment. If rejecting the entire body of provisions in a bill and creating a body of different provisions is to be regarded as the exact equivalent of the legislative process called amendment, then the signification of the word will have to be altered in the dictionary of the future.

At the second session of the 47th Congress the Senate originated a complete tariff-revision bill, which it tacked on to the internal revenue bill which it had originated. This bill, after elaborate discussion, was passed and sent to the House. In

common talk, in newspaper comments, and in deliberative discussions, this bill was known as "the *Senate* bill," thus giving universal recognition of the fact that its origin was in the Senate, and distinguishing it from the bill prepared in the Committee of Ways and Means, universally known as "the *House* bill." The House refused to concur, acting under the resolution which, while providing for a committee of conference, declared that "it shall be the duty of the conferees on the part of the House in said committee to consider fully the constitutional objections to said bill," preceded by the further declaration that "in the opinion of this House it is believed that such changes and alterations are in conflict with the true intent and purpose of the Constitution, which requires that all bills for raising revenue shall originate in the House of Representatives."

Five conferees on the part of the House met five conferees on the part of the Senate in joint committee; but, as it has leaked out, the instructions of the House to its conferees were so far disobeyed that the question of constitutionality was not even considered at all as an issue, being presented without discussion merely for the information of the Senate conferees, instead of being formally and fully urged as directed to be done. Then these conferees, by their *joint* action, changed various duties, and made their report.

The altered bill was then passed by the Senate, which, by a second time acting first, maintained its attitude of originator. When the bill finally reached the House and was put on its passage, all that existed in it of what had originated in the House was contained in the following words:

"*An act to reduce internal revenue taxation.*"

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.*"

Every other part of the bill had been originated in the Senate or in the conference committee. How is it possible for such a bill to be a compliance with the constitutional provision that "*all* bills for raising revenue shall *originate in the House of Representatives*"?

As a body, the House did not even *amend* the bill originated in the Senate, its action being confined to concurrence with the Senate bill as changed by the *joint* supervision of the two sets of conferees; but, assuming amendment by the House, we have *a bill originated in the Senate and amended in the House*, or a bill passed by a method the direct and complete reverse of that required by the Constitution. How can the Supreme Court, without affronting the common sense of the country, avoid deciding such a law to be unconstitutional, hence null and void, if a case involving that issue should be commenced in one of the Circuit Courts of the United States, and appealed to that tribunal of last resort?

It is said, however, that the House waived its power to originate. But whence did it derive its authority thus to violate the Constitution? To waive its prerogative was as unconstitutional as it was for the Senate to originate the tariff bill; for the prerogative was not granted to the members of the House in their capacity of individuals, and for their several use, benefit and behoof, but to them in trust as a legislative body, for the protection of the rights and liberties of the people, their constituents. Such a vital trust is not to be subjected to the indignity of being made the mere football of personal expediency or of partisan advantage. The House owes its very existence, and all its authority, to the Constitution. Every member of the House takes an oath to support the Constitution. Whenever the House acts it is subject to all the confinement within bounds which exists in the Constitution. Waiver of its exclusive prerogative, instead of operating as a clear justification, really evidences collusion with the Senate to violate the Constitution; amounts to participation in the guilt of the Senate; makes the House an accomplice with the Senate in its act of usurpation. This is an additional reason to be urged upon the Supreme Court to declare the law null and void, rather than an admissible plea in defense of the neglect of the House to maintain its constitutional right, held in trust for the people. No reputable lawyer would for an instant consider with favor the notion of waiver as a defense to be pleaded before any court. In point of fact, however, the House formally and solemnly raised the objection of unconstitutionality, and the grounds of its objection have never been answered, nor can they be answered.

To support the validity of the act the following sophistry has been employed: "There is no doubt that if any of the *provisions* of the tariff law are unconstitutional the Supreme Court would have the power to so find. There is something of a question if the Supreme Court has a right to find that the method in which a bill was passed was unconstitutional, providing that the forms laid down for its passage were all followed, and the record is clear in this respect. In other words, it is doubtful if the Supreme Court has a right to go behind the certification of the officers of Congress that the bill was properly passed, or behind the record. If this view is correct, even if it should be shown that the passage of the bill was unconstitutional, it would be of no avail, as there is no power except Congress itself that could take action on the unconstitutionality of its passage."

If it be intended above to be asserted that Congress can effectually pass an unconstitutional law by simply providing, through a resolution of the House, forms for the passage of said law in direct violation of the Constitution, then it is virtually asserted nonsensically that the House may temporarily amend the Constitution effectually by laying down, by means of a simple resolution, certain unconstitutional forms for the passage of a bill. Such a doctrine makes the discretion of the House the measure of its authority, and symbolically converts the Constitution into a rope of sand. A doctrine like that put into practice could soon be brought to an ignominious end by prosecution and conviction of representatives for perjury in violating their oath to support the Constitution of the United States. It is to be borne in mind, however, that the forms laid down for the passage of the bill by the House itself were not all carried out; for the instruction to the House conferees to raise and "*fully consider*" in conference committee the objection of unconstitutionality was wholly disobeyed, while the unconstitutional origination and passage of the bill in the Senate was not even attempted to be masked by specially provided forms in that body, where part of the offense was committed. There could be no more monstrous perversion of both the letter and the spirit of the constitutional provision, that "each house may determine the rules of its proceedings," than to assume that the language authorizes either house to evade or override an express command of the Constitution. Under such a loose construction the organic law would become a wilderness of powers, in which the most radical usurpations might be found clothed with the masking counterfeit of legitimate potentiality.

But it is not necessary to go behind the record. All necessary is to put in evidence the record as a whole. Both the journals of each house and the *Congressional Record* are official publications, and these sufficiently register the successive steps and the entire method employed to pass the new tariff act. On their face these records show that the method required by the Constitution to give validity to such legislation was completely set aside and nullified. It is plainly competent for the proper courts, of which the Supreme Court is that of last resort, to ascertain and decide whether or not the only legitimate and obligatory method was complied with, and if not, to pronounce the act to be null and void. Simply because the Constitution specifies the method it is within the province of the court to inquire and to adjudicate regarding the method, the judicial power expressly extending "to all cases in law and equity arising under this Constitution." In a case involving a conflict between the method required by the Constitution and a method employed by Congress the courts have no choice but to be guided by the paramount authority of the Constitution in making their decisions.

It is mooted whether the purely repealing parts of the act (as, for instance, the 7th and 9th sections, which repeal certain sections of the Revised Statutes of the United States relating to the tariff) would not have to stand in any event, on the ground that the prerogative of the House is confined to the origination of "all bills for *raising* revenue," whereas an act to repeal duties does not operate to "*raise*," but to *discontinue*, revenue. It should be considered, however, that the full exercise of the prerogative of the House involves the power to choose the objects of taxation; for, if the Senate equally possesses the same power, then the constitutional division of power between the two houses becomes practically a nullity. But when the Senate takes the initiative to repeal certain duties which have passed to the statute-book because they originated in the House, such action is equivalent to saying to the House that the Senate has undertaken to invade and limit the former's prerogative, by assuming primary control over certain objects of taxation. Can the Senate constitutionally take the first step to undo what it could not have constitutionally taken the first step to do? Prohibited from exercising the power to originate duties, is not the Senate prohibited from exercising the power to originate the repeal of duties? The Senate's authority in all matters of taxation is limited to proposing or concurring with *amendments* to any *pending bill* on that subject, originated in the House; but a statute, or part of a statute, in force, is not in any sense *a bill*, which is a word describing the inchoate condition of what is called, on passing its final stage, *a law*. If the Senate should initiate an attempt to repeal a statute, or part of a statute, which imposes duties, such attempt would have to take the form of a *Senate bill*, and this would be originating legislation to diminish the revenue, instead of proposing an amendment to a *House bill*, according to the constitutional limitation of the privilege of the Senate; for, to raise revenue is to determine what amount shall be produced by certain taxes, and to diminish revenue is to determine what amount shall be produced by repealing certain taxes. Both instances represent estimated limitations of the amount of revenue to be raised. If authority to originate one form of the limitation is prohibited to the Senate, how can it possess authority to originate the other form of the limitation of the revenue? In their last analysis, the raising of revenue by imposing entry charges on imports, and the diminishing of revenue by repealing some of the entry charges on imports, are only different methods of determining how much revenue shall be raised. The repealing sections or clauses in the new tariff act having been wholly originated in the Senate, what, then, is to shield them from being declared by the Supreme Court to be unconstitutional?

Finally, the act should be set aside because its mode of passage must otherwise establish a very dangerous precedent, likely to lead to further infractions of the Constitution, and to a growing disrespect for its authority, not merely among senators and representatives, but also among the masses of the people for whose protection and benefit it was framed and ratified. No more favorable occasion than this could have been offered to resent and stigmatize this particular sort of infraction of the Constitution, because it contains extraordinary elements of aggravation to excite odium. The Senate pushed its own bill to completion with such vigor, determination and independence, at the very time when the Committee of Ways and Means was constitutionally preparing its own bill, as to forestall, blockade, circumscribe, abridge, hinder and circumvent action on the House bill. Under the stress of many complicated circumstances, some partisan, some industrial, some commercial, and all aggressively selfish, the Senate bill was forced upon and through the House, amid the intense excitement of both conflicting and variously combined interests. Nothing but such a remarkable pressure could have produced such an entanglement and such a deplorable result. No ground should be left for such a vicious precedent to stand upon.

Insomuch as the 7th and 9th sections of the act went into immediate operation, there is nothing to prevent an immediate appeal to the courts to declare the law unconstitutional. The sooner this shall be done the less will be the consequent derangement of the business of the country. If a case should not be submitted for adjudication until after the entire act shall have gone into effect, the disturbance to production and trade must be widespread, disorganizing, and exceedingly repressive. Since the probabilities are very strong that somebody, or some firm, or some corporation, apprehending or feeling the approach of disaster, will at some time resort to the courts for defense of their imperiled concerns, it would be the part of prudence and of sagacity to seize an early opportunity to secure an adjudication of the issue of constitutionality. Some timidity must characterize the commercial and the manufacturing ventures of our people so long as a reasonable doubt hangs over the validity of the new tariff act. That doubt can be cleared away in no other way than by an appeal to the courts; so the sooner that shall be done the better for the whole country.

DAVID H. MASON.

Chicago, March 31.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

Among the decisions rendered by the United States Supreme Court on the 9th inst. was one disposing of the reargued case of The Cook County National Bank of Chicago vs. The United States. The suit was brought by the United States against the insolvent Cook County National Bank and its receiver to recover out of the assets of the bank the sum of $20,000 deposited therein by the postmaster of Chicago. In its bill the government claimed that, under the preference act of 1797 (section 3,466 Revised Statutes), it was a preferred creditor of an insolvent corporation, and that it had an equitable right to set off its claim against the proceeds of the unused surplus of the bonds deposited by the bank in the Treasury to secure circulation. The bank demurred to the bill, but its demurrer was overruled by the Circuit Court. The Supreme Court reverses the decision of the Circuit Court upon both points, holding first that the provisions of the National Bank act (section 5,236 Revised Statutes) have the effect of withdrawing national banks that have failed from the class of insolvent persons out of whose estates demands of the United States are to be paid in preference to the claims of other creditors under the law of 1797. The United States, therefore, in this class of cases, stands upon an equality with other depositors. Upon the second point the court holds that the United States has no right to set off its claim against the surplus bonds, or the proceeds of surplus bonds, belonging to the bank, which were placed in its hands to secure the bank's circulation. Bonds so deposited constitute a trust fund, and a trustee cannot lawfully set off against funds held by him in that capacity his individual claim against the grantor of the trust.

Dutiable articles introduced by mail are liable to seizure by the customs authorities, according to the ruling of the United States Supreme Court in the case of Cotzhausen vs. Nazro, collector, et al., decided on the 9th inst. The plaintiff received by mail through the Milwaukee post office a sealed envelope containing a small knit shawl, or scarf, sent to her by her daughter-in-law in Germany as a token of affection. The envelope was duly registered, and bore an indorsement stating the nature of the contents. The collector of customs was informed of the receipt of the envelope, and it was opened by the plaintiff in the presence of the collector. No attempt was made to evade the payment of the proper duty, and plaintiff offered to pay it, but the collector seized the shawl and confiscated it as smuggled goods. The plaintiff thereupon brought suit against the collector and the postmaster for unlawful conversion of the property. Defendants had judgment in the Circuit Court of the United States for the Eastern District of Wisconsin upon the ground that they had acted strictly within the line of their official duty. Upon appeal the Supreme Court affirmed the decision below, Judge Miller, who delivered the opinion, saying: "It is a violation of the law to introduce dutiable articles at all in this manner (by mail), and articles so introduced are liable to seizure for such violation. We think that in making the seizure the defendants only did their duty, and, whatever the hardship to the plaintiff, they are not liable to this action on the facts found in the verdict of the jury."

One F made his promissory note for $125 payable to D, at the Bank of Newberry, five months after date. D indorsed the note in blank, and upon receiving it the bank paid the money to F. The latter, in order to secure D, his indorser, executed and delivered to him a chattel mortgage of property valued at $120. When the note fell due, D, waiving protest in writing over his own signature, took up the note, and sometime afterward assigned the mortgage to the plaintiff, transferring the note to him at the same time, for value. The plaintiff sold the property covered by the mortgage under legal proceedings and applied the proceeds as a credit upon the note. He then brought suit against the administrator of D (who had died in the meantime), for the balance. The plaintiff had judgment in the suit before a trial justice and in the Court of Common Pleas, and the decisions below were confirmed by the Supreme Court of South Carolina, in Coleman vs. Dunlap, administrator, etc., decided March 6. The Supreme Court held that the indorser D, in this case, was the drawer of a new bill, and that, consequently, demand upon the maker and notice of non-payment to the indorser were not necessary. The indorser took up the note from the bank and reissued it for value. He might have stricken out his own name on the back, but did not do so, and he probably left it there to give the note value. The court held it to be a well settled principle of commercial law that if the last of several indorsers were to pay the note to his indorser he could reissue the note with or without his indorsement remaining upon it, and recovery could be had under this second transfer from all prior parties who remained liable to him, and from him also if his name were upon the instrument.

The Supreme Court of Indiana, in a recent decision, took ground in favor of a strict construction of the power of tax commissioners. In the case in question, The State vs. Illyes, it appeared that certain persons were appointed by the board of county commissioners to look up property omitted from taxation. They discovered certain property alleged to have been omitted, calculated the amount of taxes delinquent thereon, and took the note of

one who was an heir-at-law of the delinquent for the payment of the taxes. The court held that the note was without consideration, that executive and ministerial officers can levy and collect taxes only in the manner prescribed by law, that such officers must keep strictly within the authority of the tax law, and that persons appointed to look up omitted taxable property cannot assess taxes against such property, the taxes never having been levied and assessed according to law.

A clearing house due-bill, payable to "banks" and "only in the exchange through the clearing house the day after issue," was held to be a negotiable instrument by the Pennsylvania Common Pleas Court, in the case of Dutton vs. The Merchants' National Bank, decided on February 16. The court said that, while the leading authorities in this country are somewhat in conflict, it felt compelled to hold that the instrument in question was "not 'a mere certificate of deposit on special terms,' but an agreement to pay so much money on demand. True, the place of payment is named only in the exchange through the clearing house, that is by a bank, but the amount is fixed, and the time at which the paper is payable is also certain, and it is also payable in dollars; that is, the legal currency of the country."

According to the case of Jenkins vs. The International Bank of Chicago, decided by the United States Supreme Court in January, a writ of error sued out by an assignee in bankruptcy to a judgment in a state court, rendered against the bankrupt shortly before the declaration of bankruptcy, is a suit brought by the assignee within the meaning of section 5,057 of the Revised Statutes, which provides that no suit, either at law or in equity, shall be maintainable in any court between an assignee in bankruptcy and a person claiming an adverse interest, touching any property or rights of property transferable to or vested in such assignee unless brought within two years from the time when the cause of action accrued for or against such assignee.

The obtaining by a principal intrusted with an obligation by his surety of the signature of another surety without the knowledge of the first, is not such an alteration as will discharge the first surety, according to the opinion of the Supreme Court of Minnesota, in the case of Ward vs. Hackett, decided in January.

In the case of Montgomery vs. Chase, the same court laid down the rule that a chattel mortgage will not cover after-acquired property unless it expressly so provides, and that it is immaterial that the parties may have intended that it should have that effect. The mortgage cannot be changed or its legal effect altered by any parol agreement or understanding between the parties at the time of its execution—the instrument must speak for itself.

In the case of Williams vs. More, decided in January, the Supreme Court of California held that when one member of a firm of attorneys is employed the firm is employed, and the client is entitled to the services of all the members of the firm. In the absence of knowledge and consent on the part of the client he is not bound by the private agreement of the members of the employed firm as to compensation, and in such cases payment to one member of the employed firm is payment to all.

An oral sale of a house which was to be paid for in work and materials on demand, and where the purchaser went into actual possession of the house, was held by the Supreme Court of Wisconsin, in the case of Snider vs. Thrall, decided in January, to be a valid sale, and not within the statute of frauds.

BUSINESS NOTES.

The seventeenth bulletin of the Edison Electric Light Company records the successful installation of the first "village plant" in the United States, at Roselle, N. J. This town, a creation of the Central Railroad of New Jersey, is situated a short distance from Elizabeth. It has been the aim of those having its welfare in hand to leave naught undone to contribute to the comfort and conveniences of its inhabitants. The total length of wire is 8¾ miles. It is conducted on poles 30 feet high and 130 feet apart. The mains were completed January 15 and found on the first test to be electrically perfect. The steam is furnished by a 150 horse-power duplex safety boiler, enclosed in brickwork. The machinery room has a capacity for four K dynamos, each with an independent engine. Three K dynamos are installed, two of which are now running every night. Thirty-five houses have been wired for over 500 lights. There are also 150 electric street lamps. The depot is also lighted by clusters of Edison lamps. The current was turned on January 19, since which time, says the report, the lights have been furnished satisfactorily and without hitch. There are other towns along the line of the Jersey Central road where "village plants" for electric lighting should be introduced.

The unexpected success promised for the railway exposition to be held at Chicago, May 24, has induced its managers to announce that the surplus funds realized will be used "to found a hospital for railwaymen." The *Railway Age*, published at Chicago, one of whose editors is deeply interested in the forthcoming exhibition, is making urgent appeals for the carrying forward of this feature of the enterprise.

Cable dispatches during the week have told of considerable excitement in the London rice market, due to a combination of foreign dealers who have locked up the product on hand and advanced prices of the same in the markets of the world. The Messrs. Talmage, in this city, extensive commission dealers in rice, express themselves as doubtful of the success of the foreign rice pool. The quantity of rice in sight this year is considerably in excess of that one year ago, and the crop in this country promises to be an average one, whereas it was 40,000 casks short last year.

There is great activity in the cattle market in the southwest. The grass is starting well and the cattle are reported in good condition, in consequence of which prices are high, yearlings ranging from $12 to $15, and older ones in proportion. The grand gathering of cattle this year is expected to take place in the Cherokee Nation, I. T., whence 200,000 head will probably be shipped to the various northern and eastern cities. Arkansas now has 13,000 out of 25,000 cattle ready for the drive. Northern Louisiana cattle will go into Texas, and in northern Texas buyers and dealers are congregating in anticipation of an active season.

There was recently held at Paris an international conference for the establishment of electrical units. Delegates were represented from twenty-six governments, including the United States. The report made of the results of the conference to the State Department at Washington was through Professor Trowbridge, of Harvard College. It appears that the results of the conference did not take definite form. This was because there was not sufficient unanimity in the various determinations that had been made of the electrical unit of resistance, the ohm. Each government was requested to encourage redeterminations of this unit. On the part of France, Minister Cochery assured the delegates that his government would endeavor to give effect to the resolutions of the conference by suitable representations to the various governments.

The total coal production in the United Kingdom in 1882 amounted to 156,499,977 tons, against 154,184,300 tons in 1881, an increase of 2,315,677 tons last year. The principal gain was in Lancashire, where the excess brought to the surface was 1,280,835 tons, South Staffordshire being second, with an excess of 515,198 tons. The retrograde movement was most noticeable in Worcestershire (453,863 tons less than in 1881), where the decline was about 30 per cent. The consumption of coke in the United Kingdom amounted to 8,472,378, an increase of 2,649,544 tons, or 45 per cent. over 1881. The coke consumption is equal to 14,120,627 tons of coal. The increased production of coal named above entered into consumption as follows:

	Tons.
Increase of exports	1,371,761
Increase in coal shipped by steamers engaged in foreign trade	347,572
Increase in pig iron industry	230,000
Increase in manufacture of wrought iron	320,000
Total	2,269,333

The fact that Railway Pool Commissioner Fink has decided not to permit a reclassification of domestics and prints shipped from eastern to western points, in compliance with the unanimous request of eastern makers and dealers, has caused considerable excitement in the trade. It was believed that the argument advanced why such a reclassfication should be made, was sufficient to successfully appeal to the railroad people. The claim made was, in substance, that the staple cotton fabrics were charged first-class freight rates, much the same as silks and satins, while ranking rather as the rough goods of the dry goods trade. They are entitled on this basis to the same reduction in freight tariff as coffee and beans receive, as compared with spices and highwines. The railway men refused to look at it in that light. It was further alleged that southern railways leading west, not being in the east and west trunk line pool, have given the southern and western cotton fabric manufacturers special rates to competing points west and northwest. The railway men here state that if this is the real reason why eastern cotton cloth manufacturers want lower freight rates that a compliance with their request will do no good, because it will result simply in a contest between southern and eastern railways to see which will carry cotton goods to the west the cheapest, and that the outcome will be the transfer of the burden of the competition of the cotton cloth makers to the shoulders of the railways. The dry goods men say they will refer the matter to the State Railway Commission.

The "Central Committee of National Labor Legislation" has petitioned the President to call an extra session of Congress, as early as practicable, "to consider the relations between labor and capital." The signers of the petition, as may be presumed, claim to represent the "wage-workers of the country." Their grievance is that, while Congress resolved in June last to investigate the relations specified, the matter was referred to a committee which has not since reported. There was "a week's investigation," but further time was asked to permit the congressional committee to travel about and gather facts. This struck the memorialists as ridiculous, not to say wasteful of the public funds. They want to see some signs of remedial legislation, and therefore pray the President to call Congress together to lighten "the burdens of the oppressed workmen." It is to be regretted that the specifications of the wrongs to be righted were not made more clear, either in the memorial or the Associated Press report of the same.

The thirteen Louisville (Ky.) tobacco warehouses furnish the following statistics of leaf tobacco for the first quarter of the years named:

	Hogsheads—		
	Receipts.	*Deliveries.*	*Sales.*
1883	20,077	18,767	25,339
1882	19,125	16,468	20,862
1881	13,886	14,089	17,489
1880	14,102	14,124	15,943

The stocks April 2 last were 7,842 hogsheads, against 7,539 hogsheads April 2, 1882. March receipts were delayed, owing to dry weather. The temperature since has been milder and deliveries have gained. Prices have been full and firm. The new dark lugs are of poor quality, thin and house-burnt. The offerings of rich dark lugs and dark leaf of the new crop are light. Burley tobaccos of all grades are eagerly taken, and the demand for good qualities of all types exceeds the supply. Indications are that a large acreage of tobacco will be planted this spring, and the proportion of white burleys is likely to be still further increased. The attendance of home and foreign buyers is large. The market is strong and animated throughout.

Not long since the journals of the country were expressing indignation at the bargain between the Union Pacific Railroad and Claus Spreckles, the sugar refiner of the Pacific coast, by which the former agreed to charge a prohibitory rate for all sugars refined in the east and offered for shipment to California. Another and quite as offensive a freight contract has been brought to light in the same state by the San Francisco *Merchant*. That journal says that seven California wine houses have to ship east 1,500,000 gallons of wine during the coming year at 10 cents a gallon freight "on condition that the Pacific Mail shall exact a prohibitory rate (12½ @ 13½ c. per gallon) from all other wine shippers." One of the chief problems of the Pacific coast viticulturists is, "how shall the wine be transferred from the cellar of the maker in California to the houses of the consumers in the east at the smallest cost for intermediate dealers, profits for commissions and for transportation?" The position taken by the *Merchant* is that all shipments east, in lots of 2,000 gallons, should be carried to New York for 8 cents per gallon. As the situation is stated, the state must suffer for the greed of seven wine-makers and the Pacific Mail.

The London *Colliery Guardian* is of the opinion that while a network of railway feeder lines in India is recognized as indispensable to the prosperity of the country, the significant fact remains that but 455 miles of railway are under construction in that country at the present time through private enterprise without guarantee. Great Britain is now complaining at being shut out of certain foreign markets, and without complaint is seeing certain foreign markets slipping from her hands to those of some rival, yet permits India to yield a pittance of profit for want of enterprise in the matter of developing its resources. The *Guardian* adds that "the effect upon the United States of being able to thrust Russia aside from being the chief source of England's supply of grain has been great enrichment to a people who have excluded England's manufactures with dogged persistency. What would not be the effect upon the trading communities of England if India should in her turn thrust the United States out of the position which she wrested from Russia. While free India's purchasing power would be immensely increased that pressure would be brought to bear upon the western farmers of the United States that would quickly reverse much of the restrictive legislation which has, as we have intimated, for so long a time kept so large a portion of England's manufactures out of the New World."

The following national banks have been organized: The Lake Shore National Bank of Dunkirk, N. Y.; capital $105,000; Truman R. Colman president, William T. Colman cashier. The Merchants' National Bank of Amsterdam, N. Y.; capital $100,000; John N. Visscher president, William J. Taylor cashier. The Vineland National Bank, N. J.; capital $50,000; Benjamin D. Maxham president. The Third National Bank of Sedalia, Mo.; capital $100,000; Albert Parker president, Reuben H. Moses cashier. The First National Bank of Stanton, Mich.; capital $50,000; Henry H. Hinds president, A. D. F. Gardner cashier. The First National Bank of Urbana, Ill.; capital $50,000; Charles L. Burpee president, P. Richards cashier. The National Bank of Ashland, Neb.; capital $50,000; John R. Clark president, Samuel Waugh cashier. The National Bank of Hustonville, Ky.; capital $50,000; J. P. Riffe president, J. W. Hocker cashier. The National Bank of Vandalia, Ill., has changed to the Bank of Vandalia; capital stock $100,000. The Kahoka (Mo.) Savings Bank has been incorporated, with a capital stock of $10,000. The Sheanandoah (Iowa) National Bank has elected George Bogart president in place of W. M. Whipple. The Lima (Ohio) National Bank has elected B. C. Faurot president in place of S. W. Moore. The First National Bank of Mandan, Dak., has elected James Bellerns president in place of C. E. Haupt.

The production of puddled bar iron in the United Kingdom in 1882 amounted to 2,841,534 tons, against 2,681,150 tons the year before. The heaviest increase was in the Cleveland district, where the figures were 852,199 tons, against 669,189 tons in 1881. It is added that the returns for the north of England included in 1881 only those for finished iron, whence it is inferred that the real increase in the production of puddled bar last year was 60,000 tons in the aggregate, and in the Cleveland output alone 80,000 tons, the difference being met by decreased output elsewhere. The output in South Wales has declined, as two large puddled iron works are now employed on steel, throwing 146 puddling furnaces out. There are now but 12 Welsh puddling furnaces, against 30 a few years ago. Welsh iron now takes the form principally of coke bars for the manufacture of tin plates and iron rails. Of the latter the make in 1882 was 46,978 tons, against 118,177 tons in 1881. In South Staffordshire, of the 123 works in operation a few years ago more than 30 have been closed and many dismantled; of the 1,720 puddling furnaces only 1,115 were in operation during 1882. It is, however, probable that the make of Staffordshire iron was greater in 1882 than in any one of the six or seven preceding years. The total number of puddling furnaces in operation at the end of 1882 was 4,369, 814 less than in the preceding year. The Lancashire furnaces were well employed throughout the year.

GRAIN TRADE OF NEW ORLEANS.

The *Times-Democrat* says: The grain trade of New Orleans this year promises to be the largest it has ever enjoyed. During the past month of March thirty-nine vessels left this port, carrying 1,786,619 bushels of corn and 513,864 bushels of wheat, a total of 2,300,583 bushels of grain, against 393,421 last year, an increase of nearly 500 per cent. Among the departing grain-laden vessels was the Briscoe to Belfast with 119,500 bushels of corn, equivalent to 3,100 tons, the largest grain cargo that ever left this port. The showing for the entire season is equally flattering. Since September 1 New Orleans has exported 3,134,234 bushels of corn, against 608,568 last year, and 5,075,409 bushels of wheat, against 592,927 in 1882. Indeed, our grain exports for the first six months of the present season exceed those of any previous twelve months in our history, except 1880–81. There cannot now be the slightest doubt that this year's export of grain from New Orleans, like its export of cotton, will be the largest ever known, and that our entire commerce will exceed that of the best year during "the flush times" before the war.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The bull movement in the market, which was opened on Tuesday of last week by the sudden advance of Northwest, has been continued since and apparently with a considerable degree of success. The cliques seem to have held well together; no "weak spot" has discovered itself by any one of them suddenly throwing on the market more of their stock than it could stand; and the other mistake of steaming up prices with the purpose of selling on the excitement, has been carefully avoided. The market, to all outward seeming, has been firmly yet cautiously conducted; the rise has been gradual, and the operators who are guiding the movement appear to be so doing it as to make people believe they expect it to last. Some public buying is certainly reported by the commission houses, and that it is increasing. But it is cautious and timid so far, as might be expected. People buy and sell again when they have a few fractions profit, and sell if they see a fractional loss against their purchases. It is that sort of trading which is usually described as "scalping the market," and this is as much as can be expected at this time. If the rise continues slowly and firmly, this scalping business will give place to bolder operations, but there is the same uncertainty as before whether the rise will continue. There is an active business in bonds, which is a most encouraging sign, and the advance in many of these, which are still in the early speculative stage of their existence, has been marked. A well-informed investor, who has been watching the bond market for some three weeks past, informed us that about six or seven different bonds, which he thought seemed to be selling at figures promising a good chance for a rise, had gone up in that time from 2 to 4 per cent., except one, which he thought well enough of to buy in moderate amount, and that had risen 7 per cent. This is sure evidence of the revival of the spirit of investment.

The features of the market during the week have been the large dealings in the coal stocks, the steady improvement in the prices of the Vanderbilt stocks, and the firmness with which Union Pacific maintained its rise. It now seems to be established about par, and when people have got accustomed to seeing it there a firm foundation is laid for a further advance. In a stock like this, advances have be made with pauses and intervals for people to get used to it, or they get frightened at the rapid rise and sell expecting that a bad break will come at any moment. We hear, however, that some negotiations are still going in respect to the stock, upon the outcome of which its price is likely to be favorably or adversely affected. The stock which has shown a sure rise from its depression without a set-back, and apparently by the force of continuous investment purchases, is Chicago, Burlington & Quincy, which in February fell below 117, and almost from the day it turned to go up has gone on up until it is now 130, including the dividend. But then this is not a speculative stock. Like Rock Island, Chicago & Alton, and Illinois Central, it is held for investment and scattered all over the country in the hands of wealthy people. The cause of its temporary but extreme depression is even now somewhat of a mystery, unless the story of Mr. Vanderbilt's pressing his block of 25,000 shares on the market be accepted as the explanation. Central Pacific, on the other hand, has shown less elasticity than might have been expected. True, it has got back to 80 again; but if it be a sure 6 per cent. dividend-paying stock, as is claimed for it, that is still a marvelously low price. In the Vanderbilt stocks, Lake Shore has been the leader, Mr. Henry N. Smith being credited with the care of it, having long ago loaded up with a heavy cargo of this stock. It has been advanced a fraction or so daily, and the trading in it has been quite active. Canada Southern is supposed to be mainly held by the Vanderbilt boys, who are waiting the time when a dividend will be paid on it to realize profits by selling out. Mr. Gould has had his hands full, apparently, protecting his Western Union, which is now so tangled up by legal complications that no dividend can be paid on the stock, the injunction against paying dividends on the $15,000,000 of illegal stock operating to prevent payment on any portion of the capital stock, with which of course it is inextricably mixed. In order to avert the serious effect on the stock which the stoppage of dividends would unquestionably have he has personally provided the $1,300,000 which the dividend calls for, and anyone having the stock can go to the Mercantile Trust Company and sell his right to the dividend, which Mr. Gould buys pending appeal to the court of last resort. This is a device to avoid the charge of contempt of court. Meantime it is thought that Mr. Gould is devising some scheme to legalize the illegal stock or otherwise get around the difficulty, for the best lawyers are of the opinion that the Court of Appeals will confirm the judgment of the lower courts. Mr. Gould's ingenuity and resources appear equal to the devices of his opponents, so far as purely speculative operations are concerned; but it is beyond reasonable doubt that the legal assaults on Western Union have had the effect of greatly discrediting the stock with investors. No one wants to feel that the securities he has locked up in his safe and registered in his name for keeping are so uncertain in their legal status that a constant defensive fight has to be kept up in the courts over them. His Wabash road Mr. Gould has practically hitched on to his Missouri Pacific or southwestern system. Hitched on is the proper term to describe the lease which is now awaiting formal ratification, for the only change it appears to involve is the working of the road by the Missouri Pacific Company. A reduction of expenses is, of course, one of the features of the change; and besides this, the whole system of roads from Toledo to the farthest point west they reach is put under the charge of one man. Mr. Gould has selected for this important post one of his lieutenants, a gentleman by the name of Hayes, and he is not a man who usually makes mistakes in his selection of officers. The Wabash road will, it is understood, get what it earns, and no more. A similar lease was made of the Kansas & Texas road (after it had absorbed the International & Great Northern) to the Missouri Pacific, and a material saving in the cost of working and other improvements in the property have been the consequence. The Iron Mountain road, it will be remembered, was consolidated with the Missouri Pacific, though, for various reasons, its separate legal organization is still kept up.

The loan market has been so easy through the week, and loanable funds so abundant, that the bond redemptions have scarcely been thought of. Of the ten millions which the Secretary of the Treasury offered to redeem up to Wednesday last, he has received something over four millions only, and half of these came from the Controller of the state of New York. The redemptions, however, with some small amounts of gold which have arrived, have contributed their quota in producing the ease in money, and call loans this week have averaged about 6 per cent. The fact that all the great operators were combined on the bull side of the market has had, possibly, a more powerful effect in keeping loan rates steady, since any considerable locking up of funds would undoubtedly have produced some temporary stringency at least.

Foreign exchange still continues high, and the fact that the London market has followed the rise in ours slowly and heavily, has given the arbitrageurs a great chance to scalp the two markets, by buying in London and selling here. This has contributed to maintain rates; and again, as our loan rates have declined, the traders, who were holding back their remittances for use at high rates here, have forwarded them, thereby causing a brisk demand for exchange. Posted rates yesterday were $4.84 and $4.86½; actual rates ¾ to 1 per cent. below these. The Bank of England increased its reserve during the week, though it lost some gold, to 36 15/16 per cent. of its liabilities. The discount rate remains at 3 per cent.

The government bond market has been marked by heaviness and somewhat lower quotations in the latter part of the week. The following were the closing quotations yesterday:

	April 6, bid.	—*April 13,*— bid.	asked.
U. S. 5s extended (3½ p. c.)	102½	101	—
U. S. 4½s 1891, registered	113⅜	113¼	113½
U. S. coupon	113⅜	113¼	113½
U. S. 4s 1907, registered	119½	119¾	120
U. S. 4s 1907, coupon	119½	119¾	120

The bank statement of Saturday was a disappointment in some respects, but a much better one is looked for this week. The loans were slightly increased, and the increase in the reserve was only $396,450, which still leaves it $3,701,000 below the 25 per cent. line. The following are the comparative totals of the statements of March 31 and April 7:

	March 31.	*April 7.*	*Differences.*	
Loans	$310,130,100	$311,039,400	Inc.	$909,300
Specie	49,086,800	50,020,400	Inc.	1,533,600
Legal-tenders	16,801,800	15,923,700	Dec.	878,100
Deposits	279,944,200	280,980,400	Inc.	1,036,200
Circulation	16,574,800	16,532,000	Dec.	42,800

The proportion of total reserve to liabilities is now 23.68, against 25.28 per cent. at the same time last year.

By telegraph from Baltimore, Md.: The stock market the past week was rather quiet, and no change of consequence in prices was noticed. An advance took place in Atlanta & Charlotte first 7s, which closed at 107 bid, 107⅞ asked. The mining list was also a shade firmer. Money is quiet and easy at 5 per cent.

By telegraph from New Orleans, La.: City bonds cannot legally be assessed. Louisiana 7s advanced 1¼ points, premiums 2¼. Commercial sterling is 1½ points higher.

By telegraph from Halifax, N. S.: Sterling exchange 9⅜ @ 9⅞.

By cable from London, Eng.: There was a brisk buying of American railroad stocks in this market, but it is supposed to be by New York operators. Stocks seemed scarce at London on Wednesday's fortnightly settlement.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S this week from the principal business centers of the country disclose but little change in the general trade situation. The signs are of continued though not very vigorous improvement. Wheat has fluctuated widely during the past week, declining about 3½ to 4c. per bushel in the early part of the week in consequence of the decline in London caused by heavy imports, but afterward reacting in American markets, so that prices are less than 1c. below those of a week ago. Corn also fluctuated in sympathy with wheat, but has reacted more strongly, declining 2c. per bushel in the early part of the week and advancing 3c. in the latter part. There is no improvement to report in the iron trade. Pig is even duller than last week. Manufactured iron is quiet. The labor troubles at Pittsburgh, growing out of the settlement of the rate of wages for mill employés for the year following June 1 next, will come up for decision, it is said, in conference, at the city named, to-day. There are other unpleasant features of the iron trade growing out of dull trade and wages disputes. The petroleum certificate market was unsettled again yesterday just as the bulls had announced that the questions of production, stocks, demand and supply were all in their favor. A new 400-barrel well is responsible for the break in prices. It is in well-defined territory, and will be an object of considerable interest until it proves its capacity. The anthracite coal market is, on the whole, dull. At eastern centers the demand is generally for small lots for immediate consumption. The outlook for the western demand for anthracite is excellent, and western shippers are impatiently waiting the opening of lake and canal navigation. Ocean freights for petroleum have improved slightly. Grain is still nominal and dull. Trade in wool has been of a hand-to-mouth character in all markets, and prices, as a rule, have favored buyers. There were 153 failures in the United States reported during the past week, 37 less than the preceding week, 42 more than the corresponding week of 1882, and 55 more than the same week of 1881.

BREADSTUFFS.

The foreign grain markets are now influenced by two opposing sets of causes. One of these has for some weeks past had a depressing effect upon prices, which, however, is regarded as in a great measure temporary. The other relates to the future as far ahead as next autumn, and shows the probability of higher prices at least then if not before. The first of these groups of influences is the heavy imports of wheat into the United Kingdom in the past month, the large amount still afloat for both the United Kingdom and the continent, and the recent improvement in the weather in Great Britain, which favors the spring sowing of wheat, though it is claimed that comparatively little spring sowing will be done in England. The recent rains also in California and Oregon, which, it is believed, now insure a good crop on the Pacific coast, have also had their effect. The expectation of increased supplies from Russia before long, which are now held back by the bad country roads and the delay in the opening of the rivers, also has considerable weight. All of these circumstances, but more especially the heavy imports, have combined to depress the markets, and may continue to do so for some time yet.

The following cable from London on Friday the 13th, gives the later and immediate effects of the circumstances referred to above, viz: "A few months ago large quantities of American wheat were bought for forward delivery, it having been assumed by the purchasers that the continuous bad weather would cause prices to rise. Contrary to expectation, however, there has since been a decline of five shillings per quarter. Heavy losses have thus been caused in London and the provinces, and a number of failures are probable."

But behind all these are the facts, not lost sight of, that the favorable change to fine weather in England comes too late to give the promise of over two-thirds of an average crop of wheat in the United Kingdom. In France, also, the crop cannot under any circumstances exceed 85 per cent. of an average. The fine weather in England is of so recent a date that we only know of it by cable, while the latest mail advices, up to March 31, still tell an unpromising story. The *London Miller* says the frosts have been more severe in March than any remembered in the same month by the present generation, and *Dombusch* for March 31 says that though the lands were then dry and workable, the temperature was unusually low, and the appearance of the late-sown wheats was not promising. In Scotland severe frosts and constantly recurring snowfalls caused great inconvenience to farmers, and a late and very hasty spring sowing is now known to be inevitable. "On the whole," says *Dombusch* of March 31, "the outlook for the harvest is dreary and full of apprehension."

The reports from France up to the 27th ult. say that the alternate freezing and thawing has been detrimental to the autumn-sown wheat, which looks only a little better than in Great Britain. In the northern and northwestern departments of France, especially, the weather has been so unfavorable that farmers delayed with their work are apprehensive that they will be unable to accomplish their spring seeding in seasonable time.

In Germany the weather up to the end of March had been unusually cold, but crop reports were not discouraging. The further east from the Atlantic seaboard in Europe the more encouraging are the prospects for the next crop of wheat. The general outlook may therefore be expressed in the probability that while the principal exporting countries have the prospect of at least fair average crops, the importing countries are sure to require more than usual imports from their next crops.

In the United States, while the forthcoming Agricultural Department report will show a decrease in the average condition of the winter wheat (which constitutes about 60 per cent. of our crop), the area planted in spring wheat is sure to show an important increase in the next crop. The question, therefore, of whether the United States will have another large crop is yet to be decided by the character of the weather during the six weeks after May 1. The stocks of wheat held at the primary markets of the United States at the west, and especially at Chicago, are double what they were at this time last year, but only about three-fourths as large as at the same time in 1880 and 1881.

The stocks of corn in store and afloat at Chicago are more than double what they were at this time last year, and nearly double what they were in 1880 and 1881, but it is reported that the forthcoming agricultural report will show a comparatively small amount of corn in first hands. The figures mentioned are, indeed, so small that they would scarcely be generally credited, even if they should be officially given in the report; it must be remembered that high prices for both corn and pork for the past year have probably drawn to market all that farmers dared to sell.

AMERICAN WHEAT MARKETS.

During the close of the last and the opening of the present week the American wheat markets were brought into a semi-panicky condition by a full realization of the large supplies of breadstuffs in the home and foreign markets. In addition to this the general tenor of the reports as to the condition of the winter wheat crop were regarded as much more favorable, and led parties who had been holding wheat with the expectation of higher prices in the near future to change their views and to throw their holdings on the market for sale. Others thought they saw a good opportunity to make sales for future delivery, and these causes sent the markets downward until Tuesday morning, at which time the decline had become so great that a natural reaction set in. On Wednesday morning the foreign markets were reported as being steadier, which imparted a better tone to business, and prices continued to improve until Thursday morning, when the markets showed an improvement of about 4c. per bushel over the low prices of Monday. Later in the day there was a sharp decline and more than one half of this advance was lost.

The markets on Friday opened steady and became more active under stimulating advices from the foreign markets and a decided falling off in the receipts for the day at Chicago. The markets all close firm, with an upward tendency.

The movement of wheat from the interior to the principal western receiving points has been steadily decreasing for some time, and for the first week in April the receipts were only about one-half of the amount received during the corresponding week in March. The visible supply, though at present large, is gradually decreasing, and will probably continue to do so until after harvest. The receipts at the seaboard have been light, and the stocks at the leading ports are diminishing under a moderate export demand. As is usual at this season of the year, the reports as to the condition of the winter wheat crop are very conflicting, but conservative parties, who are in a position to judge with a good degree of correctness, do not regard the prospect as altogether flattering. As flour is now the cheapest of food products, it would seem as though the present price of wheat was on a sound basis.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis for the week ending April 6 were 593,789 bushels, against 734,972 bushels the previous week, and the shipments 303,466 bushels, against 142,705 bushels the preceding week.

The visible supply of wheat in the United States and Canada April 7, as compared with the previous week, shows a decrease of 281,692 bushels.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets for May wheat at the dates mentioned: New York, 2 p.m. Saturday last, 1.18⅛; Monday, 1.17⅛; Tuesday, 1.17⅜; Wednesday, 1.17⅜; Thursday, 1.17⅞; Friday, 118¼. Chicago, 1 p.m. Saturday, 1.06⅞; Monday, 1.04¼; Tuesday, 1.04¾; Wednesday, 1.05⅝; Thursday, 1.05⅝; Friday, 106.

CORN.

Many of the remarks made in reference to the situation of the wheat market will apply with force to corn. Apparently there has been but little manipulation of prices, though the fluctuations have been sharp and frequent. The large supplies of corn in the elevators at Chicago and St. Louis are an obstacle to any improvement in prices. The receipts at Chicago up to within a few days have been larger than was anticipated, and it is feared that many of the contracts made for the sale of May corn will bring forward considerable quantities of cribbed corn early in the coming month. The volume of speculative business has been large, while the export demand has been restricted by an advance in ocean freights.

The course of the corn market during the past week has been as follows: May corn in the New York market at 2 p. m. Saturday 64¼c.; Monday 64⅛c.; Tuesday 64⅞c.; Wednesday 65⅝c.; Thursday 66⅛c.; Friday 65⅞c. In the Chicago market at 1 p. m. on Saturday 53⅞c.; Monday 53½c.; Tuesday 53⅞c.; Wednesday 54⅛c.; Thursday 54¼c.; Friday 55c.

The aggregate receipts of corn at the seven principal receiving points, for the week ending April 6, amounted to 1,982,378 bushels, against 2,711,586 bushels the preceding week, and the shipments 1,201,825 bushels, against 796,612 bushels the previous week.

The visible supply of corn in the United States April 7, as compared with the previous week, shows an increase of 434,759 bushels.

PROVISIONS.

As compared with wheat and flour the markets for provisions have been inactive and the trading has been confined principally to a few of the leading packers and heavy operators and at somewhat lower prices. The export demand has been quite moderate. There is no evidence that the recent edict of the German government prohibits the importation of lard and, it is hoped that it is exempted, for of the amount exported from the United States last year more than one-fifth went to Germany, while the value of the other hog product shipped to that country was of comparatively little value.

The receipts of hogs at Chicago and other western packing points have not been as large as had been calculated upon and are falling behind those of last season, and last summer's packing was quite light. If the receipts do not soon show an increase higher prices are likely to be the result.

The aggregate receipts of hogs at Chicago, Milwaukee, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis and Cleveland, in the week ending April 11, amounted to 102,945, against 114,016 the previous week, and 142,809 for the corresponding week last year.

The following shows the export of hog product from the places mentioned for the week ending April 7, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	3,614	5,377,156	2,586,074
Boston	488	1,842,179	569,979
Portland	240	....	....
Montreal	..	....	....
Philadelphia	..	3,250,000	....
Baltimore	400	....	....
New Orleans	..	3,700	....
Totals	4,751	10,566,035	3,396,953

The total export of hog product from November 1, 1882, to April 7, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, pounds.	*1881–82, pounds.*
Pork	22,510,800	27,552,400
Bacon	223,869,036	236,444,700
Lard	116,323,521	132,852,233
Totals	362,703,357	396,869,337

The visible supply of grain in the United States and Canada, April 7, 1883, as compared with the periods indicated below, was as follows:

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*	*Barley, bushels.*	*Rye, bushels*
April 7, 1883.	22,349,953	18,223,008	4,057,698	1,098,230	1,857,858
Mar. 31, 1883.	22,631,045	17,788,249	4,320,782	1,489,878	1,910,863
April 8, 1882.	11,732,326	8,913,448	1,529,799	933,233	939,088
April 9 1881.	20,723,131	13,467,447	2,948,583	766,072	447,491

THE PROVISIONS MARKETS BY TELEGRAPH.

From Chicago, Ill.: Pork steady; trading mainly between brokers. Lard firmer on reports that strong operators are buying; scarcely any being made. Meats firm, offerings still; there is a fair consumptive trade and a light export demand.

From Louisville, Ky.: The cattle market is active and steady.

From St. Louis, Mo.: Provisions are upward but buyers hold back, and the movement is trifling. Hog receipts only tolerable, with steady values and an active market. Cattle offerings are light, and prices tend upward.

From Kansas City, Mo.: Provisions continue quiet, demand for packers' products less active, and prices unchanged. The cattle market has fluctuated some. Hog receipts large; the market early in the week was unsteady, and a further decline of 15c. to 20c. occurred later; prices partially recovered. Market now more healthy, prices steady, closing 10c. to 15c. lower than last week.

From Davenport, Iowa: The provisions market is improving.

From Des Moines, Iowa: The provisions market is quiet, with very few offerings.

From Lincoln, Neb.: The provisions market is dull.

From Topeka, Kan.: The provisions market is looking up, though still slow.

From Nashville, Tenn.: The provisions market is steady and fairly active. Cattle sales small and prices high.

From Memphis, Tenn.: Meats and lard are quoted firm.

THE NEW YORK DRY GOODS MARKET.

Business for the week has been of very fair proportions, though somewhat interrupted by the weather. Those who complain most are the commission houses. They are not booking the usual orders for future delivery, especially is this the case in cassimeres, and in fact all grades and qualities of domestic cloths.

The dull trade with them in this respect is no criterion of the tone of the general market. Business in the west is undoubtedly good, and the condition of the south is also encouraging. Stocks are well in hand in all the principal market centers.

The jobbing and retail trade for the week has been of fair proportions, though steady and warmer weather is required to make it really satisfactory. This we can expect almost daily.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, April 13.—Manchester cotton goods are still quoted at the lowest, but the unexpected increase in March exports shows the East is buying at current low terms. Yarns were steadier during the last few days.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The dry goods trade is steadily improving.

From Boston, Mass.: The retail dry goods trade is good, the commission houses report a quiet state of affairs, and with the jobbers it is between seasons. So, on the whole, the general trade is only fair at best. Collections are fair. A notable event is the withdrawal of Messrs. Jordan, Marsh & Co. from the wholesale trade.

From Providence, R. I.: The print cloth market is quiet and steady, the amount of sales being light; 64s are quoted at 3 9/16c., and 56x60s at 3 1/16c. nominal. There are about 135,000 pieces on hand. The cotton market is very quiet and steady, sales being small; middling uplands are quoted at 10½c. and middling gulfs at 10¾c.

From Troy, N. Y.: In the dry goods trade it has been quiet.

From Philadelphia, Pa.: A fair business has been done by jobbers, but the package trade has continued quiet. Selections are chiefly for near wants, and there is no speculative feeling in any department.

From Pittsburgh, Pa.: The dry goods trade continues to improve notwithstanding the fact that spring trade has not fairly set in, owing to unfavorable weather. The business is regarded in a healthful condition, although margins are not altogether satisfactory. Collections fair to good.

From Cincinnati, Ohio: The dry goods trade has been affected by the wet season, but has experienced a fair volume of business under well-sustained prices for cotton fabrics.

From Columbus, Ohio: Trade in dry goods has brightened some as compared with last week and the week before, and dealers now have but little cause for complaint.

From Dayton, Ohio: The dry goods market is improving.

From Indianapolis, Ind.: In dry goods trade is thought to be improving, but not as active as it might be for this season.

From Chicago, Ill.: Dry goods fairly active on orders. There is a fair attendance of personal buyers. The week's sales exceed those for same time last year. Millinery and furnishing goods active. Collections good.

From Peoria, Ill.: The dry goods trade is improving; sales increasing, prices firm and the outlook encouraging.

From Louisville, Ky.: Dry goods are in brisk demand with the small trade.

From St. Louis, Mo.: Dry goods values are strong and unchanged, though some lines are sold at a shade below list prices on account of sharp competition rather than real declines. Business in dry goods continues excellent, and seems undisturbed by the influences which have lately hampered other lines.

From Detroit, Mich.: In dry goods a very good business has been reported during the past week. Many buyers are in the market in person, and mail orders have been quite free for the last half of the week.

From Kansas City, Mo.: Dry goods sales are still heavy, but the trade this season exceeds all expectations, and promises to hold out well.

From Burlington, Iowa: The dry goods trade is steady and embraces a general variety of spring goods, though the demand is not in excess of last season. Collections are fair. Weather favorable for business.

From Davenport, Iowa: The dry goods market is improving. Retail trade is reported as being good. Collections fair.

From Des Moines, Iowa: Fair, warm weather has caused the dry goods trade to improve considerably.

From Milwaukee, Wis.: Trade in dry goods seems somewhat better than last week, but not all that could be desired. Trade should now begin to liven up very substantially, considering the lateness of the season. Stocks are quite large, and composed of the better class of fabrics, for which there is a growing demand. Collections are slightly improved, though yet far from satisfactory.

From Topeka, Kan.: The dry goods trade is in excellent condition.

From Lawrence, Kan.: The dry goods trade is quiet.

From Lincoln, Neb.: The dry goods trade is in a healthy and prosperous condition.

From Denver, Col.: The dry goods market is active and sales are heavier than at this time last season.

From San Francisco, Cal.: Dry goods are moving freely. Jobbers are making large sales.

From Baltimore, Md.: The dry goods market the past week was active, and with many jobbers sales were over the average of last year at this period. Retail dealers are also doing a good business and commission men have no complaints to make. Prices rule steady.

From Norfolk, Va.: Dry goods jobbers have been more active during the past week.

From Richmond, Va.: The dry goods trade is steadily improving.

From Wilmington, N. C.: The dry goods jobbing and retail trade is experiencing a fair activity.

From Atlanta, Ga.: The demand for dry goods continues fair, and sales are in excess of last week.

From Savannah, Ga.: The dry goods market is firm and active. Stocks full and adequate for the demand.

From Selma, Ala.: The dry goods trade continues fair.

From Dallas, Tex.: The dry goods business is active in wholesale and retail branches.

From Marshall, Tex.: The dry goods trade is brisk.

From Memphis, Tenn.: Wholesale jobbers in dry goods report that merchants have procured the bulk of their spring stock, and business has fallen off a trifle as compared with previous week.

From Halifax, N. S.: The dry goods trade shows some improvement. Prices are firm and steady.

COTTON.

The New York Cotton Market for the week past has been higher for spot middling uplands, the price having advanced to 10⅛c. The sales for the week have been for export 2,639 bales; for consumption 1,686, and for speculation 135 bales. Included in the above are 635 bales to arrive. The deliveries on contract amount to 2,600 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 3-16c.	7 1-16c.	9 9-16c.
Strict ordinary	7⅝	7½	10⅛
Good ordinary	8 7-16	8 15-16	10 15-16
Low middling	9⅜	9½	11 13-16
Middling	10⅛	10	12¼
Good middling	10½	10⅜	12⅝
Middling fair	11¼	11⅛	13⅜
Fair	12	11⅞	14⅛

The market for spot cotton closed firm, with holders asking for higher prices.

The future market at New York has been higher, the price having advanced an average of 20 points for near months and 17 points for later months. The sales for the week foot up 591,500 bales, against 435,400 bales for the corresponding week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
April	10.15c.	9.90c.	12.30c.
May	10.21	10.04	12.38
June	10.37	10.18	12.54
July	10.49	10.29	12.70
August	10.61	10.39	12.81
September	10.38	10.18	12.44
October	10.08	9.94	11.77
November	9.97	9.83	11.57

The future market at New York closed firm.

The southern markets during the week past have been firm and steady. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year*
Galveston	9,151	9⅜	11⅞
New Orleans	31,500	9⅝	12
Mobile	3,500	9½	11¾
Savannah	7,600	9⅜	11¾
Charleston	2,500	10	11⅞

The total receipts of cotton at the ports since September 1 are 5,469,267 bales, an increase of 1,136,217 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	762,380	402,329
New Orleans	.....	1,132,928
Mobile	301,057	247,919
Savannah	774,078	668,304
Charleston	517,044	477,030
Wilmington	125,470	130,614
Norfolk	731,866	573,433
Baltimore	53,212	27,291
New York	146,720	159,319
Boston	157,023	194,443
Philadelphia	67,593	56,182

The receipts at the ports for the week were 72,459 bales, against 77,052 last week and 32,624 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 19,341 bales, against 21,645 bales last week and 10,254 bales for the corresponding week last year. The shipments for the week were 37,622 bales, against 38,305 bales last week and 26,729 bales for the corresponding week last year. The stocks for the week were 218,219 bales, against 236,726 last week and 184,033 for the same week last year.

At Liverpool the spot market is reported firm, with a good demand which is freely met, the quotations closing at 5⅝d. for middling uplands, and $5^{11}/_{16}$d. for middling Orleans.

The sales for the week at Liverpool were 60,000 bales (of which 47,000 were American), against 49,500 (of which 33,000 were American) last year. The sales for export were 3,500 bales, against 6,500 bales last year. The sales for speculation were 3,100 bales, against 3,800 bales last year. The amount forwarded was 20,000 bales, against 10,000 bales last year. The stock in port is 995,000 bales (of which 730,000 are American), against 873,000 bales (of which 571,000 were American) last year. The total imports for the week were 73,000 bales (of which 41,500 were American), against 95,000 bales (of which 48,500 were American) last year, and the amount afloat 292,000 bales (of which 172,000 are American), against 461,000 bales (of which 221,000 were American) last year.

The Liverpool future market has been firm and quiet, prices having ruled a trifle higher. Below will be found the closing quotations at Liverpool on Friday of low middling uplands for delivery, as compared with last week:

	To-day.	*Last week.*	*Last year.*
April	....	....	6 44-64d
April-May	5 39-64	5 37-64	6 44-64
May-June	5 42-64	5 39-64	6 46-64
June-July	5 46-64	5 42-64	6 51-64
July-August	5 49-64	5 45-64	6 55-64
August-September	5 42-64	5 47-64	6 60-64
September-October	5 49:64	....	6 51-64

The Manchester market closed firmer, and advance demanded, which buyers refuse.

COTTON REPORTS BY TELEGRAPH.

From New Orleans, La.: The week's cotton movement has been fair. The market has materially improved. Low ordinary to good ordinary inclusive advanced $^3/_{16}$c., low middling and middling ¼c., good middling ⅛c., futures fully $^1/_{7}$c. higher.

WOOL.

Seaboard wool markets have exhibited very little animation during the past week. The general situation is without material change. Buyers have the advantage as regards prices on most descriptions, although in view of the small supplies in hand dealers as a rule are not urging business. Any attempt to force trade would necessitate the acceptance of lower prices, as manufacturers are very indifferent and show no disposition to operate beyond immediate requirements. Notwithstanding the slow trade stocks are undergoing a gradual reduction, and while the market at the moment is rather weak it would not be surprising if values should harden a little toward the close of the clip year. Indeed this is so usual a feature of the wool trade that it has come to be expected as a matter of course. In other years, however, there has been greater incentive to competition among buyers for the desirable lots of old clip left unsold about shearing time. The unsatisfactory condition of the goods trade and the possibility of cheaper wool after the interval of scarcity has been tided over, will be likely to incline manufacturers to move cautiously this season. It is yet too early to learn anything definite concerning the probable opening prices for new wool in primary markets, but it may be considered certain that growers will hold out for better prices than are likely to be generally paid, as the majority of operators appear to expect some cheapening of the staple as a result of the new tariff, and will be disposed to discount its effect in bidding for stocks in the country.

IRON.

The iron market continues the monotony heretofore recorded. There is no material improvement to record in any line. American pig is quite as dull as when last reported. Quotations remain at $24@$22 for Nos. 1 and 2 respectively. Scotch pig is in light arrival, the total for the week being about 1,200 tons, with sales of all brands to about the same amount. The demand for Scotch is about equal to the receipts. The market is bare of stocks of first quality, and if any special demand were to set in prices would respond sharply. First grades of Scotch iron are selling at about $2 per ton less than No. 1 American. The manufactured iron market is unimproved. Bessemer pig has been bid for at $1@$1.50 below current quotations, but no concessions are known to have been made. Steel rails are dull at $39 for ordinary sections. Lighter qualities are quoted at $40@$41. Some sales have been made at these figures. The impending wages difficulty between the mill owners represented at the recent Pittsburgh convention and the Amalgamated Association of Iron Workers will be discussed in joint meeting at Pittsburgh to-day. The present rate of wages will terminate June 1. The rate for the year succeeding that date is the subject under dispute. The mill owners declare the employés must be contented with 10 per cent. less wages.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, April 13.—Practically there has been no change in the prices of iron. Buyers are more inclined to think the lowest prices have been reached.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Trade has ruled quiet. Inquiries are more numerous for pig and structural iron at bottom prices. Bar is easier and buyers are operating only for present requirements. The demand for plate is improving. Steel rails are selling in small lots at $39, and negotiations are pending for larger lines below that rate.

From Pittsburgh, Pa.: The demand for both iron and nails is improving, and while prices for the former are still very low, it is thought the opening of spring cannot help but increase the demand and stiffen prices.

From Cincinnati, Ohio: Pig iron is in better demand under ample supply, with no change in prices. The principal demand seems to be for car wheel, and better grades of manufactured iron are in good demand with ample supply.

From Cleveland, Ohio: The iron market is without material change. Prices continue low but firm.

From Chicago, Ill.: Hardware, tools and heavy iron are in good demand. Miners' stocks active. Bar iron rather more active. Pig selling fairly; in job lots steady. Nails active. Fair orders are received for steel rails.

From Detroit, Mich.: In iron no changes whatever are noted. Prices are at a standstill, and little improvement is looked for.

From Louisville, Ky.: There is a limited business in pig iron, but a better feeling of prospective improvement prevails.

From St. Louis, Mo.: Some grades of pig iron are advancing slightly on an only fair demand. Manufactured iron is selling actively at the $^{23}/_{10}$ rate. During the week all grades experienced a downward tendency, with a panicky market, but are now advancing sharply.

From Nashville, Tenn.: Iron and hardware quiet without any noticeable feature.

COAL.

There is no news to report concerning the anthracite coal trade. Business has not recovered any of the expected activity yet, and although some dealers say trade is fair, there are others who call it decidedly sluggish. The western trade is believed to promise an unusually large and prosperous season for all engaged therein. The opening of lake and canal navigation is therefore anxiously awaited. The bituminous coal trade is dull. Some contracts in the coast trade have even been declared unprofitable, owing to the high rate of tolls. Half time at the anthracite mines was in order again this week for three consecutive days, ending with to-day. This concludes the April quota agreed on. The total product of anthracite coal for the week ending March 31 was 778,770 tons, against 632,862 tons in the corresponding week in 1882, a gain of 145,908 tons. The output of anthracite from January 1 to March 31, 1883, was 6,379,295 tons, against 5,616,811 tons in a like portion of 1882, an increase of 762,484 tons.

PETROLEUM.

The petroleum situation in the speculative markets has experienced the transformation pointed out in these columns a week ago, and the bull in oil has looked more cheerful than his business opponent on the other side of the market. This change was due to the flattening out of the Balltown district. The great original decline in production—that in the Bradford district—still continues. Without the intervention of the short-lived but prolific Cherry Grove region much higher prices than are now paid for oil would probably be quoted. Following hard upon the exhaustion of the Cherry Grove region the Cooper tract wells showed in various instances an abundance of oil where not much was expected. This was taken to mean another heavy increase in the production, and prices fell away. But the Cooper tract, although it has recently spurted its total production daily, in excess of what was reported last week (after it had been declining for a month), is nevertheless believed to be insignificant as a market influencer. The increased flow of oil there is said to be the consequence of torpedoing, which will simply hasten the day of exhaustion. The Balltown tract, where unexpectedly prolific wells were recently discovered, was the successor to the interest and "mystery"-working mania which characterized the Cherry Grove and Cooper tracts. It, too, has lost some prestige, as prospective big wells, and some of the "mysteries" have shown themselves to be of no special value. This situation, as intimated above, points to higher prices for oil. But that is as far as the onlooker may advisedly speak. The market for certificates of crude was not noticeably active or depressed on Saturday and Monday last. Interest seemed to be centered on Balltown, whence news was anxiously awaited. On Wednesday some advance was made, owing to definite information being received of the instability of the flow from the Welch and Grandin wells. On Thursday the market was firmer and higher.

On Friday the market opened firm at 95c., but was undermined unexpectedly by the generally accepted news that a new well had come in on the Balltown tract at the rate of 400 barrels daily. Notwithstanding the hole is in a well-defined territory, it is doing excellently. This broke the market, and the morning session closed with prices barely steady at 93⅜. The general situation in petroleum pro-

duction, however, with the exception of this circumstance, continues in favor of higher prices. The longevity of this well will prove of interest. Prices at the close were 94⅜c., against 91c. last week, Friday—an increase of 3⅛on the week.

The week's record of prices for certificates of crude, ending April 13, at Oil City, is as follows:

PRICES OF CERTIFICATES OF CRUDE.

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	91½	92⅜	91⅜	91⅞
Monday	92¼	92⅜	88½	89⅛
Tuesday	89¼	91½	89	90
Wednesday	90⅛	96⅛	90¼	96⅜
Thursday	97½	97¾	94¾	96⅜
Friday	95¾	96¼	93⅜	94⅝

The refined market was dull on Saturday and Monday and no improvement was experienced until Tuesday evening. Shippers were not anxious to buy, but refiners held firmly at previous quotations. Crude was moderately active. Wednesday's strength in the general oil market was felt in refined and prices were firm. Case oil was not as stiffly held and crude was unchanged. On Thursday the price of refined was advanced ⅛c. all round.

The quotations for certificates of crude petroleum and of petroleum products last evening as against those of April 6, March 30, and March 22, are as follows:

	March 22.	*March 30.*	*April 6.*	*April 13.*
Certificates, crude..	102⅞c.	94½	91	94⅜
Refined, 110°.....	8½	8¼	8¼	8⅜
Refined, 70°	8⅜	8⅜	8⅜	8½
Crude, in barrels....	7¼@7¾	7⅛@7⅝	7⅛@7⅜	7⅛@7⅜
Case, plain	11	11	11	11
Naphtha..... ...	6¾	6¾	6¾	6¼

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to April 7 was 139,763,223 gallons, against 141,573,886 gallons in a like period of 1882, a decreased exportation of 1,810,663 gallons, against an increase of 4,471,437 gallons reported up to March 31. For the week ending April 7 the foreign shipments were 15,780,298 gallons, against 4,952,476 gallons in the preceding week. New York city's exports of petroleum from January 1 to April 7 amounted to 120,951,270 gallons (leaving but 18,811,953 gallons for all other ports), against 119,147,199 gallons in a like period in 1882.

The Washington Bureau of Statistics' report of the exports of petroleum for February, 1883, shows that the total of the various shipments in that month was 29,209,791 gallons, valued at $2,689,721, against 28,753,191 gallons in February, 1882, valued at $2,680,861. This shows an increase in February last over February, 1882, of 456,600 gallons, valued at $8,860. The total exported for eight months ended with February last was 326,017,057 gallons, valued at $28,600,237, against 373,783,882 gallons in February, 1882, valued at $34,353,551, the decline in the past eight months' foreign shipments, as against those in the corresponding period in 1882, being 47,766,825 gallons, and $5,853,314.

OCEAN FREIGHTS.

During the past week there has been some improvement in petroleum ocean rates for charters. In the early part of the week the market had continued, as reported on Saturday last, very dull, with a surplus of vessels in search of cargoes. Grain is still dull and low, with practically nothing doing. The only improvement, therefore, has been in petroleum charters. There is some activity in coasting freight rates. But as a rule the market is dull.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: General trade is good but just now restricted on account of the bad state of country roads rendering the movement of freight difficult. Groceries are in good demand. Produce slow.

From Boston, Mass.: Boot and shoe trade is fair. The spring trade is about over, and shipments are decreasing. The fall trade is opening fairly, and there are thirty or forty buyers in town. Shipments for the week to places outside of New England 43,672 cases, against 35,336 cases the fifteenth week in 1882. Total shipments since January 1, 781,552 cases, against 703,269 cases same time last year.

MIDDLE STATES.

From Troy, N. Y.: The grocery and provision business for the past week is reported to have been dull, caused by the bad condition of the country roads, which prevented the farmers from making purchases and confined the efforts of salesmen to those towns made accessible by rail. With the advent of settled weather it is believed trade will improve.

From Binghamton, N. Y.: The general jobbing trade, which has been greatly retarded by bad weather, has taken a decided tendency upward during this week. The retail trade in all lines is more active and dealers are buying with more confidence.

From Philadelphia, Pa.: General trade has made a little more satisfactory progress, under the stimulus of genuine spring weather, but there has been no decided activity. The industrial situation is disturbed by labor troubles in several departments. A number of the building trades have already struck, or are perfecting organization preparatory to a demand for higher wages, and textile production has been further embarrassed by a general strike of the beamers and twisters for an advance of $1 per week. A good many mills running on low grade cotton and shoddy stuffs are likely to hold out against the strikers, as prices are now so low that there is no margin of profit, and in some cases there are accumulations on hand that cannot be distributed except at a positive loss. Cotton and wool continue dull, and the yarn trade is much depressed in all branches except fine worsteds, which are selling up close, both for clothing woolens and tapestry and Brussels carpets. Other kinds of carpetings are quiet. English chemicals have taken an upward turn, amounting to 10@15 per cent., in consequence of a movement to limit the production of bleaching powders in England, and an advance of 6@8 shillings per ton in transatlantic freight rates. Grain is more active and higher; exporters are bidding more freely, and an occasional cargo is sold, but as a rule this market has advanced faster than shippers' limits have been extended. Grain freights are hardening slightly. Liverpool steamer room is engaged ahead. Petroleum is in better demand, and closes firmer. There is a fair trade doing in farm products at full prices for desirable stock. Groceries, provisions and butter rule quiet.

WESTERN STATES.

From Cincinnati, Ohio: General trade was dull until within the past day or two, when the fair weather seemed to give it a new start, and there is now a more active movement. Breadstuffs have experienced a slight advance, but offerings are light. Wheat declined slowly until the near close of the week, when it reacted. Receipts about the same as last week. The receipts of corn have been light, and the market is stronger. The cotton market has improved, but without any noteworthy event. Country produce has declined under liberal receipts and favorable change in the season. Hemp is unchanged. Whisky is unchanged, with a fair consumptive demand only. Wool and woolens are slow and unchanged. In tobacco the volume of offerings to date this year exceed the amount of last year's almost 50 per cent. Prices are a little less than last week, with a sluggish movement.

From Cleveland, Ohio: The weather throughout the week has been favorable and general wholesale business has improved, though for the season it is still backward.

From Dayton, Ohio: The manufacturing interests are all employed, and the demand for money is increasing. Collectors forward. Building material is advancing in price.

From Columbus, Ohio: General trade remains about the same.

From Chicago, Ill.: Boots, shoes and clothing moving fairly. Groceries more active; stocks reduced. Wheat feverish and unsettled; light receipts encourage bears to cover, and deter bulls from buying. Fine weather and improved crop advices. Corn active; buying largely to cover shorts; bears rendered uneasy by light receipts of past two days; no apparent demand by large operators for advance.

From Indianapolis, Ind.: Trade is still indifferent, and there seems an absence of vigor and life. Collections are only fair, though prospects thought to be improving. Manufacturers as a rule are busy. Considerable building is going on.

From Peoria, Ill.: The liquor trade suffers some pending the spring elections in country towns, where the license question is at issue. The general trade report a good business, with the volume larger than last year.

From Detroit, Mich.: Just now there is an average good business done by jobbers in all lines, and a considerable improvement is noted in collections over last week. Navigation on lakes will probably not be opened until May 1.

From Louisville, Ky.: The merchandise movement is moderately active, and trade appears to be in a conservative and satisfactory condition. Collections average prompt. Heavy rains and mild sunshine have alternated during the week. Planting and gardening operations are about three weeks behind the usual season. There is a small movement in grain, and firmer prices are quoted. Call board sales have been inaugurated at the Board of Trade with encouraging results. Flour dull and steady. Wool quiet and irregular. Kentucky whiskies in first hands and in brisk consumptive demand with distributing houses. Old goods firm. The leaf tobacco movement is the largest ever recorded here, receipts and sales averaging over 600 hogsheads daily. Offerings show a liberal proportion of the better grades, principally white burleys. Prices are full and firm, and bidding active. Local securities firm and in good request. In cotton a decidedly better feeling prevails. Inquiry is good, but holders are reluctant sellers, except at extreme quotations.

From St. Louis, Mo.: Grain receipts are light and shipments increasing. Cotton advancing a little, sales and shipments heavy. Receipts also good. The general jobbing trade shows gradual improvement. Collections fairly easy.

From Kansas City, Mo.: General trade revived under the influence of seasonable weather, and leading lines report a satisfactory week's business. Crop prospects are encouraging. Country dealers are buying more freely. Collections generally are satisfactory. Wheat gradually strengthening, now fairly active. The decline reported last week has been recovered, and prices are firm.

From Burlington, Iowa: Business continues satisfactory in all lines. Retailers are enjoying a fair run, while jobbers are doing all they can well handle.

From Davenport, Iowa: General trade is much better than last week.

From Des Moines, Iowa: Save flour, potatoes and apples, the supply is in excess of the demand, and very little produce is offered. Prices are weak. Retail trade in all lines is stronger than last week. Wholesale trade in all lines is good. Sales are better than last year, due in part to a larger territory tributary to this city.

From Milwaukee, Wis.: The local money market has been reasonably active, and calls are noticed from all classes of mercantile borrowers at the banks. Shipments of currency to the west have been up to the average. The condition of country roads has been and still is such as to greatly impede trade with jobbers, among whom there has been no material improvement in the volume of business, and in groceries particularly there has been a dullness very unusual at this season of the year.

From Lincoln, Neb.: General trade is good, with fair prospects for the future. Farmers are busy with work, and consequently retailers report trade more quiet. There has been but very little corn brought into market. There is a good demand for fruits, and prices are better.

From Lawrence, Kan.: The condition of general trade remains unchanged from last week. Collections good. The wheat crop promises an excellent outcome.

From Topeka, Kan.: General trade is beginning to show signs of a general improvement and may be quoted as fair at present. Collections are good.

From Leavenworth, Kan.: Prices of wheat, corn and oats are fluctuating. General trade good. The present prospects of good crops throughout the state tend to keep prices down. All parties are holding their grain for an advance.

From Denver, Col.: Groceries, hardware, boots and shoes in good demand. Trade in all branches shows a heavy increasing demand.

CALIFORNIA.

From San Francisco, Cal.: Business is prosperous, and spring trade active. The prospects are for a large crop. There has been more inquiry for wheat. Shippers' freights higher; 55s. for orders. Ten charters have been made this week. Hides dull. Spring wool arriving freely. No eastern buyers yet.

SOUTHERN STATES.

From Baltimore, Md.: The general volume of business the past week was very fair. Very few buyers, however, have been here this season, which jobbers are unable to account for, and say most orders are coming in from salesmen on the road. An oil-pipe line is expected to terminate at Baltimore in the near future, which will largely extend the export trade in petroleum. The market for refined is quiet and nominal, but crude rules firm at 7⅛@7⅜c. for cargo lots in shipping order. Vessels are now loading 22,000 barrels of refined for German ports. The demand for flour from shippers and local dealers is reported better; the stock is ample, but holders are firm in their views, and the market is quoted active and steady. Southern wheat is scarce and prices are higher; western also rules firm. A stronger market is reported in corn, with a tendency for better prices. Some activity is noticed in the cotton market, and holders are asking full prices; sales were larger than for some time past. Freights continue dull.

From Richmond, Va.: Business quite active in all lines; country merchants coming in and buying.

From Norfolk, Va.: Trade generally is fairly good. Agricultural and hardware men are now profitably engaged. The retail trade in all branches is improving. The weather is now more spring-like. Cotton receipts continue fair. Collections are rather better.

From Wilmington, N. C.: The weather has been pleasant. Cotton firmer; demand good; receipts small. Grain and breadstuffs, in sympathy with other markets, advancing. Lumber quiet. Timber and shingles firm. Freights quiet and steady. Spirits turpentine feverish, market advanced. Rosins easier. Tar steady. Crude turpentine firm.

From Savannah, Ga.: Trade is more even and steady, being enlivened by a more easy market, which has facilitated movements. The weather, after a thunder storm Monday night, cleared warm, which is favorable to truck farmers, who are beginning to ship to northern markets. Crops in this line generally look well. The demand for cereals is generally better.

From Atlanta, Ga.: Clothing, boots and shoes are in demand, with fair sales. Retail trade in all lines is good. Jobbers in groceries and provisions report a more active trade. Collections fair. The fine weather has greatly improved trade of all kinds.

From Macon, Ga.: Trade generally is dull. Nothing of interest to report.

From Selma, Ala.: There has been little or no change in trade since last report. The grocery trade is still dull. In other branches of trade business has been good.

From New Orleans, La.: Open kettle sugars are in request and firm; clarifieds quiet and steady. Rice in good demand; market firm; stock light; fair to prime 5⅜@6c. The supply of flour and provisions is ample for moderate requirements, prices easier. Coffee strong, fair 9½c. The tone in financial circles is improved by falling of the lower Mississippi sufficiently, it is believed, to carry without overflow.

From Galveston, Tex.: The general jobbing trade shows less activity than last week. The weather continues warm.

From Dallas, Tex.: General trade is good. Grain in demand, but scarce. Cotton in moderate demand; fully supplied.

From Marshall, Tex.: General trade is fair. The weather is fine for plowing, and planters are in good condition.

From San Antonio, Tex.: Wholesale business is far in excess of last year's. Receipts and shipments by rail are larger than for any previous spring in the city's history.

From Nashville, Tenn.: The jobbing trade is more quiet this week, the spring rush being over. The weather has been favorable for the growing wheat, which, in some localities, is much improved. Flour declined 25c., and is in light demand. Wheat

dull at a decline of 7c. Corn lower, but steady. Drugs active. Boots and shoes quiet. Horses and mules but few on market.

From Memphis, Tenn.: Business during the past week has been fair. Flour is in good demand and steady in price. Meal holds firm in price. Corn and oats steady.

NOVA SCOTIA.

From Halifax, N. S.: Business generally seems rather better this week; prices are steady and firm. Collections continue fair, and current prospects seem a little more favorable. Fishing and trading outfits are going on rather actively within the past two or three days.

LATE MAILS.

From Chicago, Ill., April 11: Although the active trade and liberal percentage of cash sales of goods, in connection with free collections, have so far relieved the financial necessities of merchants as to render the majority of them comparatively independent of the banks, the calls for funds from operators in grain and provisions and other branches of business, including lumber manufacturers and dealers, is sufficient to give the banks full employment for their loanable balances, and at no corresponding time in years has the money market been so firm as at present. This is due to the enormous stocks of grain being carried here, in connection with an unusual demand from miscellaneous manufacturers, and the indications favor a strong loan market until the grain now held here begins to move out freely. The dry goods houses are doing a liberal jobbing trade, but the rush for the season is about over, and sales during the balance of the season will be mainly in small bills, as wanted for replenishing stock. But, as jobbers say their sales so far have been very large, they can well afford to be content with an average business for the remainder of the season. The millinery houses have had an unprecedented trade, and their sales keep up surprisingly. The other branches of the jobbing trade, and especially the hat, cap, boot, shoe and clothing houses, have enjoyed a large business. The hardware and metal houses report a continued good demand for all classes of goods, and an improved sale is reported for leather. Bar iron is selling freely in job lots, and a fair business is reported in pig iron; the sales, however, are to mill and foundrymen, who want stock for current consumption. Nails are selling fairly in small lots, and the character of the orders indicate that they are bought for immediate sale. Lumber is going out freely, and as dry stock is most called for the demand indicates a liberal activity in building operations in the interior. Wool receives very little attention, but stocks are small and confined to coarse and undesirable grades. Stocks of flour are not above an ordinary average, the receipts are light and production of the northwestern mills small, but the demand is light and trade slow, and holders refuse to make concessions. The decline obtained in wheat on Monday has been recovered, and the market closes strong this afternoon, the firmness being mainly due to the adverse crop reports published by the government Bureau of Agriculture, which checked selling, and set the shorts to covering. But, so far as could be discovered to-day, none of the large bull houses bought any considerable amounts, and many of the bears argue that inasmuch as the reports were made up before the recent change in the weather, they are of little value, as the condition of the wheat plant has been materially improved within the past ten days. Corn has improved with wheat, but the market shows little real strength. The general feeling is that the stocks are too large to justify a large advance. The small receipts of hogs has a tendency to strengthen confidence in mess pork and lard sufficiently to prevent free selling by the shorts. There is, however, very little apparent buying for an advance, and the market is rather quiet. Meats are meeting more attention from domestic and foreign buyers, who want the property for shipment to consumers. Prices are advancing, and some cuts difficult to find in large lots. The arrivals of hogs are scarcely sufficient to supply the demand from local buyers and shippers, and packing operations are virtually suspended. Hence, stocks of provisions are passing into consumption much faster than they are being made. The closing cash prices for grain, pork and lard to-day and the same day last year compare as follows:

	Closing to-day.	*Same day last year.*
No. 2 spring wheat	$1.00¾@$1.03	$1.35½@$1.36
No. 2 corn	.49½@ .52½	.72½@ .74¾
No. 2 oats	.41½@	.47½@ .50
No. 2 rye	.56½@	.81 @ .83½
No. 2 barley	.75 @	1.10 @ ....
Mess pork	18.00 @	18.10 @ 18.15
Lard	11.27½@ 11.30	11.25 @ 11.30
Short rib sides	9.85 @	10.05 @ ....

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.	*Exchange selling on New York.*
Boston, Mass	6 @ 6½	50c. discount per $1,000.
Chicago, Ill	@ 7	60c. premium.
Cincinnati, Ohio	@ 8	50c. premium.
Columbus, Ohio	@ 8	1-10 premium.
Dallas, Texas	@	⅛ premium.
Davenport, Iowa	8 @	1-10 premium.
Dayton, Ohio	6 @ 7	Par.
Des Moines, Iowa	8 @10	⅛ premium.
Detroit, Mich	6 @ 7	
Galveston, Texas	@	Par.
Halifax, N. S	6 @ 7	⅝ premium.
Indianapolis, Ind	7 @ 8	Slight discount.
Kansas City, Mo	10 @12	$1 premium.
Louisville, Ky	7 @ 8	75c. premium.
Lincoln, Neb	10 @	1-10 premium.
Macon, Ga	8 @12	3-10 premium.
Marshall, Tex	12 @	½ premium.
Memphis, Tenn	6 @ 8	¼ premium.
Milwaukee, Wis	7 @10	25@50c. premium.
Montgomery, Ala	12 @	½ premium.
Nashville, Tenn	8 @	$2 per $1,000

Topeka, Kan	@	$1 premium per $1,000.
Troy, N. Y	6 @	
Wilmington, N. C	6 @ 8	Par.

THE AMERICAN STEAMSHIP LINE.

The Philadelphia *Record* says: "The steamships of the American line as carriers of cabin passengers are now numbered with the things of the past. Yesterday the alterations of the Pennsylvania into a vessel for freight and steerage passengers only was completed, making the last of the company's steamers that have been altered for this purpose. An officer of the company, when asked if the statement that the company had lost nearly $100,000 per year since the line was started was true, replied that it was substantially correct, and that the actual figures of this deficit for 1882 were $99,007.86. The reasons assigned for the unprofitableness of the ships as passenger carriers were numerous. The line was at a great disadvantage with competing lines in shipping crews, the British lines shipping at $12,000 per vessel less than those of the American line, and as all foreigners seemed to know no port of entry in the United States but New York, it was impossible to get them to ship in vessels destined for any other point in visiting America. 'In fact,' added the officer, 'there seems to be no assured commercial and passenger traffic tor a line of steamers sailing from Liverpool unless it enters New York.' It was stated as by no means a certainty that the line will be maintained even as freight carriers, for that has only been resorted to as an experiment. No estimate has been made of the additional profit that will be gained by increased storage for freights; but as it is a dead waste taken up and utilized, the officers feel that it must be compensating if the freights are offered in sufficient amount to occupy this additional space. At this time, however, the outlook is certainly very encouraging, as the vessels are being offered all the freights they can carry. The changes made in the vessels accomplished certain reductions in expenses, and this, added to many other opportunities which will present themselves for securing profitable freights, may bring the line to a paying basis. The line numbers nine vessels, including the British steamers, which sail under foreign colors. These vessels were put on to secure greater regularity in the shipment of freights now offering in such large quantities by the Pennsylvania Railroad Company. The British steamers have limited accommodations for cabin passengers, but appear to be very well satisfied with the freight offerings alone.

TRADE EMBARRASSMENTS.

There were 153 failures in the United States reported to BRADSTREET'S during the past week, 37 less than the preceding week, 42 more than the corresponding week of last year and 55 more than the same week of 1881. Compared with the previous week the middle states had 28, a decrease of 13; New England states 16, a decrease of 6; southern states 39, an increase of 2; western states 56, a decrease of 3; Pacific states and territories 14, a decrease of 17; Canada and the Provinces 25, an increase of 1. The prominent failures were Williston, Knight & Co., New York, and the Williston & Knight Company, buttons, East Hampton, Mass.; George Palen & Co. leather and hides, New York; Babcock & Watrous, hat manufacturers, Middletown, N. Y. In the principal trades they were as follows: General traders 26; grocers 22; liquors 12; hardware 11; manufacturers 10; clothing 8; dry goods 8; shoes 5; drugs 4; hotels and restaurants 4; hats 4; fancy goods 3; lumber 3; tobacco and cigars 3; furniture 2; leather 2; bankers and brokers 2; jewelry 2; flour and grain 2; millers 2; butchers 2; crockery 2.

ALABAMA.

EPES STATION.—J. J. Hillman, general store, who recently failed, is reported to owe from $30,000 to $45,000.

ARKANSAS.

CAMDEN.—W. M. Minter, grocer, has failed and been attached.

CALIFORNIA.

CAMBRIA.—A. Citron, dry goods, has failed.

LOS ANGELES.—W. B. Tullis, jeweler, has filed a petition in insolvency.

MARTINEZ.—J. B. Smith, saloon, has failed.

SALINAS.—J. H. Harris, grocer, has failed.

SAN FRANCISCO.—Julius Abenheimer, calfskins, has assigned to John Rosseter, of Rosseter & Smith. Liabilities $25,000, all due east; assets $13,000.

SAN FRANCISCO.—J. Ezekiel, crockery, has failed.

SAN FRANCISCO.—S. Irving & Co., gents' furnishing goods, have been attached.

SAN FRANCISCO.—T. G. Parker & Co., tailors, have failed.

SAN FRANCISCO.—John H. Scheper, saloon, has been attached.

SAN PEDRO.—J. E. Walton, merchant, has gone into insolvency.

SPADRA.—A. B. Caldwell, general store, has filed a petition in insolvency.

COLORADO.

DENVER.—Anton Bayer, saloon, is reported to have left town.

DENVER.—John A. Thompson, grocer, has been closed by creditors.

DENVER.—B. W. Wisebart, clothing, has been sold out. Liabilities $10,000; assets $21,000.

DENVER.—Rose & Wolff, saloon, have been closed by creditors.

GRAND JUNCTION.—Matt. Arch, saloon, has been attached for $4,500.

LEADVILLE.—Hirst & Allen, hotel, have been attached.

LEADVILLE.—Charles Sawyer, saloon, has been closed on a chattel mortgage.

LEADVILLE.—Charles Schroeder, clothing, has been attached and is selling out.

TRINIDAD.—Iler & Adams, liquors, have been closed on confessed judgments.

CONNECTICUT.

HARTFORD.—William Potter has assigned.

NORWICH.—Stephen Gifford, carman, has assigned.

NORWICH.—George H. Harvey, stage line, has assigned.

DAKOTA.

VALLEY CITY.—Joel S. Weiser, general store and lumber, has assigned.

GEORGIA.

ATLANTA.—A receiver has been appointed for Gillett Brothers, wholesale tobacco.

SAVANNAH.—T. H. Bolshaw, crockery, has assigned.

SAVANNAH.—The Georgia & Florida Inland Steamship Company is in the hands of the sheriff on a foreclosure of a mortgage given to the Ocean Steamship Company.

SOCIAL CIRCLE.—At a meeting of the creditors of Abercrombie & Son, general store, it was decided to turn over the entire assets to E. P. Newton, who assumes the indebtedness of $15,000, and agrees to pay 75 cents.

TARBORO.—Harrison Brothers, lumber and general store, are offering to compromise.

ILLINOIS.

CHICAGO.—Magnus Anderson, showcase manufacturer, has compromised at 50 cents in indorsed notes, at four, six and twelve months. Liabilities $16,000.

CHICAGO.—Place & Miles, kerosene oil, have assigned. Liabilities $2,165.

CHICAGO.—N. W. Taylor, a heavy creditor, has bought the assets of George H. Taylor & Co., wholesale paper, and will close them out, assuming the payment of all the signed liabilities at 40 cents.

CHICAGO.—Mrs. Martha Wimmerstedt, doing business under the style of the estate of C. W. R. Wimmerstedt, dry goods, has assigned to Eugene Skogland. Liabilities $6,190.

CHILLICOTHE.—N. Thompson, tin and hardware, has failed. Liabilities about $1,200; assets about $400.

COLFAX.—A. F. Corthon, lumber, has assigned to Z. Taylor. Liabilities $7,220; assets $5,074.

DECATUR.—Alfred Clark, hats, has assigned.

DUNCAN.—J. H. Slater, general store, has been closed by the sheriff.

EL PASO.—P. H. Tompkins, proprietor of the Bank of El Paso, has assigned to D. A. Espy. Liabilities $150,000; nominal assets about $110,000. The failure is attributed to injudicious investments and depreciation in realty owned by him. It is thought the assets may realize from 30 to 50 cents.

GILMAN.—D. B. Wenger, grocer, has been attached.

HAVANA.—Joseph Bruder, tin, has failed.

JOLIET.—The Sun Printing Company has confessed judgments and been attached.

MENDOTA.—Schultz & Hoffman, hardware, have assigned. Liabilities $7,800; assets $6,000.

INDIANA.

INDIANAPOLIS.—Herman Rikhoff, wholesale liquors, has sold out and failed. He was heavily loaded with bonded goods.

LOGANSPORT.—William A. Jones, gunsmith, has failed and been attached.

ROCHESTER.—Henry W. Neiswanger, shoes, sold out to a relative and has since been sued for $902.

WILLIAMSPORT.—Jacob S. Lutz, general store, is in the hands of the sheriff.

IOWA.

BURLINGTON.—Stephen Long, proprietor of the Barret House, has assigned.

DAVENPORT.—James R. King, second-hand goods, has failed.

DELTA.—Bennett, Garskell & Co., general store, have been closed on a mortgage.

KEOKUK.—Ayer & Sellew, hardware, have assigned. Liabilities $23,000; assets $20,000.

MASON CITY.—A. M. Thompson, drugs, has assigned to M. S. Schermerhorn.

MONDAMIN.—L. Scott, general store, is reported to have left town.

SIOUX CITY.—Davis & Hubbard, shoes, have been attached.

SIOUX CITY.—F. P. Dean, shoes, has been attached.

WATERLOO.—Maclay & Co., hardware, have failed. They gave a chattel mortgage on entire stock for $3,000, and a bill of sale of books, accounts, etc., for $700.

KANSAS.

LAWRENCE.—J. L. Mossler, clothing, has failed. Liabilities $12,000; assets $10,000.

MEDICINE LODGE.—The liabilities of L. F. Pearson, dry goods and clothing, are estimated at $10,000; assets $6,000.

KENTUCKY.

BIG SPRING.—Basham & Cox, general store, have assigned.

LOUISVILLE.—W. L. Murphy, flour mill, has assigned to A. T. Smith.

LOUISIANA.

NEW ORLEANS.—Romain & Otis, provision brokers, have assigned. Liabilities $9,895; assets $10,560.

SHREVEPORT.—Abe Dreyfus, dry goods and groceries, is reported attached.

MAINE.

AUBURN.—The attachment against A. B. Crafts was a matter of dispute and does not affect his standing.

CARIBOU.—James P. Small, general store, has failed, and will settle in insolvency. Liabilities $3,800, of which $1,400 is secured; actual assets about $2,500.

LEWISTON.—C. H. Pendexter, fancy goods, has settled at 20 cents.

LEWISTON.—Roland E. Patterson, mason and contractor, has been attached.

PORTLAND.—E. G. Peterson, desk manufacturer, is reported offering 25 cents.

SACO.—Horace B. Stuart, grocer, has gone into insolvency.

MARYLAND.

BALTIMORE.—Chas. C. Buckland, of Buckland, Ebeling & Co., pianos and organs, has assigned to Jacob L. Rosenthal, and it is stated in the deed that Mr. Ebeling has no interest in the assets assigned.

BALTIMORE.—M. Pacholder, trading as M. Pacholder & Co., manufacturers of cigarettes, has filed a petition in insolvency. Liabilities about $12,000.

MASSACHUSETTS.

AMHERST.—C. W. Muzzey, restaurant, has been attached.

BOSTON.—Baker & Cutler, grocers, have failed. Liabilities reported to be about $20,000.

BOSTON.—A. T. English & Co., produce, have failed and been attached. Liabilities about $5,000; assets $1,000.

BOSTON.—The committee of creditors of The Boston Machine Company reported that the assets at the lowest valuation at a forced sale would pay 75 cents. The assets nominally are $475,000, of which $319,000 is in machinery, tools, etc.; mortgaged real estate $60,000; stock $43,000; claims $53,000.

BOSTON.—The Civil Service Co-operative Society has failed and assigned.

CHELSEA.—S. J. Haradin, grocer, has filed a petition in insolvency.

EAST HAMPTON.—The Williston & Knight Company, covered buttons, has been placed in the hands of James M. Warowell, as receiver. See Williston, Knight & Co., New York city.

LOWELL.—George Naylor, manufacturer of carpets, has suspended. Liabilities $32,000.

NORTH DANA.—The majority of the creditors of A. W. Goodman, Schofield & Co., woolen manufacturers, have agreed to accept 25 cents. The committee reported the liabilities to be $70,817, of which $37,250 is secured; nominal assets $67,769.

PEMBROKE.—The committee of creditors of John Foster, lumber and groceries, recommend a compromise at 30 cents. Liabilities $36,501; nominal assets $31,445.

WEST MEDWAY.—Elbridge G. Ware, grocer, has settled at 30 cents.

WORCESTER.—H. A. Richardson, machinist, has been attached.

MICHIGAN.

HILLSDALE.—Card & Beaman, general store, have been closed by creditors.

HOMER.—William Mahaney, grocer, has been closed by mortgagee.

MASON.—G. J. Charles, dry goods, has been closed up by creditors.

MINNESOTA.

FERGUS FALLS.—John Halberg, dry goods and groceries, has assigned. Liabilities over $4,000; nominal assets $5,000.

LAKE BENTON.—G. F. Meecher & Co., dry goods, have been closed by the sheriff.

MURDOCK.—Thornton & Farnen, general store, have been attached for $947.

MISSOURI.

MACON CITY.—W. P. Howe, restaurant, has failed.

PLEASANT HILL.—Thomas F. Simon, general store, is reported to have failed.

ST. LOUIS.—The Atlantic Milling Company, flour, has suspended, and asks an extension on current bills of $50,000, and will hold a meeting of creditors shortly to submit a statement.

ST. LOUIS.—The Star Brush Manufacturing Company has assigned to George G. Gibson. Liabilities $2,230; assets $2,850.

VERSAILLES.—E. F. Ninninger, drugs, has assigned.

NEBRASKA.

OMAHA.—C. F. Koegle, millinery, is reported to have left town.

OMAHA.—Julius Rich, notions, is compromising at 75 cents.

TABLE ROCK.—W. L. Scism, notions, has failed and closed out.

NEVADA.

EUREKA.—W. P. Haskell, furniture, has been attached for $2,000. He recently claimed assets $27,450, and liabilities $13,838.

NEW JERSEY.

NEWARK.—Abraham Lowenthal, merchant tailor, has confessed judgments for $5,922 to Ferdinand Grebe, who is said to have been in his employ for some time past.

NEW BRUNSWICK.—F. M. & W. W. Oliver, butchers, are reported to have assigned to K. T. B. Spader. Liabilities $10,000; assets $4,000.

PATERSON.—Frank S. Genung, merchant tailor, is in the hands of the sheriff on confessed judgments for $3,341.

NEW YORK.

BROOKLYN.—William Borling assigned on the 13th inst. to Henry A. Phillips, giving preferences for $1,500.

BUFFALO.—Elmore Welsh, lumber, has assigned to Fred. Greiner.

GOWANDA.—James Kavanaugh, shoes, transferred stock to his wife, and a portion has been seized by the sheriff at the instance of creditors.

ILION.—H. W. Martin, jeweler, was seized by the sheriff on judgments for $2,000.

JAMESTOWN.—F. W. Cheney, grocer, has assigned.

MIDDLETOWN.—Babcock & Watrous, hat manufacturers, have assigned to S. R. Hawley, of New York. Robert Lewis, a special partner for $10,000, retired from the firm in December last.

NEW YORK CITY.—Walter P. Beers, wholesale hatters' trimmings, assigned on the 12th inst. to Walter H. Graef, giving preferences to Isaac L. Tice $1,600; Farnum & Graef $2,156; A. L. Sorria $144; total $3,900.

NEW YORK CITY.—Crowder & McGarvey, manufacturers of furs, assigned on the 12th inst. to George A. Hettrick. They started May 1, 1881, claiming a cash capital of $7,000.

NEWYORK CITY.—Statement of R. & C. Degener, shipping and commission, shows assets due them in Ecuador $658,020; surplus proceeds of merchandise pledged $246,476; total $904,496; liabilities $647,671; stock $132,000; total $779,671; surplus $124,825. They owe $60,000 for merchandise, less $20,000 secured; $74,000 is the amount of indebtedness for acceptances, some of which will probably be retired by the drawers. The balance of their indebtedness is for paper sold and for loans made upon merchandise they hold consigned to them. Their receivabies are in the shape of accounts due them in South America, Hayti, Mexico and Central America. They propose to organize the business into a limited company, under the style of R. & C. Degener (Limited), with $250,000 capital stock, and are desirous of managing it under the supervision of a representative of the creditors and the trustees of the company.

NEW YORK CITY.—Goldstein Brothers, retail clothing, assigned on the 7th inst. to Marcus Kronfeld, giving preferences for $6,934. They began March 1, 1882, claiming $12,000 capital.

NEW YORK CITY.—The schedules of Ives, Beecher & Co., wholesale whiskies, show direct liabilities $440,823; contingent $115,468; total $556,291. There are also individual debts of J. S. Beecher $81,244. The actual assets consist of pledged merchandise $81,244; merchandise in hands of assignee $94,395; book accounts and receivables $55,125; real estate and equity $39,050; cash 3,155; total $272,971. Deducting the pledged merchandise the net assets are $191,726. The greatest depreciation was on merchandise, the nominal value of which was $221,715; actual value $94,395. The contingent liabilities are on customers' notes discounted, the banks holding the notes. The firm say they are waiting to see what disposition will be made with Mr. Beecher's individual interest in the J. M. Atherton Company before making a formal offer to compromise.

NEW YORK CITY.—A. K. Leon & Brother, wholesale linens, assigned on the 12th inst. to Samuel Friedberger, giving preferences to Henry Newman $6,502; Henry Brash $1,022; A. L. Grabfelder $1,465; Joseph Louchheim $500; Louchheim Brothers $360; Hugh M. Crossman $527; total $9,377.

NEW YORK CITY.—The schedules of Timothy Loughnan, dry goods, show liabilities $5,057; nominal assets $5,581; actual assets $2,322.

NEW YORK CITY.—Mannes Oppenheimer, butcher, assigned on the 10th inst. to Elias Neumann, giving preferences to Matthew Kain $1,050; Elias Neumann $700; W. Blumenthal & Son $900; total $2,650.

NEW YORK CITY.—George Palen & Co., leather and hides, assigned on the 9th inst. to Justus L. Buckley, without preference. The firm did a largely extended business which required the floating of a large amount of paper. As long as money was easy things went on smoothly, but after the recent failures in the "Swamp" they could find no market for their paper, and as most of their capital was invested in real estate, tanneries, etc., they were unable to obtain ready cash to meet their obligations, and the assignment was the result. The liabilities are about $450,000, mainly in notes, and the attorney of the firm thinks the assets ought to pay 75 cents. The assets comprise the large tannery at Limestone, N. Y., and other tanneries in Cattaraugus county, hides and accounts. The firm has been established many years; the founder, George Palen, died in October, 1876, his son taking his place. The following month a new firm was formed in which J. B. Hoyt & Co. put in $150,000 special capital, and Mrs. Jane Palen $50,000 special, the general partners, George Palen and A. L. Knight, contributing $50,000 each. This copartnership was renewed from December 31, 1881, for five years.

NEW YORK CITY.—The schedules of James F. Pendergast, ship broker, show liabilities $66,846; actual assets $43,500.

NEW YORK CITY.—The schedules of Adolph Scheibel, manufacturer of neckwear, show liabilities $8,389; nominal assets $5,801; actual assets $3,714.

NEW YORK CITY.—A. Seelig & Son, manufacturers of boys' clothing, assigned on the 7th inst. to Louis Levy. Judgments for $4,664 had previously been entered against them, and an attachment was placed on their property. The liabilities are about $12,000, and it is thought that they cannot pay as much as 40 cents.

NEW YORK CITY.—Seymour & Pell, wholesale provisions, assigned on the 13th inst. to Henry C. Henderson, giving a preference to Samuel Pell, $7,307.

NEW YORK CITY.—Isaac Sippili, dry goods agent, has been arrested and released on $22,000 bail in a civil suit brought by H. B. Claflin & Co. to recover $19,925 which they loaned him shortly before his failure, as they allege, on representations that he was worth $150,000 over and above all his debts.

NEW YORK CITY.—Adam Strauss, gents' furnishing goods, assigned on the 9th inst. to Simon Stern, giving eight preferences for $3,048. Liabilities $5,555; nominal assets $2,387; actual assets $2,249.

NEW YORK CITY.—The schedules of Whitson & Conkling, butter and eggs, show liabilities $4,378; nominal assets $2,616; actual assets $1,523.

NEW YORK CITY.—The committee of creditors of Wiley, Wickes & Wing, wholesale fruits, have recommended a compromise at 30 cents in indorsed notes, at three, five and eight months, a legal accounting against Mr. Wickes, and the appointment of two trustees to receive for the creditors any amount realized from the claim against him.

NEW YORK CITY.—Williston, Knight & Co., manufacturers and commission buttons, assigned on the 9th inst. to John M. Warewell, without preference. In a circular to their creditors the firm stated that their embarrassment was wholly due to speculations and financial irregularities of H. Williston Knight, lately a member of the firm, who was also treasurer of The Williston & Knight Company, of East Hampton, Mass. He used the notes and acceptances of the firm and company, without authority and unknown to the other partners, for his personal benefit, involving a probable actual loss of $75,000, and an expected loss of $20,000 to $30,000 upon claims partially secured. The irregularities date back a year, but were only recently discovered, after he had left the firm on February 15. He is said to have gone to Europe. He sold the paper through note brokers, and did it so adroitly that it did not appear on the books, and pocketed the proceeds, some of which he said he lost in speculation. The paper is all held by banks, as well as the regular paper of the firm. On January 9 he stated that the firm had invested $300,000, and his father was worth $50,000 more. The liabilities were less than accounts receivable, the machinery was placed at $44,000, and real estate $98,000, unencumbered. Now it appears that the liabilities of both firm and company are about $262,000, and the assets are not sufficient to pay in full. The house was regarded as one of the oldest and wealthiest in the button trade, having been established fifty years. The firm and company were practically identical, as the firm owned most of the stock of the company—$150,000. The suspension of the firm involved the suspension of the company, and Mr. Wardwell was appointed receiver of the company on the 10th inst. at the instance of Charles H. Knight, who alleged that the company was insolvent and owes $172,000. The failure also affects the Mill River Ivory Button Company, of Leeds, Mass.

NORTH PEMBROKE.—G. A. Eickford, general store, has assigned.

ROCHESTER.—Mary Garson, suspender manufacturer, has assigned.

SALAMANCA.—H. Lewis, cigar manufacturer, has assigned to Marcus Lewis.

NORTH CAROLINA.

RALEIGH.—L. L. Polk & Co., agricultural implements, have assigned. Liabilities $13,000: assets $5,000; preferences $11,000.

WALLACE.—J. L. Bradham, general store, has failed.

WALLACE.—J. Robert Quinn, general store, has failed.

WILMINGTON.—J. H. McGarity & Co., groceries and liquors, have assigned.

WILMINGTON.—A. S. Winstead, grocer, has assigned.

OHIO.

CADIZ.—John S. Graybill, clothing, has assigned to William Ramsey. Liabilities about $8,000; assets $4,000.

CLEVELAND.—C. H. Rodig, jeweler, offers 33 1-3 cents, which has been accepted by a majority of creditors.

COLUMBUS.—A. H. & G. A. Blood, Jr., wholesale fancy grocers, have assigned to Jonas M. McCune.

LA GRANGE.—The Brilliant Glass Company has failed, and Joseph Beatty, formerly treasurer, has been appointed receiver. The company was burnt out in February. It was incorporated in January, 1881, with a capital of $25,000, and bought the works of the Novelty Glass Company at sheriff's sale.

LANCASTER.—Farrington & Wildermuth, grocers, have been closed by the sheriff. They began February 1.

LIMA.—William Owen, dry goods, has been attached.

LOGAN.—B. C. Reber & Co., drugs, are in the hands of the sheriff on a claim for $1,100.

PORT WASHINGTON.—J. B. McFee, hardware, has assigned to H. H. Porter.

TOLEDO.—The schedules of C. H. Coy & Co, bankers, show liabilities $291,000, of which $46,000 is contingent as indorsers; $95,000 mortgages on real estate; $93,000 to deposit rs; $46,000 secured. The assets are placed at $123,000, consisting of real estate $98,000; discounted notes $25,000. It is thought the estate will not realize more than 25 cents.

OREGON.

PORTLAND.—D. D. Lavin & Co., saloon, have assigned.

PENNSYLVANIA.

ALLENTOWN.—Nathan Snyder, contractor, is reported to have failed.

BRADDOCKS.—M. J. Rodgers, feed, has been closed by the sheriff.

GETTYSBURG.—James Bigham, agricultural implements, is reported to have failed.

LANSFORD.—The Miners' Bank has suspended. It had a paid up capital of $25,000. John C. Rutter was president.

NEWTOWN SQUARE.—Isaac Haldeman, general store, has been sold out by the sheriff on executions for $5,675, mainly in favor of his wife and son.

OLYPHANT.—D. M. Voyle, general store, is reported to have assigned. Liabilities about $6,000; actual assets $3,000; secured claims $600.

PHILADELPHIA.—Joseph Boulter & Son, manufacturers of hosiery, have assigned to Joseph Hanson.

PHILADELPHIA.—Samuel S. Featherston, china and glassware, has been sold out by the sheriff. Judgments for $18,974 were recently entered against him.

PHILADELPHIA.—Thomas Holton, sewing machines, is advertised to be sold out by the sheriff on the 17th inst.

PHILADELPHIA.—John Magee & Son, shoes, are said to have obtained a compromise at 25 cents. The greater portion of their indebtedness was to one firm, to whom they gave notes of thirty and sixty days, but the other creditors have been paid cash, it is said.

PHILADELPHIA.—John B. Wood, dry goods, has been sold out by the sheriff. Unsecured creditors received nothing.

PHILADELPHIA.—Zane Brothers, manufacturers of straw hats, were advertised to be sold out by the sheriff on judgments for $4,000 in favor of their mother. They were recently burnt out, loss $4,500, insurance $3,000.

PUNXSUTAWNEY.—A. E. Burket, general store, has been closed by the sheriff on confessed judgment.

STROUDSBURG.—R. Quackenbush, dry goods, has been closed by the sheriff, on judgments for $9,000.

TAMAQUA.—The Greenwood Rolling Mill is reported to have failed. Liabilities about $30,000.

SOUTH CAROLINA.

ORANGEBURG.—P. G. Cannon, hardware, has assigned.

TENNESSEE.

CHAPEL HILL.—Morton & Thompson, general store, have been attached and are being sold out.

FEATHERSTON.—W. S. Littleton & Co., general store, have assigned.

LEBANON.—Harland & Sandy, blacksmiths, have suspended.

LEBANON.—T. J. Lea & Brother, grocers, have failed.

LEBANON.—Taylor & Fakes, manufacturers of boots and shoes, have failed.

LEBANON.—J. C. Trinum, grocer, is reported to have failed.

TEXAS.

ATLANTA.—W. H. Birdsong, general store, has been attached.

FORT WORTH.—J. J. Reeves, grocer, has been attached.

FORT WORTH.—E. C. Turk, dry goods, etc., has been attached.

GENT.—J. L. McCracken, general store, has been attached.

JACKSBORO.—P. Banta, saloon, has been attached.

JEFFERSON.—D. Turk, clothing, has been attached.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, APRIL 21, 1883.

NOTES OF THE WEEK.

The fire which occurred on Sunday last in the building occupied by the Bradstreet Company, on Broadway, originated in the basement of No. 57 Reade street, in premises occupied by other tenants, and extended to the lofts occupied by the Company's mechanical department, comprising the press-room, bindery, lithographic and stock rooms, etc., which were practically destroyed. The portion of the building used by the Company's Agency department suffered somewhat from water and smoke, but not a single report or record has been lost, not a document destroyed, nor has a pound of the type which makes up the Company's "Book of Reports" been disturbed. A slight temporary delay in serving the patrons of the Company was caused by the dampness which pervaded the building, but this has since been remedied. The damaged machinery belonging to the Company's mechanical department will be replaced at once. In the meantime arrangements have been made whereby any interruption or delay to the Company's publications has been, and will be, avoided.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country disclose a moderate, and on the whole evenly distributed, improvement in the condition of general trade. In the east collections are reported good. In the middle states, while a moderate improvement is reported, there are no striking features to record, and the movement lacks decided activity. In New York the late spring has retarded the opening of navigation, and the opening up of many important lines of trade has been delayed in consequence. The industrial situation in Pennsylvania has not materially changed during the week, but the continuance of seasonable weather has resulted in a slight increase in the volume of general business. The west has shared in the general improvement, though there, also, the movement has been moderate. Sales are, for the most part, on the basis of present consumption, and in the absence of speculation the markets rule steady. In the northwest the improvement has been somewhat retarded on account of the bad condition of the roads. In the south general trade is in the main satisfactory, considerable activity being noticeable in some lines.

The bull movement in the stock market appears to have come to an end, one set of professionals having, it is surmised, been successful in selling out to another set. Certainly it is not the outside public which has been caught this time, for though there has been some little buying of bonds this month the business done in stocks has been confined almost exclusively to the regular Wall street hands. It is very much like swapping jackknives in these days, and the complaint is general that there is no money to be made in the street. The market fluctuations wipe out to-day the profits of yesterday, and the trader who wins this week will lose next week. The arts of manipulation are now displayed in all their forms; but the general feeling is that unless a change for the better comes speedily there will soon be a change very much for the worse.

It is the opinion of some of the most conservative financial thinkers that the new gold certificates are the greatest danger which now threatens the stability of resumption. The debate in Congress indicates that there was a very imperfect appreciation of the character and effect of these certificates, and the manner in which they were at first treated by the Treasury Department showed that the dangers which are now feared were not then understood. The reports as to the amount of these certificates now being issued would seem to show that the Treasury has listened to the warning that has reached it from some quarters; that these certificates are not voluntarily issued by the department, as they were at first, against its own gold, and that they are only issued against deposits of gold, as under the law they must be. Secretary Folger, in 1881, had fears as to the effect of these certificates, which he did not appear to have later, when the law authorizing them was enacted. In 1881 he said: "Immediately preceding resumption the issue of certificates upon deposits of gold was discontinued. It was feared that parties might present legal-tender notes based upon a 40 per cent. reserve, obtain the gold therefor, and immediately deposit it for the certificates, for which, by law, the department was required to hold 100 per cent. Though often requested, the department has ever since refused to make any further issue of these certificates. By consent of the Comptroller of the Currency these certificates are allowed to form a part of the lawful reserve of national banks, much of which reserve is now in gold coin. Should the certificates be issued they would at once take the place of this coin, and the Treasury would hold the coin instead of the banks. In view of any possible demand for the redemption in coin of legal-tender notes the issue of these certificates is very objectionable."

But the certificates were issued, and the requirement of the law which extends the bank charters is that they must be issued whenever the holder of any gold coin shall deposit that coin and demand the certificates. The Treasury, immediately after this new law was passed, did not heed the warnings which Judge Folger himself gave in 1881, and issued the certificates on its own motion, without waiting to receive deposits. The Treasury authorities seemed not to take into consideration the fact that, by making these issues, they were depriving themselves of their accumulations of gold, and that it might be possible to reduce their accumulations by such a process to a point too low for the stability of resumption. The result was that the gold reserve was reduced from about $147,000,000 in November, 1881, to about $125,000,000 February 1, 1883. At that time the mischief begun to be apparent. No public order has been issued at the Treasury directing the Treasurer to discontinue the issue of the gold certificates except in the strictest accordance with the new law; but the policy of the department seems to have been changed, and, as the result of it, the gold stores of the Treasury have increased. No public record is kept of the amount of gold certificates issued.

The State Railroad Commission has submitted two reports regarding the expenditure of capital in the construction of elevated railroads in New York city. The majority report is signed by Messrs. Kernan and Rogers, and the other by Mr. O'Donnell. The former find the total cost of the roads to have been $22,683,253, against $30,646,659, as claimed by the railway companies. The capitalization is $47,318,000, made up as follows: Manhattan stock (nothing paid in) $13,000,000; New York Elevated stock $6,500,000; Metropolitan Elevated stock $6,500,000; New York Elevated funded debt $8,500,000; Metropolitan Elevated funded debt $12,818,000. From the total cost of construction, $30,646,659, as claimed by the companies, the commissioners deduct certain items "not pertaining to construction," together with the discount on bonds, amounting to a total of $5,313,670, leaving the cost proper, as stated, $22,683,253. The commissioners regard the $13,000,000 of Manhattan Railway stock as "nothing but water," and as not, therefore, entitled to be touched as "capital actually expended." The report concludes that such stock and bondholders as are innocent purchasers had a right to suppose they were protected by the law from having bonds or stock improperly issued or negotiated. While admitting that "10 per cent. on the capital stock actually paid in and expended was all the legislature intended to guarantee stockholders," the commissioners confess their inability to determine whether the reduction of fare on the elevated roads would produce less than 10 per cent. on the capital actually expended. From all the evidence in hand, however, the commissioners conclude that it would be unjust and in violation of the letter and spirit of the general railroad act to reduce the fare on the elevated railroads at the present time.

The situation in the old world is not all that could be hoped for by the friends of peace. The relations between France and China are becoming very much strained on account of the French difficulties with Annam. The French are apparently determined to enforce their demands, and Annam and China seem to be equally determined to resist them. Such appears to be the conclusion drawn by those best informed in the premises. In case of a war it is not improbable that China will receive material, though perhaps indirect, assistance from quarters where French aggressiveness is regarded with disfavor. It may be that a feeling of distrust at the colonial policy developed by France of late has had something to do with the much-talked-of triple alliance. What the temper of those in authority in Germany is as regards France may be gathered from a recent article in a German official organ, in which the writer says that if the monarchy should be restored in France it is not very likely that Germany would declare war against France forthwith, but that she would probably await an attack by France, which the writer affected to think would soon be made, as under certain conditions the restored monarchy could probably be induced to declare war on Germany without a warning. The extraordinary tone of the article sufficiently indicates that Germany's love for the republic is but a feeble security for France against attack from that quarter.

THE CURRENTS OF STOCK SPECULATION.

That the great movements of speculation in Wall street are based on the amount of wheat, corn and cotton harvested in each year is a fact which the majority of newspaper readers never recognize, and hear with incredulity when it is asserted. Such scepticism is natural, for the surface movements are all directed by the leading operators, and it is these alone which the average observer sees. It is only when we extend our view over a series of years, and compare the rise or fall of prices with the abundance or failure of the crops, that we see how closely speculation is allied to agriculture. That it is so allied may be shown by a logical formula, thus: the stocks dealt in on the Stock Exchange are almost wholly those of railroad companies; the price of a stock is approximately ascertained by the dividends it pays; the dividends are paid from the earnings, the earnings come from the traffic; and the traffic of all the great railroad systems of the country is the movement of agricultural products from the fields to the great centers of distribution, in the interior or on the coast, with the return movement of goods purchased from the proceeds of the sale of those products. This sounds like a string of truisms, yet while the truisms may be recognized their logical consequences are very generally overlooked.

Practical acquaintance with business in Wall street soon discovers to any one capable of discernment that the few real leaders there are men of exceptional stamp, very different from the mere gamblers they are often supposed to be. They, however, cannot control the great movements of speculation; the most they can do is to initiate, check or lead them. All the wealth of the Vanderbilts, the Goulds and the Keenes combined could not have turned the downward movement of prices from 1873 to 1877. Prices in that period showed all the surface irregularities they have ever shown; there were daily and weekly fluctuations which made or marred the fortunes of swarms of small venturers in the speculative arena; there were bear movements and bull movements arising from special circumstances, just as there were before and have been since; nevertheless, the main movement was steadily downward. The business done on the Exchange was gradually shrinking, the number of customers for the brokers was slowly diminishing, the rent of local real estate declining, the value of seats on the Exchange falling, until at last there was an utter stagnation in Wall street, which was almost depopulated. There was not so much business done in one day on the Exchange, in those dreary times, as is now done in less than one hour of an ordinarily busy day. The prices of securities were at the very lowest point, for railroad after railroad ceased to earn dividends or interest, and receiverships were the order of the day. There were non-dividend paying stocks which have since sold between 30 and 40, which were then quoted at 2 and 3, and then disappeared from the dealings altogether; while dividend-paying securities, which have since risen to 125 and 155, were then quoted from 75 to par. The panic of 1873 would not alone account for this long and severe depression. It was the series of disastrous crop years which followed it; when the impoverished south raised scanty crops of cotton, and the grasshopper devoured the wheat of the northern farmer. With wheat at $2 per bushel on the New York Produce Exchange, there was nothing left of surplus earnings for investment. The grasshopper was a burden in the land. In devouring the substance of the western farmer he eat up the income of the broker in Wall street.

From 1877 until 1881 the tide flowed the other way. As each year brought us larger and larger crops, prices rose, speculation revived, business increased, rents were raised, Wall street became active and populous again. Prices were on the rise, with the same fluctuations as when in the previous period they had gone down, yet the great movement of speculation went on until it culminated in a wild excess which would infallibly have reproduced the panic of 1873 had not the assassination of President Garfield given the nation a shock to its very center. That event changed the whole temper of the public. To reckless confidence succeeded in one moment gloom and distrust. The wild career of speculation was checked midway, and it was well it was so. For the enormous crops of the year 1880 had been followed by a partial failure of the wheat crop, and even when the pistol shot of the assassin startled the people a drouth was drying up the corn crop. They refused to see it; the immense crops of the previous three years seemed to have made them think that prosperity, each year increasing, was assured for ever. Startled by the assassination, people opened their eyes and saw. The winter wheat crop a partial failure; the corn crop a total failure, and the spring wheat crop also short; while the previous winter had been one of almost unprecedented length and severity, most destructive to railroad property—these were the events of the year 1881. From July of that year to July of last year prices on the Stock Exchange moved downward, though the wealth and genius of Mr. Gould and Mr. Vanderbilt, with their numerous following, were united in one prolonged effort to stem the decline. The winter and the drouth were stronger than all of them together, nor would it have been different had every operator in Wall street allied himself with them. It was not until last July, when the assurance of an immense wheat crop had given fresh confidence to the country, that Wall street again saw a rise in the price of stocks, supported by free buying by the great outside public. There has been very little money made by anybody in Wall street since that movement exhausted itself, which it did in about two months.

OPENING OF THE SPRING CHEESE TRADE.

The recent report from the Produce Exchange of stocks of cheese in this city April 1 make such a showing as has not been seen here at this time of the season for a number of years past. The stock, being less than half that of last year, and 13 per cent. less than the year before, has created a remarkably strong market, which has been equaled but twice since 1875. In April, 1877, cheese opened at 15½c. and closed at 14½c., and in April, 1880, it opened at 14¼c. and closed at 15c. Both of these were years when the winter receipts were unusually light, and in 1880 they continued light all through the month. That has been the case this year to a certain extent, although the receipts have been heavier than in 1880, but both the export and home trade have also been larger in proportion, and have absorbed the receipts more fully. The result is that cheese is going out higher than it opened at the beginning of the month, everything in the shape of fine old stock being held firmly by the few dealers who control it. At the end of the month the 43,475 boxes reported April 1 will probably have dwindled to 30,000, a really insignificant amount when we realize how small a proportion of it consists of first-class, full-milk stock.

Another element which contributes to render the cheese market strong is the late make of new cheese this spring. The western part of the state was not snowed under so completely as the central portion, and factories were there able to commence operations even a little earlier than last year. But all through central and northern New York the snowfall was tremendous, making the roads almost impassable by ordinary teams, and quite so for wagons loaded with milk-cans. Even yet the traveling is difficult and precarious, so much so that factories are not receiving more than half or three-quarters their proper quota of milk. It also created a delay of ten days to two weeks in their openings, and the deliveries of cheese must be fully that much later than last season. Had the prices of butter been as favorable as they were last year much of the early milk would have been made into dairy butter; but the low price of that article has caused the farmers to feed the milk to their calves and pigs, believing that they could realize more out of it in that way than any other. The influx of new cheese upon the market will be light for some time to come, and the make of "hay cheese" will be considerably more limited than usual. This will prove advantageous all around, and give opportunity to work out the entire stock of old cheese before the fresh grass-fed article arrives in market.

These facts furnish a certain basis for imagining what the course of prices may possibly be this season. With the continued dullness of the export trade, if the market depends upon that as it has done in former years, there would be a sharp and decided decline as soon as stocks began to appear in any quantity. But, fortunately, we are not so dependent upon England as we used to be. Our own people are acquiring a healthy liking for cheese, and are demanding, in many cases, that it shall be of the best. And, as has always been the case with butter, they are willing to pay rather more for it than their competitors across the water. The best and most successful cheese trade in this city at the present time is that which caters to the home trade. This business is on the increase, and more firms will pay attention to it this season than ever before. The light make, increased home demand, and thorough cleaning up of old stocks, will therefore make good prices for new cheese until it begins to appear in considerable quantities. Should the exports keep up fairly well the position would be still stronger. Of course there will be the usual decline in the latter part of May and June, and the amount of that decline, together with the subsequent range of prices, will be determined mainly by the quantity of cheese produced. We do not look for a much larger production than appeared last year, and, if that should be the case, there is no reason to believe that cheese will fall below 9@10c. In fact, we look for a prosperous season among the cheese factories, and have but one word of caution to utter to the factory men. That is, that they be exceedingly careful in their processes, and turn out the finest product they have ever made. This will gain them more credit with exporters, which is a point now to be sought after.

STRENGTH OF THE UNITED STATES TREASURY.

The United States Treasury is generally stronger than it seems to be. The reserve of the Treasury is not a specific aggregate, or a certain percentage. It is not fixed by law. According to the usage, theoretically, it should be 40 per cent. of the amount of United States notes outstanding. The purpose of keeping any reserve is to redeem legal tender notes, and the experience of bankers is that 40 per cent. is a safe amount against all liabilities. The 40 per cent. average amount of legal tenders outstanding is about $138,000,000, and, in round numbers, $140,000,000 has come to be considered as the sum which a conservative Secretary of the Treasury will keep in his reserve; but there is no legal requirement fixing any sum. The reserve, as a matter of fact, is a fiction of bookkeeping. According to a strict analysis of the condition of the Treasury to-day the reserve may be regarded as 39 per cent. over liabilities to United States notes outstanding, or as 52 per cent. to all demand liabilities, including United States notes, and excluding certificates. The duplicated estimate was made by the Treasurer of the United States himself in the last annual report. The statement of the reserve on the first of last November, when the books were closed preparatory to making the report to Congress, was as follows:

ASSETS.	
Gold coin	$108,888,963.44
Gold bullion	50,916,780.10
Standard silver dollars	92,414,977.00
Fractional silver coin	26,749,432.45
Silver bullion	4,012,503.27
Deposits with national bank depositaries	8,738,523.16
United States notes	29,689,196.17
National bank notes	6,370,051.58
Total assets	$327,780,427.17
LIABILITIES.	
Old debt	$792,012.27
Called bonds, matured and interest	9,661,510.16
Matured bonds and interest	786,524.00
Interest due and not paid	5,255,170.24
Gold certificates outstanding	11,370,270.00
Silver certificates outstanding	65,620,450.00
Certificates of deposit (act of June 8, 1872) outstanding	9,835,000.00
Disbursing officers' balances and various small accounts	24,208,117.05
Outstanding drafts and checks	5,635,232.31
Five per cent. fund for redemption of national bank notes	14,471,298.01
Fund for redemption of notes of national banks failed, in liquidation, and reducing circulation	38,169,253.10
Post office department account	6,823,901.04
Total liabilities	$192,628,738.18
Reserve, excess of assets	$135,151,688.99

This is, substantially, the condition of the Treasury to-day, with the exception that the excess of assets is larger, being, in round numbers, about $139,000,000. This increase brings the reserve up to about the traditional 40 per cent., while, at the time the report of the Secretary of the Treasury was sent to Congress, the reserve was nearly $4,000,000 below this 40 per cent. The reduction below the 40 per cent. reserve at that time was due to the fact that the Secretary of the Treasury had anticipated the payment of called bonds to the amount of $12,063,714.

In this statement of liabilities there are three items against which special laws require that a reserve of 100 per cent. shall be held. These items are outstanding gold certificates, silver certificates, and certificates of deposit. There is no law as to the amount of reserve that shall be held against any of the other items in this list of liabilities, but the 40 per cent. reserve is the usage of the Department.

This list of liabilities does not appear in the monthly debt statement. It is crossed off as so much money set apart for the

specific uses mentioned—as a trust fund—and, whatever credit appears upon the debt statement to the Treasurer, is the excess of assets each month, after all these liabilities have been deducted.

An analysis of this table of liabilities will show that, as we have said above, the Treasury is generally stronger than it seems to be. Some of these items of liabilities are fictions of the peculiar Treasury method of accounting. Some are items against which 100 per cent. is kept, although belonging in the class against which it is considered that only 40 per cent. is necessary. Several of the items are constant quantities which remain every year at about the same amount. The "old debt" rarely varies, and it is expected that a very considerable portion of it will never be presented for redemption.

The items of "called bonds matured and interest," "matured bonds and interest," and "interest due and not paid," are pretty nearly constant quantities. The Treasury keeps a reserve of 100 per cent. always against these, although it is doubtful whether many banks, however conservative, would keep such a percentage of reserve against constant quantities. The same general statement is true as to the "outstanding drafts and checks," "five per cent. fund for redemption of national bank notes" and "fund for redemption of notes of national banks failed, in liquidation and reducing circulation." These are substantially constant quantities.

A curious question has frequently arisen as to the item of "fund for redemption of notes of national banks failed, in liquidation and reducing circulation." The query is, whether the Treasury has made use of this trust fund, and if so, whether it has had any right to do so. The question is not a practical one. This sum of $38,000,000 is not kept distinct as a separate deposit. There are no marks upon it in the Treasury to establish its identity. But so long as there is an excess of assets, and this "fund for the redemption of notes of national banks failed," etc., is accounted for as a liability of the Treasury, against which 100 per cent. is retained, the money is in the Treasury, and is ready for the redemption of the liquidating notes whenever they may be presented.

There are two items in this account, aggregating about $31,000,000, classed as liabilities, which are so classed as a mere matter of bookkeeping, and which are not properly a liability against which in ordinary business 100 per cent. would be retained. These items are "disbursing officers' balances" and the "Post Office Department account." The Treasury owes the disbursing officers of the government nothing. This money is no more a liability than is any other outstanding obligation which has not matured. For the convenience of accounting, advances are made to the disbursing officers, and these advances are set apart as a liability. The government is under no necessity of making any advances to disbursing officers. This is oftentimes a doubtful convenience. The payments could as well be made by disbursing officers' warrants upon the Treasury. There is no more reason why 100 per cent., for instance, should be kept against these advances than against any other unmatured obligations of the government. The item of $6,000,000 with which the Post Office Department is credited is also an advance for a supposed convenience of accounting. It has been proposed at times to treat the Post Office accounts as any other receipts and expenditures are treated. By this method of accounting the Treasury keeps a reserve of 100 per cent. for so large an amount as $6,000,000 against itself. It is certainly a very conservative method of financiering when a government finds it necessary to keep a reserve of 100 per cent. against itself.

It will be seen, therefore, that this statement of liabilities is a very liberal one, and that the so-called reserve, or excess of assets, always represents the Treasury to be in a much sounder condition than banks generally are. The reserve in the Treasury, which is technically the amount held for redemption of United States notes, is seldom below the traditional 40 per cent., while, as has been seen, against a very considerable part of the liabilities 100 per cent. is held. Of course it is not to be forgotten that the United States notes are themselves a liability, but it appears from this statement that if all of the liabilities of the government payable on demand should be at once discharged there would still remain about 40 per cent. cash to meet any demand for the redemption of these notes.

The following statement shows the percentage of reserve, if sufficient funds were set aside for the payment in full of the gold, silver and currency certificates, and the remainder of the cash were considered as a pro rata reserve against all liabilities of the government. This statement was prepared by the Treasurer of the United States to illustrate the peculiar character of the Treasury reserve. It covers a period of twelve months and also an average of forty-seven months:

	*Present reserve.**	*Percentage of cash.†*
1881.		
November	40.6	53.5
December	42.2	54.6
1882.		
January	39.3	52.8
February	40.3	53.1
March	43 8	55.9
April	42.1	54.7
May	40.7	53.4
June	39.8	54.1
July	34 2	51.5
August	34 7	52.1
September	39 9	54.5
October	37.2	53.0
November	39.0	53.3
Average for forty-seven months	39.0	52.1

* Percentage of excess of assets over liabilities to United States notes outstanding.

† Less coin and currency certificates to demand liabilities, including United States notes and excluding certificates.

THE FOREIGN TRADE MOVEMENT.

The regular detailed monthly statement of exports and imports for February has been published, and affords a better opportunity to learn the changes in the commercial current between the United States and other countries than could be gathered from the preliminary report previously issued by the Bureau of Statistics. A summary of the totals of imports and exports is as follows:

	February	
Imports.	1883.	1882.
Total free of duty	$16,535,727	$16,047,407
Total dutiable	39,765,770	42,779,519
Total coin and bullion	1,277,087	1,099,471
Total imports	$57,578,584	$59,926,397
Exports.		
Domestic merchandise	$65,460,734	$54,929,269
Foreign merchandise	1,394,505	1,667,264
Coin and bullion	2,169,909	8,783,522
Total exports	$69,025,148	$65,380,055

Strange as it may appear, our importations of articles which may be entered free of duty show an increase as compared with February, 1882, amounting to nearly $500,000, although about $800,000 less in value than like importations in January, 1883. Thus, while the imports of duty-free articles increased from $15,374,392 in January, 1882, to $16,047,407 in February of that year, in 1883 the February importations of duty-free articles declined in value from $17,313,688 in January to $16,535,727. The imports of dutiable merchandise in February, while over $3,000,000 less than in February, 1882, were exactly $140,059 in excess of the importations of dutiable merchandise in January last, thus exhibiting a remarkable steadiness. The foreign merchandise trade statement for January and February last, then, as compared with the like months in 1882, is as follows:

Imports.	1883. *January*	1883. *February.*	*Totals two months.*
Total free	$17,313,688	$16,535,727	$33,849,415
Total dutiable	39,025,711	39,765,770	79,391,481
Total two months 1883			$113,250,896
	1882.	1882.	
Total free	$15,374,392	$16,047,407	$31,421,799
Total dutiable	41,581,832	42,779,519	84,361,351
Total two months 1882			$115,783,150

Our total merchandise importations during two months of 1883 have thus decreased but $2,532,254, as compared with like receipts during January and February in 1882. But it is entirely due to the decline in receipt of dutiable merchandise, as our importations of duty-free articles have actually increased under the "conservative rate of consumption" enforced by the depressed state of home trade and industries. While the gain in two months' receipts of free merchandise amounts (as shown in above table) to $2,427,616, the decline in importations of taxed articles is from $84,361,351 in January and February, 1882, to $79,391,481, in the like months this year, or $4,969,870.

The total merchandise exports during February last were valued at $66,855,239, against $56,696,533 in February in 1882, a gain of $10,158,706. The total merchandise exports in January and February last, as compared with the like months in 1882, were as follows:

Exports.	1883. *January.*	1883. *February.*	*Totals two months.*
Total, domestic	$78,748,318	$65,460,734	$144,209,052
Total, foreign	1,488,975	1,394,505	2,883,480
Total exports, two months			$147,092,532
	1882.	1882.	
Total domestic	$63,546,254	$54,929,269	$118,475,523
Total foreign	1,374,794	1,677,264	3,052,068
Total exports, two months			$121,527,591

While the value of domestic exports dropped from $78,748,318 in January last to $65,460,734 in February, a like, but not so great decline is noticed in the total value of domestic merchandise exported in February, 1882, as compared with January in that year. The general movement of cereals and cotton, however, raised, and held the total values of exports considerably above those of the opening months of 1882; and the excess of the total domestic and foreign exports in January and February, 1883, over those months in 1882 is, therefore, $25,564,941. Thus far in April there has been no special improvement in the export movement, and the importations have remained about as during March.

AN OFFICIAL VIEW OF THE IRON TRADE SITUATION.

From advance sheets of the Annual Report of the Secretary of the American Iron and Steel Association (now in press) we gather an interesting account of the causes which have conspired during the past year to produce the existing depression in the iron and steel industries. There are several reasons why this report possesses special interest. One is that it represents the view taken by the American Iron and Steel Association itself, comprising among its members those whose opportunities for observing the situation and forming correct conclusions are unexcelled. A second reason will be found in the comprehensive tables of comparative data respecting production, importation, exportation and consumption of iron and steel, extending, as they do, over a series of years. A third is found in the peculiar but characteristic view taken of the effect on home industries of the decline in the excess of total exports over imports in 1882 as compared with 1881, not to mention the criticism made of the Tariff Commission and the last Republican Congress.

The extraordinary activity in our iron and steel industries, which began in 1879, culminated in 1882, and the decline began to make itself generally felt in May last year. The reaction was not marked at that time, and many manufacturers whose books were well filled with orders did not begin to appreciate the downward movement until in the month named. About that time the workingmen in the rolling-mills of Pittsburgh and the west, "harrassed by the high prices of breadstuffs and provisions, unwisely insisted on an advance in wages." This was resisted, and the long strike followed. The stoppage of production failed to increase the price of rolled iron. The demand for pig iron was necessarily curtailed, and the price of that variety likewise declined. Even after the resumption of work at the mills, rolled iron continued to be depressed to the end of the year, largely on account of the tariff agitation. The months of January and February saw this situation continued, owing to the uncertainty of tariff legislation at Washington. Steel rails were the first of all iron and steel products to weaken, and in November and December, 1882, were greatly depressed. The price of steel rails dropped from $60 per ton in December, 1881, to $39 last December.

Most of the causes of this have frequently been mentioned heretofore. Overproduction, consequent upon the business and speculative boom in the three years preceding 1882, was the leading one. An outcome of this was the shrinkage in the demand for railway materials. The requirements for consumption had not grown as rapidly as the means for production. The poor harvests in 1881 added to the depression by increasing the price of food and provisions. It is added that some leading influences which unfavorably affected the iron and steel industries still remain. These are noted in the interruption to railway extension and continued overproduction in some lines. Since the adjournment of Congress, however, it is noticed that consumption is more active. This is due in part to the spring movement of merchandise and cereal products. Competition continues sharp and prices low, from which the consolation is drawn that consumption may be stimulated thereby, as the iron and steel markets favor buyers rather than sellers. It is further stated that "it seems absolutely certain that prices must for some time to come rule extremely low." A further good is believed probable in that new rolling-mills, blast-furnaces and steel works, "which are not needed," will not under the existing situation be erected. But "it is greatly to be regretted that this also brings the necessity for lower wages with no compensating benefits." Mr. Swank, the secretary of the association, writes that "it is not true, as a certain class of political economists persistently teach, that when wages are reduced other things are correspondingly reduced in price; but even if this were so low wages and low prices always suggest hard times." He does not, therefore, regard it as a propitious sign that prices of iron and steel are now so low as they are. Coming as this statement does, at a time when the iron-mill owners are reported and believed to have declared that a lower rate of wages will be paid and must be accepted or the mills will be shut down, it bears a peculiar significance.

While correcting "a certain class of political economists," as noted above, the report states that while we exported less in 1882 we increased our importations, "thus seriously curtailing our favorable trade balance with foreign countries, and consequently making money difficult to obtain for home enterprises." It may well be doubted whether all the leading members of the iron and steel trade are willing to indorse this view. The report explains by saying that "in 1881 our exports of merchandise exceeded our imports $163,339,679, but in 1882 the excess was only $15,138,439." This, it is added, could have no other effect than to interfere seriously with the prosperity of the iron and steel and many other industries. While the last remark does not call for comment, the stringency of the money market, owing to the decline in the export and increase of the import trade, has a strange sound when it is recalled that the importations of England have long been in excess of her exports, and that rates for loans are lower and capital for investment is more plenty there than elsewhere. On the whole, the official review has little sympathy with Republican action on tariff questions in the last session of Congress. This is not expressed harshly, but is none the less apparent. The action of Congress is said to justify the anxiety with which "the public" regarded the future of tariff legislation. "Historical accuracy" requires the writer of the report "to add that this reduction was recommended by a tariff commission which was mainly composed of Republicans," and that "it was accomplished by a Republican Congress." While there has been no special improvement in the iron and steel industrial situation, therefore, it is drawn from the report as a whole that the flow of the industrial current seaward

is approximating the limit. There are at least signs of an ebb which justify encouragement on the part of the public, even if they do not permit manufacturers to see the possibility in the near future of enjoying as liberal profits as they have been favored with in the past.

The report itself states that there has been a large decrease in the production of iron rails in 1882 over 1881, and a small decrease in the production of open hearth steel rails and crucible steel ingots; in all other articles there was an increase in 1882 over 1881; with the single exception of pig iron, however, the increase was in no instance large, and even in pig iron only 11 per cent. The iron and steel imports in 1882 made a total of 1,335,371 tons. The value of our iron and steel exports that year was $19,029,759. Our pig iron production in 1882 was obtained in twenty-six states and Utah territory, and of a total of 5,178,122 tons.

FISH CULTURE IN THE UNITED STATES.

The vast area of the United States of America is every year being more and more cultivated. Its food means are increasing in an astonishing manner, and perhaps none more than those of the most healthy animal food we have, namely, fish. There is no doubt that this would not be the case if nothing were done to promote the cultivation and propagation of fish, for the sea-water fish would be exhausted in special neighborhoods of fishing grounds, and the fresh-water fish would be lost by the deteriorating influence of river pollution. The more manufacturing establishments, in using up water and polluting the rivers with chemical refuse, interfere with the increase of fish, the more it will be necessary to stock other rivers and replace the supply that has been lost.

In this matter, that is, in the propagation of fish, the United States stands at the head of the nations of the world, it being due mostly to the earnest endeavors of a limited number of men, who have so strongly represented their cause to the governmental powers of the country that they have obtained the support of the general government in every state of the Union. Fish commissions are established in every state, and stations for the propagation of fish are increasing in number yearly.

It was on February 9, 1871, that Congress passed a joint resolution which authorized the appointment of a Commissioner of Fish and Fisheries. The duties of the commissioner were thus defined: "To prosecute investigations on the subject of the diminution of valuable fishes, with the view of ascertaining whether any and what diminution in the number of the food fishes of the coast and the lakes of the United States has taken place; and if so, to what causes the same is due; and also, whether any and what protective, prohibitory or precautionary measures should be adopted in the premises, and to report upon the same to Congress."

This same resolution of Congress twelve years ago has had immense results, and the work done under it has raised the United States in the matter of the management of fisheries to the leadership among civilized nations. The work of the commission is principally directed toward the following objects: 1. The systematic investigation of the waters of the United States, and the biological and physical problems which they present. 2. The investigation of the methods of fisheries, management, past and present, and the statistics of production and commerce of fishery products. 3. The introduction and multiplication of useful food-fishes throughout the country, especially in waters under the jurisdiction of the general government, or those common to several states, none of which might feel willing to make expenditures for the benefit of the others.

This work was first undertaken at the instance of the American Fish Cultural Association, and a special appropriation was made by Congress for the purpose. This appropriation has been increased annually, and the propagation of fish forms at present the most extensive work of the commission. In 1880 a vessel was completed for the use of the Fish Commission called the Fish-Hawk. This vessel is of 484 tons burden, and provided with all the necessary conveniences for investigation, and forms a floating hatching establishment. Among the hatching stations, those for shad, first in Albemarle sound, N. C., and then on the Potomac river, in the vicinity of Fort Washington, and one at Havre de Grace, Md., were the most useful. For the salmonidae the McCloud river station was established for the cultivation of California salmon. From here eggs were distributed not only over all the states, but also in several European countries. The station on the Penobscot river furnished Penobscot salmon, and the principal rivers of the northern and eastern states were furnished with them. The station on Grand Lake stream produced a very large gathering of the eggs of the land-locked salmon.

A station for whitefish was made at Northville, Mich., and the lakes were plentifully supplied with the eggs. These were the principal stations up to 1880; those established later are also becoming of great consequence.

A most important introduction of food-fish is that of the German carp, which will in a few years have wonderful results. The carp may be called the "farmer's fish," as it can be well bred in farm ponds, and when of a certain age and weight forms as nutritive a food as can be desired. It multiplies easily on the American continent, as well in rivers as in lakes and ponds, and will doubtless become a very valuable food, especially for those who are remote from localities where sea-fish are readily obtained.

An interesting sign of the importance which fish is beginning to assume in the food supply of the world is the exhibition to be held this year in London. America will be very well represented at this exhibition, and Congress, proud of the success obtained in Berlin two years ago, voted $50,000 for expenses. This money will doubtless bring to the country a large increase of trade.

OCCASIONAL NOTES.

According to the annual report of the State Engineer there are 324 steam railway corporations in the state of New York, of which only 260 have made reports. The total number of miles in operation in the state is 6,641. On September 30, 1882, there were 628 miles of railroad completed, but not in operation. The number of locomotives in use in the state is 3,541. There are in use 2,297 first-class passenger cars, 552 second-class and emigrant cars, 876 baggage, mail and express cars, and 140,240 freight cars. The total capital stock reported is $623,772,211; proportion for this state $397,386,453; total funded debt $447,531,783; proportion for this state $285,108,996; total refunded debt $34,254,252; proportion for this state $21,822,327; total capital stock and indebtedness $1,105,558,248; proportion for this state $704,317,776. The total cost of roads in operation is $702,868,948, of which $464,105,946 is the proportion for this state. The total receipts from all sources were $118,766,939; proportion for this state $78,421,989. The total expenditures were $117,462,593; proportion for this state $73,233,357. Forty-seven persons were killed and 124 injured during the year. The elevated railways make returns as follows: Receipts from all sources $5,973,633; total expenditures $5,657,801; number of passengers transported $86,361,029. The average amount received per passenger was 6.86c., and the average cost of transportation per passenger 4.25c. Five passengers and 12 employés were killed, and 55 passengers and 79 employés injured.

The use of commercial fertilizers is on the increase. According to a recent report the total number of tons of these fertilizers sold in South Carolina alone for the five months commencing the first of November last aggregated 92,143 tons, against 88,449 tons for a like period during the previous year, an increase of nearly 4,000 tons. Much the greater part of this aggregate was manufactured in South Carolina. The increase in the total sales was derived solely from Charleston manufactures. Manufactories of fertilizers are springing up all over the south, and although the industry is one of very recent date the product of the establishments is estimated at more than 500,000 tons per annum. A Nashville paper recommends the increased use of fertilizers in Tennessee, reminding farmers of the fact that crops cannot be grown year after year without decreasing the productive powers of the soil. A late report of the Canadian Department of Agriculture states that the industry developed of late years in connection with phosphate of lime is gradually on the increase, particularly in the Ottawa district. The exports during the last fiscal year amounted to 17,181 tons, valued at $327,667, as against 15,601 tons, valued at $239,493, in the previous year. The increased demand for mineral phosphates, which enter largely into the manufacture of fertilizers, is one result of the decline in quality and quantity of Peruvian guano.

In the current number of the *North American Review*, Senator Morgan reviews briefly the history of Mexico since the beginning of its struggle for independence in the early part of the century, and points out the parallel which exists between the history of the sister republic and that of the United States, and the grounds of common interest which should render our intercourse with our neighbor free and friendly. He remarks upon the wealth of commercial resources possessed by both countries, and the intimate relations into which they are now being brought by their railway systems, and says that the new course of development upon which both countries are setting out may be much facilitated by wise treaties and conventions. Our existing policy, he says, has left the frontiers open to raiders, smugglers and depredators. Senator Morgan's article is sensible, but appears not to be based upon any special study of the trade relations of the two countries. Professor Alexander Winchell endeavors to show that communism is gaining a firm foothold in the United States, and that it threatens to introduce chaos into the social fabric. The communistic sentiment is as yet, he says, without system or unity, but evidences of the spread of the spirit are to be found in the growing hostility toward moneyed corporations, in the frequent resort to strikes, in the trades union and granger movements, and in other similar tendencies. He believes that the communistic tendency is fostered by our fundamental political maxim, and that it must naturally be progressive "until probably some great changes are made in the basis of political power." Notwithstanding this, however, he thinks that it is the duty of American citizens and statesmen to remove as far as practicable all real grounds for communistic aspirations. Some of Professor Winchell's notions do not seem so far removed from the ideas the growth of which he deprecates. For instance, he says that "in this living and momentous question of peace and coöperation between capital and labor, it is imperatively demanded of statesmanship to inquire whether there are not some equitable and needed limitations to be imposed on the acquisition and use of wealth." And again: "May not the unlimited accumulation of wealth be one of those personal liberties which the state finds it necessary to restrain. If the forcible seizure of the common domain and the common goods is at variance with the public weal, how much less so are the acquisition and cumulation of the common goods through the weight of momentum and vast wealth?" Among the other articles of general interest are one on "Woman as an Inventor," by Matilda Joslyn Gage; one on "College Endowments," by Rossiter Johnson, and one on "Extradition," by A. G. Sedgwick.
